

IN FULL CIRCLE

Hayleys PLC | Annual Report 2025/26

IN FULL CIRCLE

Progress unfolds in cycles, each turn broadening perspective and connecting experience, ambition, and opportunity into an ever-expanding orbit of growth. At Hayleys PLC, this cycle is reflected in the way our businesses operate across industries and markets, forming a continuum that carries Sri Lanka's strengths and innovation to the world.

At this stage, as we reset, refine, and realign for long-term sustainability, our trajectory expands further, with strategic investments reinforcing our sphere of value.

This is Hayleys' continuum of impact, where what we have given returns in full circle; grounded in resilience, advancing with purpose, and creating meaningful impact across industries, communities, and global markets. In doing so, we give back to the economy and people that first placed their trust in us and continue a journey where growth and responsibility advance together.

Fiddlehead ferns embody the circle's enduring symbolism in nature, from the careful unfurling of each leaf to the repeating life cycles that sustain entire ecosystems. Just as a mature fern can produce hundreds of new fronds in a single season, it exemplifies how value, once created, radiates outward, returns, and strengthens what came before. The fern becomes a bold visual metaphor for Hayleys PLC, illustrating value thoughtfully generated, meaningfully returned, and perpetually evolving in a continuous, self-reinforcing cycle.

More than **75%** of the world's flowering plant species rely on animal **pollinators**, such as bees, birds, bats, and other insects for reproduction. These pollinators help maintain biodiversity and support food webs and agricultural production.

More than **80%** of terrestrial plant species respond to **seasonal cues** such as daylight and temperature to regulate growth, flowering, dormancy, and reproduction, helping sustain ecosystem productivity and biodiversity.

Earth's average distance from the Sun is about **149.6 million kilometres**, placing it within the habitable zone where liquid water can exist. Its nearly circular **orbit** helps provide relatively stable solar energy throughout the year, while Earth's axial tilt produces the seasons. Together, these factors contribute to climate patterns that support water cycles, ecosystems, and the long-term evolution of life.

The **water cycle** redistributes heat around the planet and sustains clouds, rivers, aquifers, and oceans. Each year, approximately **577,000 km³** of water evaporates into the atmosphere globally, with the majority originating from the oceans.

The World of Hayleys

Across every domain at Hayleys PLC, each action builds on the last, reinforcing the wider ecosystem that drives growth and collective impact. Like interconnected systems in nature, our businesses operate as a continuous, interdependent network: each contribution generating compounded impact and sustaining value across industries, communities, and global markets. These natural processes illustrate how individual actions feed into the health of the whole. Each reinforces the system, enabling life to flourish, ecosystems to renew, and environments to remain adaptable and resilient.

In the same way, at Hayleys PLC, every strategic action, partnership, and investment builds on the last, creating an ecosystem of progress where impact grows cumulatively, guiding our journey toward shared value, resilience, and enduring growth.

Welcome to Our Integrated Annual Report

Our 13th Integrated Annual Report represents our primary annual communication to capital providers and other stakeholders demonstrating how our purpose of 'Inspiring an Inclusive World and a Thriving Planet' shapes our strategy, stakeholder interactions and resource allocation. Through an integrated assessment of the interdependencies among the six capitals, the Report demonstrates how we create and deliver sustainable value to our diverse stakeholders while proactively managing trade-offs and minimising potential value erosion.

BASIS OF PREPARATION

Period

- ⦿ The Group adopts an annual reporting cycle, and this Report covers the period from 1st April 2025 to 31st March 2026. Material information and post balance sheet events up to the Board approval date of 29th May 2026 have also been included

Audience

- ⦿ The Report is designed to cater primarily to the information requirements of capital providers, but also includes information that is relevant to other stakeholders

Changes to reporting

- ⦿ Addition of 13 new subsidiaries that were formed/ acquired during the year and amalgamation of 2 subsidiaries.

Restatements

- ⦿ There were no major restatements of financial or non-financial information during the year

REPORTING BOUNDARY

This Report covers the operations of Hayleys PLC and its 202 affiliates (collectively referred to as the "Group") based in Sri Lanka and overseas (refer to Note 1 of the Financial Statements on page 369). Key changes to the Group's structure during the year included the following:

- ⦿ Formation of 6 subsidiaries and acquisition of 7 new subsidiaries in the Energy, Mobility & Projects, Industry Inputs, Power & Energy, Tea Exports, Transportation & Logistics Sector

INTEGRATED REPORTING BOUNDARY

Narrative/ Sustainability Report			
Reporting Standard		Objective of Reporting	
Integrated Annual Report	• Integrated Reporting Framework	• Providing a holistic and connected view of how an organisation creates, preserves and may erode value over time	
	• SLFRS S1 and S2 Sustainability Reporting Standards	• Disclosures on sustainability and climate-related risks and opportunities that may impact an entity's financial performance and position over time	
	• Sustainability Accounting Standards Board (SASB)	• Disclosures on industry-specific, financially material sustainability disclosures	
	• Taskforce on Nature-related Financial Disclosures	• Disclosures on nature-related risks and opportunities that may affect an organisation's strategy, risk profile and long-term value creation.	
ESG Report	• GRI Standards (2021)	• Disclosures on the Group's economic, environmental and social impacts	
	• Sustainable Development Goals (SDG)	• Demonstrate how the Group's operations contribute towards advancing the SDGs	
	• Gender Parity Reporting Framework of CA Sri Lanka	• Disclosures on gender diversity, enabling stakeholders to assess progress toward achieving gender-balanced and inclusive workplaces.	
	• 10 principles of the UN Global Compact	• Demonstrate its commitment to responsible business conduct	

Welcome to Our 13th Integrated Annual Report

MATERIALITY

The content included in this Report is determined through a systematic materiality assessment process (detailed on page 106) which reflects issues that could impact the Group's ability to create value and its impacts on the society and environment. The Group adopts a 'double materiality' approach in corporate reporting, reflecting the nature of our businesses, our impacts and dependencies as well as recent developments in disclosure standards.

- Financial materiality:** Our Integrated Annual Report is primarily designed to provide decision-useful information on matters (including sustainability-related risks and opportunities) that are likely to influence the organisation's ability to create economic value. The Report also includes a high-level overview of matters that are material from an impact perspective, complementing the assessment of financial materiality
- Impact materiality:** The Group's ESG Report is prepared primarily on the basis of impact materiality, with emphasis placed on the Group's most significant impacts on people, society and the environment.

ASSURANCE

We ensure the integrity of both our financial and non-financial information through a combined assurance model which includes oversight by the management and the use of internal audit and external assurance providers. The different elements of our Integrated Report that were assured are set out below;

Reporting element	Internal assurance	External assurance
 Financial information and relevant processes	- Regular review and evaluation of the financial reporting processes by the Internal Audit department - Executive review by CFO and finance teams - Independent oversight by Board of Directors and Audit Committee	Messrs. Ernst and Young (Page 235) 
 Integrated Report and relevant processes	- Verified by Board of Directors and sub-Committees - Sector level information verified by Sector leadership teams	- Integrated Reporting assurance by Messrs. KPMG (Page 320) - Evaluation of reporting processes - Descriptions relating to strategy and value creation - Application of content elements - Integrated thinking within the organisation
 Sustainability-related Financial Disclosures	- Verified by Board of Directors - Sector-level disclosures verified by Sector Board of Directors	Assurance on SLFRS S1 and S2 Sustainability Disclosure Standards by Messrs. KPMG (Page 322)
 GHG inventory	Information verified by Sector-level sustainability champions and Group ESG function	Group-wide verification of the GHG inventory by Control Union in line with ISO 14064-1(2018): Greenhouse gases

STATEMENT OF COMPLIANCE

This report represents a complete set of sustainability-related financial disclosures for Hayleys PLC and its subsidiaries for the year ended 31 March 2026. The Group's sustainability-related disclosures have been prepared in accordance with SLFRS Sustainability Disclosure Standards as issued by CA Sri Lanka.

BOARD RESPONSIBILITY STATEMENT

Hayleys PLC's Board of Directors hold ultimate responsibility for ensuring the integrity of this Report. We hereby confirm that the 2025/26 Report addresses all relevant material matters and fairly represents the Group's integrated performance. We also confirm that the Report has been prepared in accordance with the Integrated Reporting Framework of the International Integrated Reporting Council. The Report is approved and authorised for publication.

Evolving our Report

ENHANCING CLARITY THROUGH DUAL-REPORTING APPROACH

This year marks a significant evolution in the Group's reporting journey, with the introduction of a dual-reporting approach comprising the Integrated Annual Report and a dedicated ESG Report.

Together, these form a cohesive suite of reports, each catering to distinct stakeholder needs while remaining closely interconnected. The Integrated Report continues to provide an investor-focused perspective on value creation, while the ESG Report offers a more detailed, impact-oriented view of the Group's sustainability priorities. Both reports are cross-referenced and aligned, ensuring consistency and connectivity. This transition to a dual-reporting structure was driven by several key considerations:

DISTINCT INFORMATION NEEDS

Recognising that capital providers and other stakeholders seek different types of information, the separation enables more targeted and meaningful communication aligned to these varying expectations.

STRENGTHENING CONNECTIVITY WITHOUT COMPROMISE

While presented separately, the reports remain fully aligned and cross-referenced, preserving integrated thinking while improving clarity and depth of disclosure.

IMPROVING READABILITY AMIDST EVOLVING REPORTING REQUIREMENTS

The introduction of new frameworks has significantly expanded disclosure requirements, increasing both the length and complexity of the Report and making it more challenging for stakeholders to navigate and access relevant information.

STAKEHOLDER FEEDBACK

Feedback from investors and broader stakeholder groups highlighted the need for increased clarity and clearer segmentation of financial and sustainability-related information

Our Reporting Suite

The reporting suite presented below is designed to meet the diverse information needs of our stakeholders, enabling stakeholders to fairly assess the Group's financial and sustainability performance.

Environmental, Social and Governance (ESG) disclosures

Topic-specific disclosures structured in line with the priority areas of the ESG Roadmap- the Hayleys Lifecode and designed to meet the diverse information needs of stakeholders

Integrated Annual Report 2025/26

Our Integrated Annual Report serves as our primary communication with our stakeholders, with key focus on capital providers

MATERIALITY

The Group's material topics have been organised into four overarching themes and the accompanying illustration demonstrates how each material theme is addressed across the Group's suite of reports, enabling stakeholders to easily navigate and access relevant disclosures.

NAVIGATING THE REPORT

This year, we have refined the structure of our Annual Report to enhance clarity, and ease of navigation, enabling stakeholders to engage more intuitively with the information presented. At the core of this evolution is a sharper strategic orientation, with strategy taking centre stage in shaping the narrative of the Report. The structure is designed to clearly demonstrate how the disciplined execution of our strategic priorities translates into sustained value creation across our six capitals, reflecting the interconnected nature of our business model. In doing so, the Report places greater emphasis on linking performance, resource allocation and outcomes within a unified framework. Further strengthening this integrated approach, interlinkages across sections are highlighted through the consistent use of navigation icons and embedded QR codes, guiding

readers seamlessly to related content and providing deeper insights where relevant.

The strategic disclosure sections are mapped to the relevant capitals as illustrated below:

Strategic focus area		Link to capitals
1.	Portfolio Optimisation	Financial Capital, Manufactured Capital
2.	Customer Centricity	Social & Relationship Capital- Customers
3.	Nurturing Inspired Teams	Human Capital
4.	Inclusive Business Models	Social & Relationship Capital- Customers and Communities
5.	Strategic ESG Integration	Human Capital, Social & Relationship Capital, Natural Capital

Structural changes featured in this years' Report

- ☉ Narrative structured on 5 strategic pillars, linked to the capitals
- ☉ Impact materiality disclosures have been consolidated within the ESG Report
- ☉ Capital management disclosures have been streamlined and summarised to minimise duplication

Approach to Integrated Reporting

An integrated approach to our strategy formulation and value creation precedes the preparation of this Report, which is facilitated by organisation-wide collaboration and robust reporting processes. This process is governed by the Board of Directors, Group Management Committee (GMC) and respective functions and assured through a combined assurance model.

Improvements featured in this year's Integrated Annual Report

As part of our ongoing commitment to transparency and continuous improvement, we actively seek feedback from both internal and external stakeholders on our Annual Report each year. The feedback received this year highlighted a clear preference for simplifying the presentation of information, enhancing clarity, and improving overall readability. Stakeholders also encouraged us to reduce unnecessary complexity and streamline the Report to make it more concise and accessible. These insights have been carefully considered in shaping this year's reporting approach, guiding efforts to refine the structure, sharpen the narrative, and present information in a manner that easier for readers to navigate.

Key improvements featured in this year's report include the following:

Clarity and readability

- ⦿ Integrated Report has been refined to focus primarily on investor-oriented disclosures
- ⦿ Increased strategic orientation
- ⦿ The Report has been streamlined with a reduction in page count compared to the previous year

Accountability

- ⦿ External assurance on the SLFRS S1 and S2 Sustainability Disclosure Standards, bringing the total number of external assurances obtained to four.
 - Financial Reporting
 - SLFRS S1 & S2 Standards
 - Integrated Reporting
 - GHG Inventory

Reporting frameworks

- ⦿ Adoption of Task force on Nature-Related Financial disclosures (TNFD) standards
- ⦿ Increased connectivity between sustainability-related financial disclosures and general - purpose financial statements

Sustainability and emission reporting

- ⦿ Widened Scope 3 disclosures with the addition of 2 new categories:
 - Fuel and energy related services
 - Capital goods
- ⦿ Improvements in SLFRS S1 and S2 reporting (page 140)

Digitalisation of reporting

- ⦿ Videos complementing the key chapters of the Annual Report
- ⦿ Dynamic chart generators of key financial and non-financial information
- ⦿ AI-enabled dashboards
- ⦿ Persona-based website

Approach to SLFRS S1 and S2 Sustainability Disclosure Standards

During the year under review, sustainability related financial disclosures under the SLFRS S1 and S2 Sustainability Disclosure Standards became mandatory for the top 100 listed entities by market capitalisation on the Colombo Stock Exchange, including Hayleys PLC. Having voluntarily adopted these standards ahead of the regulatory requirement and progressively strengthened our disclosures over the past two years, the Group has transitioned towards comprehensive reporting under the standards this year.

2023/24

- Implementing relevant governance structures and risk management processes
- Climate-first reporting
- Qualitative approach to assessing financial effects
- Limited coverage of Scope 3 GHG emissions

2024/25

- Widen disclosures to include sustainability-related risks and opportunities (SRRO)
- Commenced quantification of financial effects
- Widened coverage of Scope 3 emission computation with the addition of 2 new categories

2025/26

- Improved quantification of financial effects
- Widened coverage of Scope 3 emission computation with the addition of 2 further categories
- External assurance on SLFRS S1 & S2 Disclosures

PROCESS AND DISCLOSURE IMPROVEMENTS

Process improvements

- Formalisation of Group-wide risk management procedure defining risk prioritisation criteria
- Enhanced integration of SRRO/CRRO into strategy formulation through their inclusion in the annual budgeting process
- Established quarterly reporting of SRROs to the Board of Directors of Hayleys PLC and relevant sector-level leadership
- Obtained external assurance on SLFRS S1 and S2 sustainability-related financial disclosures

Reporting improvements

- Enhanced quantification of the financial effects of SRRO/CRRO
- Strengthened connectivity between general purpose financial disclosures and sustainability-related financial disclosures
- Expanded the coverage of Scope 3 emissions to include two additional categories
- Improved readability of disclosures using graphical illustrations and visual representations

NAVIGATING OUR SUSTAINABILITY-RELATED FINANCIAL DISCLOSURES

The Group's SLFRS S1 and S2 disclosures are presented separately in the Sustainability-related Financial Disclosures chapter on page 140. To enhance connectivity across the report, these disclosures are linked to relevant sections of the Annual Report.

Pillars of SLFRS S1 and S2	Primary location of disclosures	Location of connected information
Governance	Sustainability-related Financial Disclosures: Page 144	Corporate Governance: Page 64
Strategy	Sustainability-related Financial Disclosures: Page 148	Portfolio Reviews: Page 212 to 317 Strategy and Resource Allocation: Page 118 Capital Management: Page 192 Financial Statements: Page 358
Risk Management	Sustainability-related Financial Disclosures: Page 178	Risks and Opportunities: Page 108
Metrics and targets	Sustainability-related Financial Disclosures: Page 180	Portfolio Reviews: Page 212 Capital Management: Page 192

Digitalisation of Reporting

The Group continues to leverage digitalisation to enhance the accessibility, and overall stakeholder experience of its reporting processes. Through the use of interactive and digitally enabled reporting formats, information is presented in a more engaging manner while also supporting the delivery of more targeted and relevant information to different stakeholder groups.

The Group's digital reporting was elevated during the year with the following features: This year, particular focus was placed on delivering a seamless viewing experience across all digital platforms, ensuring that stakeholders can engage with the Report in a holistic and consistent manner across devices and formats.

PERSONA-BASED WEBSITE FEATURING AI-POWERED CHATBOT AVATAR

The Annual Report website features

- AI-powered chatbot avatar with voice enabled capabilities
- Flexibility to build reports based on specific disclosure requirements
- Chart generator capabilities
- Persona-based capabilities

AI-ENABLED STORYTELLING DASHBOARDS

AI-enabled storytelling dashboards were introduced within the website to present key information through interactive and intuitive visual narratives, enhancing stakeholder engagement and accessibility.

SRI LANKA'S FIRST AUGMENTED REALITY-ENABLED ANNUAL REPORT

Selected pages within the Annual Report were enhanced with augmented reality features to provide a more immersive and engaging stakeholder experience.

Please refer to page 533 for the Basis of Preparation of the Consolidated Statement of ESG Performance.

BASIS OF PREPARATION OF THE CONSOLIDATED STATEMENT OF ESG PERFORMANCE

Principles of consolidation: Environmental disclosures including energy consumption, emissions, water and waste covers all Group-wide manufacturing sites, plantations, corporate offices and other sites. Social and governance-related disclosures also relate to the Hayleys Group comprising all entities controlled by the Group.

Materiality: In assessing whether a disclosure is sufficiently material to be included in the Group's Statement of ESG Performance, the management considers its potential impact on the Group's ability to create value in the short, medium and long-term and the extent of its social and environmental impacts.

Policies: The methods of computation and information aggregation of the ESG disclosures are set out within the relevant capital reports and have been applied consistently in the preparation of the consolidated ESG Statement.

Refer to page 533 for further information on Basis of Preparation

OUR PURPOSE

To Inspire an
Inclusive World and
a Thriving Planet

VISION

To be Sri Lanka's
Corporate Inspiration
at all Times

MISSION

Delivering Superior
Shareholder Value by
Unleashing the Full
Potential of our People
and Achieving Leadership
in all our Domestic and
Global Businesses

VALUES

H **Honesty and integrity** - ethical and transparent in all our dealings.

A **Accountability** - holding ourselves responsible to deliver what we promise.

Y **Yes, WE can! (Team Work)** - working with each other and with our partners across boundaries, to make things happen.

L **Love for humanity** - treating everyone with respect and dignity, providing for the development of our people and rewarding them for good performance.

E **Enduring Customer Value** - enhancing experiences for every customer, from the rural farmer to the global consumer.

Y **Yes, we WILL WIN! (a Will to win)** - exhibiting the will to win that which is important to Hayleys and its shareholders.

S **Social Responsibility as a Good Corporate Citizen** - caring for the communities in which we work, actively supporting their growth and being environmentally responsible in all we do.

&

I **Innovation** - transforming ideas into products and services to create economic, social and environmental value in the pioneering spirit of Hayleys

STRATEGY

- Portfolio optimisation
- Customer centricity
- Nurturing inspired teams
- Inclusive business models
- ESG integration

A CYCLE OF SUSTENANCE

The water cycle transforms, adapts, and renews through evaporation, condensation, and precipitation. As water shifts across states and environments, it responds seamlessly to changing conditions; sustaining balance while continuously moving forward. What appears fluid and evolving is, in fact, a system of precision: circulating energy, redistributing resources, and sustaining life through a dynamic continuum.

At Hayleys PLC, our leadership is responsive to shifting conditions, yet firmly anchored in intent. Decisions are guided by insight, discipline, and foresight, enabling us to navigate complexity with agility. By aligning diverse businesses, we sustain momentum; guiding the Group forward with purpose, resilience, and a clear long-term vision.

Reflections from the Chairman & Chief Executive

As emerging avenues for growth began to take shape, we acted with a greater degree of boldness, moving decisively to strengthen our presence in new verticals as we lay the foundations for the continued evolution of our portfolio

Executive
Scan to view

Dear Stakeholder,

In my message to you last year, I reflected on how the accelerating pace of change was reshaping the business landscape, challenging established norms and redefining the pathways to growth. One year later, that pace has shown little sign of slowing and what was once viewed as cyclical disruptions have become enduring realities. However, as I observed last year, change tends to reward those with the courage to adapt and the conviction to act. Throughout the year, Hayleys demonstrated both. In a year that affirmed the strength of its character, I am proud to note that Hayleys delivered yet another year of exceptional growth, advancing innovation, expanding its operational footprint and generating value across its stakeholder universe. Against this backdrop, it is my pleasure to present the 13th Integrated Annual Report and the Audited Financial Statements of Hayleys PLC for the financial year ended 31st March 2026.

If there was one characteristic that defined the Group during the year under review, it was a willingness to act with conviction. As emerging avenues for growth began to take shape, we acted with a greater degree of boldness, moving decisively to strengthen our presence in new verticals as we lay the foundations for the continued evolution of our portfolio. These strategic interventions, combined with the diversity of our business model and the strong performance of our mature businesses, enabled the Group to deliver another year of record performance. Revenue increased by 19% to surpass the half-trillion-rupee mark for the first time, reaching a record Rs. 585.02 bn, while Profit Before Tax rose by 4% to Rs. 38.04 bn during the year under review.

The theme of this year's Report, In Full Circle, captures a belief that has long underpinned the Hayleys journey: that sustainable progress is rarely linear, but instead built through a continuous

process of learning, adaptation and renewal. As we enter new businesses and broaden our portfolio, every strategic investment builds upon foundations laid before it, creating a continuum of progress that expands our sphere of value. This philosophy is evident in our contribution to the nation. During the year, Hayleys accounted for 5% of Sri Lanka's export income, generated USD 800 mn in foreign exchange earnings and provided employment to more than 38,700 people. These contributions reflect a broader principle that has guided our journey for generations: that the value we create ultimately returns in full circle to the economy, communities and stakeholders who place their trust in us.

CYCLES OF CHANGE: NAVIGATING A WORLD IN MOTION

The global economy remained resilient during 2025, expanding by 3.3% amid the gradual easing of financial conditions in advanced economies and sustained domestic demand across emerging markets. While supportive financial conditions and a moderation in trade tensions helped underpin growth, economic activity remained uneven across regions and sectors. More recently, the escalation of global geopolitical tensions has added a new layer of uncertainty, raising concerns around supply chain disruptions, energy price volatility and inflationary pressures, with growth expected to moderate in the near term.

Amidst these evolving global challenges, Sri Lanka's economic trajectory during the year offered grounds for cautious optimism, reflecting the benefits of reforms undertaken in recent years and a gradual return to stability. Sri Lanka's economic recovery gathered further momentum during 2025, with the country recording GDP growth of 5% as macroeconomic fundamentals continued to strengthen. Supported by a clear political mandate and policy continuity, the reform agenda remained firmly on course, encompassing fiscal and tax

reforms, strengthened governance and anti-corruption frameworks, and broader structural measures aimed at enhancing productivity and competitiveness. These efforts continued to bolster investor confidence and reinforce the credibility of the country's economic direction. Growth was broad-based, with the Industrial Sector expanding by 8.0%, Services by 3.4% and Agriculture by 1.2%.

The year also saw further improvements in monetary and external sector conditions. Supported by accommodative monetary policy and low inflation, market interest rates continued their downward trajectory, creating a more conducive environment for business activity. Meanwhile, the country's external position strengthened with the current account recording a surplus of USD 1.7 bn and gross official reserves increasing to USD 7.0 bn by end-March 2026. Despite the Sri Lankan Rupee depreciating by 6.3% against the US Dollar, exchange rate movements remained broadly stable, reflecting improved economic fundamentals and growing confidence in the recovery. Nevertheless, the recent escalation of tensions in the Middle East serves as a timely reminder of the fragility of the global recovery. While the ultimate outcome remains uncertain, a prolonged period of instability has the potential to affect energy prices, trade flows and investor confidence, with broader implications for economic growth and stability.

PERFORMANCE OVERVIEW

The Group's performance during the year reflects the continued execution of a strategy designed to strengthen resilience while positioning the portfolio for future growth. In recent years, we have focused on broadening our geographical footprint, diversifying customer segments, investing in new growth platforms and enhancing our value proposition through innovation and operational excellence. Against this backdrop, the Hayleys Group delivered the highest Revenue in its history, with Revenue from Continuing

Reflections from the Chairman & Chief Executive

Operations increasing by 19% to Rs. 585.02 bn during the year under review. Growth was broad-based, led by the Consumer & Retail Sector, which recorded a 44% increase in top line to Rs. 156.74 bn, reflecting the success of timely market activations amid evolving consumer demand. Despite global market volatilities our export-oriented businesses also delivered a commendable performance, collectively recording Revenue growth of 14%, supported by market diversification and a continued focus on value-added products. Reflecting the strength of the Group's underlying operating performance, Earnings Before Interest, Tax, Depreciation and Amortisation (EBITDA) increased by 8% to Rs. 64.82 bn, while Profit Before Tax from continuing operations rose to Rs. 38.04 bn. Consumer & Retail, Transportation & Logistics, Purification and Hand Protection emerged as key contributors to profitability, underscoring the value of a portfolio that combines the stability of established businesses with the growth potential of emerging opportunities.

CAPITAL STRENGTH FOR FUTURE AMBITION

The Group placed considerable emphasis on further strengthening its financial position during the year, ensuring that its balance sheet remains capable of supporting both current operations and future growth ambitions. A key milestone was the successful completion of a Rs. 9 bn Rights Issue, the first undertaken by the Company since 2005, which was oversubscribed and reflected the confidence shareholders continue to place in the Group's long-term prospects. The proceeds are being utilised to optimise the capital structure through the partial settlement of debt while enhancing the Group's capacity to pursue strategic investments. This was complemented by the successful issuance of Rs. 12.9 bn in listed, rated, senior, unsecured redeemable debentures, further supporting long-term capital management objectives.

Total Assets increased by 26% to Rs. 645.82 bn, driven by ongoing investments in property, plant and equipment, strategic capacity expansion initiatives and higher working capital requirements associated with increased business activity. Total equity increased by 18% to Rs. 170.50 bn, driven by strong profit retention and the successful Rights Issue. Total borrowings increased to Rs. 289.66 bn, reflecting the growing deposit portfolio of Singer Finance, increased working capital requirements of Singer (Sri Lanka) PLC together with funding deployed towards new investments. Resultantly, the Group's debt-to-equity ratio increased to 1.70 times. Nevertheless, cash flow generation and debt servicing capacity remained strong, supported by the Group's market leadership and diversified business portfolio. This was reflected in Hayleys retaining its national long-term credit rating 'AAA (Ika)' by Fitch Ratings with a stable outlook, reaffirming confidence in the Group's financial strength.

SHAREHOLDER VALUE

Strategic clarity, coupled with disciplined execution, has provided a strong foundation for consistently delivering shareholder value. During the year, Hayleys PLC paid an interim dividend of Rs. 6 per share while Earnings per Share (from continuing operations) increased to Rs.20.34 (from Rs. 19.69) while Net Assets per Share also increased by 22% to Rs.150.95. The Hayleys share price recorded impressive gains, closing the year at Rs.215 per share compared to Rs.137 the previous year.

ORBITS OF OPPORTUNITY

As one opportunity gives rise to the next, the Group continues to broaden its horizons while remaining anchored in the capabilities that have shaped its success. Our aspiration has always been to build businesses that lead their industries, with the ambition of achieving market leadership wherever we compete. In this spirit, the Group's entry into the large-format supermarket

sector marked a significant milestone in the evolution of the portfolio. While representing a new business vertical, it builds upon capabilities Hayleys has cultivated over decades across sourcing, logistics and customer engagement. As consumer expectations around quality, convenience and service continue to evolve, we believe modern retail presents a compelling long-term opportunity. During the year, significant progress was made in establishing the foundations of the business, including the recruitment of a highly experienced leadership team, the establishment of key operating structures and the securing of strategic locations to support the phased rollout of the supermarket network.

The formation of Hayleys Mobility marked another important step in the Group's pursuit of emerging opportunities. Through our entry into the electric and hybrid vehicle market, we are positioning ourselves at the forefront of Sri Lanka's transition towards cleaner mobility solutions. By partnering with some of the world's fastest-growing new energy vehicle manufacturers and curating a differentiated portfolio of offerings, we have already established a meaningful presence within this evolving sector. While still in its formative stages, the progress achieved to date reinforces our confidence in its long-term potential and its ability to become a meaningful contributor to the Group's future growth.

ADVANCING THE CONTINUUM OF CAPABILITY

While the Group continued to pursue new avenues of growth during the year, equal focus was placed on strengthening the long-term competitiveness of our existing businesses. Across the portfolio, we continued to invest in areas where we see the greatest potential to deepen differentiation and advance further up to higher-value segments. In line with this strategic direction, the Group committed Rs. 33.37 bn in capital expenditure during the year, advancing several transformative initiatives aimed

at enhancing capabilities and expanding into higher-value segments. Within the Purification Sector, an investment of USD 18.18 mn is underway to expand the Group's energy storage solutions capacity, positioning the business to capitalise on the growing global demand for advanced energy storage applications. The Hand Protection Sector continued to strengthen its presence in specialised segments through investments in new production lines for sports and electrical safety gloves, complemented by the integration of advanced automation technologies. Mabroc Teas also commenced the development of a significantly larger manufacturing facility to support future growth ambitions while the Agriculture Sector is establishing a coconut water concentrate facility as part of its ongoing focus on value addition and product

diversification. Collectively, these investments underscore our confidence in the future and our commitment to continuously reshaping the portfolio towards sectors, products and capabilities that will define the Group's next phase of growth.

PEOPLE - THE CIRCLE THAT SUSTAINS US

Having had the privilege of working alongside the Hayleys family for several decades, I remain firmly convinced that the achievements of the Group are ultimately a reflection of the commitment and character of our people. Across our diverse operations, geographies and cultures, over 38,700 employees bring to life the values, capabilities and entrepreneurial spirit that have shaped this organisation for generations. As workplaces continue to evolve,

organisations are being challenged to respond to shifting aspirations of a younger workforce. Accordingly, our people strategy during the year remained focused on creating a more connected and future-ready workforce through the continued digitalisation of HR processes, investments in leadership development and targeted upskilling initiatives designed to build capabilities in emerging areas. We also continued to invest in initiatives that promote the physical, mental and emotional wellbeing of our people, recognising that this remains intrinsically linked to the long-term success of the organisation.

INTELLIGENCE IN MOTION

Few forces are reshaping the global business landscape as profoundly as digital technology. The convergence of data, automation and intelligence is

Reflections from the Chairman & Chief Executive

redefining how organisations operate while simultaneously altering customer expectations and the very nature of work itself. Recognising this reality, we launched a Group-wide Digital Roadmap during the year to provide a clear and coordinated framework for our digital transformation journey, structured around the pillars of Digital Innovation, Digital Literacy, Digital Product Delivery, Data-to-Value, and Change & Communication.

The emergence of Artificial Intelligence has added a new dimension to this transformation. While the pace at which AI is reshaping industries has been remarkable, our approach remains deliberate and grounded in responsible adoption. Across the Group, we have begun exploring a range of AI applications spanning advanced analytics, intelligent automation, customer engagement and manufacturing quality solutions, with a focus on delivering tangible business value. At the same time, we remain mindful of the ethical considerations that accompany these technologies. Anchored on a human-in-the-loop philosophy, our approach combines the capabilities of AI with appropriate governance, security and oversight.

GOVERNANCE-THE COMPASS THAT ANCHORS US

Over the years, Hayleys has developed a governance architecture that reflects the scale and complexity of its operations, while remaining sufficiently agile to respond to an increasingly dynamic operating environment. Governance structures facilitate strong alignment between the Board and the Group Management Committee (GMC), a dynamic that is especially critical in an organisation as diverse as Hayleys, where coordinated leadership and unified strategic direction are vital.

During the year, we continued to strengthen the Board's collective skill profile and broaden diversity across the

Group's Boards. I am pleased to welcome Ms. Rimal Fernando to the Hayleys PLC Board as an Independent, Non-Executive Director, bringing valuable expertise in supply chain management and logistics. We also made encouraging progress in enhancing gender diversity across our Boards, reflecting our belief that diverse perspectives lead to improved depth and effectiveness of decision-making. Key areas of Board focus during the year included strengthening governance frameworks relating to the implementation of the Personal Data Protection Act and oversight of sustainability-related risks and opportunities in line with the mandatory application of the SLFRS S1 and S2 Sustainability Disclosure Standards during the year. Meanwhile, the GMC was further strengthened during the year with the appointment of Mr. Choliya De Silva, Mr. Ruwan Rajapakse and Mr. Brahman Balaratnarajah, whose deep industry expertise and diverse leadership experience further enhance the Group's strategic and operational capabilities.

CATALYSING THE ENERGY TRANSITION

The global transition towards a lower-carbon future is becoming a defining feature of the economic and industrial landscape, creating both challenges and opportunities for businesses worldwide. At Hayleys, we view this transition as a powerful intersection between commercial opportunity and environmental stewardship. Accordingly, the Group continues to play an increasingly prominent role in advancing Sri Lanka's energy transition through investments spanning renewable energy generation, solar solutions, sustainable mobility and energy infrastructure.

During the year, the Energy, Mobility & Projects Sector (previously the Projects & Engineering Sector) reinforced its leadership in rooftop solar, surpassing 500 MW of installations and maintaining an estimated market share of 20%. The Group also significantly expanded its renewable energy generation portfolio

Our aspiration has always been to build businesses that lead their industries, with the ambition of achieving market leadership wherever we compete. In this spirit, the Group's entry into the large-format supermarket sector marked a significant milestone in the evolution of the portfolio.

through the commencement of a 50 MW wind power project, the development of a further 149 MW of solar projects and the acquisition of controlling stakes in several renewable energy companies, adding 60 MW of wind and 150 MW of solar capacity. Together with the Industry Inputs, Power & Energy Sector's current 54 MW existing renewable energy portfolio, these investments strengthen our position as a leading contributor to Sri Lanka's low-carbon transition. Our entry into the electric and hybrid mobility sector further supports the decarbonisation of transportation, one of the country's largest sources of emissions.

Beyond the solutions we provide, we remain focused on reducing the environmental footprint of our own operations. Renewable energy now accounts for 75% of the Group's energy consumption and, despite significantly higher levels of business activity, Scope 1 and Scope 2 Green House Gas (GHG) emissions increased by just 1% during the year, reflecting the effectiveness of our ongoing decarbonisation efforts.

VALUE THAT ENDURES

Over the years, I have observed environmental and social sustainability move from the periphery of the Boardroom to one of immediate strategic relevance, driven by the growing realities of climate change, biodiversity loss and resource scarcity. As a Group whose operations remain closely linked to natural ecosystems through our plantations, agriculture-related value chains, renewable energy businesses and hospitality operations, we witness these realities firsthand. We recognise that responding to these challenges requires the systematic integration of environmental, social and governance considerations into the way organisations think, operate and create value over the long term. Guided by the Hayleys Lifecode, the Group's ESG roadmap, we continued to strengthen this integration. All sectors have now launched dedicated ESG roadmaps, translating Group-wide priorities into targeted action plans and measurable outcomes. As a result, ESG-related targets are actively monitored across the Group, supported by initiatives spanning emissions reduction, water stewardship, waste management, biodiversity conservation and social impact. Hayleys PLC, together with nine Group companies, remains committed to the Ten Principles of the United Nations Global Compact and the CEO Water Mandate. The progress achieved against our broader environmental, social and governance priorities are discussed in greater detail on page 133 of this Report

Few organisations have roots that extend as deeply into the economic and social fabric of Sri Lanka as Hayleys. Across our businesses, we are connected to thousands of employees, customers, suppliers, smallholder farmers, business partners and communities whose livelihoods and aspirations are intertwined with our own. Guided by our Purpose, we remain committed to ensuring that the impact we create is shared broadly and responsibly across all those who contribute to our success.

A PORTFOLIO IN MOTION: REVIEW OF BUSINESS VERTICALS

Robust growth across the Group's domestic businesses was complemented by the resilience of its export-oriented operations, which continued to navigate a challenging global environment. Together, these performances highlight the strength derived from the Group's diversified business model. The following sections provide a high-level overview of the performance of the Group's business sectors. Please refer to pages 212 to 314 for detailed Portfolio Reviews.

Consumer & Retail

The Consumer & Retail Sector emerged as the Group's largest contributor to both Revenue and profitability during the year, delivering a record performance as it successfully capitalised on the recovery in consumer demand. Revenue increased by 44% to Rs. 156.74 bn, while Profit Before Tax rose by 76% to Rs. 11.46 bn, supported by timely market activations, strategic portfolio expansion and continued investment in brand visibility. The Sector further reinforced its market leadership through onboarding leading global brands such as Starlink, Hikvision and HP during the year, while also expanding its presence into the emerging light mobility and electric vehicle segments. Reflecting its enduring brand equity, Singer was recognised as the People's Brand of the Year for the 20th consecutive year at the SLIM-Kantar People's Awards 2026. Meanwhile, Singer Finance delivered another year of exceptional growth, with Profit Before Tax increasing by 82% to Rs. 2.65 bn, supported by strong growth in lending activities and an expanding geographical footprint.

Despite the near-term uncertainty, the medium-to-long-term outlook for the Sector remains favourable, supported by improving disposable incomes and evolving consumer aspirations. Against this backdrop, the Sector will continue to focus on customer-centricity, portfolio optimisation and digital transformation,

while further strengthening its market position through product innovation, customer service excellence and deeper engagement across multiple consumer segments.

Transportation & Logistics

The Transportation & Logistics Sector leveraged the strength of its diversified business model and growing regional presence to deliver a Revenue growth of 10% to Rs. 117.50 bn, supported by strong contributions from the Freight Management, Integrated Logistics and Travel & Aviation clusters. While Profit Before Tax declined by 8% to Rs. 6.0 bn, reflecting challenges within the Marine & Energy and Projects & Engineering divisions, the Sector's broad earnings base and geographical diversification continued to underpin overall resilience.

The Sector remained focused on executing its long-term strategy of expanding beyond Sri Lanka through a geo-product operating model, with India and Indonesia continuing to emerge as key growth markets. During the year, further progress was made in strengthening its regional footprint, while Bangladesh and Myanmar also recorded encouraging momentum. Complementing this growth agenda was a continued emphasis on digital transformation, AI integration and people development. The Sector's long-term growth potential remains strong, given its expanding regional presence and Sri Lanka's strategic position within global supply chains. As part of our ongoing efforts to sharpen strategic focus and better reflect the evolving nature of our portfolio, the Construction and Engineering Cluster will be separated from the Transportation & Logistics Sector and positioned as a distinct Sector in future reporting periods.

Purification

The Purification Sector delivered another year of commendable growth during the year, reinforcing its position as a global leader in sustainable purification

Reflections from the Chairman & Chief Executive

solutions. Revenue increased by 56% to Rs. 66.77 bn, while Profit Before Tax grew by 7% to Rs. 5.89 bn despite significant raw material cost inflation and margin pressures. Performance was supported by strong demand across core applications, higher volumes and a favourable shift in product mix towards value-added carbon solutions, underscoring the effectiveness of the Sector's long-standing strategy of moving up the value chain.

A key focus during the year was the continued expansion of the Sector's energy storage solutions portfolio, which is emerging as an increasingly important growth driver. Supported by accelerating demand stemming from electric vehicle adoption, AI-driven data centres and grid stabilisation requirements, Haycarb continued to strengthen its position within this high-growth segment through investments in product development and capacity expansion. The Sector also continued to invest in supply chain resilience through backward integration initiatives and the expansion of its regional manufacturing footprint. The Sector remains exceptionally well-positioned to benefit from increasingly stringent environmental regulations and the growing demand for advanced carbon solutions that support the transition to a lower-carbon economy.

Hand Protection

The Hand Protection Sector delivered a strong performance during the year, demonstrating the benefits of its continued focus on innovation, operational excellence and value-added product development. Revenue increased by 10% to Rs. 51.1 bn, while Profit Before Tax grew by 13% to Rs. 4.36 bn, supported by volume growth, a more favourable product mix and ongoing efficiency improvements across the manufacturing network.

The continued expansion of the Sector's value-added product portfolio remained

a priority during the year, with particular emphasis on specialised industrial, sports and electrical safety gloves catering to niche market segments.

This was complemented by significant investments in manufacturing capacity, including the commencement of construction of the Sector's sixth manufacturing facility in Sri Lanka, the commissioning of new production lines and the deployment of advanced technology. Growing global demand for occupational safety and specialised protective solutions, coupled with an expanding manufacturing footprint and a strong innovation agenda, is expected to support the Sector's long-term growth trajectory.

Agriculture

The Agriculture Sector delivered a resilient performance during the year, with Revenue increasing by 18% to Rs. 44.28 bn and Profit Before Tax rising by 8% to Rs. 2.82 bn. Performance was supported by strong contributions from the agricultural equipment business, export operations and Haychem Bangladesh, highlighting the strength of its diversified portfolio and deep integration across the agricultural value chain. The Sector continued to strengthen its position as a critical enabler of Sri Lanka's agricultural ecosystem, supporting farmers through extension services, technology transfer, mechanisation solutions and access to high-quality agricultural inputs. Further progress was made in expanding the product portfolio across crop protection, agricultural equipment and animal health, while digital initiatives enhanced farmer engagement and traceability across the value chain. The Sector also advanced its regional expansion agenda, with Bangladesh remaining a key growth market and an increasingly important contributor to profitability.

While the evolving global geopolitical situations in the near-term uncertainties through its potential impact on energy

Rs. 585 bn

REVENUE

Rs. 646 bn

TOTAL ASSETS

Rs. 4.5 bn

DIVIDENDS

prices, input costs and supply chains, the Sector's long-term outlook remains positive. Increasing agricultural mechanisation, growing demand for climate-smart solutions and opportunities for regional expansion are expected to support future growth.

Textiles

The Textiles Sector operated in one of the most challenging environments experienced in recent years, as global demand remained subdued and several key customers recalibrated their sourcing strategies, resulting in lower order volumes across the industry. Against this backdrop, Revenue declined by 13% to Rs. 37.79 bn, while Profit Before Tax amounted to Rs. 1.04 bn. Beyond these near term uncertainties the Sector responded with agility to shifting market dynamics while maintaining its focus on long-term competitiveness.

A key strategic priority during the year was the continued diversification of both the customer and product portfolio. The Sector broadened its engagement with emerging and fast-growing brands, particularly within the athleisure

segment, while reducing concentration risk across key markets. In parallel, it continued to accelerate its transition towards differentiated, value-added fabric solutions. These efforts were complemented by the implementation of the Group's operational excellence programme, which delivered meaningful efficiency gains. While near-term uncertainty remains, the Sector is well-positioned to capitalise on emerging opportunities within specialised and value-added segments, supported by its strong innovation capabilities, diversified customer base and continued focus on operational excellence.

Energy, Mobility & Projects

The Energy, Mobility & Projects Sector recorded a near 6% increase in Revenue to Rs. 28.31 bn despite a more challenging operating environment for the renewable energy industry. Profit Before Tax moderated to Rs. 2.33 bn, reflecting pressures within the renewable energy cluster, including lower feed-in tariffs, and power curtailments. The Sector maintained a long-term approach to value creation, strengthening its growth platform through strategic diversification, geographical expansion and the development of new business verticals.

As described on page 38, the Sector reinforced its leadership position in Sri Lanka's energy transition while also expanding its renewable energy generation portfolio through large-scale projects and acquisitions. The formation of Hayleys Mobility was also a key milestone during the year, marking Group's entry into the electric and hybrid vehicle market through partnerships with some of the world's fastest-growing new energy vehicle brands. The Sector is aptly positioned to benefit from the country's accelerating energy transition, growing infrastructure activity and increasing adoption of sustainable mobility solutions.

Plantations

Against a backdrop of mounting structural challenges facing Sri Lanka's plantation industry, the Sector continued to advance its transformation agenda, recording a 4% increase in Revenue to Rs. 19.97 bn despite a marginal decline in tea production and significant cost pressures. Profit Before Tax declined by 24% to Rs. 2.21 bn, primarily reflecting the sharp increase in wages and other operating costs. Building on its leadership position, the Sector continued to drive its long-term transformation through crop diversification, workforce innovation and a steadfast commitment to sustainability.

Further progress was made in expanding higher-value and climate-resilient crops such as coffee and cinnamon, while efforts to transform traditional estate employment through revenue-sharing models gained momentum, improving productivity and creating more equitable value for workers. Sustainability also remained a key differentiator, with all three plantation companies continuing to set industry benchmarks in responsible agriculture, decarbonisation and ecosystem stewardship. While industry-wide challenges persist, the Sector remains focused on enhancing competitiveness through diversification, operational efficiencies and sustainability-led value creation.

Construction Materials

The Construction Materials Sector delivered a year of mixed performance during the year; Revenue increasing by 23% to Rs. 16.12 bn, supported by improving demand conditions and continued momentum in export markets. Profit Before Tax, however, moderated by 9% to Rs. 1.04 bn, reflecting temporary operational disruptions, together with elevated aluminium prices and competitive pressures across certain markets.

A key focus during the year was the continued expansion of the export business, with efforts directed towards diversifying markets and reducing concentration risk amidst evolving global trade dynamics. Leveraging its differentiated product portfolio and reputation for quality, export volumes increased by 16% during the year. The Sector also became the first aluminium extruder in Sri Lanka to obtain the Aluminium Stewardship Initiative (ASI) certification, a significant milestone that strengthens its sustainability credentials and enhances access to developed markets. In parallel, investments were made to enhance manufacturing capabilities through advanced extrusion and processing technologies, while digital and AI-enabled initiatives were deployed to improve resource utilisation. Looking ahead, the Sector remains well-positioned to benefit from the recovery of the construction industry, growing demand for sustainable building materials and continued opportunities across international markets.

Eco Solutions

The Eco Solutions Sector delivered a strong recovery during the year, with Revenue increasing by 18% to Rs. 15.11 bn while Profit Before Tax increased to Rs. 98.93 mn compared to losses of Rs. 523.92 mn the year before. Performance was driven primarily by the Eco Fibre segment, which benefited from stronger market penetration and the growing global preference for sustainable material.

During the year, the Sector focused on the continued expansion of the Eco Fibre business into new markets and applications. The Sector strengthened its presence in non-traditional markets while broadening its offering across high-value horticulture applications including growing media solutions for specialised crop cultivation. Meanwhile, the completion of the fibre extraction

Reflections from the Chairman & Chief Executive

facility in Nikaweratiya marked an important milestone in strengthening backward integration and supply chain resilience, enhancing long-term raw material security. Demand dynamics remain positive supported by increasing global demand for sustainable coir-based solutions, supported by continued innovation and market expansion.

Tea Exports

The Tea Exports Sector operated in an increasingly competitive global environment during the year, with lower-cost tea origins continuing to exert pressure across key international markets. Against this backdrop, Revenue declined by 20% to Rs. 10.55 bn, while EBIT decreased by 8% to Rs. 557.51 mn. Mabroc continued to strengthen its market diversification strategy, maintaining its position as the largest Sri Lankan tea exporter to China while expanding its presence in non-traditional markets. The business also continued to sharpen its premium positioning through customised tea blends and differentiated product offerings.

Meanwhile, Martin Bauer Hayleys delivered a record performance during the year, with the Group's share of profit from the joint venture more than tripling to Rs. 319.32 mn. Growth was driven by strong demand for its tea aroma products, particularly in the United States, together with the successful expansion of relationships with leading multinational customers across Asia. As the leading exporter of Ceylon tea aroma and one of Sri Lanka's largest exporters of tea extracts, the business continues to demonstrate the significant potential of innovation-led value addition within the global tea value chain.

Industry Inputs, Power & Energy

The Industry Inputs, Power & Energy Sector experienced a challenging year, with Revenue declining by 5% to Rs. 10.51 bn and Profit Before Tax moderating to Rs. 1.22 bn. Performance

was impacted by subdued demand across several export-oriented industries and the normalisation of interest income recognised in the previous year relating to renewable energy receivables. Despite these headwinds, the Sector continued to strengthen its long-term growth platform through portfolio diversification, regional expansion and investment in emerging opportunities.

Across its Industrial Raw Materials, Lifesciences and Engineering businesses, the Sector broadened its product and service offering while strengthening its presence in regional markets including the Maldives and Bangladesh. Key initiatives during the year included the commencement of commercial production of Aquaspersions products, the introduction of new medical technologies and the expansion of engineering solutions through new principal partnerships. The Sector also reinforced its contribution to Sri Lanka's energy transition through the commissioning of the 4 MW Matara Solar 2 project during the year. Given increasing competitive intensity in the Sector, regional expansion will remain a key strategic priority in diversifying revenue streams, broadening the customer base and strengthening long-term resilience.

Leisure

The Leisure Sector delivered a mixed performance during the year, with Revenue from continuing operations increasing by 8% to Rs. 8.68 bn, supported by the continued recovery in tourist arrivals and improved occupancy levels across the portfolio. Profit Before Tax from continuing operations amounted to Rs. 411.58 mn, reflecting varying performance across properties and heightened competitive pressures within certain markets. The flagship properties including The Kingsbury Colombo and Amaya Lake continued to strengthen their competitive positioning, supported by strong guest satisfaction

levels, service excellence and differentiated hospitality offerings.

During the period under review, the Group entered into a binding contract to transfer the headlease and operating assets of Luxury Resort (Pvt) Ltd reflecting a strategic decision to sharpen focus on leisure investments within Sri Lanka. Across the portfolio, continued investments were made in guest experiences, talent development and service excellence, reinforcing the Sector's ability to differentiate itself within an increasingly competitive market. Looking ahead, the Sector remains encouraged by the long-term prospects of Sri Lanka's tourism industry, supported by growing international arrivals, improving destination appeal and continued opportunities for product differentiation.

Others

Hayleys PLC recorded a 13% increase in dividend income to Rs. 6.47 billion during the year, reflecting the strong performance of its operating subsidiaries. In line with the Group's decision to transfer the headlease and major operating assets of Luxury Resort (Pvt) Ltd, Hayleys PLC recognised an impairment loss of Rs. 6.89 billion on its investment and related receivables. Despite a 28% reduction in net finance costs to Rs. 2.29 billion, supported by fair value gains on equity investments, the Company reported a Loss Before Tax of Rs. 1.58 billion for the year.

Hayleys Business Solutions International delivered another year of strong growth, recording a 12% increase in Revenue and a 7% increase in Profit Before Tax. Performance was driven by continued expansion in the Australian market and the strategic evolution of its service portfolio towards higher-value, knowledge-based offerings. The Company further strengthened its market presence through the establishment of Hayleys Business Solutions Pacific, while

continuing to invest in digital capabilities, including AI, robotics and process automation, to enhance service delivery and operational efficiency.

COMMITMENT TO EXCELLENCE

The year also brought significant external recognition. The Group was once again ranked the No. 1 Corporate in Sri Lanka in the 32nd edition of the LMD Top 100, reinforcing its standing as one of the country's most admired and influential corporate institutions. Hayleys further strengthened its reputation for reporting excellence by securing the Overall Excellence Award at the TAGS Awards 2025 for the fourth consecutive year, together with four category Gold Awards. Complementing this achievement, the Group was named Overall Winner at the ACCA Sustainability Reporting Awards 2025 for the third consecutive year, reflecting its continued leadership in transparency, accountability and sustainability reporting.

THE NEXT ARC OF GROWTH

As we look ahead, the path forward is unlikely to be without uncertainty. Recent global geopolitical developments have reinforced the fragility of the global operating environment, heightening uncertainty around energy security, supply chain continuity and broader economic stability. For Sri Lanka, any prolonged disruption could have wider implications for tourism, foreign exchange earnings and overall economic activity. In such an environment, visibility remains limited and prudence will remain essential. We therefore continue to monitor developments closely, remaining attentive to both the risks and opportunities that may emerge. Yet, if there is one lesson Hayleys has learned over the course of its long history, it is that periods of uncertainty often create the conditions for renewal. The Group has never been defined by the circumstances it encounters but by its ability to adapt and evolve. Our diversity,

entrepreneurial mindset and long-term orientation have repeatedly enabled us to navigate complex environments while continuing to deliver lasting value.

Encouragingly, the domestic environment continues to exhibit signs of strengthening. The restoration of macroeconomic stability, improving policy consistency and the continued advancement of structural reforms have contributed to a more stable foundation for investment and economic activity. While the journey towards sustained prosperity remains ongoing, the progress achieved thus far provides grounds for confidence in the country's longer-term trajectory.

Against this backdrop, I believe Hayleys is entering its next chapter from a position of strength. We have built a portfolio that is broad in scope and adaptable in character, supported by deep capabilities, strong market positions and a disciplined approach to capital allocation. As we pursue new avenues for growth, we will continue to actively refine the portfolio, directing resources towards businesses and opportunities that are most closely aligned with our long-term strategic aspirations. This process of renewal and reinvention has been a defining feature of the Hayleys story for generations and will remain central to how we create value in the years ahead.

ACKNOWLEDGEMENTS

As I reflect on the year, I continue to be inspired by the people who make Hayleys what it is. Across our offices, factories, estates, hotels and operations around the world, I have witnessed an extraordinary commitment to doing the right thing and supporting one another in the pursuit of a common purpose. I extend my heartfelt appreciation to every member of the Hayleys family for the dedication, professionalism and care they bring to their work each day.

I also wish to thank our Co-Chairman, Mr. Dhammika Perera, for his active involvement in shaping the Group's strategic direction and providing invaluable guidance on key decisions. My sincere appreciation extends to my fellow Board members and the members of the Group Management Committee, whose wisdom, judgement and stewardship continue to guide the organisation forward. I would also like to take this opportunity to express my sincere appreciation to Mr. Aravinda Perera, who retired from the Board during the year, for his valuable contribution and guidance throughout the year.

I also wish to acknowledge and thank Mr. Rajeev Goonetilleke, who retired from the Group Management Committee during the year, for his many years of dedicated service to the Group. On behalf of the Board, I extend my best wishes for his future endeavours.

Finally, I thank our shareholders for their continued confidence, and our customers, suppliers and business partners for the trust and support they have extended to us throughout our journey. Your partnership remains integral to all that we have achieved and aspire to accomplish in the years ahead.

Mohan Pandithage
Chairman & Chief Executive
29th May 2026

Principal Decisions in 2025/26

Strategic diversification

- Hayleys (through Hayleys Fentons) entered the electric and hybrid vehicle market via an exclusive distribution partnership with Cherry Automobile Co., Limited, thereby introducing the brands of OMODA & JAECOO to the local market
- Investment in 40.63% shares of Harishchandra Mills PLC and 9.48% of Diesel & Motor Engineering PLC

Strengthening balance sheet

- Rights issue of Rs.9 bn during the year to enhance capital base and support strategic investments
- Issue of two Rs. 12.9 bn Listed, Rated, Unsecured, Senior, Redeemable debentures

Capacity expansions

- Expansion of value-added energy storage manufacturing capacity within the Purification Sector
- Strengthening the manufacturing footprint of the Hand Protection Sector with 2 capacity expansions and 1 factory acquisition
- Commenced construction of new facilities in the Agriculture and Tea Exports Sectors

Entry in to large scale supermarket sector

- The Group announced entry into the large-format supermarket sector during the year, marking a key milestone in its portfolio evolution
- Aspires to build a value-driven retail ecosystem across the island, leveraging its unparalleled reach across value chains and commitment to sustainable business.

Digital Transformation

- Multiple digital interventions which serve as a cross-cutting enabler of strategic pillars
- Launch of Digital Transformation Roadmap

Impact of geopolitical tensions

IMPACT OF GEOPOLITICAL TENSIONS IN THE MIDDLE EAST

The geopolitical landscape of the Middle East underwent a significant escalation in early 2026, with far-reaching consequences for global trade, energy markets, and macroeconomic stability. An escalation of tensions in February 2026 triggered a wave of retaliatory attacks across the region subsequently leading to the closure of the Strait of Hormuz - a critical waterway barrels of crude oil and fuel transit daily, representing nearly a fifth of global consumption. As of the time of reporting, the United States and Iran were engaged in negotiations, though the path to a durable resolution remained uncertain.

Potential implications on Hayleys

Given the breadth of the Group's operations across sectors and geographies, the conflict has the potential to generate wide-ranging implications for Hayleys, as outlined below.

⌚ Increase in energy and fuel costs

⌚ Impacts on remittances and migrant workers

⌚ Impacts on tourist arrivals from disruptions to aviation routes

⌚ Supply chain disruption

⌚ Currency fluctuations

Immediate term

- ⌚ Increase in energy and input costs can directly impact margins across manufacturing and other energy-intensive sectors
- ⌚ Spike in freight rates could benefit Hayleys Advantis although exposing customers to cost shocks that could soften volumes
- ⌚ Direct impact on hotel occupancy levels within the Leisure Sector arising from an increase in booking cancellations
- ⌚ Escalation in commodity prices stemming from supply chain disruptions could impact Sectors reliant on imported raw materials
- ⌚ Demand uncertainty across key export markets

Short-to-medium term

- ⌚ Conflict-driven economic hardship and disrupted trade logistics across Gulf markets could suppress buyer demand for Sectors such as Tea Exports
- ⌚ Fuel price hikes and resultant inflation could hamper household disposable income and dampen consumer spending
- ⌚ Cost of agro-chemicals and fertilisers are likely to rise, compressing margins in the Agriculture and Plantations Sectors
- ⌚ Infrastructure and construction activity linked to government spending may slow if fiscal pressures re-emerge due to rising energy import costs and declining reserves.

ADDRESSING AND MITIGATING RISKS

- ⌚ Deploy the Group's inherent diversification as a natural hedge
- ⌚ Increased focus on domestic guests by the Leisure Sector reducing reliance on international tourists
- ⌚ Export market diversification: intensify efforts to penetrate non-traditional markets across key business lines
- ⌚ Supply chain security: Review and diversify sourcing for key raw materials and inputs vulnerable to Middle Eastern supply chain disruption
- ⌚ Strengthen foreign currency hedging positions across export-earning subsidiaries

DIVERSITY OF EXPERTISE

Board of Directors

MOHAN PANDITHAGE Chairman & Chief Executive

Appointed as Chairman and Chief Executive in July 2009

Appointed to the Board on 1st October 1998

Skills and experience

Since assuming the role of Chairman and Chief Executive in 2009, Mr. Pandithage's strategic vision has redefined the growth trajectory of Hayleys, transforming the Group to one of Sri Lanka's most diversified, sustainable and socio-economically impactful enterprises. His foresight in capturing emerging opportunities and driving strategic investments in key industries have significantly enhanced the Group's earnings potential and long-term resilience and he was named as 'Business Leader for the Year 2025' by LMD. Mr. Pandithage assumed the role of Chairman and Chief Executive in 2009 and his visionary leadership has redefined the growth trajectory of Hayleys, transforming the Group to one of Sri Lanka's most diversified, sustainable and socio-economically impactful enterprises. Mr. Pandithage is an accomplished industry veteran and respected leader in the field of transportation and logistics, having led the Group's Transportation Sector prior to this appointment as Chairman of the Group. He was the first Sri Lankan to be awarded the Pinnacle Lifetime Award by the Chartered Institute of Logistics and Transport and has been honoured with the prestigious 'Best Shipping Personality' Award by the Institute of Chartered Shipbrokers, in recognition of his outstanding contributions to the industry. He was also inducted as a 'Legend of Logistics' by the Sri Lanka Logistics and Freight Forwarding Association.

Corporate Governance

Ensuring and Preserving Value

Corporate Governance practices in place	
⦿ Majority of Directors are Non-Executive	⦿ Board and Sub-Committee evaluations
⦿ Annual election of 1/3rd of Directors through majority voting	⦿ Comprehensive Board-approved policy framework
⦿ Board and Sub-Committee evaluations	⦿ Proactive, year-round stakeholder engagement programmes
⦿ Regular review of Board composition and structure	⦿ No super majority power in governing documents

Board Compliance	
⦿ The Board is satisfied that it discharged its duties and obligations effectively during the 2025/26 financial year ⦿ The Board confirms that the organisation has fully complied with the Corporate Governance Rules set out in the Listing Rules of the CSE ⦿ The Company's Independent Directors meet the criteria for determining independence as per the Listing Rules of the CSE	⦿ The Chairman & Chief Executive and Directors satisfy the fit and proper assessment criteria stipulated in the Listing Rules of the CSE ⦿ The Board confirms compliance with the requirements of the Policy on Matters Relating to the Board of Directors ⦿ During the year under review, there were no material violations of any laws or regulations nor any material fines or penalties imposed on the Company for contraventions of any laws and regulations

GOVERNANCE RESPONSE TO SHIFTS IN OUR LANDSCAPE

The Group persistently reviews and evaluates trends in the operating landscape, adapting its governance frameworks to ensure relevance in changing dynamics.

Trend	Governance response
Opportunities presented by a fairer and more competitive environment for the private sector following changes in the political leadership	⦿ Increased focus on mitigating the risk of corruption and bribery ⦿ Strategic alignment with the country's national economic development agenda
Regulatory reporting requirements and escalating customer concerns on sustainability considerations	⦿ Regular monitoring of ESG risk landscape with its integration to the Group's enterprise risk management framework ⦿ Monitoring progress against the aspirations and targets of the Group's ESG strategy
Providing oversight on digital transformation, data privacy and the use of data	⦿ Fit-for-purpose digital transformation strategy which is reviewed by the Board ⦿ Continued monitoring of digital and cybersecurity risks as part of the Group's enterprise risk management

Corporate Governance

APPROACH TO CORPORATE GOVERNANCE

The Hayleys Group's transformation over the decades has been anchored by its enterprise-wide corporate governance framework, which has allowed the Group to evolve its structures, processes and decision-making to remain agile in shifting operating dynamics. Good governance is embedded in long-standing principles that are designed to ensure longevity of the Group's multi-stakeholder value creation, driven by our purpose of Inspiring an Inclusive World and a Thriving Planet. Our fit-for-purpose governance approach is designed to comply with the relevant regulations and legislation and is supplemented by alignment to governance best practices and relevant voluntary frameworks as set out below.

ACTIVE GOVERNANCE DRIVING LONG-TERM VALUE

The Group's governance approach supports long-term value creation in the short, medium and long-term by enabling strategic oversight, providing guidance on resource allocation and ensuring adequate controls to preserve the interests of our stakeholders and capitals. These actions are summarised below and described in further detail throughout this Chapter.

MONITORING EXECUTION OF STRATEGY AND PERFORMANCE

Evolving the Group's strategy was a key agenda item during the year, with considerable emphasis given to the Group's new industry verticals. The Board provides substantive input into the formulation and oversight of the strategy, with focused deliberation on execution, progress, and the implications of evolving conditions within the operating environment. This process is further strengthened by the active engagement of the Group's Executive Directors, who represent key business verticals and contribute domain expertise and sector-specific insights to strategic decision-making.

The effectiveness of the Board's decision-making is enhanced through the following interventions.

Corporate Governance

Key strategy-related Board interventions during the year are summarised below:

	How governance supports delivery of strategy	Information shared with Board	Active governance in 2025/26
Portfolio optimisation	Optimal capital allocation between new, high-growth ventures and mature businesses	- Performance against financial and operational targets and metrics - Developments in external landscape including political, macro-economic and social matters	- Overseeing the Group's strategic direction and approval of Annual Corporate Plan and budgets - Evaluation and assessment of new ventures and market opportunities - Approving the annual, interim and quarterly financial results
Customer centricity	Alignment of organisational policies, culture and leadership with customer expectations	- Developments in the competitive landscape - Results of customer acquisition and retention - Results of customer satisfaction surveys	- Evaluation of opportunities in new markets and customer segments - Monitoring performance of new products and services - Monitoring customer satisfaction levels against defined targets
Nurturing inspired teams	Ensure the Group's employee value proposition is tailored to attract and retain the talent required to drive its strategy	- People-related developments including changes in headcount, health and safety and engagement initiatives - Results of employee satisfaction survey	- Assess impact of Cyclone Ditwah on employee living conditions and well-being - Review and approval of remuneration guidelines and parameters - Ensure effective succession planning is in place for key management personnel
Inclusive business models	Prioritise inclusive business models and ensure engagement in strategic CSR initiatives	- Metrics on supplier value creation and retention - Outputs and outcomes associated with community engagement mechanisms	- Receive updates on the Group's major suppliers and value creation - Monitor progress of supplier development programmes - Monitor progress of key community engagement initiatives
ESG integration	Strategic integration of ESG across all decision-making, functions and processes	- ESG risks and opportunities - Performance against ESG targets - External developments (including client requests and regulations) relating to sustainability	- Oversight on ESG risk management processes - Monitoring of ESG performance against defined targets

RISK MANAGEMENT

Risk management remained a core area of focus during the year, as the Group navigated through complexities stemming from the internal and external operating landscape. The Board and risk-related committees (refer table below) provided oversight on the impacts of macro-economic and geopolitical developments, regulatory changes as well as implications of Cyclone Ditwah on operations, supply chains and employees.

Interventions in 2025/26: The Group made significant improvements to its risk governance, processes and procedures during the year as summarised below and described in further detail in the Risks and Opportunities Section on pages 108 to 116 of this Report.

Risk-related interventions in 2025/26

Discharge of risk-related responsibilities

Function	Mandate and Activities
Risk Management Committee	- Oversee and advise the Board on current and emerging risk exposures across the following categories of risk- strategic, financial, operational and sustainability - Oversee, assess and monitor the adequacy and effectiveness of the Group's Risk Management Procedure for identifying, assessing, prioritising and reporting current and emerging risks Sector-level interventions In addition to Audit Committees in listed subsidiaries, significant unlisted sectors have also established Audit Committees
Board Audit Committee (Please refer to page 68 for the Composition, Scope and functions of the Audit Committee)	- Oversight responsibility on selecting and applying accounting policies and maintaining an appropriate relationship with the external auditors - Reviews internal control issues and risk management measures identified by MA & SRD and evaluate the adequacy and effectiveness of the risk management and internal control systems including financial reporting Sector-level interventions In addition to Audit Committees in listed subsidiaries, significant unlisted sectors have also established Audit Committees
ESG Steering Committee	Review and monitor ESG related risks, opportunities and impacts and recommend the implementation of appropriate measures to effectively address these dynamics All Sectors operate ESG Steering Committees with board representation, facilitating a bottom-up approach to managing ESG-related risks across the Group

Corporate Governance

Function	Mandate and Activities
Internal Audit (Management Audit & System Review Department)	⦿ Vital role in assessing the effectiveness of controls and strengthening them and establishing new controls where necessary ⦿ Direct channel between the Head of MA & SRD and the Chairman of the Audit Committee without the interference of any Directors or Executives. ⦿ Reports are made available to the Chairman & Chief Executive and the Chairman of the Audit Committee
External Audit and Auditor Independence	⦿ The Group's external auditors (for financial reporting) are Messrs. Ernst & Young and the principal does not engage in any services which are in the restricted category as stipulated by the CSE for external auditors ⦿ The Audit Committee reviews the independence, the skills and experience and the work of the external auditors annually and recommends appointment accordingly to the Board ⦿ The Audit Committee conducts an in-camera meeting with the external auditors on completion of the audit to identify any areas of concern ⦿ The Audit Committee also monitors non-audit work done by the external auditors to ensure their independence

DIGITAL TRANSFORMATION

The Board exercises governance and strategic oversight on the Group's digital and technology infrastructure ensuring that technology initiatives serve as a cross-cutting enabler across all strategic pillars. During the year, the Group officially launched its Digital Transformation Roadmap, clearly articulating five key pillars driving the transformation agenda (refer to page 137 for further information on related interventions) The Head of Group IT Services, supported by specialised resources across the Group supports the Board in discharging its IT-related duties and providing oversight on the management of technology assets.

The Group’s approach to IT and cybersecurity management includes suitable governance structures, policies and processes as is given below

Commitment to personal data protection: The Group is strengthening its commitment to data privacy through the implementation of a comprehensive Personal Data Protection framework, aligned with the Sri Lanka Personal Data Protection Act (PDPA). This initiative is guided by the core objectives of PDPA—ensuring lawful and transparent processing of personal data, enhancing accountability, and safeguarding the rights of individuals while enabling responsible, data-driven business operations. The following interventions undertaken during the year were aimed at embedding data protection within the Group’s operating model, thereby strengthening regulatory alignment and reinforcing stakeholder trust.

Corporate Governance

Board's role in management of impacts and ESG oversight:

The Board holds apex responsibility for formulating and updating the Group's goals, strategies and policies related to sustainable development. These aspirations are set out in the Hayleys Lifecode, the Group's ESG Roadmap; the Board reviews performance against the ESG targets set out in the Hayleys Lifecode on a quarterly basis while also providing oversight on policy updates, target revisions and strategic actions whenever required. Established reporting lines both at Group and Sector-level also enable the Board to play a central role in overseeing due diligence processes to identify impacts on the economy, environment and society. In fulfilling this responsibility, the Board considers insights derived from stakeholder engagement mechanisms, ensuring that stakeholder perspectives are meaningfully integrated into strategic decision-making.

The Group ESG Steering Committee (comprising 3 Executive Directors and 3 GMC members) assists the Board in the discharge of its ESG-related duties. The mandate of the ESG Steering Committee includes providing oversight and monitoring the execution of the Group's ESG Roadmap, identifying ESG related risks, opportunities and impacts and providing guidance on ESG related policies and programmes among others.

Board responsibility sustainability reporting:

The Board retains ultimate responsibility for ensuring the integrity

and relevance of the Group's disclosures, including the formal approval of material topics at the outset of each reporting cycle. In addition, the Annual Report is subject to comprehensive review and approval by the Board prior to publication.

Refer the Group's ESG Report for further information on ESG Governance

Key achievements in ESG integration in 2025/26

BOARD MEETINGS

Board meetings are scheduled early and duly informed to the Directors at the beginning of each calendar year. During the year, the Board convened 13 times while 1 special meeting was also held to discuss specific issues as illustrated below. Clear guidelines and processes are defined and communicated to ensure effectiveness of Board meetings.

OVERVIEW OF CORPORATE GOVERNANCE FEATURES

The Group's corporate governance structures and frameworks continued to evolve during the year, remaining aligned with applicable best practices and statutory developments. These frameworks support effective oversight and decision-making, and are integral to preserving and safeguarding stakeholder value.

 Board Structure	Unitary Board comprising both Executive and Non-Executive Directors	13 Directors	54% Non-Executive Directors
	1/3rd of Directors in office retire at each AGM by rotation	Senior Independent Director	31% Non-Executive Independent Directors
 Delegation	4 Statutory sub-committees	Audit, Remuneration, Nominations & Governance, Related Party Transactions Review Committee comprises exclusively of Non-Executive Directors	2 discretionary committees (hybrid) - ESG Steering Committee - Risk Management Committee
 Policy Framework (refer to page 71 for full list)	- Board Charter - Policy on Matters Related to the Board of Directors - Policy on Corporate Governance - Board Committee Charters - Bribery and Anti-Corruption Policy - Shareholder and Investor Communications Policy 		
 Shareholder rights	All issued ordinary shares rank equally with the same rights	All holders of the same share class treated equally	Single class of ordinary shares which are publicly traded

Corporate Governance

BOARD STRUCTURE AND DELEGATION

The Group's governance structure has evolved over time to reflect the increasing diversity and depth of the Group's operations. As set out below, the Board of Hayleys PLC has line of sight to the Group's industrially and geographically diverse businesses and

is adequately robust to enable judicious delegation and the ability to respond to requirements of a large entity operating across multiple jurisdictions

Corporate Governance

RESPONSIBILITIES OF THE BOARD

As the apex governing body of the Group, the Board of Directors provide strategic guidance while setting the tone for ethical, transparent leadership across the organisation. The Group is supported by 6 sub-committees and the Group Management Committee, which is responsible for the execution of the strategy and management of the business.

Powers retained by the Board of Directors (as defined in the Board Charter)

- Formulating and steering the Group's strategy
- Oversee performance against strategy and financial and non-financial targets
- Approving policy and programmes
- Stakeholder engagement
- Shaping Organisational culture
- Risk Management and Internal Controls

Group Management Committee

Led by the Chairman & Chief Executive and includes the Group's Executive Directors, Sector Heads, Group Chief Financial Officer and Head of Group Legal & Human Resources. The GMC engages in weekly deliberations on,

- Sector-level internal and external developments
- Updates from Hayleys PLC center functions including HR, Treasury, Corporate Communications, Group Tax, Strategic Business Development, Group IT and Group ESG
- Any emerging developments which are pertinent to the Group's performance

BOARD SUB-COMMITTEES

The Board sub-committee structure provides an opportunity to leverage director's expertise in specialised areas such as risk management, audit and sustainability. When determining committee composition, the Board considers relevant regulations, the skills and experience of its members and responsibilities of the Committee. Board committees report to the Board of Directors in detail on key discussions and activities and each sub-committee has a formal Terms of Reference that is reviewed annually. Please refer to pages 343 to 352 for further information on the activities of the Sub-Committees during the year.

Audit Committee

(Refer page 343 to 345 for Report of the Committee)

Corporate Governance

THE COMPANY SECRETARY

Company secretarial services are provided by Hayleys Group Services (Pvt) Ltd., who are competent secretarial professionals registered as company secretaries with the Registrar of Companies. The role of the Company Secretary has been defined in line with the provisions set out in the Code and include the following:

The role of the Company Secretary has been defined in line with the provisions set out in the Code and include the following:

- Facilitating the efficient conduct of Board meetings and ensuring that all proceedings of meetings are properly minuted.
- Ensuring that all Board Committees are properly constituted and provided with clear terms of reference.
- Ensuring that an Annual General Meeting is held in line with regulatory requirements and that all notices, forms and reports necessary for the meeting are disseminated with approval of the Board.
- Maintaining the registers required by regulations and filing of all statutory

returns and documents with the Registrar of Companies.

- Advising Directors with respect to their duties and responsibilities in compliance with regulatory requirements.
- Acting as a channel of communication and information for the Non-Executive Directors.
- Ensuring good relationships with shareholders.
- Filing and updating information of the Group Companies with the Registrar of Companies.
- Making timely disclosures to the Colombo Stock Exchange in terms of the Listing Rules and other regulatory body including disclosures on related parties and related party transactions.

BALANCE OF POWER

The functions of Chairman & Chief Executive are vested in one person due to the diversity and scale of operations of the Group and the Board is of the view that this is the most appropriate arrangement for Hayleys PLC. The Board has also appointed Mr. P. Y. S. Perera Non-Executive Director as Senior Independent Director to facilitate board

balance and ensure effective engagement with Non-Executive Directors. Meanwhile, the balanced distribution of authority among Executive, Non-Executive and Independent Directors enhances decision-making while promoting independent judgement.

Contribution of NEDs

- Objective advice
- Diverse perspectives
- Domain specific specialist insights
- Act in best interest of all stakeholders

Contribution of Independent Directors

- Mitigating conflicts of interest
- Ensure fairness and accountability in executive remuneration
- Build trust and maintain investor confidence

Contribution of SID

- Upholding ethics, integrity and probity
- Facilitate discussion among NEDs and EDs on governance matters
- Facilitate equitable balance between stakeholder interests
- Act on the results of any performance evaluation of Chairman

POLICIES AND PROCEDURES

A comprehensive and robust policy framework (listed above) applicable across all Group entities ensures a structured and consistent approach to processes and decision-making. Policies are reviewed and revised annually to ensure relevance in evolving operating conditions. During the year, Hayleys PLC formalised Standard Operating Procedures (SOPs) for key divisions and functions ensuring consistency and efficiency across the organisation.

Scan the QR code to view the Group's mandatory policies.
<https://www.hayleys.com/our-policies/#our-policies>

STANDARD OPERATING PROCEDURES

The following SOPs were formulated during the year

- ⊙ Secretarial
- ⊙ ESG
- ⊙ Tax
- ⊙ Fire & Safety

STRATEGIC LEADERSHIP

Skills and expertise

Given the breadth and complexity of the Group's operations, an appropriate balance of experience, perspectives, knowledge, and skills is essential for the Board to discharge its responsibilities effectively. The Board Nominations and Governance Committee reviews the Board's composition against the required mix of expertise in response to the Group's strategic aspirations and rapidly evolving environment. The Board's expertise across the areas of Finance and Accounting, Corporate Leadership and Governance and industry-specific skills is elaborated below.

Finance and Accounting

In a diversified conglomerate of the scale and complexity of Hayleys, strong finance and accounting expertise at Board level is fundamental to effective

oversight and long-term value creation. Such skills enable the Board to rigorously evaluate capital allocation decisions, assess performance across sectors and geographies, and maintain disciplined stewardship over risk, liquidity and balance sheet strength.

Finance and Accounting skills on board	
Executive Directors	Non-Executive Directors
S. C. Ganegoda, H. S. R. Kariyawasan, Ms. J. Dharmasena,	T. A. B. Speldewinde, P. Y. S. Perera, A. J. Alles

Corporate Leadership

Directors with strong corporate leadership acumen bring the ability to translate purpose and strategy into coherent, long-term priorities, while ensuring that the capabilities of the talent pool keeps pace with the Group's evolving portfolio. These perspectives support a holistic approach to risk management, where strategic, operational, people and sustainability risks are considered in an integrated manner thereby supporting the long-term resilience of the business.

Corporate Leadership skills on board	
Executive Directors	Non-Executive Directors
A. M. Pandithage, K. D. D Perera, S. C. Ganegoda, H. S. R. Kariyawasan, L. R. V. Waidyaratne, Ms. J. Dharmasena, R. J. Karunarajah	Dr. H. Cabral, K. D. G. Gunaratne, T. A. B. Speldewinde, A. J. Alles, Ms. S. R. Fernando

Industry-specific skills

For a conglomerate such as Hayleys, with significant exposure to manufacturing, transportation and logistics, agriculture and hospitality, domain knowledge enables the Board to engage meaningfully with management on operational realities, sectoral risks and long-term value drivers. This depth of understanding enhances the quality of governance and depth of decision-making.

Sustainability-related skills

The Board's competencies in sustainable development are continually strengthened through targeted knowledge enhancement initiatives facilitated by the Group ESG function. These include periodic briefings, training sessions and updates on emerging sustainability trends, regulatory developments and best practices, ensuring that Directors remain well-equipped to provide informed oversight and strategic direction on sustainability-related matters.

Industry-specific skills on board	
Executive Directors	Non-Executive Directors

Corporate Governance

Diversity

Best practice in corporate governance underscores the need for Boards to comprise a diverse mix of independence, experience and expertise to effectively discharge their duties. At Hayleys, this diversity is reflected across multiple dimensions, including age, gender and tenure, as illustrated below. Board refreshment during the year enhanced.

Board changes: During the period under review Mrs. S. R. Fernando was appointed as an Independent Non-Executive Director (refer to page 51 for profile). Meanwhile, Mr. M. Y. A Perera who served as an Independent Non-Executive Director and the Senior Independent Director resigned from the Board with effect from 15th of September 2025 having completed the 9 years of service. Following his resignation, Mr. P. Y. S. Perera was appointed as the Senior Independent Director.

Fit & Proper Assessment: The Group's fit and proper assessment for Directors is in line with the guidelines set out in the Listing Rules and include criteria on honesty, integrity and reputation, competence and capability and financial soundness. The Chairman and Directors satisfied the fit and proper assessment criteria stipulated in the Listing Rules of the CSE.

Appointment, rotation and re-election of Directors: The Group's Board succession management framework ensures continuity at the Board and Sub-Committee levels. Board appointments follow a formal and transparent manner, as determined by the Nominations and Governance Committee, which assesses the Group's strategic demands as well as diversity, skills and competencies of the Board. The Board considers the recommendations of the Nominations Committee and recommends suitable candidates for appointment or re-election by the shareholders at the Annual General Meeting under the advisement of the Nomination Committee.

- 1/3rd of Directors in office retire at each AGM by rotation, with the directors who have served for the longest period since their appointment/re-appointment retiring first
- Retiring Directors are eligible for re-election
- The Board can appoint Directors to fill any casual vacancies that may arise during the year and such Directors can hold office until the next AGM and seek election by the shareholders

BOARD AND COMMITTEE EVALUATIONS

The Board and Sub-Committee evaluations for 2025/26 comprised a self-assessment which included assessment of appropriateness of Board composition, mix of skills and ability to deliver strategic aspirations.

Areas of focus	Score
Board dynamics	95.95%
Performance of Chairman	90.77%
Performance of Board Sub-Committees	89.23%
Board agility	93.08%
Governance practices	97.54%

Board Evaluation Process

The Chairman and Remuneration Committee are responsible for evaluating the performance of the Executive Directors and Committees through an annual self-evaluation of its own performance. The responses are submitted to the Chairman

for discussion at the Board meeting. Board members expressed high levels of satisfaction with the performance of the Chairman and the Board's relationship with management. Although no areas of major concern were identified, further improvements were proposed.

BOARD INDUCTION AND TRAINING

The Group maintains a comprehensive induction programme for newly appointed Directors, enabling them to familiarise themselves with the organisation and contribute effectively from the outset. The induction programme includes a briefing on essential company and procedural information, updates from key management personnel and trends in the business. In addition, Directors are given the opportunity to engage in site visits across the Group's key verticals, thereby obtaining deeper insights in to the workings of the Sectors.

In addition, Directors are kept abreast of relevant developments through ongoing training including formal sessions, distributing of reading materials and deep dives into specific aspects. Directors are also encouraged to attend sessions conducted by the Sri Lanka Institute of Directors. Many of the Directors also conform to the Continuing Professional Development requirements of the respective professional organisations. Future-focused themes such as risk management, ESG and technology featured prominent on the 2025 board training calendar.

Director Training in 2025/26

Corporate Governance

ETHICS AND CULTURE

The Board holds apex responsibility for entrenching ethical leadership and setting the tone at the top through demonstrating integrity, transparency and the highest ethical standards. Against the backdrop of new regulations and a sustained national emphasis on good governance amid shifts in the country's political landscape, the Group continued to reinforce organisation-wide efforts to minimise bribery and corruption risks, while ensuring that its ethics framework remains relevant in an evolving operating environment.

APPROACH TO BRIBERY AND ANTI-CORRUPTION

Bribery and corruption management is integrated into our compliance and risk management programmes with multiple processes, frameworks and standards in place to govern ethics management, political contributions, gifts, donations and facilitation payments among others. Following the implementation of the new policy last year, emphasis is placed on raising employee awareness and capacity building during the year key elements of the policy include,

WHISTLEBLOWER POLICY

The Group's Whistleblower Policy provides an effective mechanism for employees to raise concerns where the interest of the organisation is at risk. The Policy ensures confidentiality and anonymity and encourages the reporting of concerns such as fraud, improper conduct and breach of the Hayleys Way among others. Two-way communication is facilitated by providing the Whistleblower feedback on the actions taken if he/she so requests. Key elements of the policy are set out alongside;

Aspects of the Whistleblower Policy

- Guidelines on procedure to raise a concern
- Management responses and steps taken
- Details of the internal inquiry process including composition and quorum of the Internal Inquiring Committee
- Maintaining confidentiality

PRESERVATION OF HUMAN RIGHTS

As a signatory to the United Nations Global Compact, Hayleys has committed to Principle 1 and 2 of the UNGC Principles of Human Rights. The Group has also implemented a Human Rights Policy which aims to foster an organisational culture that embraces internationally recognised guidelines on human rights while eliminating the risk of human rights abuse. Key aspects of the Policy include the following:

- **Fair treatment:** Quality of opportunity and treatment for the purposes of eliminating discrimination
- **Non-harassment:** Creating an environment free of all forms of workplace harassment
- **Abolishing child, forced and compulsory labour** in both our operations and along our value chain in working with subcontractors and suppliers

○ Freedom of Association and Collective Bargaining

- **Promoting health and safety** by providing appropriate safety measures and precautions at all locations

Conflicts of interest: The Group-wide Corporate Governance policy sets out guidelines on effectively managing actual and perceived conflicts of interest, particularly relating to Directors. For instance, Board members must inform the Chairperson of the Board and the Company secretary of their other positions which may be of importance to the Company or the performance of their duties before accepting such positions. Meanwhile, employees are expected to disclose any material interests they may have in outside business interests and obtain prior approval if considered required

Board engagement with culture

Speak Up & Accountability

Confidential, accessible, and independent mechanisms for reporting concerns, supported by strong non-retaliation commitments through the Group's whistleblowing framework

Compliance & Monitoring

The Board evaluates the Group's culture of compliance through the ongoing assessment of risks, monitoring adherence to laws and regulations and ensuring that compliance is embedded into decision-making.

Culture and Capability

Obtain insights on work environment, employee satisfaction, attitudes, behaviours and best practices through participation in employee events and ongoing engagement

Internal Audit

The Board obtains a direct view of the implementation of policies and alignment to ethical standards through assessing the findings of Internal Audit

STAKEHOLDER RELATIONSHIPS

The Group adopts a stakeholder-inclusive approach that balances the needs, interests and expectations of stakeholders in the best interests of the Group. Stakeholder relationship management is decentralised and integrated into the operations of the Sectors and individual businesses, with ongoing formal and informal engagements conducted by the functions best positioned to interact with each stakeholder group. The Board monitors the quality of stakeholder relationships through oversight of employee, supplier and community-related matters.

The quality of the Group's stakeholder relationships are high, as reflected by strong employee retention levels, high customer satisfaction rates, strong financial performance, effective working relationships with suppliers and meaningful community engagement initiatives in the societies we operate.

Corporate Governance

SHAREHOLDER ENGAGEMENT

The Group ensures that the rights of all shareholders are preserved and has established procedures to ensure the fair and equitable treatment of all shareholders. As described on pages 75 to 76, an array of measures are also in place to ensure that shareholder views are identified and fully considered. Platforms driving shareholder communication are as follows

- ① **Annual General Meeting:** The AGM is the main forum for engaging with shareholders and the Group has a history of well attended shareholder meetings
- ② **Quarterly results updates** with accompanying reviews and timely updates of price sensitive information to the Colombo Stock Exchange
- ③ **Hayleys website:** Includes comprehensive information including Annual Reports, interim reports, investor presentations, ESG related information and department-level information
- ④ **The Annual Report:** A track record of setting benchmarks for corporate reporting affirms the Group's commitment to disclosure and transparency. Assurance on financial statements, sustainability information and compliance with the Integrated

Reporting Framework supports the reliability of the information contained in the annual report which provides comprehensive information on relevant matters to the shareholders. The Reports and other information are available on the Company's website and price sensitive information is also available on the Colombo Stock Exchange website.

- ⑤ **Interaction through Corporate Secretarial Division:** Shareholders have the opportunity to directly address concerns, suggestions or any other queries to the Corporate Secretarial Division of Hayleys PLC.

Communication of critical concerns:

Critical concerns identified through stakeholder engagement processes are systematically communicated to the Board through established reporting structures. Insights derived from mechanisms such as customer satisfaction surveys, employee engagement assessments and community grievance channels are consolidated and presented at quarterly Board meetings by the respective business and functional heads. This ensures that emerging issues, stakeholder concerns and areas requiring attention are brought to the timely attention of the highest governance body

SHAREHOLDER AND INVESTOR COMMUNICATIONS POLICY

Purpose of policy:

Ensuring that all shareholders and investors have equal and timely access to accurate and publicly available information about the Company

Includes details on,

- ① Communication platforms
- ② Social media presence
- ③ Shareholder enquiries
- ④ Shareholder privacy
- ⑤ Financial and ESG Reporting

OUTLOOK

Looking ahead, we will continue to evolve our corporate governance practices in step with the expansion of our businesses and the pursuit of our strategic priorities. Our focus will be on maintaining a fit-for-purpose governance framework that is robust yet adaptable, capable of supporting effective oversight while remaining resilient in the face of future shocks. Through this ongoing refinement, we seek to ensure that our governance structures remain aligned with the Group's risk profile and long-term value creation objectives.

Stakeholder Group	Quality of Relationship	Metric
Employees	Strong	Retention rate: 74%
Customers	Strong	Satisfaction rate: 95%
Shareholders	Strong	Share price increase: 57%
Suppliers	Strong	Supplier payments increase: 20%
Regulators	Strong	No major fines/penalties
Communities	Strong	CSR investment : Rs. 444 Mn

Refer to page 97 for further information on the Group's stakeholder engagement practices

Focus areas for FY 2026/27

Leverage digital tools and advanced analytics to deliver timely, high-quality insights to the Board, thereby strengthening the rigour and effectiveness of decision-making.

Strengthen governance mechanisms to enhance organisational resilience while preserving the agility required to adapt to an evolving risk and operating landscape

Enhance risk management practices by deepening the integration of social and environmental risk considerations into governance processes, enabling more informed decision-making and enhancing the Group's long-term resilience.

REMUNERATION REVIEW

Remuneration remains a critical lever in reinforcing a culture of performance, fairness and accountability, while supporting the Group's ESG commitments and the development of future-fit leadership. The remuneration framework is designed to remain relevant to the operating landscape and aligned with the Group's strategic aspirations, with performance criteria calibrated to drive sustained high performance without encouraging excessive risk-taking. Despite the volatilities that prevailed during the year, the Group ensured that remuneration outcomes remained consistent with our philosophy and stakeholder expectations.

Remuneration Governance

The Board Remuneration Committee provides oversight regarding remuneration-related matters within its mandate. The Committee thereby determines the remuneration of the Chairman/Chief Executive and the Executive Directors and sets guidelines

Key decisions and activities of the Remuneration Committee

- Review the performance of the Chairman & Chief Executive, Executive Directors and Group Management Committee based on defined targets and determined the bonus payable and the annual increments.
- Review Executives' compensation and implement market corrections to Executives total compensation in line with the market median.
- Recommend the bonus payable and annual increments to be paid to Executive and Non-Executive staff based on the ratings of the Performance Management System.

for the remuneration of the management staff within the Group. The Remuneration Committee Report along with the Summrised Terms of Reference are set out on page 349. Additionally, some selected sector holding companies which are Groups in their own right, have also established their own remuneration committees to address the specific concerns within the industry in which it operates.

The Board as a whole determines the remuneration of the NED's who receive a fee for being a Director of the Board and additional fee for being a member of a Committee. They do not receive any performance related incentive payments. Remuneration Committee consults the Chairman about its proposal relating to the remuneration of other Executive Directors and have access to professional advice from within and outside Hayleys PLC, in discharging their responsibilities. No Director is involved in deciding his own remuneration. The Board is not currently assessed based on the organisation's impacts on the economy, environment and society; however, the Group intends to progressively strengthen this aspect as part of its evolving governance and sustainability framework.

Remuneration Policy

The Remuneration policy is designed to encourage the drive the achievement of the Group's strategic aspirations, which is designed to generate sustainable value for all our stakeholders. The policy details how the organisation's total rewards should be managed with the aim of aligning rewards and remuneration with the organisation's business strategy, objectives, risk tolerance levels, values and long-term interests. Key objectives of the policy are,

Driving the achievement of the Group's strategic aspirations

Attracting and retaining high-performing talent

Promote internal equity through fair and transparent remuneration schemes

Optimum allocation of resources in driving positive outcomes

Nurture an ethical culture and responsive and responsible corporate citizenry

Corporate Governance

LEVEL AND MAKE-UP OF REMUNERATION

The Group's performance management system is graphically illustrated below. Performance based incentives ensure that the total earnings of the executives are aligned with the achievement of objectives and budgets of the Group companies. Presently the Group does not have an Executive Share Option Schemes. The Remuneration Committee follows the provisions set out in Schedule D of the Code as required. No special early termination clauses are included in the contract of employment contract of Executive Directors that would entitle them to extra compensation. However, any such compensation would be determined by the Board of Directors.

Remuneration Principles

The Remuneration Committee determines the combination of remuneration needed to attract, retain and motivate Executive Directors of the quality required to achieve corporate goals. The Remuneration Committee ensures that the remuneration of executives of each level of management is competitive and in line with their performance. Surveys are conducted as and when necessary to ensure that the remuneration is competitive with those of comparative companies. Remuneration for Non-Executive Directors reflect the time commitment and responsibilities of their role, taking into consideration market practices. Non-Executive Directors are not included in share options as there is no scheme in existence.

The Report of the Remuneration Committee is set out on page 349 which includes a statement on Remuneration Policy. Please refer page 330 for the total Directors' Remuneration.

Remuneration elements

REMUNERATION OUTCOMES DURING THE YEAR

The Group's ability to evolving dynamics in the economic and industry landscapes underpinned a resilient performance, supporting the following remuneration outcomes.

- ⦿ 11.56% increase in value created to employees.
- ⦿ Across FY 2025/26, salary adjustments were effected for employees at all levels, with increment levels calibrated to individual performance evaluations.

CORPORATE GOVERNANCE RULES

The Company complied fully with the Corporate Governance Rules applicable to listed entities stipulated under Section 9 of the Listing Rules of the Colombo Stock Exchange. The Company and the Group also adopted the Code of Best Practice on Corporate Governance (2023) by CA Sri Lanka

Compliance with CSE Corporate Governance Principles – Section 9 of the Listing Rules

CSE Rule Reference	Corporate Governance Principles	Compliance Status	Hayleys' Extent of Adoption
9.1.3	A statement confirming compliance with Corporate Governance Rules	Compliant	The Company has stated that it complies with the Corporate Governance Rules within the Annual Report of the Company.
9.2.1-9.2.3 (i) - (ii)	Policies	Compliant	The Company established and continues to maintain the policies on Matters relating to the Board of Directors, Board Committees, Corporate Governance, Nominations and Re-election, Remuneration, Internal Code of Business Conduct and Ethics for all Directors and Employees including policies on trading in the Company's listed securities, Risk Management and Internal Control, Relations with Shareholders and Investors, Environment, Social Governance and Sustainability (Hayleys Lifecode'), Control and Management of Company Assets, and Shareholder Investments, Corporate Disclosures, Whistleblowing and Anti Bribery and Corruption. All policies are published on the Hayleys website www.hayleys.com .
9.2.4	Request by shareholders	Compliant	Policies are made available to shareholders upon a written request
9.3.1 (a-d)	Board Committees	Compliant	The Company continues to maintain the Nominations and Governance Committee, Remuneration Committee, Audit Committee and Related Party Transactions Review Committee (RPTRC). The Committees are functioning effectively and the Audit and RPTRC meet on a quarterly basis. The other two committees meet as and when necessary.
9.3.2	Composition and disclosures	Compliant	All the Committees comply with the required rules. Please refer the respective Committee Reports.
9.3.3	Chairperson of Board Committees	Compliant	Chairperson of Board Committees is not the Chairperson of the Board of Directors
9.4.1	Meeting Procedures	Compliant	Company maintains records of all resolutions passed at General Meetings detailing the number of votes in favour or against or abstained for resolutions, and number of shares regarding proxy appointments
9.4.2 (a) – (d)	Communication and Relations with shareholders	Compliant	The Company has a Shareholder Communication and Relations Policy, and it is published on the corporate website and mentioned in the Annual Report. The contact person is mentioned. The policy includes a process whereby Directors are informed of major issues and concerns of shareholders through the Company Secretaries. Guidelines of the Stock Exchange are followed if shareholder meetings are held as virtual or hybrid meetings
9.5.	Policy on matters relating to the Board of Directors	Compliant	The Company maintains a Policy on Matters relating to the Board of Directors which addresses the requirements in rules 9.5.1 and 9.5.2
9.5.1 (a)	Formal policy governing matters relating to the Board	Compliant	The Company maintains a balance of representation between Executive and Non Executive Directors and has adopted a procedure for the appraisal of Board performance and appraisal of the CEO. Details are given in page 71.

Corporate Governance

CSE Rule Reference	Corporate Governance Principles	Compliance Status	Hayleys' Extent of Adoption
9.5.1 (b)(i)	Chairperson and CEO	Compliant	The roles of the Chairperson and CEO are combined and held by the same person. The rationale for combining the two roles is given in Note 11 (b) of the Annual Report of the Board of Directors
9.5.1 (b)(ii)	Board Charter	Compliant	The Board Charter contains the Terms of Reference and powers of the SID. Refer Senior Independent Directors Report.
9.5.1. (c)	Diversity in Board Composition	Compliant	There is diversity in the composition of the Board and a range of skills, competencies, gender, industry and age. Details are set out in pages 72 to 73
9.5.1.(d)	Maximum number of Directors	Compliant	Maximum number of Directors is fourteen (14). Executive Directors represent the business verticals. Due to the need to have a balance between Executive and Independent Directors the maximum number is set at fourteen in the Articles of Association.
9.5.1 (e)	Frequency of Board meetings	Compliant	The Board meets on a monthly basis to review the sector performance against set targets and important matters relating to Group Companies.
9.5.1 (f)	Mechanism to keep the Directors updated on the Listing Rules and ongoing compliances	Compliant	Presentations are done during meetings to update the Directors on changes to Listing Rules and ongoing compliances together with an overview of obligations arising under such rules.
9.5.1 (g)	Minimum number of meetings a Director must attend	Compliant	A Director is required to attend at least 50% of the meetings held during the year, in order to avoid being deemed to have vacated his position.
9.5.1 (h)	Trading in securities	Compliant	The Policy on Matters Relating to the Board of Directors stipulates the requirements regarding trading in securities.
9.5.1 (i)	Maximum number of Directorships	Compliant	The Company Policy on Matters Relating to the Board of Directors stipulates that the maximum number of Directorships a Director can hold in listed companies is twenty (20).
9.5.1 (j)	Right to participate in meetings via audio Visual Communication	Compliant	The Company Policy on Matters Relating to the Board of Directors permits Directors to participate in Board and Sub Committee meetings via audio visual communication, and are counted in the quorum
9.5.2	Compliance with the requirements of the Policy	Compliant	The Company is fully compliant with the requirements of the Policy on Matters relating to the Board of Directors
9.6.1 & 9.6.2	Chairperson and Chief Executive Officer	Compliant	Since the Chairperson and the Chief Executive of the Company is the same person, a market announcement was made on 1st November 2023 stating the rationale for combining the two roles
9.6.3 (a)	Senior Independent Director (SID)	Compliant	The Company has a Senior Independent Director since the Chairperson and the Chief Executive are the same person.
9.6.3 (b)	SID meeting with Independent Directors	Compliant	The Independent Directors met once during the Financial year 2025/26, chaired by the SID without the presence of other Directors to discuss matters and concerns relating to the Company and Group and the operations of the Board. Thereafter the SID provided feedback and recommendations to the Chairman and the other board members.
9.6.3 (c)	SID meeting with Non-Executive Directors	Compliant	The SID chaired a meeting once during the Financial year 2025/26 with the Non Executive Directors without the presence of the Chairperson to appraise the Chairperson's performance.

CSE Rule Reference	Corporate Governance Principles	Compliance Status	Hayleys' Extent of Adoption
9.6.3 (d)	SID has a casting vote	Compliant	The SID is entitled for a casting vote in the meetings convened by the SID
9.6.3 (e)	SID's disclosure on effectiveness of duties of the SID	Compliant	The SID has made a disclosure demonstrating the effectiveness of duties of the SID in the Statement by the Senior Independent Director. Refer Page 340.
9.6.4	Rationale for appointing a SID	Compliant	The rationale is given in the Report of the Board of Directors (No. 11 (b))
9.7.1	Fitness of Directors and CEO	Compliant	The Company ensures that the Directors and CEO at all times fulfill the fit and proper assessment criteria set out in the Listing Rules
9.7.2	Ensure nominees meet the fit and proper criteria	Compliant	The Nominations and Governance Committee reviewed the fitness and propriety of the Directors who are eligible to be re-elected, before nominating them to be re-elected by the shareholders at the shareholder meeting. Please refer pages 346 to 348
9.7.3	Assessment of Fit and Proper criteria	Compliant	Ensured that the Directors fulfill the Fit and Proper assessment criteria of honesty, integrity, reputation, competence, capability and financial soundness.
9.7.4	Declaration of Fitness of Directors and CEO	Compliant	The Directors and the Chief Executive have provided the declaration confirming that they satisfy the Fit and Proper Assessment Criteria during the financial year and as at the date of such confirmation.
9.7.5	Disclosures on Fit and Proper Assessment criteria	Compliant	The Annual Report of the Board of Directors provides the relevant disclosure in section 11.4.
9.8.1	Minimum number of Directors	Compliant	The minimum number of Directors of the Company is five (5) as per the Articles of Association of the Company.
9.8.2	Independent Directors ('IDs')	Compliant	One third (1/3) of the Board of Directors are Independent as at date.
9.8.3 (i)-(ix)	Independent Directors	Compliant	All NEDs have submitted their confirmations on Independence as per the criteria set by Hayleys PLC, which is in line with the regulatory requirements.
9.8.5 (a)-(c)	Disclosure relating to Directors	Compliant	Each ID signed and submitted a declaration regarding his independence. The Board assessed the independence declared by the Director. Currently there are four (4) Independent Directors.
9.9 (a)-(c)	Alternate Directors	Compliant	The Board does not have any alternate directors.
9.10.1	Policy on maximum number of Directorships	Compliant	Company Policy on maximum number of Directorships which a Director can hold in listed companies is 20.
9.10.2	Disclosure relating to Directors upon new Appointments	Compliant	The appointments of new Directors is disclosed to the Colombo Stock Exchange, together with a brief resume of Director, capacity of directorship and if they hold any relevant interest in shares of the Listed Entity. Appointments are reviewed by the Nominations and Governance Committee and recommended to the Board. Please refer pages 48 to 51 for the brief resume of each Director.
9.10.3	Changes to the composition of Board of Directors and/or Board Sub-Committees	Compliant	All changes to the composition of Board of Directors and the Board Sub-Committees were immediately informed to the Colombo Stock Exchange.
9.10.4 (a)-(b)	Disclosure in relation to the Directors	Compliant	Refer the Profiles of Board Directors

Corporate Governance

CSE Rule Reference	Corporate Governance Principles	Compliance Status	Hayleys' Extent of Adoption
9.10.4 (c)	Material business relationships	Compliant	None of the Directors or close family members have any material business relationship with other Directors of the Company.

Corporate Governance

Code Ref.	Compliance and Implementation	Compliance
G. INTERNET OF THINGS AND CYBERSECURITY		
G.1 Identify connectivity and related cyber risks	This function was complied with by the Group Head of IT for the year under review.	☑
G.2 Appoint a CISO and allocate budget to implement a cybersecurity policy	A Group Information Security General Manager has been appointed and allocated budgets for the implementation of cybersecurity policies and procedures	☑
G.3 Include cyber security in Board agenda	It is a regular agenda item on the Board agenda	☑
G.4 Obtain periodic assurance to review effectiveness of cybersecurity risk management	A firm of external consultants were engaged to review the effectiveness of the Group's cybersecurity risk management during the year.	☑
G. 5 The process to identify and manage cybersecurity risks.	IT risk assessments are conducted at least annually in accordance with ISO 27001:2022 and NIST framework to identify risks in IT environment. The identified risks are evaluated, and appropriate measures are implemented by the IT team to mitigate or minimise potential threats. The Board of Directors is regularly updated on the controls established to address cyber risks, as well as on any emerging cyber threats the Company may face.	☑
H. SUSTAINABILITY: ESG RISKS AND OPPORTUNITIES		
H.1 Integration of ESG risks and opportunities	The Group has embedded the identification of ESG risks and opportunities to its existing business risk management processes. Please refer to the Climate Risk Report on pages 150 to 190 of this Report.	☑
H.2 Stakeholder engagement on ESG matters	The Group applies a systematic materiality assessment which includes formal and informal stakeholder engagement. This process is explained in the Materiality and Stakeholder Engagement sections on pages 97 to 99.	☑
H.3 & H.4 Sustainability governance	Group and Sector-level ESG Steering Committees have been established in line with the adoption of IFRS S1 and S2. Further information is available on pages 150 to 190 of this Report. The Group's approach to managing the following elements are described in the pages 208 to 209. - Health and safety - Pollution prevention - Sustainable resource use - Renewable energy - Climate change - Effluent treatment - Restoration of natural resources - Biodiversity	☑
H.5 ESG related disclosures	The Group's Annual Report includes sustainability-related financial disclosures aligned to the IFRS Sustainability Reporting Disclosure Standards. Information on the business impacts of sustainability related risks and opportunities are available in the Group's Climate Risk Report on pages 150 to 190.	☑
I. SPECIAL CONSIDERATION FOR LISTED ENTITIES		
I.1 & I 2 Establishment and maintainance of policies and policy on matters relating to the Board of Directors	The Company maintains policies related to governance, with details on their implementation available on the Company's website. A list of these policies, along with relevant web references, is provided in the Corporate Governance Report. Additionally, the Company has established and upholds a formal policy addressing matters concerning the Board of Directors.	☑

UNLOCKING
VALUE

Bring this
Story to Life

A CONTINUUM OF GROWTH

Pollination transforms potential into life. Through the transfer of pollen; carried by wind, water, or living agents; dormant systems are activated, triggering growth, renewal, and expansion. What begins as a subtle exchange evolves into a powerful process of regeneration, enabling ecosystems to thrive, diversify, and sustain themselves over time.

At Hayleys PLC, value is unlocked through purposeful connection and the convergence of capabilities. By bringing together insight, expertise, and strategic partnerships, we activate opportunity and accelerate growth across the Group. Each interaction is deliberate and each outcome cumulative; transforming potential into tangible results that extend across industries, communities, and markets.

Value Creation Model

The value creation model illustrates how Hayleys leverages its resources and relationships to create and sustain value across its diverse business portfolio, supporting both strategic execution and ESG outcomes. While Hayleys PLC operates as an investment holding company, the model presents a consolidated view of the Group's activities, highlighting key outputs and impacts. Given the

diversity of operations, the Group is disaggregated into material sectors, each operating with a degree of independence, supported by centralised functions such as Corporate Affairs, Legal, Human Resources, Treasury, and ESG.

Value Creation Model

Stakeholder Engagement

STAKEHOLDER ENGAGEMENT

The Group is acutely aware that open communication and consistent engagement is critical to building trust and sustaining the Group's social license to operate. Through our relationships with a wide range of stakeholders, the Group delivers on its Purpose and drives its strategic aspirations while addressing material risks. The Group engages with six key categories of stakeholders as given below:

Governance of stakeholder engagement: The Hayleys Lifecode articulates the Group's value propositions to each stakeholder group and includes specific policies for employees, suppliers and communities that offer guidelines on the engagement approach. The Lifecode also sets out the engagement measures adopted under each selected approach.

Integrating stakeholder feedback: Feedback obtained from both formal and informal stakeholder engagement mechanisms are integrated to the strategy formulation and daily operational processes thereby ensuring that stakeholder needs are met through our value-creation process. Key mechanisms in which stakeholder feedback was integrated during the year are summarised below:

Please refer to the ESG Report for further information on the Group's stakeholder engagement practices during the year.

Human capital management	- Strategic emphasis on leadership development - Digitalisation of HR processes - Building a diverse and inclusive culture
Product and service development	- Launch of new products - Increased focus on niche, value-added products
Customer experience and service delivery	Strengthening call centre and after-service care at Singer (Sri Lanka) PLC
ESG initiatives	- Shift to renewable energy sources and decarbonisation - Strategic emphasis on biodiversity preservation - Strengthen ESG risk management

ADDRESSING BARRIERS TO STAKEHOLDER ENGAGEMENT

The Group's stakeholder universe is widely diverse, which in turn necessitates differentiated approaches in conducting stakeholder engagement. This diversity includes language, cultural differences, general differences, gender imbalances and divisions within communities. The Group adopts the following measures to address these barriers

- Trilingual communication wherever possible
- Tailor-made engagement initiatives for selected groups
- Use of independent parties to conduct engagement

Stakeholder Engagement

RESULTS OF STAKEHOLDER ENGAGEMENT IN 2025/26

	Shareholders/Investors	Employees	Customers
Key stakeholder matters raised and our response	Pursue new avenues of growth through entry into new business verticals - Entry into retail and mobility sector Deliver attractive returns commensurate with risks undertaken - Organic and inorganic growth across key verticals Strengthen balance sheet through reducing gearing - Capital injection through Rs. 9.0 bn rights issue - Proactive and ongoing negotiations with banks through Central Treasury Timely and accurate information - Timely communication of all price-sensitive information to the Colombo Stock Exchange	Market-competitive remuneration - Market adjustments to remuneration Conducive and stimulating work environment - Performance-driven culture - Increased focus on training and development - Year-round event calendar Opportunities for career development - Succession planning across key positions to build talent pipelines Work-life balance - Family-friendly work policies including paternity leave and allowances for child-care	Innovation and new product development - Increased emphasis on value-added product offerings Responsible and sustainable business - Embedding sustainable practices into processes and decision-making - Supplier chain due diligence across several verticals Customer service - Ongoing employee training on service excellence Affordable pricing - Benefit of cost reductions (when applicable) passed on to customers
Link to materiality	- Macro-economic impacts - Foreign exchange impacts - Government policy - Operational efficiency and productivity	- Operational safety and emergency preparedness - Employee value proposition and well-being	- Customer satisfaction - Evolving customer requirements
Integrating feedback into decision-making	Shareholders' concerns (including those of minority shareholders) are brought to the attention of the Board of Directors and GMC members and incorporated into both strategic and operational decisions as required.	Identified employee concerns are escalated to the relevant GMC and Group HR Division which formulates the Group's overarching HR strategy for the year	Customer feedback is a key input in determining product development, marketing and sales strategy and pursuing opportunities in new markets
	 Refer to page 192 for further information	 Refer to page 204 for further information	 Refer to page 203 for further information

Fair and timely payment ⊙ Mechanisms to ensure timely payment Opportunities for business growth ⊙ Connectivity to global supply chains through international expansion ⊙ Share insights on future demand conditions to support better visibility and planning Access to training and development ⊙ Ongoing investment in supplier development and capacity building  Refer the Group's ESG Report for further information on stakeholder value creation	Alignment to national development agenda ⊙ Emphasis on governance and fair business practices ⊙ Strategic emphasis on export-orientation ⊙ Continued generation of tax Compliance to all relevant regulations ⊙ Mechanisms across the Group to ensure compliance ⊙ Strengthening the Group's bribery and anti-corruption procedure Accelerate positive impacts ⊙ Significant local value addition ⊙ Direct and indirect employment generation ⊙ Ongoing investment in community engagement and environmental preservation	Generating employment in the localities of operations ⊙ Efforts to recruit from adjacent communities as far as reasonably possible CSR initiatives to address prevalent community issues ⊙ Ongoing investments in strategic CSR programmes Environmental preservation and minimising environmental impacts ⊙ Monitoring and measuring environmental KPIs to minimise adverse impacts 
⊙ Principal relationships ⊙ Environmental and social issues along value chain	⊙ Domestic and international government policy ⊙ Community and livelihood development ⊙ Managing environmental and ecological impacts	⊙ Community and livelihood development ⊙ Managing environmental and ecological impacts
⊙ Identified concerns are communicated by relevant procurement departments to the respective leadership teams who provide due consideration when determining working capital management and procurement-related decisions	⊙ Regulatory developments are consistently monitored by the Sectors to which they are relevant and compliance is ensured through the Compliance/Internal Audit functions	⊙ Identified community issues are swiftly addressed at operational site level or escalated to Sector Head Office/Group level if required
 Refer to page 203 for further information		 Refer to page 203 for further information

Operating Landscape

The operating landscape is shaped by an increasingly interconnected mix of external and internal forces. These encompass both traditional and emerging risks, including climate change, technological disruption, widening inequalities, and cybersecurity threats. While direct control over certain factors may be limited, all relevant trends are continuously assessed to mitigate risks and capitalise on emerging opportunities. The key factors influencing the environment during the year are outlined below, while sector-specific industry trends are explored further in the Portfolio Reviews from page 212 to page 317 of this Report

ECONOMIC ENVIRONMENT

Global economy: The global economy expanded by 3.3% in 2025, reflecting the gradual easing of financial conditions in advanced economies and strong domestic demand in emerging and developing economies. The gradual abatement of trade tensions and supportive financial conditions paved way for a resilient global economy, although momentum varied across countries and sectors.

However, since the escalation of geopolitical tensions in the first quarter of 2026, future uncertainty has intensified, with the conflict placing additional strain on an already fragile global landscape. Global growth is expected to moderate in 2026 before stabilising, while inflation may rise modestly in the near term. Downside risks persist, particularly from geopolitical tensions, trade disruptions, and structural vulnerabilities, reinforcing the importance of policy stability, adaptability, and international cooperation.

GDP growth (%)	2025	2024
-Global	3.3	3.3
-Advanced economies	1.7	1.8
-USA	2.1	2.8
-EU	1.4	0.9
-UK	1.4	1.1
-Emerging economies	5.4	4.3
-China	5.0	5.0
-India	7.3	6.5
Headline inflation (%)	4.1	5.8
Global trade volumes (%)	4.1	3.6
Commodity prices (%)		
-Oil	-14.2	-1.8
-Non-fuel	9.4	3.7

Sri Lankan economy

7.8%

Industrial growth

1.4%

Agriculture growth

3.3%

Services growth

GDP growth

Sri Lanka recorded a GDP growth of 5% in 2025, as the macroeconomic environment demonstrated gradual yet definitive signs of stability, led by a stronger political mandate and policy continuity. Continued fiscal and tax reforms, strengthened governance and anti-corruption initiatives, along with wider structural measures to enhance productivity and competitiveness, played a key role in bolstering investor confidence.

Interest rates

Overall market interest rates declined in 2025, supported by accommodative monetary policy, low inflation, improved credit ratings, and reduced risk premia, despite a modest uptick toward year-end due to short-term rate pressures.

External sector

Sri Lanka's external sector strengthened during the year, recording a USD 1.7 billion current account surplus despite a widening merchandise trade deficit, as imports grew by 14.0% compared to a 6.3% increase in exports, largely driven by higher vehicle imports. Gross official reserves amounted to USD 7 bn by end-March 2026, sufficient to cover 3.8 of imports. Exchange rate movements gradually depreciated, with the Sri Lankan Rupee depreciating by 6.3% against the US Dollar on a year-to-date basis as at end-March 2026.

GDP growth (%)	2025	2024
Overall	+5.0	+5.0
- Agriculture	+1.4	+1.2
- Industrial	+7.8	+11.0
- Services	+3.3	+2.4
Per capita GDP (USD)	5,003	4,546
NCPI (y-o-y) end	2.9	-2.0
Year-end exchange rate (Rs/USD)	309.99	292.58
Unemployment rate	3.9	4.4
Fiscal deficit (% of GDP)	-2.3	-6.8
All Share Price Index	22,624	15,945

Operating Landscape

ECONOMIC ENVIRONMENT

Regional economies

Thailand

Thailand's economy recorded moderate growth in 2025, with GDP expanding by 2.4%, supported by stronger private investment, rising consumer spending, and continued government stimulus measures. Economic momentum improved notably toward the latter part of the year, driven by investment in machinery, equipment, and electric vehicle-related consumption. However, elevated household debt, structural competitiveness challenges, and softer tourism recovery continued to constrain broader expansion. Meanwhile, the Thai Baht recorded gradual depreciation during the year.

Maldives

Following significant economic pressures in the previous year, the Maldives economy demonstrated a gradual recovery in 2025, with GDP growth accelerating to 5.4%, supported primarily by strong tourism activity and a sharp rebound in the fisheries sector. Gross foreign reserves improved significantly, reaching USD 1.3 billion by February 2026, supported by stronger travel receipts and regulatory measures although usable reserves remained relatively constrained. Looking ahead, growth is expected to moderate in 2026 as escalating Middle East tensions weigh on tourism demand, increase energy costs, and heighten the economy's exposure to external vulnerabilities.

Bangladesh

Bangladesh's economic growth slowed to 3.5% in FY2025, marking its third consecutive year of deceleration, as political instability, financial sector weaknesses, and weakened household purchasing power weighed on economic activity. Slower domestic and external demand, combined with restrictive monetary and fiscal policies further constrained consumption and investment. Inflation remained elevated due to persistent supply-side pressures, despite a broadly balanced current account. Looking ahead, growth is projected to gradually recover in FY2026 and FY2027 as political uncertainty eases, investor confidence improves, and consumption and investment regain momentum although This recovery, however, will remain dependent on sustained macroeconomic stability, easing global supply pressures, and the avoidance of prolonged geopolitical disruptions.

Impact on Hayleys

Opportunities and levers

- ⊙ Regional diversification
- ⊙ Realignment of supply chains
- ⊙ Regional tourism opportunities

Risks

- ⊙ Potential impact on global demand & supply chain disruptions
- ⊙ Currency volatility
- ⊙ Commodity and input price volatility

GEOPOLITICAL DYNAMICS

The geopolitical landscape remained highly volatile, shaped by escalating regional conflicts, shifting alliances, and mounting strategic tensions across key trade corridors. Most notably, the intensification of military conflict in the Middle East since late February marked a significant inflection point, destabilising the international operating landscape and reinforcing a broader trend of rising geopolitical uncertainty. The latest crisis emerged against the backdrop of a series of disruptive global events that have progressively reshaped international relations in recent years. The conflict materially disrupted critical infrastructure and strategic maritime and air routes, underscoring the vulnerability of global trade networks to geopolitical shocks. At the time of preparing this Report, the situation remains fluid, with a broad spectrum of potential outcomes ranging from diplomatic de-escalation and ceasefire to a significant escalation of hostilities, an escalation in energy and petroleum based materials, all of which could have materially significant repercussions. Potential implications on Sri Lanka are summarised below:

Impact of higher commodity prices

Energy price volatility

Second-order impacts of inflation expectations, particularly energy and food prices

Potential impacts on worker remittances

Potential depreciation of currency

Trade and logistics disruptions

Impact on Hayleys

Opportunities and levers

- ⊙ Volatile freight rates & demand for logistics and transport
- ⊙ Supply chain realignment and diversification of sourcing destinations by global buyers
- ⊙ Agricultural and commodity positioning given escalating global food security concerns

Risks

- ⊙ Sharp escalation in input prices including commodities, fertilizers, aluminium and fuel
- ⊙ Supply chain disruptions
- ⊙ Investment and capital allocation uncertainty

CLIMATE CHANGE AND ENVIRONMENTAL CONCERNS

The growing inability to meet human development needs within the planet's ecological boundaries represents a critical global risk with far-reaching environmental, social, and economic consequences. For organisations such as Hayleys, the escalating challenges of environmental degradation, biodiversity loss, resource scarcity, and climate-related disruptions present increasingly material business risks. These evolving pressures can significantly impact operations through heightened supply chain vulnerabilities, stricter regulatory demands, shifting stakeholder expectations, and increased exposure to operational and strategic disruptions.

The World Economic Forum's Global Risks Report provides a comprehensive overview of the most significant short, medium, and long-term risks shaping the global landscape. Environmental risks continue to dominate the long-term risk profile as listed below:

1. Extreme weather events	6. Nature resource shortages
2. Biodiversity loss and ecosystem collapse	7. Inequality
3. Critical change to Earth systems	8. Cyber insecurity
4. Misinformation and disinformation	9. Societal polarisation
5. Adverse outcomes of AI	10. Pollution

Impact on Hayleys

Opportunities and levers

- ⊙ Sustainable innovation and new market access
- ⊙ Potential access to sustainable finance
- ⊙ Build reputation and stakeholder trust

Risks

- ⊙ Direct implications on yield and production quantity of Agriculture and Plantations Sector
- ⊙ Disruptions along supply chains which rely on agricultural material

Operating Landscape

TECHNOLOGICAL DISRUPTION

Rapid technological advancement and the emergence of transformative capabilities such as data analytics, robotics, blockchain, and artificial intelligence present significant opportunities for organisations to enhance operational efficiency and redefine traditional business models. On the other hand, these developments also introduce material risks, including cybersecurity threats, data privacy concerns, rapid technology obsolescence, and the growing challenge of adapting workforces to an increasingly digital operating environment.

Artificial Intelligence

Artificial intelligence offers significant opportunities to improve efficiency, innovation, and decision-making, while also posing risks related to governance, cybersecurity, ethical concerns, and workforce disruption.

Robotics

Robotics supports improved agility by streamlining complex processes, improving consistency, and supporting scalable production.

Obsolescence of legacy systems

The obsolescence of legacy systems poses a growing strategic risk to organisations, potentially limiting agility, increasing operational inefficiencies, and constraining their ability to adapt to evolving technological demands and competitive pressures.

Data analytics

Advanced data analytics enhances decision-making within organisations through improving forecasting and providing deep strategic insights.

Process automation

Process automation and digitalisation in manufacturing environments present significant opportunities to enhance productivity, cost efficiency, and operational scalability, while also requiring organisations to manage integration complexities and workforce transformation.

Impact on Hayleys

Opportunities and levers

- ⊙ Operational efficiency and productivity gains
- ⊙ Enhanced decision-making through better data insights
- ⊙ Innovation and product development through new digital capabilities

Risks

- ⊙ High capital expenditure requirements
- ⊙ Workforce displacement and skills gaps
- ⊙ Operational disruption during implementation or system failures
- ⊙ Cybersecurity threats and data breaches

THE EVOLVING WORLD OF WORK

The world of work continues to evolve in response to shifting macroeconomic conditions, social and political developments, rapid technological advancement, and accelerating digital transformation. At the same time, increasing competition for specialised talent and scarce skills is reshaping workforce dynamics.

Digital transformation reshaping workflows and roles

Growing focus on driving stronger **workplace inclusion and equitable opportunities**

Increased focus on **employee well-being and mental health**

Multi-generational workplaces are creating new expectations around leadership, communication, and career development.

Heightened demand for scarce skills

Impact on Hayleys

Opportunities and levers

- ⊙ Enhanced productivity and efficiency through automation
- ⊙ Stronger innovation and agility
- ⊙ Greater resilience through agile operating models

Risks

- ⊙ Resistance to change stemming from automation and digital disruption
- ⊙ Leadership and succession challenges
- ⊙ Employee disengagement or burnout

Materiality

The Group undertakes an annual materiality assessment to identify and evaluate the issues most relevant to its operations and stakeholders, enabling a structured prioritisation of key matters requiring attention. This assessment is guided by a double-materiality perspective, encompassing both the impact of the Group's activities on society and the environment, as well as the influence of environmental and social factors on the Group's financial performance. The process is carried out through three distinct stages, as outlined below.

ESTABLISH PROCESS PARAMETERS

List of potential material issues are selected as process parameters and a reference point in conducting the materiality assessment by the Group ESG Division.

- 1 Discussions with Sector leadership teams
- 2 Evaluation of the Group's business model and strategic aspirations
- 3 Stakeholder feedback
- 4 Emerging risks and opportunities

SECTOR LEVEL PRIORITISATION OF MATERIAL TOPICS

The issues are prioritised at Sector level using the following filters to assess the relative importance of the topics to stakeholders and the importance to the organization.

FILTERING TESTS

Organisational materiality	Impact materiality
Financial impact	Stakeholder impact (7 stakeholder groups)
Innovation opportunity	Environmental impacts
Reputation	
Externalities	
Strategic link	
Risk	

AGGREGATION AT HAYLEYS PLC LEVEL

Sector level materiality matrices are aggregated at Hayleys PLC weighted using a suitable metric based on the importance of the Sector to the Group.

- **Economic topics:** Revenue contribution to the Group
- **Social factors:** Headcount of the Sector
- **Environmental factors:** Relative impact to the Group's carbon footprint and water consumption

Materiality

RESULTS OF 2025/26 MATERIALITY ASSESSMENT

During the year, 22 material topics were identified from the materiality assessment process. Two new material topics were identified during the year; tax, regulations and compliance while social issues along supply chains which was material in 2024/25 was classified as not being material this year. Reflecting the Group's evolving reporting approach, financially material matters are comprehensively addressed within this Integrated Annual Report, while topics of high impact materiality have been presented separately in the ESG Report.

Refer the Group's ESG Report for impact materiality

Risks & Opportunities

The Group's risk management process is embedded across all levels of the organisation, fostering risk-informed decision-making supported by clear accountability and oversight. To ensure risks are effectively identified, assessed, managed, and monitored, the Group adopts multiple lines of defense model, providing structured assurance to stakeholders over the effectiveness of its risk management and internal control processes.

RISK LANDSCAPE 2025/26

The Group's risk and opportunity landscape is shaped by the political, economic, social, technological and environmental context within which it operates. In an increasingly dynamic operating environment, sound risk management remains critical in enabling the Group to respond and adapt to evolving conditions through informed and timely decision-making. This underscores the importance of maintaining a proactive and agile approach to risk management, strengthening the resilience of the operating model and supporting long-term value creation.

In the Global Risk Report for 2026, the World Economic Forum highlights an increasingly fragmented and volatile global environment, shaped by the convergence of geopolitical, environmental, societal, technological and economic risks. Geopolitical risks emerged as the most immediate concern for 2025, with state-based armed conflict identified as the top global risk amid ongoing wars, geopolitical tensions. Environmental risks continue to dominate the medium- to long-term horizon while technological risks have also grown in prominence particularly misinformation and disinformation.

Short-term (2 years)

APPROACH TO RISK MANAGEMENT

The Group's Enterprise Risk Management framework supports strategic and operational resilience as we pursue our strategic aspirations and deliver stakeholder value through economic cycles. The Group follows a bottom-up approach to identify, prioritise and mitigate risks- which is subject to quarterly review to ensure completeness, relevance, robustness of mitigating actions as well as Board oversight.

Risk Governance

The Board serves as the focal point for management of risk and is assisted by the Audit Committee in discharge of this duty. During the year under review, the Company also initiated proceedings to establish Risk Management Committees with Board representation, thereby further strengthening risk oversight. With the adoption of SLFRS S1 and S2 Sustainability Disclosure Standards, the ESG Steering Committee assists the Board in the management of SRROs, which includes climate, nature and other sustainability risks. The diverse business sectors of the Group have high levels of autonomy in driving their businesses with Group governance structures playing a key role in harmonizing policies, sharing best practice, guiding strategic direction, managing risks and optimizing resource allocation across the Group as depicted below. The Group also adopts the three-lines of defense model (as illustrated below) which ensures effective segregation and discharge of duties.

The Group adopts the COSO Framework in assessing potential risks which are ranked and prioritised based on impact and likelihood of occurrence. The risk management process is as follows;

Risks & Opportunities

WIDENING THE LENS OF RISK

As discussed in last year's Annual Report, the Group has progressively advanced discussed its' sustainability-risk management frameworks and practices in line with the adoption of SLFRS S1 and S2.

Connectivity of risks: Sustainability risks are typically pervasive in nature, demonstrating interactions across other types of risks. By adopting a unitary risk framework which integrates ESG risk assessments with existing business risk processes, the Group seeks to better understand these interactions, thereby providing leadership with the insights required to embed sustainability considerations into strategic decision-making.

The Group's impacts on the environment and society

opportunities including formulating response strategies and assessing progress against the Group's ESG roadmap (including the climate strategy).

- ◉ Sector-level ESG Steering Committees were established during the year under review, facilitating more focused and systematic management of industry-specific SRROs and CRROs
- ◉ Risk identification: Self-assessment of ESG risks and opportunities at Sector level through ESG risk templates
- ◉ Data inputs: An array of operational data and non-financial performance indicators (based on reporting frameworks) which are monitored on a monthly basis

Further details relating to the Group's approach in managing SRROs are given on page 140 of this Report.

INTERVENTIONS IN 2025/26

- ◉ Commenced quarterly reporting of SRROs and CRROs to the Board of Directors, enhancing Board oversight and ensuring focused attention on emerging sustainability-related and climate-related risks and opportunities
- ◉ Implemented a Group-wide Risk Management Procedure establishing clearly defined mechanisms for the identification, prioritisation, assessment and management of risks

INTERACTION OF RISKS

The following infographic demonstrates the link between these strategic, operational and other risks and the climate-related risks identified above. The size of the circle represents the magnitude of the risk.

MANAGEMENT OF SRROS

- ◉ Roles and responsibilities: The Group ESG Steering Committee is responsible for the management of sustainability, climate and nature-related risks and

INTEGRATED THINKING & EFFICIENT RESOURCE ALLOCATION

Several Hayleys PLC Centre functions monitor external developments and a variety of internal factors for early warning signs of threats and opportunities to align plans and ensure strategic relevance. The following functions come together at Group level to identify risks and opportunities and to mitigate them and manage them. The Group Management Committee plays a critical role as well, providing insights in to diverse areas of expertise, enabling early identification of potential risks, sometimes when it's just a whisper. The diagram below sets out the effective risk management structure of Hayleys Group, reflecting the evolving nature of this increasingly important function.

Department & Area of Focus	
CORPORATE AFFAIRS UNIT - Manages Group financial performance and resilience - Monitor external landscape to identify emerging threats including impending regulations and other pressure points	
GROUP RISK AND INSURANCE DIVISION - Formulation and negotiation of the Group's insurance programme - Monitoring risk exposures across the Group	
MANAGEMENT SYSTEM AUDIT & REVIEW DEPARTMENT (MSA&RD) Manage risks at a strategic level whereas MSA&RD approach it primarily from a risk mitigation and management perspective Responsible for collating risk registers, constructively challenging them and presenting to Group Management Committee, Audit Committee and Board	
STRATEGIC BUSINESS DEVELOPMENT UNIT - Monitoring the PESTEL factors to identify new opportunities as well as assess risks related to the opportunities - Review risk from a portfolio perspective	P E S T E L ⊙ Political ⊙ Economic ⊙ Social ⊙ Technological ⊙ Environmental ⊙ Legal
GROUP TREASURY - Management of Group liquidity including Foreign Exchange liquidity - Managing Group funding including costs of funding	
GROUP ESG - Review and monitor non-financial indicators to identify areas of concern and opportunities to optimise resource allocation - Monitor external sustainability landscape to identify emerging threats including impending regulations and evolving customer considerations	
GROUP SOURCING - Ensuring defined procurement procedures are carried out in line with the Group Procurement Policy - Support Sectors in identifying, monitoring and managing risks across the supply chain	
GROUP IT - Responsible for safeguarding the digital infrastructure and information assets of the Group - Surveillance to assess cyber threats - Cybersecurity	

Risks & Opportunities

TOP RISKS OF 2025/26

Market risks

GEOPOLITICAL RISK						ECONOMIC RISK					
Impact	3	Likelihood	3	Risk rating FY 2025	9 6	Impact	3	Likelihood	3	Risk FY 2025	9 9
Strategic pillar		 				Strategic pillar		 			
Capitals impacted		FC SC				Capitals impacted		FC			
Material matters		Domestic and international government policy				Material matters		Domestic and international government policy /macro-economic risk			
Context and potential impact Escalating geopolitical tensions and armed conflicts continued to disrupt global trade and supply chains, contributing to volatility in commodity, energy and transportation costs. Given the Group's exposure to both local and international markets, such developments could impact procurement costs, supply chain continuity, operating margins and overall business performance across several sectors.						Context and potential impact While macro-economic conditions have stabilised, the recovery remains fragile particularly given global headwinds, policy uncertainty, and insufficiently deep debt restructuring weighing down the overall outlook. These vulnerabilities could impact growth potential, cross border transactions and international business operations.					
Mitigating actions • Pursuing increased diversification of export markets, particularly in non-traditional markets • Focused growth in selected markets • Value-added product propositions which are relatively price inelastic						Mitigating actions • Reduce dependency on domestic market through expanding export-orientation • Maintain strong relationships with stakeholders, lobby groups and banks					

LIQUIDITY AND FINANCIAL STABILITY						SUBDUED DEMAND					
Impact	3	Likelihood	3	Risk rating FY 2025	9 9	Impact	2	Likelihood	3	Risk FY 2025	6 6
Strategic pillar		 				Strategic pillar					
Capitals impacted		FC				Capitals impacted		FC SC			
Material matters		Domestic and international government policy /macro-economic risk				Material matters		Macro-economic impacts Evolving customer requirements			
Context and potential impact Financial stress and impaired ability to meet future debt obligations and potential liquidity shortages in the Banking System and the Money Market could impact sector operations. With effect from 1 January 2028, the Single Borrower Limit (SBL) will be reduced to 25% of Tier 1 capital, replacing the existing limit of 33% of the Bank's total capital, thereby constraining the Group's ability to access further funding						Context and potential impact Demand could be impacted by reduced disposable incomes, inflationary pressures and potential inventory build-up which can affect top line growth. Meanwhile, the prevalent global geopolitical tensions could lead to subdued demand across major export markets such as North America, UK, European region and Japan.					
Mitigating actions - Improve liquidity risk oversight by Board and GMC - Derive Group synergies to manage borrowings - Diversify funding sources through exploring non-banking and offshore opportunities						Mitigating actions - Diversification across market and product categories - Forward contracts with key buyers - Focus on new customer acquisition - Explore opportunities to establish distribution networks in key export markets					

Operational risks

INCREASING COST OF RAW MATERIALS AND DISRUPTIONS TO SUPPLY CHAINS						DATA PROTECTION AND CYBERSECURITY RISKS					
Impact	2	Likelihood	3	Risk rating FY 2025	6 6	Impact	3	Likelihood	2	Risk FY 2025	6 6
Strategic pillar		 				Strategic pillar		 			
Capitals impacted		FC SC				Capitals impacted		IC SC			
Material matters		Principal relationships/Operational efficiency and productivity/Domestic and international government policy				Material matters		Technology and product innovations			
Context and potential impact potential disruptions to supply chains could exert pressure on margins and challenge predictability and future planning.						Context and potential impact Cyber-attacks or ransomware attacks and potential losses to confidential stakeholder data can lead to legal implications, financial loss and damage credibility and corporate reputation					
Mitigating actions - Proactive and daily monitoring of raw material pricing - Raw material planning and effective inventory management - Diversification of supply chains - Building long-term relationships with suppliers through strategic initiatives						Mitigating actions - IT governance policies and structures in place - Comprehensive mechanisms implemented to comply with the Personal Data Protection (PDP) requirements - Regular employee awareness on mitigating cybersecurity risks - Robust Business Continuity Plan in place					

HIGH STAFF TURNOVER AND EMPLOYEE RELATIONS						HIGH COST OF PETROLEUM PRODUCTS AND INCREASE IN ELECTRICITY COST					
Impact	2	Likelihood	2	Risk rating FY 2025	4 6	Impact	3	Likelihood	3	Risk FY 2025	9 NA
Strategic pillar						Strategic pillar					
Capitals impacted		FC HC				Capitals impacted		FC			
Material matters		Employee value proposition and well-being				Material matters		Energy consumption			
Context and potential impact While the prevalence of talent migration has slowed in comparison to the previous year, it still remains a key risk-underscoring the importance of continued investments in employees to ensure retention.						Context and potential impact Amid escalating geopolitical tensions and growing geoeconomic fragmentation, global petroleum and electricity cost have seen upward pressure in recent months. Ongoing conflicts, supply chain disruptions, and volatility in global energy markets contributed to upward pressure on fuel and energy prices.					
Mitigating actions - Enhancing employee value proposition through an array of retention, welfare and development strategies - Proactive and close engagement with employees to ensure that concerns are swiftly identified and addressed - Maintain cordial relationships with employee unions						Mitigating actions - Maintaining adequate fuel stocks and inventory levels, together with functional backup systems, to ensure operational continuity during temporary supply disruptions or shortages. - Reducing dependence on fossil-fuel energy sources through transitioning to renewable energy					

Risks & Opportunities

Sustainability-related risks

PHYSICAL RISKS OF CLIMATE CHANGE						TRANSITIONAL RISKS OF CLIMATE CHANGE					
Impact	3	Likelihood	2	Risk rating FY 2025	6 6	Impact	2	Likelihood	3	Risk FY 2025	6 6
Strategic pillar		 				Strategic pillar		  			
Capitals impacted		FC NC				Capitals impacted		FC SC			
Material matters		Physical climate risks/ Climate change adaptation				Material matters		Evolving climate regulations, Evolving customer requirements			
Context and potential impact As a Group which has extensive interests in plantations and agriculture as well as a high degree of reliance on agricultural input materials, the Group is directly exposed to physical impacts of climate change including fluctuations in rainfall and precipitation levels, rise in temperatures and increasingly erratic weather patterns						Context and potential impact Key sectors in the Group are exposed to climate-related transition risks such as increasingly stringent environmental and emission regulations and energy policies					
Mitigating actions - Close monitoring of weather patterns and potential impacts - Climate adaptation measures across sectors - Strengthen environmental management systems through certifications						Mitigating actions - Close engagement with customers on identifying and responding to sustainability-related demands - Gradual transition to renewable energy sources - Environmental targets centered on emission reductions, water consumption and waste management					

ECOLOGICAL IMPACTS					
Impact	2	Likelihood	2	Risk rating FY 2025	4 NA
Strategic pillar					
Capitals impacted	SC NC				
Material matters	Managing environmental and ecological impacts				
Context and potential impact Impacts of ocean and soil erosion, loss of biodiversity and changes to ecosystem balance which over the long-term can lead to increased overhead costs and impacts on the quality, quantity and pricing of agricultural raw materials					
Mitigating actions Processes to identify impacts and dependencies of nature Incorporating principles of environmental sustainability, resource optimisation					

OPPORTUNITIES

While remaining strategically focused on navigating emerging risks, the Group seeks to leverage opportunities to pursue potential areas for growth and drive long-term value creation. These identified opportunities are a vital input into the strategic planning and budgeting cycle, and shape the Group's overall strategic aspirations. Key opportunities identified are summarised below from a portfolio perspective; the implications on each sector are discussed in further detail in the Sector Reviews on page 212 to 317 of this Report.

STRATEGIC PILLAR: PORTFOLIO OPTIMISATION

Business diversification – Strategic investments in complementary industry sectors and verticals enable the generation of long-term value through leveraging domain-specific knowledge and synergies. During the year the Group announced its strategic entry to the large-scale supermarket sector, which is anticipated to emerge as a significant earnings generator in the future.

Regional expansion and market diversification

– The Group is actively pursuing regional opportunities across its key business lines, as it seeks to expand its geographical reach thereby building further resilience. Given geopolitical tensions and geo economic confrontations in recent months, the Group has continued pursuing expansion in non-traditional markets such as Asia and Africa.

Acquisitions – The Group has a strong history of growth through acquisition and has a finely-honed team in place for the purpose with the expertise required. Major acquisitions in recent years such as Singer (Sri Lanka) PLC, Fentons, South Asia Textiles and Horana Plantations which are now considerable contributors to Group earnings, attesting to the effectiveness of the Group's acquisition strategy. During the year the Group

Risks & Opportunities

formed/acquired several new entities across its verticals, enhancing its long-term revenue generating capabilities.

STRATEGIC PILLAR: CUSTOMER CENTRICITY

Expansion in value-added product segments and customers- Sectors are pursuing increased penetration of premium, value-added products segments with the aim of limiting vulnerabilities to price competition and margin pressure. The Group is aptly positioned to drive growth in such niche segments given its expertise in R&D, human capabilities and reputation.

STRATEGIC PILLAR: NURTURING INSPIRED TEAMS

Talent pipeline and succession – The Group remains committed to building a strong leadership pipeline through structured succession planning and focused talent development initiatives. Potential leaders are identified and nurtured through continuous learning, cross-functional exposure, mentoring and performance-driven development programmes,

Upskilling and learning platforms- With the demand for future-ready skills growing, emphasis on continuous learning presents a significant opportunity for the Group. The Group is exploring the use of digital and AI-driven learning platforms which proactively address skills gaps, support career development, and enhance employee engagement.

Mental health and well-being- The focus on mental health and well-being presents a meaningful opportunity to foster a more engaged, satisfied and resilient workforce particularly given the increasing awareness on the impacts of stress, burnout and work-life balance. Structured and holistic well-being programmes can lead to increased productivity, improved morale

and stronger loyalty, which can further enhance the Group's employer brand and emerge as a key differentiator in its HR proposition.

STRATEGIC PILLAR: INCLUSIVE BUSINESS MODELS

Expand presence along value chain

- The sectors have potential to widen their presence along the value chain through backward or forward integration, improving synergies, margins, stability of supply chains and market presence.

Diversification of supply chains –

Increasing implications of climate change, geopolitical dynamics and technological shifts are disrupting global value chains, leading to increased volatility in raw material prices. Geographical diversification of supply chains, particularly for agricultural commodities presents a significant opportunity for the Group to secure its supply chains while also injecting value across a broader ecosystem of business partners.

STRATEGIC PILLAR: STRATEGIC ESG INTEGRATION

Energy transition – The Group has a portfolio of investments in renewable energy and there are opportunities for investments in this sector in line with the country's long-term power generation plan. Additionally, the increasing cost of fuel and electricity will reduce payback periods of investments in alternative energy solutions at manufacturing locations, supporting investments in solar energy and other renewable and sustainable energy sources.

Sustainable Innovation– We innovate products with a purpose and work closely with customers to identify their needs to make them customer centric. It is a key opportunity that has propelled our growth and we will continue to invest in research and development to drive innovation. A number of our

products are necessary to address issues such as water and air pollution and environmental degradation. We will continue to stay at the cutting edge of sustainable innovation to drive growth in our businesses.

Digitalisation – Digital transformation has been identified as a cross-cutting enabler which can drive the acceleration of all five strategic aspirations. The Group's digital roadmap centers on the key pillars of workflow automation, IoT driven digitisation, modernisation of applications and AI and machine learning with the aim of accelerating digital maturity across all sectors.

PURPOSE-DRIVEN
STRATEGY

AN ARC OF REGENERATION

Beneath the forest floor exists a vast mycelial network; an interconnected system of fungal threads that links trees and plants across ecosystems through symbiotic relationships. Through these root networks, nutrients, water, and chemical signalling compounds are exchanged between plants, contributing to growth, adaptation, and ecosystem functioning. Above ground, what appears as isolated vegetation is supported by these subterranean connections, which play a role in enhancing ecological resilience and resource distribution within the environment.

At Hayleys PLC, our strategy reflects a commitment to intelligence, connectivity, and purposeful integration. By linking diverse businesses, capabilities, and stakeholders, we enable the flow of knowledge, resources, and opportunity across the Group. This interconnected approach strengthens collaboration, supports agility in responding to emerging challenges, and enhances overall performance. Through alignment and coordination, we build resilience across our operations, ensuring that each part of the Group contributes to sustainable growth and long-term value creation.

Purpose-driven Strategy

The Group's overarching strategic aspirations are purpose-driven and centered around the 5 pillars as demonstrated below. While Sectors adopt unique strategies which reflect the risks, opportunities, and core competencies of each business the Board sets the overall strategic direction. The strategic pillars are formulated by the Strategic Business Development Unit (SBDU) at Hayleys PLC and cascaded to each Sector under the leadership of the Group Management Committee. Given the Group's recent thrust towards leveraging automation and technology, Digital Transformation is now recognised as a cross-cutting enabler, that drives the effective execution of all five pillars.

GOVERNANCE AND REMUNERATION PRACTICES SUPPORTING STRATEGY

Multiple layers of performance review from sector-level Executive Committees to the Group Management Committee, Board Committees and the Board ensure a high level of monitoring on delivery of strategy. The GMC meets weekly and additional meetings may be called at short notice whenever the need arises. Monthly and quarterly performance is monitored against defined targets, with active debate encouraging the exploration of new ideas and diverse perspectives. The remuneration of GMC members and Sector heads are linked to relevant strategies and KPIs, which are cascaded across relevant functions thereby driving goal congruence across the organisation.

EVOLVING OUR REPORT:

As discussed on page 12, as part of our evolution in reporting, this year we have adopted a more strategy-centred narrative. The following pages provide a detailed account of how the Group delivered on its strategic priorities during the year. These strategic interventions are directly linked to our value creation process, demonstrating their impact on capital stewardship, stakeholder outcomes, and the management of key risks and opportunities, as illustrated below

Portfolio Optimisation

Building a resilient business portfolio which is centered on diversifying businesses, geographical footprint, customer segments and revenue streams

HOW WE MEASURE PROGRESS

Revenue growth: Demonstrates the success of the Group's expansion strategy and effectiveness of how products and services are catering to demand.

EBIT growth: Measures the Company's core profitability and the extent to which Revenue growth is translated to profitability

REVENUE AND EBIT GROWTH

Link to Remuneration

Revenue and EBIT growth is used as a metric to assess Sector and Business level performance, which in turn is an input to determining performance-based remuneration

Link to Risks & Opportunities

Economic risk
Geopolitical risk
Liquidity and financial risk
Subdued demand
Regional expansion (Opportunity)
Business diversification (Opportunity)

Further information:

Portfolio Reviews: Page 212

Manufactured Capital: Page 200

CAPITAL INPUTS

CAPITAL TRANSFORMATION

FC Significant upfront capital investments

IC Strengthens institutional knowledge

HC Builds organisational agility and cross-functional capabilities

SC Expansion of stakeholder networks

TRADE-OFFS

The portfolio optimisation strategy involves certain trade-offs, particularly in the short to medium term, as investments in diversification, geographic expansion, and new business segments may place pressure on financial resources and increase operational complexity. Expansion into new markets and industries may also lead to a broader environmental footprint, potentially increasing resource consumption and oversight requirements relating to Natural Capital

■ Negative Impact ■ Positive Impact

Purpose-driven Strategy

OPERATIONAL CAPACITY AND MANUFACTURING CAPABILITIES

During the year, the Group continued to invest in ongoing efforts to strengthen capacity and production capabilities across its diverse verticals. These investments included new facilities, capacity enhancements and technology upgrades.

Key investments during the year are summarised below and discussed in further detail in the Portfolio Review Chapter from page 212 to 317 of this Report.

Eco Solutions	Integrated coir processing facility in Nikaweratiya	Rs. 504 mn
Hand Protection	6th manufacturing facility in Sri Lanka through the strategic conversion of an acquired plant - Commissioning of new next-generation natural rubber glove dipping plant and electrician's glove dipping plant in Kottawa	Rs. 5,653 mn
Purification	- Expansion of energy storage carbon manufacturing - Strategic capacity expansions in Thailand - Ongoing construction of the Group's 7th manufacturing facility in Philippines	Rs. 4,225 mn
Agriculture	Expansion of Cocolife operations with facility to manufacture concentrated coconut water	Rs. 984 mn
Plantations	State-of-the-art Kiruwanaganga Tea Factory commissioned by TTE	Rs. 1,877 mn
Construction Materials	- Installation of a new extruder and advanced technology for fully automated dye casting - Sheet processing equipment	Rs. 1,021 mn
Consumer & Retail	Singer: Launch of a mega store in Matara and renovation of branches	Rs. 1,582 mn
Energy, Mobility & Projects	- Launch of South Asia's largest OMODA & JAECOO flagship showroom - Kaiyi flagship showroom launched	Rs. 6,662 mn
Tea exports	Mabroc Teas: Construction of new manufacturing facility	Rs. 315 mn

BUSINESS DIVERSIFICATION

Sectors continued to pursue strategic diversification by expanding into new and complementary business areas that align closely with their core competencies. These interventions aim to unlock synergies across operations, strengthen value chains, and widen revenue streams while leveraging each sector's established competitive strengths and market presence. Key areas of diversification during the year include the following:

 Energy, Mobility & Projects Entry into mobility solutions by Hayleys Fentons	 Purification Increased focus on energy storage and value-added carbons	 Plantations Crop diversification
 Agriculture Coconut-based exports including concentrated coconut milk	 Hand Protection Specialised gloves including sports and electricians' gloves	 Industry Inputs, Power & Energy Advanced analytical medical services
The Group also announced its entry into the large format supermarket sector		

GEOGRAPHICAL DIVERSIFICATION

Amid evolving geopolitical dynamics, shifting trade patterns, and increasing macroeconomic uncertainties, Sectors have continued to prioritise geographic diversification. Accordingly, sectors such as Purification, Hand Protection and Eco Solutions sought expansion in non-traditional and emerging markets while Sectors such as Transportation & Logistics, Industry Inputs, Power & Energy continued to drive its regional expansion strategy.

WAY FORWARD

Looking ahead, the Group's earnings profile is expected to continue evolving as recent strategic investments mature and begin to deliver their full potential. Through ongoing portfolio optimisation, we are building a more balanced and resilient business mix, combining the strength of our established export-oriented sectors with new growth engines across complementary industries. While we remain focused on accelerating expansion within our globally competitive, foreign exchange-generating businesses, our strategic entry into sectors such as modern trade and consumer-facing industries will further diversify earnings streams and strengthen the resilience of our businesses.

Customer centricity

Innovative, cost-effective and sustainable solutions with excellent customer care to enhance the customer experience

HOW WE MEASURE PROGRESS

New products launched and in pipeline: Demonstrates responsiveness to market trends and ability to create new revenue

INNOVATION CAPABILITIES

Customer satisfaction rates:

Different platforms/tools used across the Sectors to measure customer satisfaction

Link to Remuneration

Customer satisfaction rates are a KPI for front-facing teams across verticals

Link to Risks & Opportunities

- Subdued demand
- Value-added product and service segments (Opportunity)
- Strengthen after sales service (Opportunity)

Further information:

- Portfolio Reviews: Page 212
- Intellectual Capital: Page 206
- Social & Relationship Capital: Page 202

CAPITAL INPUTS

CAPITAL TRANSFORMATION

- FC** Investment in technology improvements and training
- FC** Sales growth
- HC** Service capabilities and front-line competency
- SC** Customer retention and loyalty

TRADE-OFFS

In the short term, the customer centricity pillar necessitates tangible investment in technology, innovation and capabilities resulting in a draw-down of financial capital. Over the medium-to long term, these investments are expected to yield stronger customer loyalty, improved retention and sustainable revenue growth, reinforcing both Social & Relationship Capital and Financial Capital over time.

■ Negative Impact ■ Positive Impact

Purpose-driven Strategy

CUSTOMER PROFILE

The breadth and depth of the Group's operations have enabled it to build a global network of diverse customers, comprising retail and B2B customers spread across 5 continents. Customer acquisition in new and existing markets was a key priority during the year (refer to Portfolio Review from page 212 to 317 for further information). As such, the cater to approximately 2.1 mn customers during the year, as illustrated graphically below.

Our offering

Across its diverse sectors, the Group's extensive product portfolio is designed to address a broad spectrum of evolving needs across both retail and industrial customer segments, supporting customers at multiple stages of their journey. The comprehensive product landscape of the Group, reflecting the breadth and strategic relevance of its offerings, is illustrated below:

CUSTOMERS ACQUIRED

CUSTOMER VALUE PROPOSITION

Our customer value proposition is strategically designed to address the evolving and emerging needs of

- ✓ **Innovation**
- ✓ **Customer Service**
- ✓ **Product Stewardship**

our customers, as identified through continuous stakeholder engagement and customer insights highlighted on page 98. The core pillars of this value proposition, which guide how we create meaningful and differentiated customer value, are outlined alongside.

Innovation

The Group's capacity for innovation continues to be anchored in its research and development capabilities, a depth of

specialised talent, and an organisational culture that places continuous learning at its core. These foundational strengths have shaped the Group's strategic direction, driving advancement across both its product portfolio and operational processes. The Group further strengthens its innovation agenda through active partnerships with leading research institutions and universities, translating knowledge into commercially viable outcomes.

The Group's innovation record for the year is summarised below:

Purpose-driven Strategy

Customer service

As discussed in the Portfolio Reviews from pages 212 to 317, customer excellence remained a defining priority across the Group's Sectors during the year under review. This commitment was particularly prominent within Singer, Hayleys Fentons, and the Leisure Sector, given their direct consumer-facing nature across retail and service environments. Strengthening aftersales capabilities, enhancing contact centre operations, and investing in the continuous training and development of front-line staff were identified as critical focus areas, each contributing to an elevated customer experience and long-term brand loyalty.

Product stewardship

The Group's commitment to product stewardship is embedded across different aspects of its customer journey through compliance to certifications, internal policies as well as responsible marketing practices.

1.	PROCUREMENT/BUYING STAGE	Stringent procurement practices and strong relationships with suppliers limit the risk of potential issues at the purchasing stage
2.	MANUFACTURING	Compliance to an array of certifications and clearly defined policies, procedures and guidelines for manufacturing operations.
3.	MARKETING	A Responsible Marketing Guideline ensures the integrity and accuracy of all marketing communications. The Hayleys Group Corporate Communications Department reviews all key press releases and publications.
4.	PRODUCT USE	Compliance with a range of certifications which provide assurance to external stakeholders regarding the quality and safety of our products. These include the following certifications obtained by various sectors ⦿ ISO 9001: 2015 Quality Management Systems ⦿ ISO 22000: 2018 Food Safety Management Systems ⦿ British Retail Consortium Certification Safety and Quality certification for consumer products

WAY FORWARD

Looking ahead, the Group will continue to strengthen its customer centricity agenda across its key Sectors. Digitalisation will serve as a principal enabler with investments directed towards digital platforms and customer relationship management systems to deliver more responsive customer experiences. The Group will further its value-added innovation efforts, with a continued focus on developing products and solutions that address evolving needs. Structured investment in front-line staff development and service excellence training will equally remain a priority, recognising that capability building is fundamental to sustaining service quality.

Nurturing Inspired Teams

Building a dynamic, diverse and high-performing team which drives the Group's value creation aspirations

HOW WE MEASURE PROGRESS

Employee retention rate:

Showcases employee satisfaction levels and strength of the employee value proposition

Average training hours: Measures the Group's commitment to strengthen its human capital and align with strategic aspirations.

EMPLOYEE VALUE PROPOSITION

Link to Remuneration

Remuneration is performance driven focusing on employee satisfaction, retention, learning and development, succession planning, etc

Link to Risks & Opportunities

High staff turnover and employee relations

Geo-political impact

Upskilling and learning platforms (Opportunity)

The use of AI and Digital Transformation across the HR sphere (Opportunity)

■ Positive Impact

Refer the Group's ESG Report for further information on the Group's people agenda

Purpose-driven Strategy

APPROACH TO MANAGING TALENT

As a diversified Group, Hayleys operates a centralised Group HR Division that provides strategic oversight of the Group's people agenda and HR governance framework. This is complemented by decentralised HR functions at the Sector level, enabling effective alignment with industry-specific requirements and operational nuances. A comprehensive HR policy framework, supported by clearly defined procedures, ensures a consistent and equitable approach to talent management. These practices extend beyond regulatory compliance, aligning with recognised global benchmarks such as the UN Global Compact Principles 1 to 6 and the ILO Declaration.

Opportunities and levers

The Group's holistic HR policy framework encompasses key areas such as recruitment, employee development, performance management, disciplinary processes, grievance handling, data protection, health and safety, and ethical conduct. These policies provide a structured and consistent foundation for managing the employee lifecycle while promoting fairness, accountability, and responsible workplace practices.

Value proposition

Conducive, supportive and inclusive environment in which all employees feel connected, valued with opportunities for skills and career progression

HR priorities

- ⦿ Talent development
- ⦿ Employee well-being
- ⦿ A respectful workplace
- ⦿ Succession planning
- ⦿ Digital transformation

HR Targets: HR targets across the Group are guided by the Hayleys Lifecode, which establishes clear priorities under its key HR pillars of creating an engaged workforce and fostering a healthy and safe workplace. These include targets on attrition rates, training hours, anti-discriminatory training, leadership development, succession planning, etc.

RANKED AMONG SRI LANKA'S TOP 10 NATIONAL BEST EMPLOYERS

Reflecting the strength and growing recognition of the Group's employer brand, Hayleys was ranked among Sri Lanka's Top 10 National Best Employers at the inaugural EFC National Best Employer Awards 2025, organised by the Employers' Federation of Ceylon.

THE EVOLVING WORLD OF WORK

Workplaces across the Group continue to evolve in response to broader global shifts, including rapid technological disruptions and shifting employee expectations. As these dynamics are reshaping how organisations attract, engage and retain talent, these evolving factors are carefully considered in the formulation of the Group's HR strategy, ensuring its continued effectiveness.

THE HAYLEYS FAMILY

The Hayleys team consists of 38,746 employees deployed across a wide and diverse operational footprint, bringing together a rich mix of capabilities and backgrounds. Our workforce reflects the scale and variety of the Group's businesses, with talent spanning multiple disciplines, cultures, and markets.

Employee well-being

The Group remained committed to fostering employee well-being, with ongoing initiatives that support both mental and physical health, enabling a balanced and supportive work environment.

Purpose-driven Strategy

DIGITALISATION AND AUTOMATION

Building on the progress made in recent years, the Group continues to advance the HR digitalisation agenda in line with its broader digital transformation road map. These ongoing efforts enhance operational efficiency, improve employee experience, and enable more accurate, data-driven insights. Key developments during the year are listed below:

- ⦿ **Automation of HR reporting processes** to improve efficiency and accuracy, while reducing the burden on both Group HR and Sector HR teams and strengthening accountability.
- ⦿ **Rollout of the DMS HRIS mobile application** for non-executive employees across the Group, featuring sign-in and sign-out functionality, and geo-tracking capabilities to strengthen workforce management and monitoring.
- ⦿ **A centralised WDMS (Web Based Data Management System) tool** to monitor over 200 attendance machines across the Group, enhancing control, security, and operational oversight. As part of this framework, system access, including entry controls, is promptly revoked upon employee resignation, strengthening overall security.
- ⦿ **Implementation of a canteen management system** enabling structured meal planning based on staff preferences and shift patterns, helping to minimise food wastage

Leveraging AI: AI is being increasingly leveraged to enhance efficiency, improve decision-making, and deliver a more seamless employee experience, as outlined below:

Rs. 325 mn

Investment in training

15 hrs

Average training hours

DEVELOPING CAPABILITIES

The Group placed strategic emphasis on developing capabilities aligned with the evolving demands of the business landscape, with a focus on strengthening leadership, technological expertise and core business competencies. Key interventions during the year are summarised below:

The Management and Leadership Development Programmes (MLDP)	'FYOUTURE CEO'- The Group Management Trainee Programme
The Group continued to expand its comprehensive MLD programme, extending its reach across additional Sectors and strengthening its cumulative impact. Targeted at middle management, as well as executive and supervisory levels, the programme is tailored to address the specific needs of each Sector. It incorporates a blend of coaching, project-based assessments, and structured learning interventions, covering an array of competencies including entrepreneurial thinking, emotional intelligence, and productivity. 11 Sectors covered in 2025/26 bringing the total coverage to 16 Sectors 434 employees trained under the MLDP 80,656 Leadership development training hours	The Group's Management Trainee Programme continues to be recognised as one of the most sought-after initiatives of its kind in the country, reflecting its strong reputation for developing future leaders. During the year, the programme attracted a record number of applications, surpassing 5,700 candidates, compared to 5,400 in the previous cycle. Selection is conducted through a rigorous seven-stage process, assessing a wide range of competencies including cognitive ability, teamwork, interpersonal, emotional intelligence, presentation, decision-making, and strategic thinking skills.
Strengthening AI capabilities across functions	
The Group conducted targeted AI training initiatives across key disciplines, aimed at building domain-specific capabilities and enhancing practical application within respective functions. Customised programmes were developed and delivered on a Group-wide basis for areas such as HR, Sales and Marketing, and Company Secretarial, ensuring relevance to each function's unique requirements.	

EMPLOYEE WELFARE & WELL-BEING

The Group continued to strengthen its focus on employee wellbeing by placing greater emphasis on mental and emotional well-being. This was driven by evolving workforce demographics, including the growing presence of Gen Z employees. Accordingly, in addition to numerous medical camps and check-ups, the Group conducted ongoing awareness sessions on stress management, women's health and emotional intelligence among others.

In addition to formal communication channels, the Group promotes engagement through a year-round calendar of sports, cultural and family-oriented activities. The Group also continues to invest in employee welfare through initiatives supporting transportation, nutrition and healthcare needs. During periods of disruption caused by the recent Ditwah cyclone, the Group extended support to affected employees through various assistance measures, reinforcing its commitment to employee wellbeing and resilience.

PERFORMANCE MANAGEMENT

The performance management process from goal setting to mid and end-year

reviews for all employees in executive and above categories are conducted through the Human Resource Information System; the appraisals for all non-executive employees are conducted offline. Approximately 99% of the Group's permanent employees undergo annual performance appraisals.

The Group's Remuneration policy ensures a consistent approach across Group

Performance management process

1

Individual employees set annual goals aligned to the relevant business/ department strategy, which are reviewed and approved by the relevant manager

2

Mid-year performance appraisal where progress against expectations and deliverables are discussed

3

Year-end performance review where final performance rating is confirmed subsequent to a Company-wide calibration process

companies, while factoring in industry-specific dynamics and regulations (refer to page 77 for further information). Our benefits include components that are applicable across the Group as well as non-core benefits which are applicable to selected Sectors or employee groups. Remuneration schemes are designed to be equitable and competitive, and factor growth and adjustments reflecting economic and market dynamics

LABOUR RELATIONS

The Group recognises and respects the right to freedom of association and collective bargaining, with approximately 14% of employees covered by collective agreements across its operations. During the year, both Group and Sector HR teams maintained constructive and cordial relationships with trade unions, with no disruptions to operations arising from industrial action.

SUCCESSION PLANNING

A comprehensive succession planning framework has been established to strengthen talent pipelines and ensure leadership continuity. Implementation is currently underway in close collaboration

Purpose-driven Strategy

with Sector HR teams, with particularly strong practices already in place within the Transportation & Logistics and Consumer & Retail Sectors. Focused on C-1 level roles, the framework typically spans a five-year horizon and is supported by tailored development plans aligned with individual readiness and organisational priorities

WAY FORWARD

As the Group makes a strategic entry into the Retail sector, significant emphasis has been placed on building a strong leadership foundation, with several key positions already filled, while broader recruitment efforts continue to gain momentum. In parallel, the Group remains focused on advancing digitalisation

and upskilling its workforce to enhance future readiness. Looking ahead, we aspire to build a future-ready workforce, both in mindset and capability, that is well-positioned to navigate a rapidly evolving business landscape shaped by technological advancements, shifting customer expectations, and increasing global disruptions.

Inclusive Business Models

Creating a secure, sustainable and efficient ecosystems which uplift livelihoods and empower communities

HOW WE MEASURE PROGRESS

Suppliers developed: Demonstrates how the Group is supporting the long-term resilience of suppliers

CSR beneficiaries: Demonstrates the impact of our CSR initiatives and scalability of the programmes

SUPPLIERS DEVELOPED

Link to Remuneration

Supplier development and value creation related indicators fall within the scope of the Hayleys Lifecode social targets

Link to Risks & Opportunities

Disruptions to Supply Chains

CAPITAL INPUTS

CAPITAL TRANSFORMATION

HC Time and resources required to monitor compliance and deliver training

IC Stakeholder credibility and social license to operate

SC Proprietary knowledge in inclusive sourcing models

FC Mitigating procurement volatility and cost fluctuations

TRADE-OFFS

Inclusive business models require the deployment of financial capital toward supplier development and responsible procurement that could margins. However, over the long-term these trade-offs are required when building supply chains that are resilient, ethical, and enduring while preserving the Group's social license to operate.

■ Negative Impact

■ Positive Impact

SUPPLIER PROFILE

The Group's diverse and far-reaching supplier networks is a defining feature of its' operating model and enables the Group to inject significant value across communities, driving socio-economic empowerment. Suppliers represent diverse geographical profiles and scales of operations, ranging from individuals and small-scale suppliers to large B2B players.

Procurement policy: The Group's Procurement Policy serves as a minimum standard across all Group entities and sets clear guidelines on supplier management and contract management, sustainable procurement guidelines and spend management among others.

Inclusive value chains: Aligned to its Corporate Purpose, the Group has always prioritised business models that support grassroot communities, thereby injecting economic value and driving empowerment. Through its diverse businesses, the Group connects rural communities to global supply chains, facilitating market linkages, building capacity and providing access to finance and resources. During the year, the Group supported nearly 435 smallholder agricultural suppliers and business partners.

Consumer & Retail	Indirect employment in branches	>2,800
Energy, Mobility & Projects	Sub-contractors	287

KEY AREAS OF FOCUS IN 2025/26

During the year, the Group's supply chains continued to operate within a challenging global environment. Ongoing geopolitical tensions disrupted international trade flows, contributing to delays, increased costs, and heightened uncertainty across key supply routes. In addition, agricultural supply chains were increasingly impacted by the effects of climate change, including erratic weather patterns and shifting yield conditions, which affected availability and pricing. These developments underscored the importance of supply chain resilience, proactive sourcing strategies, and ongoing monitoring of external risk factors.

Supply chain resilience

During the year, the Group's Sectors placed strong emphasis on enhancing supply chain security and resilience in response to prevailing uncertainties. This included pursuing geographical diversification to reduce concentration risk, exploring backward integration to strengthen control over key inputs, and deepening engagement with suppliers to ensure continuity and reliability. These efforts supported the Group's ability to navigate disruptions while maintaining operational stability.

Purification Sector

- Expansion of manufacturing footprint to regional markets
- Backward integration

Eco Solutions Sector

- Backward integration with the establishment of a fibre extracting facility

Hand Protection Sector

- Ongoing investments in supplier development

Supplier development

In building resilient supply chains and supporting the long-term sustainability of our valued partners, several key sectors in the Group conduct ongoing supplier development programmes. During the year, the Group invested Rs. 57.4 mn in supplier development with a total of 5,512 suppliers benefitted from these interventions. Progress made in the major programmes are summarised below:

Purpose-driven Strategy

Sector	Programme	Progress in 2025.26
Hand Protection	DPL Firstlight: Strategic supplier development programme which ensures a fair price for rubber latex by guaranteeing rubber smallholders a price which is indexed to RSS1 (the highest grade of consumed rubber) for their field latex.	4,893 Farmers in total 3.51 bn Payments to Firstlight farmers 526 Farmers participated in training programmes
Purification Sector	Haritha Angara: A holistic supplier development initiative, through which charcoal makers are encouraged to engage in environmentally friendly charcoaling with Haycarb PLC providing technical support and buy back agreements.	>500 Coconut and charcoal suppliers 248 Active Haritha Angara pits Rs.19 mn Investment in supplier development
Agriculture Sector	The Agriculture Sector works with out-growers and smallholders for fruits and vegetables and seeds from the regions of Batticaloa, Jaffna, Kilinochchi, Mullativu, Mannar, Vavuniya, Ampara, Anuradhapura, Polonnaruwa,	6,014 out-growers 435 smallholder farmers

Further details relating to the Group's supplier and procurement activities including supplier due diligence and development in further detail in the Group's ESG Report.

COMMUNITY ENGAGEMENT

CSR Governance: All CSR initiatives are aligned to the Group Community Engagement policy but formulated and driven at Sector level while certain significant projects are also driven by the Centre. The Group ESG Steering Committee has oversight responsibility on the Group's CSR activities. Details pertaining to CSR activities, beneficiaries and impacts are reported by the Sectors to the Group ESG division on a quarterly basis.

Measuring our impact: Sectors monitor the impact of its community engagement activities on an ongoing basis, defining project-specific criteria to monitor progress and assess success. From a Group perspective, total beneficiaries, CSR investments and volunteer hours are monitored on a consistent basis.

KEY INITIATIVES

Puritas Sath Diyawara & Going beyond

Conceptualised and launched by Puritas (Pvt) Ltd of the Purification Sector, this initiative leverages the Group's expertise in water purification to provide purified water to families in areas affected by chronic kidney disease (CKD). Meanwhile the Going Beyond initiative was launched as an extension of Puritas Sath Diyawara with the aim of addressing broader socio-economic needs of the people living in CKD affected villages

ESG aspirations

Purpose-driven Strategy

ESG Governance and policy: The Board, as the highest decision-making authority of the Group, holds overall oversight of ESG matters, including the formulation of sustainability-related policies and goals and the implementation of the ESG framework. In discharging these responsibilities, the Board is supported by an ESG Steering Committee, with similar governance structures established at Sector level to ensure consistent oversight and execution across the Group. Meanwhile, the Group's ESG Roadmap, includes a comprehensive suite of ESG policies across all material focus areas. The policies apply as a minimum standard across the Group and ensures a consistent approach in managing the Group's material ESG risks

ESG Strategy: The Group's ESG strategy is articulated through the Hayleys Lifecode, its comprehensive ESG roadmap for 2030. Since the launch of its first edition in 2022, the Group has made significant progress in embedding ESG considerations across its operations. All Sectors have now successfully rolled out ESG roadmaps and targets aligned with the Group framework, with performance against these targets being consistently monitored. While the Group remains largely on track to achieve its 2030 commitments, progress in certain areas has been more gradual than anticipated. The Hayleys Lifecode centres on six key areas of focus:

ESG in practice: The following mechanisms are in place to embed ESG considerations across the Group's governance framework, operational processes, and decision-making.

DEVELOPMENTS IN 2025/26

- ⦿ The Policy on Matters Relating to the Board of Directors was amended to include oversight on the Group's Sustainability and Climate-related Risks and Opportunities
- ⦿ With the rollout of sector-specific ESG roadmaps across 7 Sectors, all Sectors within the Group now have established, tailored roadmaps aligned with the overall Group framework.
- ⦿ Quarterly reporting of sustainability and climate-related risks and opportunities to the Hayleys PLC and Sector Boards.

TARGETS FOR 2030

Purpose-driven Strategy

PROGRESS AND DEVELOPMENTS IN 2025/26

The following table provides a high-level overview of the progress made against the Group's key ESG targets during the year. Please refer to the ESG Report for more detailed information. Disclosures on targets are also aligned to the requirements of the Targets and Metrics pillar of SLFRS S1 and S2.

2030 target	Metric used	Baseline (2018/19)	Interim target	Performance tracking		
				2026	2025	2024
Commitment: Accelerate Climate Action						
90% sustainable and renewable energy	% reliance on sustainable and renewable energy	64%	3% annual increase	75%	74%	68%
30% reduction in energy intensity	Energy consumption (GJ)/ USD Revenue	2,934 GJ	3% annual reduction	3,097	3,997	4,481
30% reduction in absolute Scope 1 & 2 GHG emissions (for operating boundary in 2018/19)	GHG emissions (tCO ₂ e)	Scope 1: 46,472 tCO ₂ e	6% annual reduction	107,329	105,480	98,717
		Scope 2: 55,647 tCO ₂ e.	6% annual reduction	65,852	63,380	63,706
4% annual linear reduction in Scope 1 & 2 GHG emissions for new entities	GHG emissions (tCO ₂ e)	Scope 1 & 2: 16,927 (Baseline 2023/24)	4% annual reduction	12,914	14,417	16,116
Commitment: Restore and regenerate nature						
Increase biodiversity enhancing programmes to cover 5 times the built area	Trees planted		Annual increment of 50%	84,115	134,391	69,382
Commitment: Optimising resource footprint						
50% sustainable water sourcing	Reliance on rainwater and recycled water as a % of total water withdrawal	10%	6% annual increase	25%	14%	16%
30% reduction in water intensity	Water withdrawal (m ³)/ USD Revenue	3,620 m ³	3% annual reduction	3978	4,410	5,097

2030 target	Metric used	Baseline (2018/19)	Interim target	Performance tracking		
				2026	2025	2024
40% of solid waste recycled	Solid waste recycled (MT)/Solid waste (MT)	17% (2023/24)	5% annual increase	29%	18%	17%
25% reduction in waste intensity	Total waste (MT)/ USD Revenue	60.30	4% annual reduction	13%	14%	15%
Commitment: Responsible work place						
Average 40 hours of training p/employee	Training hours p/ employee, per/ annum	5.31	Sector-specific annual KPIs	14.95	11.43	10.19
All employees to undergo training on anti-discrimination	% of employees covered through anti-discriminatory training	Nil	-	>3,900 covered	>4,700 covered in 8 sectors	N/A
Commitment: Partnering progress						
Customer satisfaction surveys covering 100% of operations	No. of sectors with formal satisfaction mechanisms	10	-	10	10	10
Increase CSR beneficiaries by 50%	No. of CSR beneficiaries	400,000	5% annual increase	668,859	640,270	707,580

WAY FORWARD

Looking ahead, the Group will continue to strengthen the integration of ESG considerations into decision-making, operations, and long-term strategy, while maintaining focus on achieving its ESG targets and commitments. ESG reporting and oversight mechanisms have also been further strengthened at Board level, enabling more robust monitoring of progress and emerging priorities. In line with evolving global expectations, the Group has commenced a more strategic assessment of biodiversity-related impacts and dependencies, including the introduction of TNFD-aligned reporting during the year, which will be progressively embedded into the broader ESG framework going forward.

DIGITAL TRANSFORMATION

Digital transformation serves as a cross-cutting strategic enabler within the Group, strengthening the effectiveness and execution of all other five strategic pillars. Hayleys' digital transformation agenda is focused on delivering enterprise-wide value through scalable, integrated, and outcome-driven initiatives spanning manufacturing, agriculture, retail, finance, and corporate functions. During the year, the Group successfully advanced numerous initiatives aimed at strengthening core operations, enhancing customer engagement, and improving process efficiency across the organisation.

Governance and Approach

A holistic Digital Transformation Roadmap was rolled out during the year under review, ensuring that digital interventions across sectors and functions are integrated, prioritised, and collectively directed towards delivering measurable enterprise-wide value. To strengthen governance and execution, a centralised Digital Transformation PMO and Digital Architecture Board were established, supporting alignment, security, systems integration, personal data protection, disaster recovery, and backup protocols across initiatives. In addition, a central demand tracker was launched to capture and monitor digital requirements across the Group, while periodic programme reviews conducted through the PMO ensured ongoing oversight and effective implementation of key initiatives.

Purpose-driven Strategy

ELEMENTS OF DIGITAL ROADMAP

During the year, the Group implemented multiple digital initiatives that strengthened the execution and delivery of its four strategic pillars, as summarised below.

STRATEGIC PILLAR 1: PORTFOLIO OPTIMISATION

- Delivered DPL MES (BIDEX) replacing legacy systems and enabling planning, Quality control, Production execution on a scalable, cloud native, integrated and supported platform
- Executed a plant digitalisation pilot at DPL Hanwell, laying the foundation for future smart factory capabilities
- Established an Advanced Analytics Centre of Excellence at Singer, focused on forecasting, customer analytics, and data-driven decision support capabilities.
- Implemented a gold loan scoring model (Singer Finance) improving credit risk assessment

- Developed the 2025 Annual Report BOT with voice-enabled capabilities, enhancing stakeholder access to and interaction with corporate information and data.

- Implemented a satellite sensing and performance optimisation solution to enhance monitoring, analytics, and operational decision-making.
- Piloted an RFID-enabled real-time glove former tracking system to generate real-time operational insights and improve process visibility
- Implemented the Conclave Board automation system to strengthen governance processes, with rollout currently underway across selected priority Sectors.
- Introduced process automation platform at Hayleys Advantis improving operational efficiency.

STRATEGIC PILLAR 2: CUSTOMER CENTRICITY

- Implementation of CRM platforms in the Hand Protection and Purification Sectors
- Delivered a hyper personalisation platform for Singer & Singer Finance Solus platforms enhancing engagement with customers
- Deployed an AI-powered chatbot and virtual assistant on the Haycarb website to enhance customer engagement and responsiveness.
- Implemented the Mabroc Tea Traceability System, enhancing supply chain transparency and traceability across priority export markets.

STRATEGIC PILLAR 3: NURTURING INSPIRED TEAMS

- Implemented headcount reporting system (Group HR) for workforce analytics

STRATEGIC PILLAR 4: INCLUSIVE BUSINESS MODELS

- ⦿ Developed and launched the DPL Easy Pay System, enabling real-time farmer payments in the Hand Protection Sector and onboarding over 2,400 farmers onto the platform.
- ⦿ Established the OMNIX procurement platform within the Agriculture Sector, with over 1,000 farmers onboarded to date.

STRATEGIC PILLAR 5: STRATEGIC ESG INTEGRATION

- ⦿ Completed Phase 1 of the Haycarb boiler digitalisation initiative, including successful pilot implementation to support safer and more efficient operations.
- ⦿ Rolled out machine digitalisation initiatives at Hayleys Fabric, including the implementation of stenter machine monitoring systems
- ⦿ Implemented energy monitoring systems across 5 factories

Scaling AI capabilities across the Group

Hayleys' AI journey is guided by the ambition of becoming an AI-driven, data-intelligent enterprise, leveraging AI to enhance decision-making across commercial, operational, and customer-facing functions. Anchored on a human-in-the-loop approach, the strategy ensures that while AI strengthens automation, insights, and efficiency, critical decisions continue to be guided by human expertise. The approach is further supported by secure-by-design principles and cost-efficient, scalable model deployment aligned with business requirements.

Key strategic focus is as follows:

The Group has initiated a broad range of AI use cases across sectors, spanning advanced analytics, intelligent automation, AI-powered customer engagement, and manufacturing quality inspection solutions. These initiatives are enhancing operational efficiency, decision-making, and business performance, while ongoing efforts remain focused on scaling AI adoption across the enterprise. At the same time, strong emphasis continues to be placed on cybersecurity, data protection, and capability development through structured training and AI awareness initiatives across the organisation.

Sustainability-Related Financial Disclosures

ABOUT THE REPORT

This Report details the Hayleys Group's sustainability-related financial disclosures as set out in the SLFRS S1 and S2 Sustainability Disclosure Standards and the Taskforce on Nature-Related Financial Disclosures (TNFD). In addition, the Report also refers to the Sustainability Accounting Standards Board for the determination of disclosure topics. While primarily of interest to providers of financial capital, the Report also includes information relevant to other primary users.

Basis for Reporting

- Reporting entity
- Reporting period
- Time horizons
- Presentation currency

Consistent between Financial Statements and Sustainability-Related Financial Disclosures

Reporting Entity

The disclosures included herein relate to Hayleys PLC and its 203 affiliates (collectively referred to as the "Group") based in Sri Lanka and overseas. The reporting boundary is consistent with that of the Group's financial reporting and should be read in conjunction with the Group's financial statements.

Basis for reporting boundary

judgements: The reporting boundary has been determined with reference to the Group's financial reporting boundary and where material, includes relevant upstream and downstream activities across the value chain. Judgements were informed by the potential magnitude of financial exposure, likelihood of occurrence, degree of operational control or influence and potential of risk transmission. Where SRRO/CRRO arising within the value chain are assessed as material, these activities have been

incorporated within the scope and clearly identified in Section 149 of this Report.

Functional/Presentation Currency

Sustainability-related financial information is presented in Rs. million and rounded to the nearest million, unless otherwise stated. Intensity metrics, including energy, emissions and water intensity, are expressed per USD million of revenue to minimise the effects of exchange rate volatility and enhance comparability across reporting periods.

Time horizons

Material information impacts relevant to sustainability-related risks and opportunities, including nature-related issues are assessed over the short, medium and long-term as defined below. The Group's definitions of time horizons relating to SRROs as defined below, is used consistently across the Group's sustainability-related financial disclosures and is aligned with the planning horizons used for strategic decision making.

Time horizon	Definition
Short-term	Less than 1 year
Medium-term	1-5 years
Long-term	More than 5 years

Transitional relief

This Report represents the Group's third year of sustainability-related financial disclosures; accordingly, the Group has not applied any transition relief permitted under SLFRS S1 and SLFRS S2.

Materiality

In determining material SRROs/CRROs the Group applies the thresholds set out in its Risk Management Procedure, which considers magnitude of potential impact and likelihood of occurrence. The Board considered and approved the SRRO/CRRO considered to be material. The results of the materiality assessment will be revisited by the Board every

In determining material sustainability-related information in accordance with SLFRS S1 and SLFRS S2, the Group applies judgement consistent with the definition of materiality, being information that could reasonably be expected to influence the decisions of primary users of its general purpose financial reports. The Group considers both qualitative factors and quantitative thresholds in this assessment. Quantitative thresholds (including impacts exceeding 0.1% of Group Revenue or 0.5% of Profit Before Tax) are used as initial screening indicators. However, these do not override qualitative considerations such as regulatory exposure, potential future financial effects, reputational risk, stakeholder sensitivity and long-term strategic implications

Based on the current operating environment and maturity of the market, we do not see the SRROs impacting the Group's access to finance / cost of capital.

year, or upon the occurrence of a significant event or significant change in circumstances.

Connected information

Cross referencing and the following navigation icons have been used across the Report to demonstrate links between,

	Connections between the items to which the information relates
	Connections within the sustainability-related financial disclosures
	Connections between sustainability-related financial disclosures and other general-purpose financial reports

Advancing the integration of SLFRS S1 & S2 Standards

APPROACH TO TNFD DISCLOSURES

During the year, the Group also commenced aligning its disclosures more systematically with the recommendations of TNFD framework. This phased approach is expected to support the more structured identification and assessment of nature-related dependencies, impacts, risks and opportunities across the business, while also strengthening the Group's broader SRRO identification processes. Interventions adopted during the year are given below:

Scope of reporting: The reporting scope includes all key business sectors of the Group from a high-level portfolio perspective, adopting a broad, bird's-eye view across operations.

ALIGNMENT BETWEEN TNFD AND SLFRS S1

Ecological impacts were identified as a material SRRO for the Group during the year, and we have used the TNFD framework to support a more structured assessment and reporting of nature-related dependencies, impacts, risks and opportunities. The table below maps each IFRS S1 disclosure requirement to the corresponding TNFD pillar and section of this report.

SLFRS S1 requirement	TNFD	Page reference
Governance	Governance: - Board's oversight - Management's role	145
Strategy	Strategy - Nature related dependencies, impacts, risks and opportunities (DIRO) - Impact on business model, value chain, strategy and financial planning	158
Risk Management	Risk Management - Process for identifying, assessing and prioritising DIRO	178
Targets & Metrics	Metrics & Targets	180

Sustainability-Related Financial Disclosures

STRUCTURE AND CONNECTIVITY OF DISCLOSURES

The Group's sustainability-related financial disclosures are presented primarily within this Chapter and are cross-referenced to other relevant sections of the Annual Report through the three connectivity icons outlined above. The illustration below provides a graphical representation of these linkages.

SOURCES OF GUIDANCE

The Group applies the following sources of guidance in identifying SRRO/CRRO and determining the related disclosure requirements. The specific sources considered in respect of each SRRO and CRRO are disclosed within the relevant sections of this report.

Identification of SRRO/CRRO	Identifying disclosure requirements
- SLFRS S1 and S2 Sustainability and Climate Disclosure Standard - Disclosure topics in relevant SASB Standards - Taskforce on Nature Related Financial Disclosures - CDSB Application Guidance for water and biodiversity-related disclosures - Results from external market analysis and stakeholder engagement	- SLFRS S1 and S2 Sustainability and Climate Disclosure Standard - Metrics associated with the disclosure topics of the relevant SASB Standards - Taskforce on Nature Related Financial Disclosures - CDSB Application Guidance for water and biodiversity-related disclosures - GRI Standards

JUDGEMENTS

The preparation of the Group's sustainability-related financial disclosures involves applying judgements to determine what information is reliable, useful and relevant. This includes interpreting the reporting requirements and exercising informed judgement in areas where the standards permit flexibility. The table below summarises the key judgements applied.

Topics	Areas of discussion
Identification of SRRO/CRRO	The Group exercised judgement in, - Assessing which SRROs could reasonably influence primary users' decisions - Determining thresholds, magnitude and likelihood parameters - Estimating probability, potential consequences and interdependencies of SRROs
Definition of time horizons	Judgement was applied in determining appropriate short-, medium- and long-term time horizons, considering the Group's strategic planning cycles and materialisation of the effects of SRRO/CRRO
GHG emissions	The Group exercised judgement when selecting, - Fuel efficiency factors for owned and third-party vehicles - Emission factors - Materiality of scope 3 emissions
Quantification of financial effects	The Group exercised judgement in - Determining the materiality thresholds for SRRO/CRRO disclosure - Estimating the level of financial impact that is attributable to the specific SRRO/CRRO - Determining which elements of the financial statements are impacted
Scenario analysis	Judgement was exercised in selecting the reference global climate scenarios

Sustainability-Related Financial Disclosures

Measurement uncertainties

In preparing the sustainability-related financial disclosures, the Group has relied on assessments, analyses and projections based on data obtained from various internal and external sources. Given the nascent stage of certain computation methodologies and the inherently forward-looking nature of sustainability matters, a degree of measurement uncertainty is unavoidable. In undertaking these assessments, the Group applies professional judgement and relies on reasonable and supportable information available at the reporting date, supported by the relevant skills and capabilities within the organisation. The amounts subject to a high level of measurement uncertainty relating to each SRRO/CRRO, measuring the impacts of the relevant SRRO/CRRO and assumptions relating to scenario analysis.

The following specific measures support the quality and credibility of the Group's sustainability-related financial disclosures.

Forward-looking Information

Certain sustainability-related financial disclosures such as future business impacts, expected financial effects, results of resilience assessments and strategic interventions are presented as forward-looking information. This information is supported by fact-based strategies as well as descriptions on the underlying assumptions and methods of producing the information thereby providing assurance to users that the information reflects actual plans or decisions made by the Group. This information is disclosed within the respective sections in which each SRRO/CRRO is discussed.

GOVERNANCE

Roles and responsibilities

Clearly-defined governance structures, committee mandates and regular reporting to the Board both at Group and Sector-level, ensures that there is Board oversight on the implementation of environmental, social and governance matters, including the effective management of SRROs. Environmental considerations include climate, nature and resource consumption while social impacts consider relationships with employees, customers, suppliers and communities. The Board holds apex responsibility for the effective

Interventions to strengthen the governance of SRRO/CRRO in 2025/26

- Amendments to Board Charter to include oversight of SRRO/CRRO
- Strengthened reporting on SRRO/CRRO to the Board of Directors
- Establishment of a Group Risk Management Committee and Risk Management Procedure in December 2025 setting out systematic guidelines for the management of risks (including SRRO/CRRO in the organisation)

implementation of the Group's ESG roadmap while ensuring that strategy is informed by and addresses sustainability-related risks and opportunities. The Board is supported by the ESG Steering Committee, Risk Management Committee and Audit Committee in the discharge of these duties, with each Committee reflecting upon sustainability matters in different ways based on their Committee mandates and responsibilities.

The mandate of the Group and Sector-level ESG Steering Committees include (among others) providing oversight and monitoring executing of Group and Sector-level SRROs.

ROLE OF THE BOARD AND SUB-COMMITTEES IN MONITORING, MANAGING AND OVERSEEING SRRO/CRRO				
	Board of Directors	Group and Sector ESG Steering Committees	Risk Management Committee	Group and Sector Audit Committees
Roles and responsibilities in managing SRROs	○ Oversight on the implementation of the Group's ESG Roadmap ○ Monitoring and review of climate, nature and sustainability-related risks and opportunities ○ Review external communication on sustainability-related matters	○ Identification of climate, nature and sustainability-related risks and opportunities and related impacts ○ Implementation of appropriate response measures ○ Monitoring performance of material ESG metrics against targets ○ Review and provide guidance on ESG related policies to the Board	○ Advise the Board on current and emerging risk exposures including sustainability-related risks ○ Oversee, assess and monitor the adequacy and effectiveness of risk management procedures	○ -Risk management scope of Audit Committee includes the management of SRROs

Sustainability-Related Financial Disclosures

ROLE OF THE MANAGEMENTIN MONITORING, MANAGING AND OVERSEEING SRRO/CRRO				
Group CFO	The Group CFO functions as the GMC Member responsible for driving ESG integration and is a member of the Group ESG Steering Committee. Responsibilities include, review and monitoring of ESG performance against targets (which includes emission, nature, resource consumption and social value creation) allocating resources to drive the Group ESG agenda, monitoring the Group's SRRO landscape and oversight on the Group's sustainability reporting.			
Group ESG Division	The Group ESG Division is tasked with implementing the Group's ESG strategy (as articulated in the Hayleys Lifecode) while working closely with Sector Sustainability/ESG Divisions to identify emerging and current SRROs. This includes assessing the external landscape including regulatory and policy changes and collaborating across functions to drive ESG integration.			
Sector Sustainability/ ESG Divisions	Sector-level Sustainability/ESG champions drive their respective ESG roadmaps and are responsible for identifying Sector-level SRROs, which are reported to the respective ESG Committees and the Group ESG Division. Sector divisions recommend response strategies and are responsible for implementing sustainability initiatives in line with the overall ESG agenda which includes climate action, biodiversity preservation, resource optimisation and social value creation among others.			
Support functions				
HR Divisions Identifying, managing, and mitigating workforce-related risks while unlocking opportunities linked to workforce capability, engagement, and culture	Procurement Oversight and management of risks associated with the supply chain by ensuring responsible sourcing, supplier reliability, and operational continuity	Engineering Divisions Management of environmental risks relating to energy, water consumption, waste and effluent generation, emissions and biodiversity impacts among others	Internal Audit Independent assurance role in ensuring that the sectors adheres to environmental and social compliance requirements	
Controls and procedures				
Controls and procedures for the effective management of SRRO/CRRO are embedded within operational and governance processes; they include internationally recognised environmental certifications across relevant operations, compliance with applicable environmental and social regulations and established internal procedures and oversight mechanisms. In addition, sustainability-related data is systematically captured and monitored through the Hayleys CUBE.				

METHOD AND FREQUENCY OF BOARD REPORTING

The following information is presented to the Hayleys PLC and Sector Boards of Directors on a quarterly basis, in addition to quarterly reporting to the ESG Steering Committees.

 Material SRRO/CRRO (including nature-related impacts and dependencies and ecosystems)	 Impact on business model and value chain	 Financial effects of SRRO/CRRO
 Key metrics monitored	 Strategy to manage SRRO/CRRO	 Performance against targets

STRATEGIC INTEGRATION

SRROs/CRROs and nature-related considerations are incorporated into the Group's strategy, financial planning and risk management processes through regular reporting to the Board and its relevant sub-committees. The table below outlines how sustainability-related matters are considered at Board level. Going forward, the Company intends to further strengthen these processes to support deeper integration of sustainability considerations into the Group's decision-making.

 Strategy formulation	During the annual corporate planning and budgeting sessions all Sectors are expected to present the risks (including SRRO/CRRO and nature-related dependencies and impacts) which are relevant to each strategic priority to the Board, along with key measures for mitigation. Meanwhile, all planned initiatives which contribute towards achieving Sector-level ESG targets are also presented
 Decisions on major transactions and trade-offs	ESG due-diligence criteria (which includes exposure to SRROs, climate and nature-related impacts and dependencies) are assessed when evaluating a merger/ acquisition
 Trade-offs	Trade-offs are considered when evaluating major transactions, particularly in relation to factors that may affect the achievement of each sector's ESG targets and long-term aspirations.
 Risk management processes and policies	SRRO (including nature-related impacts) and CRRO have been integrated into the Group's enterprise risk management framework as discussed in further detail on page 180 of this Report
 Board oversight on target setting	All 14 sectors of the Group have implemented ESG roadmaps with clearly defined targets, action plans and annual KPIs. As discussed on page 136, targets centre on 6 pillars which include climate action, ecosystem and nature, and social aspects. Targets are formulated by Sector leadership teams and submitted to the respective Boards for approval. Progress against these targets is reported to the Board on a quarterly basis, ensuring direct Board oversight.

SUSTAINABILITY EXPERTISE

When appointing directors, the expertise, skills, industry experience and competencies of each candidate are carefully evaluated to ensure alignment with the Group's vision, strategic aspirations, risks and opportunities. The Board also obtains assistance from internal or external subject experts with regards to emerging developments in sustainability if and when required. Quarterly reporting to the Board by the Group's ESG Division and relevant sustainability champions also help elevate Board knowledge on climate , nature and other related ESG issues.

Board skill gap assessment

During the year, the Group conducted a formal skill gap assessment pertaining to sustainability for its Directors, revealing areas for further skill enhancements.

Engagement with communities on nature-related impacts:

The Group maintains ongoing engagement with local communities in areas surrounding its operations to support the effective management of nature-related impacts and maintain positive community relationships. While formalised nature-related community impact assessments are currently not conducted across the Group, the Group recognises the importance of strengthening stakeholder engagement processes in this area and will seek to progressively integrate more structured nature-related assessment approaches into its sustainability management practices going forward.

Sustainability Departments or at minimum, a dedicated Sustainability Champion have been established in each sector as mandated by the Hayleys Group. Sector-level Management Committees

are responsible for ensuring that the appropriate skills and competencies are available within each Sector with adequate investments directed towards training and development. These skilled professionals play a central role in escalating relevant SRROs, monitoring risks and opportunities and reporting performance against targets to the Sector-ESG Committees and Boards of Directors as relevant.

Nature-related advocacy: The Group and its subsidiaries actively engage with a broad range of stakeholders, including the Ministry of Environment, relevant regulatory and local authorities, industry associations and other sector-specific bodies, on matters relating to nature and environmental stewardship. These engagements support the development and implementation of policies, regulations and industry initiatives that promote sustainable environmental management and responsible business practices. Particular emphasis is placed on biodiversity conservation in the Plantation Sector, where all 3 RPCs contributes its expertise, operational insights and on-the-ground experience to support national and industry-level efforts aimed at preserving ecosystems, protecting natural habitats and enhancing biodiversity outcomes.

Skills and expertise	Board of Directors
Finance and accounting	6
Strategy, management and leadership	10
Corporate governance and legal	1
Risk Management	6
Manufacturing and engineering	2
Supply chain management	1

Sustainability-Related Financial Disclosures

Engagement with communities on nature-related impacts: The Group maintains ongoing engagement with local communities in areas surrounding its operations to support the effective management of nature-related impacts and maintain positive community relationships. While formalised nature-related community impact assessments

REMUNERATION

The annual remuneration of the Directors, Board Sub-Committees, and members of the Group Management Committee (GMC) is currently not linked to sustainability-related metrics,

Material area	Applicable personnel
Energy & emissions	Engineering Departments
Health and safety	Health and Safety Head
Customer satisfaction	Marketing Departments

including nature-related metrics. Certain sectors, including Hand Protection and Purification, have already made progress in incorporating sustainability-related performance measures into management leadership remuneration considerations. The Group will continue to strengthen and evolve these practices going forward, reflecting the increasing integration of sustainability into the core strategies of most sectors are currently not conducted across the Group, the Group recognises the importance of strengthening stakeholder engagement processes in this area and will seek to progressively integrate more structured nature-related assessment approaches into its sustainability management practices going forward.

STRATEGY

The Group has identified 3 climate-related risks, 1 climate-related opportunity and 2 sustainability-related

risks that could potentially impact its prospects during the year under review. Compared to the previous year, certain SRROs were assessed as no longer material, while others were consolidated with related topics to enhance the clarity and relevance of reporting. A comparison of the SRROs identified across the two reporting periods is presented below.

The SRROs/CRROs presented represent a consolidated Group-level view of the most material sustainability and climate-related exposures identified across the organisation. The sectors in which these risks and opportunities are most prevalent, together with the points within the value chain where they primarily materialise, are illustrated below. Further details relating to sector-specific risk exposures and management approaches are available in the respective Sector Annual Reports.

Previous year SRROs		Current year SRROs		Reason for change
1.	Climate-related physical risk: Rainfall	1.	Climate-related physical risk: Rainfall (CRRO 1)	No change
2.	Climate-related physical risk: Temperature	2.	Climate-related physical risk: Temperature (CRRO 2)	No change
3.	Climate-related transition risk: Legal and policy implications	3.	Climate-related transition risk (CRRO 3)	Transition risks of legal and policy implications and escalating customer requirements on sustainability have been considered together given their interconnected nature
4.	Water availability	-		Water availability did not emerge as a key SRRO
5.	Ecological impacts	4.	Ecological impacts (SRRO 1)	No change
6.	Escalating customer requirements on sustainability			Combined with legal and policy implications under climate-related transition risk
7.	Environmental and social issues along supply chains			Environmental issues along the supply chain have been captured under Ecological Impacts while social issues did not emerge as a material SRRO during the year
		5.	Operational safety (SRRO 2)	Emerged as a new risk during the year, reflecting high exposure to fire incidents
8.	Energy transition	6.	Energy transition (CRRO 4)- Opportunity	No change

CRRO#1:

CLIMATE-RELATED PHYSICAL RISKS-RAINFALL

There have been long-term changes in rainfall distribution in Sri Lanka including observable shifts of bio-modal monsoon patterns, rainfall intensities and extended dry periods. Climate predictions from credible sources indicate that Sri Lanka's average rainfall will increase under all selected climate scenarios, resulting in increased wet days and higher intensity of extreme rainfall events.

Summary of impact pathways

Outcome	Impacted sector	Business impact	Financial impact	Methodology
Impact on agricultural output-tea	Plantations (All 3 RPCs)	Impact on yield and crop Long-term changes in crop mix	Impact on Revenue Impact on Financial Position	Quantitative
Impact on agricultural output-rubber	Plantations (KVPL and Horana)	Impact on yield and crop Long-term changes in crop mix	Impact on Revenue Impact on Financial Position	Quantitative
Impact on energy sources (hydro/solar/biomass)	Hand Protection Purification Textiles Eco Solutions Industry Inputs, Power & Energy	Reduction in power generation	Impact on Cost of Sales	Qualitative
Impact on customer demand through disposable income	Consumer & Retail Agriculture	Impacts on sales through reduced customer demand	Impact on Revenue	Quantitative

- World Bank Climate Knowledge Portal

TIME HORIZON

Short-term: In the short term, excessive or insufficient rainfall can disrupt plantation harvests, reduce crop quality, delay field operations

Medium and long-term: Changing rainfall patterns and climate-related weather extremes could adversely impact Sri Lanka's plantation sector over the long term

Impacts on Value Chain

Impacts on Business Model

CONNECTED INFORMATION

- Refer to page 182 for detailed disclosures on the Group's GHG emissions and targets
- Refer to page 171 for details on the Group's climate strategy

Physical Risks of Climate Change- Rainfall

Increased rainfall variability adversely affects agro-ecological regions and crop cultivation patterns. High-intensity rainfall may disrupt harvesting activities, accelerate soil erosion and increase surface run-off, while reduced rainfall could contribute to drought conditions and increased evapotranspiration. Meanwhile, prolonged periods of intense rainfall during the year contributed to severe flooding and weather-related disruptions associated with Cyclone Ditwah, adversely affecting agricultural activities, logistics and plantation operations across several regions of Sri Lanka

CURRENT FINANCIAL EFFECTS:

- Damages to infrastructure stemming from Cyclone Ditwah
- Implications of physical climate risk on plantation yield and crops

Medium-Term		(536)
Long-Term		(756)

Impact on Cash Flows (Rs. mn)

Short-Term		(959)
Medium-Term		(1,074)
Long-Term		(1,188)

WHERE IT ARISES

- The Group's low and high-grown tea estates, rubber estates
- Manufacturing plants in the Hand Protection, Purification and Textiles Sectors in the Western Province of the country

Strategy & Decision-Making

Crop diversification

Diversifying biomass sources

Geographical diversification of operations

Integration of climate adaptation plans to overall strategy

Direct mitigation and adaptation

Current	Anticipated
Crop diversification Resource allocation : Rs. 690 mn	Integrating climate adaptation plans into the overall strategic agenda of the Plantations Sector
Conversion of boilers to biomass (Plantations)	

Indirect mitigation and adaptation

Current	Anticipated
Diversification of suppliers or sourcing regions (Purification, Eco Solutions)	Diversification of operations and manufacturing footprint (Purification, Hand Protection)
Backward integration with the aim of securing increased control over raw material procurement (Eco Solutions)	
Resource allocation : Rs. 700 mn	

CLIMATE-RELATED TRANSITION PLANS:

All Sectors have committed to emission reduction targets as per the Sector-level ESG Roadmaps. In addition, TTE, KVPL and Hayleys Fabric have comprehensive decarbonisation plans in place. Please refer to page 186 for further information. (Refer to page 182 for further information targets and performance against targets)

Sustainability-Related Financial Disclosures

CRRO#2:

CLIMATE-RELATED PHYSICAL RISK-TEMPERATURE

Sri Lanka experiences average temperatures of 28°C–29°C, with limited monthly variations. Temperatures are typically affected by altitude, with considerably lower temperatures experienced in the central mountain ranges. The country is estimated to have witnessed an increase of around 0.8°C during the 20th century, with an acceleration towards the end of the century (Sri Lanka Climate Risk Country Profile). Variations in temperature have multi-faceted impacts on the Hayleys Group, given its potential impacts on worker health and reliance on natural resources which could be vulnerable to temperature variations across key business lines.

Summary of impact pathways

Outcome	Impacted sector	Business impact	Financial impact	Methodology
Impact on worker productivity	Plantations Agriculture Manufacturing	Impact on yield and crop	Impact on Revenue	Qualitative
Impact on agricultural output-rubber	Plantations (KVPL/Horana)	Impact of leaf fall and diseases on yield and crop	Impact on Revenue	Qualitative
Increased cooling load requirements	Transportation Others	Increased energy consumption to meet cooling requirements in warehouses and office buildings	Impacts on overhead costs	Qualitative
Higher demand for cooling solutions due to rise in extreme heat days	Consumer & Retail	Increased sales of temperature-linked products	Impact on Revenue	Qualitative

Refer to page 154 for further details relating to this CRRO

CRRO#3:

CLIMATE-RELATED TRANSITION RISK-LEGAL & POLICY IMPLICATIONS AND CUSTOMER REQUIREMENTS ON SUSTAINABILITY

As a Group generating 50% of its Revenue through exports, the Group is exposed to transition risks stemming from shifts in the regulatory and policy landscape pertaining to sustainability and climate mitigation as well as increasing pressure from customers on sustainability considerations. This is particularly evident from the European region, which has seen notable shifts in demand dynamics. Over the medium term, organisations operating in Sri Lanka can also be expected to be impacted by national policy developments as per the country's Net Zero Roadmap and NDC Implementation Roadmap (2021-2030). Key sustainability-related regulations and policies and the potential impact on the Group are summarised below.

Summary of impact pathways

Outcome	Impacted sector	Business impact	Financial impact	Methodology
Environmental requirements / regulations (EUDR, Carbon Border Adjustment mechanism, IMO regulations)	Textiles Hand Protection Purification Transportation & Logistics	Safe chemical management practices Safe chemical management practices Ship owners will be required to used cleaner fuels Focus on water preservation	Increased overhead costs and CAPEX Investments relating to exploring opportunities in low-carbon fuel Positive implications on Revenue	Quantitative
Customer's social requirements	Textiles Hand Protection Purification	Increased requirements on supply chain due diligence including human rights, working conditions etc	Overhead costs Positive implications on Revenue	Quantitative
Product requirements	Hand Protection Purification Tea Exports	Requirements for lifecycle analysis, certifications and product-level carbon footprint etc.	Overhead costs Positive implications on Revenue	Quantitative

- ☉ Escalation in cooling load requirements in warehouses and office buildings (Advantis)
- ☉ Opportunities in growing cooling solutions business (Singer)

Anticipated impacts

- ☉ Reduced long-term yields and productivity (Plantations)
- ☉ Implications of heightened water stress

CONNECTED INFORMATION

- ☐ Refer to page 171 for details on the Group's climate strategy
- ☐ Refer to page 182 for details on the Group's GHG emissions

Physical Risks of Climate Change-Temperature

Climate model ensembles predict that Sri Lanka's temperatures will increase from a minimum of 0.8°C to a maximum of 3.5°C based on the emission pathways. The rises in minimum temperature is expected to be faster than the rise in average temperature. The models also predict significant threat from extreme heat, with the number of days surpassing 35°C potentially increasing from a baseline of 20 days to more than 100 days by the 2090s under the high emission pathway.

Investments in developing sustainable products	Enhance environmental social screening across supply chain

CLIMATE-RELATED TRANSITION PLANS:

- All Sectors have committed to emission reduction targets as per the Sector-level ESG Roadmaps. In addition, TTE, KVPL and Hayleys Fabric have comprehensive decarbonisation plans in place.

Sustainability-Related Financial Disclosures

SRRO#1:

ECOLOGICAL IMPACTS

Biodiversity is critical for preserving the integrity of ecosystems through providing essential resources including resilience to floods and droughts as well as supporting fundamental processes such as water cycles and soil formation. The unprecedented loss of biodiversity and implications on ecosystems have the potential to disrupt the stability of economies and societies, with more than 50% of global gross GDP being moderately or highly dependent on nature and the goods and services it provides.

In reporting on ecological impacts during the year, the Group utilised the recommendations of the Taskforce on Nature-related Financial Disclosures framework as guiding principles for identifying and assessing nature-related dependencies and impacts across the sectors. As part of this initial phase, the assessment was limited to the Group's direct operations, with broader value chain implications expected to be progressively incorporated in future reporting cycles. The following nature-related impacts and dependencies were mapped across the sectors, culminating in the development of a risk heat map illustrating the relative significance of impacts versus dependencies across the Group's operations.

LEAP Assessment Approach: As illustrated below, the Group undertook a preliminary LEAP assessment aligned with the Taskforce on Nature-related Financial Disclosures framework, adopting a portfolio-level perspective across its operations at this stage. The assessment focused on identifying key nature-related dependencies, impacts, risks and opportunities from a broad strategic viewpoint. Going forward, the Group intends to progressively deepen

its alignment with the TNFD framework through more granular assessments and enhanced integration of nature-related considerations into decision-making processes.

	Output	Status
L-LOCATE	Priority location list, ecosystem sensitivity	Foundational disclosures of the ESG Report
E-EVALUATE	Assess dependencies on, and impacts to, ecosystem services	Dependency and impact assessment – Page 159
A-ASSESS	Identify and prioritise nature-related risks and opportunities	Phase 2 implementation Foundational disclosures aligned to SLFRS S1 reported on page 161
P-PREPARE	Develop strategy, targets and disclosure	Phase 2 implementation Foundational targets aligned to the Hayleys Lifecode reported on page 187

Locate: Identification of Priority Areas

As part of the LEAP “Locate” phase, Steps L3 and L4 focused on identifying locations where the Group's operational sites directly interface with nature. This assessment considered the extent to which operations intersect with ecologically sensitive areas, including biodiversity-rich regions, areas of high ecosystem integrity and areas of importance for ecosystem service provisions including benefits to communities. Through this process, the Plantation and Leisure sectors were identified as areas with greater direct interaction with nature, with further details illustrated below.

 Plantations	Over 23,000 hectares of active cultivation in the low grown (Galle, Deniyaya, Kalutara, Kegalle) and high-grown regions (Talawakelle, Nanu Oya, Nuwara Eliya)
 Leisure	15.54 hectares in Kandalama

Evaluate: Dependency and Impact Assessment

This following grid summarises the findings of the Group's impact and dependency assessment, conducted in accordance with the TNFD's LEAPs approach. Presented below are the impacts and dependencies assessed as Very high and high in relation to the Group's operations. Dependencies that have been ranked as medium and low have been excluded.

CLASSIFICATION OF DEPENDENCIES		ECOSYSTEM SERVICE/DRIVER	SCORE
Plantations	Provisioning service- Cultivation	Biomass provisioning	Very high
	Regulating and maintenance- Cultivation	Global climate regulation:	Very high
		Rainfall pattern regulation: Growing of perennial crops is dependent on rainfall pattern regulation by ecosystems to ensure sufficient levels of rainfall	Very high
		Local climate regulation: Ecosystems regulate the micro climate in the locations of agricultural production providing stable conditions for growing crops	Very high
		Soil quality regulation	Very high
		Soil and sediment retention: Perennial crop cultivation depends on ecosystem services that prevent soil erosion, reduce fertiliser runoff and mitigate landslides	Very high
		Water flow regulation: Cultivation depends on ecosystem services that regulate water flows, ensuring water availability during dry periods while reducing flood risks to plantations and related infrastructure.	High
		Flood control: Dependent on flood mitigation services to protect crops, and infrastructure from flooding.	High
Leisure	Cultural services- Provision of guest experiences	Recreation-related services: Short-term accommodation activities depend on recreation-related services provided by ecosystems to attract more visitors	Very high
		Visual amenity services: Many short-term accommodation options depend on the availability of nearby visual amenity services	Very high
Industry Inputs, Power & Energy	Provisioning services- Generation of renewable energy	Water supply: Hydropower energy production depends on water supply services provided by ecosystem	Very high
	Maintenance services- Generation of renewable energy	Global climate regulation: Wind energy production facilities depend on global climate regulation to maintain a relatively steady climate	Very high
		Water flow regulation: Hydropower energy production activities depend on the provision of water flow regulation to enable the use of water for routine operations	Very high
		Flood control: Significantly dependent on flood mitigation services to protect infrastructure from flooding.	Very high

Sustainability-Related Financial Disclosures

SECTOR	Impacts	Score
Plantations	Area of freshwater use	High
	Emissions of toxic soil and water pollutants	High
	Emissions of nutrient soil and water pollutants	High
	Generation and release of solid waste	High
	Areas of land use	High
	Volume of water use	High
Textiles	Emissions of GHG	High
Transportation & Logistics	Disturbances	Very high
Industry Inputs, Power & Energy	Disturbances	High
	Area of fresh-water use	High

The Group's overall nature-related dependency and impact heatmap is illustrated below. The Plantation Sector was identified as having significant dependencies on nature while manufacturing sector businesses including Textiles, Hand Protection and Purification were identified as having significant nature-related impacts. These impacts, dependencies relate primarily to the Group's direct operations.

RISKS AND OPPORTUNITIES

Key risks arising from the Group's nature-related dependencies and impacts are represented in the form of risk impact pathways as follows;

Outcome	Impacted sector	Business impact	Financial impact	Methodology
Acute physical risks ⦿ Flooding & extreme weather ⦿ Acute droughts ⦿ Landslide/soil erosion events ⦿ Beach erosion destroying coastal amenity value	Plantations Industry Inputs, Power & Energy Leisure	Impact on yield and quality of plantation crops Impact on continuous power generation	Revenue Cost	Qualitative
Chronic physical risks ⦿ Chronic soil degradation ⦿ Shifting microclimate changes ⦿ Biodiversity loss and ecosystem degradation ⦿ Chronic beach erosion reducing coastline	Plantations Industry Inputs, Power & Energy Leisure	Impact on yield and quality of plantation crops Impact on continuous power generation Impact on appeal of hotel properties	Revenue Cost	Qualitative

ACUTE PHYSICAL RISKS

The Group's operations are exposed to acute physical risks arising from extreme weather events, including flooding, droughts, landslides, soil erosion and coastal erosion. Such events have the potential to disrupt plantation activities, reduce agricultural yields, damage hydropower infrastructure and affect the attractiveness and accessibility of leisure properties. The increasing frequency and severity of these events may also result in higher operating costs, asset damage and business interruptions across affected locations.

CHRONIC PHYSICAL RISKS

The Group is exposed to chronic physical risks arising from gradual environmental changes, including soil degradation, biodiversity loss and long-term coastal erosion. In the plantation sector, declining soil health and reduced ecosystem resilience may adversely affect crop productivity and increase input requirements over time. Biodiversity loss may diminish the ecosystem services that support agricultural operations, including soil fertility, pollination and natural pest control. In the leisure sector, ongoing coastal erosion may reduce beach frontage and alter the natural landscapes that underpin the attractiveness of certain properties, potentially affecting visitor appeal and requiring additional adaptation measures.

Sustainability-Related Financial Disclosures

SRRO#1: ECOLOGICAL IMPACTS

INFORMATION SOURCES

- ☉ Sri Lanka Biodiversity Profile
- ☉ Disaster Management Centre of Sri Lanka
- ☉ Peer-reviewed academic research

TIME HORIZON

Short-term: Soil erosion, land degradation, coastal erosion and broader ecosystem changes could manifest in the short-term

Medium & Long-term: Sustained ecological degradation and ecosystem changes could materially impact the viability and resilience of affected operations

Impacts on Value Chain

Ecological Impacts

Sri Lanka's unique location, topography and climatic conditions have contributed to exceptionally rich biodiversity and a remarkably high level of endemism. However, increasing anthropogenic land use and other environmental pressures have resulted in the extensive degradation of natural ecosystems, leading to Sri Lanka being recognised as one of the world's 36 biodiversity hotspots. Against this backdrop, ecological impacts arising from soil erosion and degradation, coastal erosion and broader ecosystem changes continue to present increasing sustainability-related risks across the Group's Plantation, Agriculture and Leisure sectors.

Impacts on Business Model

Current impacts

- ☉ Impacts on yield and quality of plantation crops including flavor profile in teas due to poor soil quality (Plantations)
- ☉ Direct asset exposure to inundation and erosion (Plantations & Leisure)

Anticipated impacts

- ☉ Increased operational, maintenance and land restoration costs (Plantations)
- ☉ Increased need for investments in adaptation, ecosystem restoration and sustainable operational practices (Plantations)

Reforestation, afforestation and biodiversity restoration initiatives

Regenerative agriculture and sustainable land management in Plantation Sector

Improving monitoring, mapping and assessment of ecological impacts

Strengthening water stewardship through improved watershed management

Direct mitigation and adaptation

Current	Anticipated
Total investment in biodiversity and restoration initiatives (All Sectors)	Large scale reforestation programmes across Sectors
Resource allocation : Rs. 4 mn	
Investment in regenerative agriculture	

Indirect mitigation and adaptation

Current	Anticipated
Improving mapping and assessment of ecological impacts through TNFD framework	Drive deeper integration of nature-related considerations to strategy
Resource allocation : Rs. 2 mn	
Investments in employee and community awareness	

NATURE-RELATED TARGETS:

Biodiversity-related targets have been established by the Group and its operating companies in line with their respective ESG roadmaps. At present, these targets remain at a foundational level, reflecting the evolving nature of biodiversity-related measurement and management practices across the Group. Going forward, the Group intends to progressively strengthen and refine these targets in line with the Phase 2 implementation of TNFD.

Sustainability-Related Financial Disclosures

SRRO#2:

OPERATIONAL SAFETY

The Group's extensive manufacturing and operational footprint exposes it to a range of operational safety risks that could result in injury or loss of life, damage to property and equipment, business interruptions, regulatory penalties and reputational harm. Fire-related incidents represent a key area of risk exposure across several operations due to the presence of industrial processes, machinery, combustible materials and energy-intensive activities.

Summary of impact pathways

Outcome	Impacted sector	Business impact	Financial impact	Methodology
Fire and explosion incidents	All Manufacturing Sectors Leisure Transportation & Logistics	Asset damage and disruptions Injury or loss of life	Impact on Revenue Operating Costs Capital Expenditure	Quantitative
Workplace health and safety	All sectors	Injury or loss of life Reduced productivity Reputational impacts	Impact on Operating Costs Impact on Financial Position	Quantitative
Process safety failures	Manufacturing Sectors	Operational downtime Damage to critical infrastructure	Impact on Revenue Impact on Cost of Sales	Quantitative

Refer to page 166 for further details relating to this CRRO

CRRO#4:

ENERGY TRANSITION (OPPORTUNITY)

The upside potential presented by the global transition to a low-carbon economy presents the most significant sustainability-related opportunity to the Group. This opportunity arises primarily through Hayleys Fentons which is a leader in the country's renewable energy sector and the Purification Sector- which manufactures solutions for energy storage applications.

Refer to page 168 for further details relating to this CRRO

IDENTIFICATION AND ASSESSMENT OF OPPORTUNITIES

Sustainability-related risks and opportunities are identified through the Group's established strategic planning, risk management and business review processes, adopting both top-down and bottom-up perspectives. Opportunities are identified in the normal course of business through ongoing engagement with operating companies, market assessments, stakeholder feedback and evaluations of emerging trends and developments. Once identified, sustainability-related opportunities are assessed using the same governance and investment evaluation frameworks applied to other business opportunities, taking into consideration their strategic alignment, financial impact and effective risk management.

- ⦿ **Identification:**
Sustainability opportunities are identified similar to other opportunities through horizon scanning of emerging sustainability trends, market developments and regulatory changes.
- ⦿ **Assessment:**
Evaluation of the potential financial, operational and strategic benefits associated with identified opportunities.
- ⦿ **Prioritisation:**
Ranking of opportunities based on their potential contribution to long-term value creation and strategic objectives.
- ⦿ **Monitoring and Review**
Ongoing monitoring of the progress and performance of key sustainability-related opportunities together with the Group's other business opportunities

Sustainability-Related Financial Disclosures

SRRO#2: OPERATIONAL SAFETY

INFORMATION SOURCES

- ⊙ Safety Management Systems
- ⊙ Assets and Operations Data
- ⊙ Regulatory and Industry Sources

TIME HORIZON

Short-term: Operational safety risks primarily arise from day-to-day activities across the Group's manufacturing facilities, plantations, hotels, logistics operations and project sites

Medium-term: Ageing infrastructure, evolving regulatory requirements and failure to adapt could result in higher compliance costs, operational disruptions

Impacts on Value Chain

Upstream

Own

Downstream

CURRENT IMPACTS

- ⊙ Workplace injuries and failures
- ⊙ Delays in product availability due to operational disruptions

ANTICIPATED IMPACTS

- ⊙ Community health and safety concerns arising from fires, explosions or industrial accidents
- ⊙ Loss of customer confidence, reduced demand and loss of contracts where safety performance is considered a procurement criterion.

Impacts on Business Model

Current impacts

- ⊙ Fire incidents which led to operational disruptions and reduced revenue generating capacity and necessitated restoration expenditure

Anticipated impacts

- ⊙ Disruptions to operations and reduced productivity due to facility shutdowns (All Sectors)
- ⊙ Increased operating and capital expenditure associated with repairs, asset replacement, remediation activities

CONNECTED INFORMATION

Refer to Group's ESG report for detailed disclosures on the Group Health and Safety Record

Operational Safety

The Group's extensive manufacturing and operational footprint exposes it to operational safety risks that may affect its people, assets and business continuity. Key risk exposures include fire incidents, workplace accidents and process safety failures, which have the potential to result in loss of life, injuries, asset damage, operational disruptions and productivity losses. Such events may also give rise to legal liabilities, regulatory actions, increased operating costs and reputational impacts. Fire risk remains a significant area of exposure across the Group, particularly within the Eco Solutions, Construction Materials and Leisure sectors.

- ⊙ Damages to infrastructure stemming from fire damage in Amaya Kuda Rah

Rs. mn	25/26	24/25
Financial performance	(257)	(947)
Cash flows	1,096	450
Financial position	N/A	N/A

ANTICIPATED FINANCIAL EFFECTS:

Revenue implications

- ⦿ Revenue losses arising from operational disruptions, production downtime and the temporary closure of manufacturing facilities
- ⦿ Reputational impacts that may affect customer confidence, stakeholder trust

Cost implications

- ⦿ Higher capital expenditure requirements for the repair, replacement or upgrading of damaged assets and safety infrastructure.
- ⦿ Increased operating costs associated with emergency response, remediation activities
- ⦿ Insurance-related impacts, including increased premiums, deductibles and uninsured losses arising from significant incidents.
- ⦿ Productivity losses due to workforce disruptions and employee injuries

There is no significant material adjustment within the next annual reporting period to the carrying amounts of assets and liabilities reported in the related financial statements

WHERE IT ARISES

- ⦿ Manufacturing facilities in Sri Lanka and overseas locations including Thailand, Indonesia
- ⦿ Hotels operations in Sri Lanka and Maldives
- ⦿ Logistics and warehousing operations

Strategy & Decision-Making

Safety governance, monitoring and assurance through certifications

Enhance emergency preparedness and continuity planning

Embedded into operational planning and asset management

Culture of safety

Direct mitigation and adaptation

Current	Anticipated
Structured fire safety protocols including regular fire risk assessments	Enhance contractor and supplier safety
Incident reporting, investigation and corrective action processes	Emergency safety preparedness
Comprehensive employee contractor and safety training	
Regulatory compliance monitoring	

Indirect mitigation and adaptation

Current	Anticipated
Robust enterprise risk management system which includes safety and operational preparedness	Integrate safety into performance management
Insurance coverage to mitigate the financial consequences of significant safety events, including fire and business interruption risks	Data analysis and hazard monitoring

Sustainability-Related Financial Disclosures

CRRO#4: ENERGY TRANSITION (OPPORTUNITY)

INFORMATION SOURCES

- ☉ Sri Lanka Nationally Determined Contributions
- ☉ Sri Lanka Climate Prosperity Plan
- ☉ 2050 Carbon Net Zero Roadmap and Strategy
- ☉ National Climate Change Policy of Sri Lanka

TIME HORIZON

Short-term: Demand for the Purification Sector's energy storage solutions remains strong and provides opportunities for further expansion.

Medium-term: Demand for renewable energy generation in Sri Lanka is expected to strengthen further with policy directions and the growth of sustainability mobility solutions.

Impacts on Value Chain

Impacts on Business Model

Current impacts

- ☉ R&D and new product development in energy storage solutions (Purification Sector)
- ☉ Sales generated from sustainability mobility solutions Energy, Mobility & Projects
- ☉ Contributions from renewable energy investments

Anticipated impacts

- ☉ Drive further investments in both rooftop solar PV installations as well as large-scale wind and solar projects
- ☉ Drive further investments in both rooftop solar PV installations as well as large-scale wind and solar projects

CONNECTED INFORMATION

- ☉ Refer to page 212 -Portfolio Reviews for Sector-specific information
- ☉ Refer to page 212 for information on financial contributions from relevant Sectors

Energy Transition

Realising Sri Lanka's NDC commitments and Net-Zero aspirations will require significant investments in renewable energy, with the country targeting a 70% reliance on renewable electricity by 2030. Meanwhile, the global transition also presents opportunities by offering upside potential in industries driving the move to alternative and green energy sources.

Investments in large-scale energy generation by Projects, Mobility & Energy	

Indirect mitigation and adaptation

Current	Anticipated
Investments in mobility solutions	

LEVERAGING ON ENERGY TRANSITION:

The Group views the opportunities stemming from the energy transition as a key growth area over the next few years with increased resources deployed towards widening the renewable energy generation footprint and sustainability mobility solutions.

Sustainability-Related Financial Disclosures

CONNECTIVITY OF RISKS

The Group's overall risk profile for the year is discussed in greater detail in the Risks and Opportunities chapter of this Report on page 108. The following infographic demonstrates the link between these strategic, operational and other risks and the climate-related risks identified above. The size of the circle represents the magnitude of the risk.

APPROACH TO QUANTIFICATION

The Group commenced the quantification of financial effects of SRRO/CRRO in the previous financial year. While the limitations in resources and capabilities across the Group as well as unavailability of national level data renders it challenging to quantify financial effects, this year we have widened the scope of quantification with 4 SRROs/CRROs quantified, compared to 3 last year. We hope to further refine our methodology as we evolve our quantification processes over the next financial years. Quantifying potential financial impacts is challenging in the current absence of national-level data and a global, standardised calculation methodology. In determining which SRROs to quantify, we adopted the following criteria and decision diagram;

TRADE-OFFS CONSIDERED

The Group recognises that sustainability-related decision-making may involve trade-offs across financial, environmental and social considerations. Accordingly, ESG due diligence is integrated into major investment and strategic decisions to support balanced and responsible outcomes over the long term. Environmental and social risks, together with the potential impacts arising from the Group's operations and investments, are assessed as part of the overall evaluation and screening process.

CLIMATE STRATEGY AND TRANSITION

The Group's broader sustainability strategy is represented in the 6 long-term commitments of the Hayleys Lifecode as illustrated alongside. In determining these 6 areas of focus the relative exposures arising from the selected SRROs were taken into consideration, with the strategy formulated to effectively mitigate the impacts of these risks.

 The Climate Action pillar of the strategy is articulated around the following four levers. Sector-level initiatives are broadly aligned to the Group climate strategy, thereby facilitating greater impact and a consistent approach across the Group.

Pillars of the Hayleys Lifecode

- ⦿ Accelerate climate action
- ⦿ Restore and regenerate nature
- ⦿ Optimise resource footprint
- ⦿ Responsible and responsive corporate citizenry
- ⦿ Responsible work place
- ⦿ Partner progress

Refer page 134-Strategic ESG integration for further information

Refer to the Group's ESG Report for further information on the Group's climate strategy

RESOURCE ALLOCATION

Resource allocation relating to sustainability and ESG initiatives is integrated into the Group's annual corporate planning and budgeting process. Investments associated

with each sector's ESG strategy and roadmap are evaluated during the annual planning cycle and presented to the Board for review and approval, supporting alignment between sustainability priorities, strategic objectives and long-term value creation.

Please refer to page 186 for information relating to performance against defined targets in the Group's climate transition plan.

CLIMATE RESILIENCE

The Group uses climate-related scenario analysis to assess the potential business impacts of climate change and evaluate the resilience of its strategy and business model against a range of plausible future climate outcomes. This disclosure covers physical and transition CRROs. In accordance with SLFRS S1 & S2, the Group has applied the relief provision permitting qualitative disclosure of financial effects where quantification is not currently practicable. As discussed on page 174, climate scenario analysis is not presently directly integrated as an input into the identification process for sustainability-related and climate-related risks and opportunities (SRROs/CRROs).

Climate Strategy

Sustainability-Related Financial Disclosures

METHODOLOGY AND APPROACH

The Group continues to adopt a qualitative approach to scenario analysis, commensurate with its circumstances, the complexity of the Group, and the proportionality mechanism.

Scenario selection: Three Group-level scenarios were developed based on internationally recognised physical and transition climate scenarios, sensitised to reflect the Sri Lankan national context. Scenario selection represents:

- ⦿ The plausible range of futures, from an orderly low-carbon transition to a high-physical-risk divergence outcome
- ⦿ Include a scenario consistent with limiting global warming to 1.5°C
- ⦿ Reflect the national policy environment through alignment with

Sri Lanka's Climate Prosperity Plan 2022 and NDC 3.0 commitments

- ⦿ Be referenceable to internationally recognised frameworks (IPCC AR6; IEA WEO 2023) to enable stakeholder comparability

Time horizons: The time horizons defined on page 140, have been consistently applied in the Group's climate-scenario analysis.

Basis for qualitative disclosures: The Group is unable to provide quantitative financial effect disclosures under scenario analysis at this time because: (i) localised, sector-specific climate modelling data for Sri Lanka is not yet sufficiently available or reliable (ii) established quantitative crop-climate impact models for the Group's key agricultural commodities — including

tea, rubber, and other plantation crops — do not yet exist at the required level of granularity; (iii) the trajectory of key domestic and international regulations remains subject to significant uncertainty and (iv) the Group does not yet have the internal data infrastructure and cross-functional modelling capabilities required for financially reliable quantification.

SCENARIO FRAMEWORK

The selected scenarios are based on international physical and transition climate scenarios and sensitised to reflect the local context based on the country's climate risk profile and national climate action agenda as represented by the country's NDC 3.0, Sri Lanka Climate Prosperity Plan and Carbon Net Zero 2050 Roadmap. Key assumptions made under each scenario are summarised below:

IPCC Scenarios used for physical risk assessment (AR6)			IEA World Energy Outlook Transitional Risk Scenarios (2023)		
Scenario	Description	Temp increase	Scenario	Description	Temp increase
SSP 1-2.6	Optimistic scenario with rapid transition to renewable energy, extensive carbon sinks and global co-operation in sustainable economic growth	1.8°C	Net Zero Emission (NZE) Scenario	Pathway achieving global net zero by 2050, supported by transformation of energy systems, rapid deployment of low-carbon technology and unprecedented global cooperation	1.4–1.5°C
SSP 2-4.5	Middle-of-the-road emissions pathway with some transition towards clean energy, inconsistent global cooperation and uneven efforts across countries	2.7°C	Announced Pledges Scenario (APS)	Assumes that governments will meet, in full and on time, all announced climate-related commitments although energy system changes remain inadequate	1.7°C
SSP 3-7.0	High-emission pathway, with energy mix dominated by fossil fuels, weak or inconsistent climate policies and severe climate risks	3.6°C	Stated Policies Scenario (STEPS)	Reflect the current policies and measures that are actually in place and what governments are doing to meet their targets	2.4°C

Sri Lankan Scenarios- Climate Prosperity Plan	
Business as usual (BAU)	Continuation of the current development trajectory with limited climate-related policy interventions. Domestic energy mix remains dominated by fossil fuels, NDC commitments are not met, and climate adaptation investment remains insufficient to materially alter the emissions pathway
Nationally Determined Contributions (NDC) scenario	The country meets its unconditional emission reduction target of 8.11% below BAU levels, delivers on sectoral reduction priorities — including a 75% contribution from the power sector through renewable energy expansion
Climate Prosperity Plan (CPP)	Sri Lanka's most ambitious domestic pathway, under which the country achieves maximum utilisation of its renewable energy resources, targeting 70% of energy requirements from renewable sources by 2030 and full decarbonisation of the electricity sector

HAYLEYS GROUP SCENARIOS

The three scenarios developed by the Group for qualitative assessment are summarised in the table below.

Hayleys Group Scenarios	Scenario A Net Zero	Scenario B Current Pathway	Scenario C Divergence
Reference scenarios	IPCC: SSP1-2.6 IEA WEO 2023: NZE Sri Lanka: CPP	IPCC: SSP2-4.5 IEA WEO 2023: APS Sri Lanka: NDC 3.0	IPCC: SSP3-7.0 IEA WEO 2023: STEPS Sri Lanka: BAU
Global temperature (by 2100)	~1.5°C	~1.7°C	~2.4°C
Sri Lanka temperature (by 2100)	~1.2°C	~2.5°C	>3.0°C
Climate policy environment	Sri Lanka meets both its unconditional (8.11%) and conditional (11.98%) NDC 3.0 emission reduction commitments in full, achieving a total reduction of 20.09% below BAU by 2035. The Climate Prosperity Plan is fully implemented with strong international climate finance, technology transfer and global cooperation mobilised in support.	Sri Lanka meets its unconditional NDC 3.0 emission reduction commitments (8.11% below BAU by 2035). Adaptation ambitions and sectoral reduction targets are delivered, but conditional targets are only partially met due to limited mobilisation of international climate finance and technology support.	Neither unconditional nor conditional NDC 3.0 commitments are met. No material climate-related policy interventions are implemented at the domestic level. Global and local decarbonisation goals face a significant implementation gap, constrained by economic, political and institutional barriers.
Energy transition	Rapid decarbonisation of the energy system, with 70% of Sri Lanka's energy requirements fulfilled by renewable sources by 2030 and full decarbonisation of the electricity sector thereafter. Steep decline in fossil fuel demand.	Gradual transition towards cleaner energy, with renewable energy expansion progressing in line with NDC 3.0 power sector targets — the power sector contributing approximately 75% of total NDC emission reductions.	Energy mix remains dominated by fossil fuels. No accelerated shift towards renewables. Limited investment in energy transition technologies. No material carbon pricing or energy transition incentives in place

Sustainability-Related Financial Disclosures

Hayleys Group Scenarios	Scenario A Net Zero	Scenario B Current Pathway	Scenario C Divergence
Forests & land use	Forest cover rebounds beyond the NDC 3.0 target of 32% by 2035. Active reforestation, sustainable land management and nature-based solutions are fully scaled. Carbon sink capacity is maximised in line with CPP ambitions.	NDC 3.0 forest cover target of at least 32% by 2035 is met. Sustainable forest management and degraded land restoration are implemented in line with stated commitments. Sustainable agriculture practices and post-harvest loss reduction are progressively adopted.	Forest cover targets are not met. Deforestation pressures persist and land-use change continues on a BAU trajectory, reducing carbon sink capacity and amplifying biodiversity and ecological risks.
Physical climate outcomes for Sri Lanka	Manageable increase in physical risk. Rainfall variability and temperature increases remain within a range addressable through planned adaptation measures. Extreme weather events occur but at a frequency and severity consistent with the lower-emission pathway.	Moderate physical risk materialises over the medium-to-long term. Rainfall variability increases and temperatures rise to approximately 2.5°C. Extreme weather events become more frequent, placing increasing pressure on agricultural operations, water availability and supply chains.	Severe physical risk across all sectors. Temperatures exceed 3°C above pre-industrial levels. Drought frequency and intensity in dry and intermediate zones increases materially. Extreme rainfall events and prolonged dry spells cause widespread disruption to agricultural supply chains and infrastructure.
Implications for the Group	- Significant transition investment required in ST-MT: renewable energy, manufacturing decarbonisation, EUDR and CBAM supply chain compliance. - Physical risk manageable with planned adaptation measures. - Early movers in sustainability positioned to benefit from green market premiums and improved access to sustainable finance.	- Moderate transition costs and compliance requirements with greater flexibility on timing than Scenario A. - Physical risks manageable near-term but require progressive adaptation investment over MT-LT, particularly for plantation and agricultural operations.	- Transition risk lowest, but physical risk most severe and financially material. - Agricultural yields, water availability and supply chain reliability significantly impaired over LT. - Absence of carbon price and sustainability regulations forecloses green market opportunities and exposes the Group to stranded asset risk over the long term.

RESILIENCE TESTING

CRRO#1: Physical climate risk- Rainfall

In higher-emission scenarios, Sri Lanka's dry and intermediate zones are expected to experience more frequent and severe droughts alongside increased variability in rainfall intensity and distribution. Climate projections indicate rising frequency of extreme sub-daily rainfall events and heavier five-day rainfall volumes. These patterns have direct implications for agricultural raw material supply chains, plantation operations, and sectors serving the agriculture value chain. For the Group as illustrated below, significant implications could be expected across several sectors relying on agricultural raw materials, sectors engaging in plantations and those catering to the agriculture sector through input materials, equipment.

● Low ● Medium ● High

Our scenario	Scenario A- Net Zero			Scenario B-Current Pathway			Scenario C-Divergence		
	ST	MT	LT	ST	MT	LT	ST	MT	LT
Plantations	●	●	●	●	●	●	●	●	●
Agriculture	●	●	●	●	●	●	●	●	●
Hand Protection	●	●	●	●	●	●	●	●	●
Purification	●	●	●	●	●	●	●	●	●
Textiles	●	●	●	●	●	●	●	●	●
Eco Solutions	●	●	●	●	●	●	●	●	●
Industry Inputs, Power & Energy	●	●	●	●	●	●	●	●	●

Resilience of strategy: Key strategic interventions in mitigating rainfall exposure include climate adaptation measures in the Plantation Sector including crop diversification, data-driven monitoring of precipitation and rainfall patterns, diversification of supplier base (Purification and Eco Solutions) and backward integration among others. While these interventions will be adequate in the low-emission scenario, the increase in extreme weather events and limited opportunities in climate-resistant technology in the high-emission scenario will impact the Group's operations in the high-emission divergence scenario.

Capacity to adjust business model and strategy: The Group currently remains in a position to adapt its business model through crop diversification, deployment of unused lands to agricultural export crops, diversification of supply chain and backward integration. Further investments may be required over the medium-to-long in suitably leveraging technology for precision agriculture techniques and minimising the impact of weather variability.

The table below describes the financial areas potentially affected by this risk.

Financial area potentially affected	Direction of impact	Relative magnitude	Scenario-differentiated narrative
Revenue - plantation and agricultural segments	Downward pressure	Potentially significant (High exposure sectors in Scenario C)	Scenario A: limited impact expected with managed rainfall variability. Scenario B: moderate yield and quality reductions likely in dry zones. Scenario C: materially adverse yield and supply disruption expected, particularly for tea and rubber
Cost of goods sold - raw material procurement	Upward pressure	Moderate to significant	Scenarios B/C: reduced local agricultural output likely to increase procurement costs and necessitate sourcing from alternative, potentially higher-cost suppliers for Purification and Eco Solutions
Capital expenditure - adaptation investments	Upward pressure	Moderate (Scenarios A/B); Significant (Scenario C)	Increasing investment expected in water management infrastructure, precision agriculture technology, and climate-resilient crop varieties
Operating costs - insurance and risk management	Upward pressure	Moderate across all scenarios	Rising frequency of weather-related disruptions expected to increase insurance premiums and operational contingency costs.

Sustainability-Related Financial Disclosures

CRRO#2: PHYSICAL CLIMATE RISK- TEMPERATURE

Sri Lanka's average temperature rise is projected to be below the global average across all emission pathways, with increases estimated at approximately 1.2°C (Scenario A), 2.5°C (Scenario B), and above 3°C (Scenario C) above pre-industrial levels by 2100. Temperature increases have direct implications for agricultural yield, quality, and quantity; labour force productivity, cooling energy demand and human health and morbidity.

● Low ● Medium ● High

Our scenario	Scenario A- Net Zero			Scenario B-Current Pathway			Scenario C-Divergence		
	ST	MT	LT	ST	MT	LT	ST	MT	LT
Plantations	●	●	●	●	●	●	●	●	●
Agriculture	●	●	●	●	●	●	●	●	●
Hand Protection	●	●	●	●	●	●	●	●	●
Purification	●	●	●	●	●	●	●	●	●
Eco Solutions	●	●	●	●	●	●	●	●	●
Transportation and Logistics	●	●	●	●	●	●	●	●	●
Consumer & Retail	●	●	●	●	●	●	●	●	●

Resilience of strategy: Plantations and Agriculture sectors are pursuing climate-smart agriculture techniques including climate resistant seed varieties and regenerative practices. Crop diversification is also being explored, with the aim of increasing contribution from climate-resistant crops. The Group is also pursuing diversification of supply chains, in mitigating the exposure to climate change. While this strategy is expected to be effective in the low and mid-emission pathways, the temperature increase of more than 3°C in the high-emission pathway will be challenging to the Group and require more transformative change in order to effectively mitigate the impacts of rising temperature and adverse weather events. gh-emission divergence scenario.

Capacity to adjust business model and strategy: Similar to its strategy against increasing variability in rainfall the Group is currently positioned to adapt its business through crop diversification, deployment of unused lands to agricultural export crops, diversification of supply chain and backward integration. However, over the long-term more substantial investments may be required in suitably leveraging technology for Further investments may be required over the medium-to-long in suitable technological interventions, further diversification of operations and alternative raw materials in minimising the impact of rising temperature.

Financial area potentially affected	Direction of impact	Relative magnitude	Scenario-differentiated narrative
Revenue - plantation and agricultural segments	Downward pressure	Moderate (Scenarios A/B); Significant (Scenario C)	Scenario A: temperature increase manageable with climate-smart agriculture adaptations. Scenarios B/C: progressive yield and quality degradation for temperature-sensitive crops
Operating costs - labour productivity	Upward pressure	Moderate and increasing over time (LT)	Rising temperatures expected to reduce outdoor labour productivity and increase cooling energy demand across manufacturing facilities, cold-chain logistics, and consumer-facing operations. Impact escalates significantly under Scenario C (>3°C).]
Capital expenditure - infrastructure adaptation	Upward pressure	Moderate (LT, all scenarios); Significant (LT, Scenario C)	Potential requirement for facility upgrades, and supply chain infrastructure over the medium-to-long term, particularly in Scenario C where transformative change may be required

CRRO#3: CLIMATE-RELATED TRANSITION RISK- POLICY& LEGAL, MARKET DEMAND

The global and domestic transition to a low-carbon economy creates policy, legal, market, and technology-related risks for the Group's export-oriented sectors and those with carbon-intensive operations. Key regulatory developments include the EU Carbon Border Adjustment Mechanism (CBAM), the EU Deforestation Regulation (EUDR), packaging regulations under the European Green Deal, International Maritime Organization (IMO) shipping emissions standards, and domestic policy developments under Sri Lanka's Climate Prosperity Plan 2022 and NDC commitments.

● Low ● Medium ● High

Our scenario	Scenario A- Net Zero			Scenario B-Current Pathway			Scenario C-Divergence		
	ST	MT	LT	ST	MT	LT	ST	MT	LT
Hand Protection	●	●	●	●	●	●	●	●	●
Textiles	●	●	●	●	●	●	●	●	●
Purification	●	●	●	●	●	●	●	●	●
Transportation & Logistics	●	●	●	●	●	●	●	●	●
Construction Materials	●	●	●	●	●	●	●	●	●

Resilience of strategy: The Group is proactively monitoring sustainability-related policy and regulations, particularly from the EU. The impacts of EUDR and CBAM are expected to materialise in the short to medium-term and will require increased investments in reducing emissions, supply chain interventions as well as product and packaging innovation. In Scenarios B and C, the Group is on track to comply with major regulations, a Net Zero pathway (Scenario A) will require significant investments in processes, resources, technology and capabilities in the medium-to-long term to comply with emerging developments.

Capacity to adjust business model and strategy: The capacity to adjust the business model varies from Sector to Sector; Hand Protection, Textiles and Purification which are significantly exposed to emerging regulations are positioned to gradually adjust its business model and strategy given the nature of the emerging policy developments and required interventions. Transportation & Logistics on the hand, may face challenges given the significant investments required in retrofitting vessels and upgrading infrastructure, which could materialise in the medium-to-long term under a Net Zero Scenario.

Financial area potentially affected	Direction of impact	Relative magnitude	Scenario-differentiated narrative
Revenue - export-oriented sectors	Downward pressure (risk); upward potential (opportunity)	Potentially significant for Hand Protection, Textiles, Purification and Construction Materials	Scenario A: highest regulatory compliance cost but also greatest market access benefit for certified/low-carbon products. Scenarios B/C: EUDR and CBAM impacts materialise at lower stringency, offering some compliance runway
Operating costs - carbon and regulatory compliance	Upward pressure	Moderate (Scenarios B/C); Significant (Scenario A)	CBAM cost exposure increases under more ambitious decarbonisation pathways. Domestic energy policy under CPP scenarios will affect input costs for energy-intensive operations.
Capital expenditure - fleet, infrastructure, processes	Upward pressure	Significant for Transportation & Logistics (Scenario A)	Vessel retrofitting and fleet electrification requirements under IMO and domestic policies represent the most capital-intensive transition cost exposure. The required investment timeline under Scenario A is materially shorter than under B or C.
Market access and competitiveness	Mixed — risk and opportunity	Sector-dependent	Sectors with strong sustainability credentials (Hand Protection, Textiles) are positioned to benefit from green procurement trends. Sectors slower to transition face market access risk in EU and regulated markets. Net impact is sector- and scenario-specific.

Sustainability-Related Financial Disclosures

CRRO#4: ENERGY TRANSITION (OPPORTUNITY)

The transition to a low-carbon economy presents significant commercial opportunities for the Group, particularly for sectors positioned to benefit from rising demand for renewable energy, sustainable products, and nature-based solutions. Under Scenarios A and B, accelerated policy support and evolving market preferences are expected to create new revenue streams, reduce cost exposure to fossil fuel price volatility, and strengthen competitive positioning in sustainability-conscious export markets.

Opportunity type	Relevant sectors	Applicable scenario(s)	Time horizon	Nature of financial benefit (qualitative)
Renewable energy generation & energy cost reduction	Industry Inputs, Power & Energy, Energy, Mobility and Projects	A / B (strongest)	ST, MT, LT	Sectors engaged in renewable energy generation are positioned to benefit from growing demand for renewable energy generation, supported by Sri Lanka's NDC 3.0 target of 70% renewable energy by 2030. This opportunity is most significant under Scenario A but remains relevant across all three scenarios as a cost reduction and energy security measure
Sustainable mobility solutions	Energy, Mobility and Projects	A / B (strongest)	ST	Demand for sustainable mobility solutions is expected to grow significantly under Scenarios A and B, supported by Sri Lanka's NDC 3.0 commitment to improve vehicle fleet fuel economy and emission performance by 25% by 2035, and an accelerating consumer shift towards electric vehicles driven by an increasing influx of relatively affordable EV options in the local market.
Energy storage solutions	Purification	A / B (strongest)	ST, MT, LT	Upside potential is more pronounced under Scenario A, where policy-driven decarbonisation accelerates the transition, but the underlying demand trajectory for storage solutions remains robust across Scenarios A and B

RISK MANAGEMENT

In line with the Group's roadmap towards achieving full compliance with the SLFRS Sustainability Disclosure Standards, the Group significantly strengthened its sustainability risk management processes during the year. During the year, the Group fully embedded the management of sustainability-related risks to its existing ERM framework. As such, a formalised risk management framework was implemented across the Group during the year, clearly articulating mechanisms for risk identification, assessment, prioritisation and reporting, alongside the establishment of appropriate governance structures to oversee its effective execution. Refer to page 108 of the Risks and Opportunities Chapter of this Report for further information.

RISK MANAGEMENT

ADVANCING SUSTAINABILITY RISK MANAGEMENT

2023/24

- Identification of climate-related risks
- Qualitative assessment of implications

2024/25

- Widen risk coverage to include broader sustainability-related risks
- Quantification of financial effects for CRROs

2025/26

- Integration of sustainability-related risks to the ERM framework
- Strengthen oversight with the establishment of a Risk Management Committee
- Definition of criteria for risk assessment and prioritisation
- Quarterly reporting to the Board

Risk Identification: Group entities are required to translate internal developments, external trends and drivers into identified risks, which could potentially impact strategic performance and business objectives. Designated persons at Sector-level have been discharged with the responsibility of convening meetings with operational teams (including sustainability practitioners) to identify Sector-specific risks. At present, the Group's broader sustainability-related risk identification and assessment processes incorporate key nature-related impacts and

dependencies, including water withdrawal and consumption, waste generation and resource utilisation across operations and value chains. As the Group further integrates the recommendations of the Taskforce on Nature-related Financial Disclosures (TNFD), it intends to progressively incorporate more formalised nature-related assessment methodologies into its risk management and reporting processes.

Risk Assessment: Risk assessment considers the extent to which identified risks could impact the Group's strategy, business objectives and long-term value creation. The assessment process incorporates a range of approaches including expert input, forecasting and valuation techniques, scenario analysis and the use of external tools and market information, where relevant. Risks are assessed based on both their potential impact and likelihood of occurrence, taking into consideration possible financial, operational, customer, workforce and reputational implications. Likelihood assessments consider the probability and expected frequency of occurrence of a given risk event over the short to medium term.

Tools and processes

- ⊙ Stakeholder engagement
- ⊙ Regular performance updates
- ⊙ Analysis of megatrends
- ⊙ SWOT analysis
- ⊙ Media monitoring
- ⊙ Internal and audit findings

Inputs and parameters

- ⊙ Environment, climate and nature-related parameters
- ⊙ Operational indicators
- ⊙ Regulatory and market parameters

IMPACT				
Severity	Catastrophic	High	Medium	Low
Criteria	Revenue, EBITDA, Employee turnover, Loss of customers, Reputational damage			
LIKELIHOOD				
		High	Medium	Low
Criteria	Frequency of occurrence, Chance of occurrence			

Risk Prioritisation: Risks are prioritised to determine the urgency of the response, types of action required and the resource deployment that may be required. Prioritisation should follow cross-functional debates and discussions with representatives from the relevant functions. Risk assessment and prioritisation culminates in the formulation of a risk-heat map which visually communicates the risk landscape of an organisation, facilitating management attention and resource deployment.

Sustainability-Related Financial Disclosures

USE OF CLIMATE-RELATED SCENARIO ANALYSIS

At present, climate scenario analysis is not directly integrated as an input into the identification process for sustainability-related and climate-related risks and opportunities (SRROs/CRROs). The Group's climate scenario analysis processes remain at a foundational stage, with further work expected going forward to progressively strengthen scenario analysis capabilities and integrate related insights more closely into risk identification, assessment and strategic decision-making processes.

METRICS & TARGETS

This Chapter presents the Group's sustainability-related metrics and targets established to monitor performance in managing material sustainability-related and climate-related risks and opportunities. The chapter has been structured into two broad sections: (i) climate-related risks and opportunities and (ii) other sustainability-related risks and opportunities (SRROs). Climate-related disclosures have been further categorised into cross-industry metrics and targets applicable across the Group, together with industry-specific disclosures focused on sectors exposed to the most significant climate-related risks and opportunities.

Maturity of Scope 3 emissions

The Group's Scope 3 emissions are considerably larger than its Scope 1 and 2 emissions, given the depth and breadth of our operations. We are cognisant that accurately capturing the entirety of our Scope 3 emissions is extremely challenging at this juncture and we are adopting a phased approach to identify and measure our Scope 3 emissions. As disclosed last year we continue to widen the coverage of our Scope 3 emissions by adding 2 new categories (fuel and energy related activities and capital goods) thereby reporting on the following 7 categories as a minimum standard across the Group*.

- ⦿ Category 2: Capital goods
- ⦿ Category 3: Fuel and energy related activities
- ⦿ Category 4: Upstream transportation and distribution
- ⦿ Category 5: Waste generated in operations
- ⦿ Category 6: Business travel
- ⦿ Category 7: Employee commuting
- ⦿ Category 9: Downstream transportation and distribution

Meanwhile, several sectors (particularly Sectors which have committed to SBTI) report all categories of the Scope 3 emissions as listed below.

Reporting and Monitoring: Risk management follows a structured and tiered reporting process designed to ensure accountability and timely oversight. Consolidated risk heatmaps are tabled to the Risk Committee. Significant risks and mitigation measures are escalated to the Audit Committee and Board of Directors for review and alignment with group-wide governance standards.

Integration into existing risk management frameworks: The Group applies a consistent risk management procedure across both business risks and SRROs/CRROs ensuring alignment within the broader Enterprise Risk Management framework. Accordingly, SRROs and CRROs are assessed, monitored and tabled alongside other principal risks to the Audit Committee, with key matters subsequently communicated to the Board for oversight and strategic consideration.

Climate-related metrics and targets

Cross-industry metrics

Greenhouse gas (GHG) emissions

Computation methodology: The Group measure its Greenhouse gas (GHG) emissions based on the GHG Protocol-Corporate Accounting and Reporting Standard (revised edition). Hayleys also conducted a Group-wide verification of its carbon footprint in accordance with ISO 14064-1(2018)- Greenhouse Gas (GHG) through engaging Control Union.

Organisational and operational

boundary: The Group's carbon footprint computation represents all 14 Sectors and 195 subsidiaries which includes both the Group's local and overseas operations. The Group applies the financial control approach in defining its organisational boundary for greenhouse gas accounting purposes. The Group's operational boundary includes Scope 1 and Scope 2 emissions together with selected material Scope 3 categories as described in further detail in subsequent sections.

Sector	Scope 1	Scope 2	Categories captured under Scope 3	Assurance by 3rd party
Eco Solutions	✓	✓	7 categories	✓
Hand Protection	✓	✓	9 categories	✓
Purification	✓	✓	7 categories	✓
Textiles	✓	✓	10 categories covered	✓
Construction Materials	✓	✓	7 categories	✓
Plantations - Talawakelle Tea Estates - Kelani Valley Plantations - Horana Plantations	✓	✓	11 categories covered 5 categories covered 7 categories covered	✓
Agriculture	✓	✓	7 categories	✓
Consumer & Retail	✓	✓	7 categories	✓
Leisure	✓	✓	7 categories	✓
Industry Inputs, Power & Energy	✓	✓	7 categories	✓
Transportation and Logistics	✓	✓	14 categories covered	✓
Energy, Mobility and Projects	✓	✓	6 categories covered	✓
Tea Exports	✓	✓	7 categories	✓
Others	✓	✓	7 categories	✓

Measurement approach: In most instances, the Group has used the Global Warming Potential (GWP) and emission factors published by the Intergovernmental Panel on Climate Change (AR6) in assessing the climate impact of various gases; for emission categories for which IPCC factors are not directly available the Group has relied on other sources. Assumptions and emission factors relating to the computation of the scopes and categories of Scope 3 emissions are listed below:

Scope 3 emission category	Coverage	Emission factors
Scope 1	Emissions stemming from sources that are owned or controlled by Group including stationary combustion, mobile consumption and fugitive emissions. Fuel allowances paid by the organisation to employees is also taken into consideration. Fugitive emissions consist of emissions from refrigerants, fire extinguishers and waste-water treatments.	IPCC (AR6) emission factors
Scope 2	Emissions stemming from purchased electricity	Grid emission factors in the respective countries
Category 2: Capital goods	Emissions from the production of durable assets purchased by the company	DEFRA emission factors 2025
Category 3: Fuel and energy related activities	Emissions from the production and extraction of fuels and energy purchased and consumed by the company that are not included in Scope 1 or Scope 2.	DEFRA emission factors 2025
Category 4: Upstream transportation and distribution	Calculated based on the procurement of both imported and local input materials by air, sea and road. The computation of imported goods considers emissions generated from the port of importation to the organisation's premises.	DEFRA emission factors India GHG emission factors

Sustainability-Related Financial Disclosures

Scope 3 emission category	Coverage	Emission factors
Category 5: Waste generated in operations	Disposal and treatment of waste generated through operations	DEFRA emission factors 2025
Category 6: Business travel	Transportation of employees for business- related activities in vehicles not owned or operated by the company.	ICAO Carbon Emissions Calculator Ecoinvent 3.1
Category 7: Employee commuting	This includes emissions associated with commuting by all employees between their homes and worksites other than those which are given a fuel allowance,. Data is collated through employee surveys which are conducted every two years, covering approximately 80% of employees.	India GHG emission factors
Category 9: Downstream transportation and distribution	This includes emissions that occur from transportation and distribution of finished products, both locally and for exports. The computation of exported goods considers emissions generated up to the port of export.	DEFRA emission factors India GHG emission factors

There have been no changes to the measurement approach compared to the previous year other than the use of updated emission factors.

The Group's GHG emissions for the year under review are given below:

Scope 1 and Scope 2 Disclosures

	Greenhouse gas emissions (metric tonnes CO2e)					
Description	Scope 1		Scope 2		Total	
	2024/25	2025/26	2024/25	2025/26	2024/25	2025/26
Consolidated accounting group	112,756	113,207	70,520	72,587	183,276	185,794
Other investee (investment in associate)	280	346	1063	983	1,343	1,329
Total	113,036	113,553	71,583	73,570	184,619	187,120

Scope 3 disclosures

Scope 3 Emissions	Greenhouse gas emissions (metric tonnes CO2e)	
Category description	2024/25	2025/26
Category 2: Capital goods	-	4,966
Category 3: Fuel and energy-related services	-	35,239
Category 4: Upstream transportation and distribution	30,537	25,178
Category 5: Waste generated in operations	1,550	935
Category 6: Business travel	791	2,890
Category 7: Employee commuting	7,504	8,724
Category 9: Downstream transportation and distribution	111,153	54,184
Total	151,534	132,116

Climate-related transition risks

Exposure to climate-related transition risks is considered to be most significant within the Construction Materials, Transportation & Logistics and Textiles Sectors, where operational assets are more susceptible to evolving regulatory requirements, technological shifts and changing market expectations associated with the transition to a lower-carbon economy

Sector	Description	Assets (LKR mn)	% of assets
Transportation Sector	The sea-going fleet of Advantis is exposed transition risks arising from IMO regulations, which may necessitate significant retrofitting investments or potentially result in certain vessels becoming obsolete over time.	4,501	1%
Construction Materials Sector	Assets within the Construction Materials Sector may be exposed to transition risks arising from the CBAM, which could necessitate the gradual phase-out or replacement of carbon-intensive manufacturing assets	1,021	-

Climate-related physical risks

Of these Sectors, exposure of assets to physical climate risks is most pronounced within the Plantations Sector, while the remaining sectors are more likely to experience impacts on revenue generation. A summary of asset vulnerability is presented below:

Sector	Description	Assets (LKR mn)	% of assets
Plantations	The Sector's mature and immature plantations, distributed across 55 estates, are inherently vulnerable to the impacts of excessive rainfall, prolonged wet conditions and associated climate-related disruptions	9,840	2%

Climate-related opportunities

Climate-related opportunities across the Group primarily stem from the global energy transition, with the most significant benefits expected to accrue to the renewable energy portfolio within the Hayleys PLC Group. Additional opportunities are also evident in sustainable mobility solutions offered by Hayleys Fentons, alongside the renewable energy generation activities within the Industry Inputs, Power & Energy Segment and the energy storage solutions of the Purification Sector.

Capital deployment

The Group's future investments directed towards climate-related opportunities are summarised in the table below.

Purification Sector- Energy storage solutions
Energy, Mobility and Projects
Investments in renewable energy generation
Investments in scaling sustainable mobility solutions
Industry Inputs, Power & Energy
Investments in renewable energy generation projects

Internal carbon prices

The Group currently does not apply an internal carbon price within its operations or decision-making processes.

Remuneration

As discussed on page 148 the Group is in the process of aligning sustainability-related KPIs with remuneration frameworks across its sectors..

Sustainability-Related Financial Disclosures

Industry-based metrics

The Hayleys Group operates across 14 industry verticals and reports under 9 applicable SASB Industry Standards. Disclosures are scoped to those sectors where the Group's double materiality assessment has identified material climate-related risks and opportunities (CRROs), and where the applicable SASB standard provides climate-specific metrics that are relevant and reportable in the current period. This approach ensures that disclosures are decision-useful to primary users without presenting immaterial information that could obscure material matters. The basis for inclusion or exclusion of each sector is set out in the table below.

Mechanism for selecting metrics

The selection of metrics for each Climate-Related Risk and Opportunity (CRRO) and Sustainability-Related Risk and Opportunity (SRRO) was informed by the relevant industry-specific SASB Standards, with priority given to those metrics considered most relevant to the Group's operating context and the assessment of material sustainability-related matters. Given the diversified nature of the Group's portfolio, certain additional SASB metrics that are relevant to specific sectors and operating companies have not been included within the CRRO and SRRO disclosures and are instead discussed within the respective portfolio reviews presented on pages 212 to 317. This approach ensures that disclosures remain focused on the most decision-useful metrics while providing comprehensive coverage of sustainability-related performance across the Group.

Plantations (SASB Standard: Agricultural Products)				
Material CRRO identified		Basis		
Physical climate risk- Temperature and Rainfall		Highest physical risk exposure		
SASB Code	Metric	Unit	2025/26	2024/25
FB-AG-110a.1	Gross global Scope 1 emissions	Metric tons (t) CO ₂ -e	18,711	18,041
FB-AG-130a.1	Operational energy consumption	GJ	484,858	547,811
	-% grid electricity	%	9	17
	-% renewable	%	85	77
FB-AG-140a.1	Total water withdrawal	M3		
	-% from high/extremely high stress**	%	100	100
FB-AG-140a.2	Description of water management risks	Refer to ESG report for further information		
FB-AG-140a.3	Incidents of non-compliance related to water quantity/quality	No.	Nil	Nil

** The Aqueduct Water Risk Atlas places Sri Lanka in the medium to high-risk category for water stress

Textiles (SASB Standard: Apparel, Accessories & Footwear)				
Material CRRO identified		Basis		
Transition-related risks		Direct exposure to global brand sustainability requirements and significant contribut		
SASB Code	Metric	Unit	2025/26	2024/25
CG-AA-440a.2	Amount of priority raw materials purchased (MT) and certified %	%		
	-Cotton		7,407(44%)	8,021(41%)
	-Polyester		9,819(19%)	10,609(18%)
	-Dyes and Chemicals		12,239(100%)	13,385 (100%)

Hand Protection (SASB Standard: Household & Personal Products)				
Material CRRO identified Transition-related risks		Basis Significant export exposure to carbon-regulated markets		
SASB Code	Metric	Unit	2025/26	2024/25
CG-HP-140a.1	Total water withdrawn	%	100	100
	Total water consumed, Percentage withdrawn from High or Extremely High Baseline Water Stress**			
CG-HP-140a.2				

** The Aqueduct Water Risk Atlas places Sri Lanka in the medium to high-risk category for water stress

Purification (SASB Standard: Chemicals)				
Material CRRO identified Transition-related risks		Basis Significant export exposure to carbon-regulated markets and escalating customer pressures		
SASB Code	Metric	Unit	2025/26	2024/25
RT-CH-110a.1	Gross global Scope 1 emissions	Metric tons (t)	13,303	13,741
	Coverage of emission-limiting regulations	CO ₂ -e, %		-
RT-CH-110a.2	Discussion of long-term and short-term strategy or plan to manage Scope 1 emissions	Refer to page 171 for further information		
RT-CH-130a.1	Total energy consumed	GJ	1,237,234	1,473,979
	Renewable energy	%	77	75
	Grid electricity	%	10	11
	Self-generated energy	%	76	75
RT-CH-140a.1	Total water withdrawn			
	Total water consumed	M3	684,768	673,560
	Percentage of each in regions with High or Extremely High Baseline Water Stress	M3	807,939	689,921
		%	100	100
RT-CH-140a.2	Number of incidents of non-compliance relating to water	No.	Nil	Nil

Transportation & Logistics (SASB Standard: Marine Transportation)				
Material CRRO identified Transition-related risks		Basis Risks stemming from IMO regulations and significant contribution of emissions to the Group		
SASB Code	Metric	Unit	2025/26	2024/25
TR-MT-110a.1	Gross global Scope 1 emissions	Metric tons (t) CO ₂ -e	28,935	27,701
TR-MT-110a.2	Discussion of long-term and short-term strategy or plan to manage Scope 1 emissions			
TR-MT-110a.3	(1) Total energy consumed	GJ	372,138	343,424
	(2) percentage heavy fuel oil	%	93	80
	(3) percentage renewable	%	3	3

Sustainability-Related Financial Disclosures

CLIMATE-RELATED TARGETS

Climate-related targets are defined through the Group's ESG Roadmap, the Hayleys Lifecode and cascaded to sectors through sector-specific ESG targets. The target-setting process incorporates both top-down and bottom-up approaches, with the Centre team and sectors collaboratively establishing targets aligned with business growth objectives and sustainability aspirations. Targets are reviewed and approved by the respective ESG Steering Committees and the Hayleys Board, with progress monitored through quarterly Board-level reviews. Targets have not yet been validated by a third party, other than the sectors set out alongside which have committed to the Science-based-targets-initiative.

The Group's key climate-related targets and progress against the targets is summarised below:

Commitment to SBTi

The following Sectors, which collectively account for 28% of the Group's GHG emissions have committed and obtained verification of its SBTi targets

- ☉ Talawakelle Tea Estates PLC
- ☉ Hayleys Fabric PLC
- ☉ Kelani Valley Plantations PLC

Targets			
DESCRIPTION OF THE TARGET			
The Group's climate-related targets are mitigation targets and cover the Group's scope 1, 2 and 3 emissions. Targets relate to the entities within the Group's financial and operating boundary in the baseline year of 2018/19. Companies which were acquired by the Group subsequently have an annual 4% y-o-y reduction target in Scope 1 and 2 GHG emissions.			
SASB Code	Metric	Unit	2025/26
Metric used to set/monitor the target	tCO2e	Time horizon of the target	Long-term target (2030)
Base period and baseline value	FY 2018/19 Scope 1: 46,472 tCO2e Scope 2: 55,647 tCO2e Scope 3 emissions: 5548 tCO2e	Milestones and interim targets	4% annual reduction
Third-party frameworks	No	Changes to the target	No change
Performance against the targets	Target	2025/26	2024/25
Scope 1 GHG emissions	30% reduction by 2030	0%	6%
Scope 2 GHG emissions	30% reduction by 2030	3%	-2%
Scope 3 GHG emissions	10% reduction by 2030	0%	1527%

We are acutely aware that reducing our Scope 3 emissions will require extensive collaboration across our upstream and downstream value chains as well innovation in our product development processes. As our understanding on our Scope 3 emissions increase and we identify opportunities for emission reduction across our value chains, our targets are unlikely to remain static and will evolve as our own maturity in this space grows

SRRO METRICS AND TARGETS

The Group has established a set of metrics and targets to monitor and assess performance against its identified sustainability-related risks and opportunities (SRROs). In determining the relevance and appropriateness of these metrics, the Group has referred to internationally recognised frameworks and guidance, including the recommendations of the Taskforce on Nature-related Financial Disclosures (TNFD), together with internally

developed indicators embedded within the Group's and sector-level ESG Roadmaps.

SRRO#1: Ecological Impacts

In determining the metrics and disclosures relating to ecological impacts, the Group has referred to the recommendations and guidance of TNFD. As the Group remains in the early stages of its TNFD implementation journey, the current disclosures represent a foundational baseline

intended to support the progressive integration of nature-related considerations into decision-making and reporting processes. The Group will continue to enhance and refine its ecological impact-related metrics, over time as data availability and assessment capabilities further mature.

Metric 1			
Metric name and definition	Total rehabilitated/restored area (km ²) Source: TNFD guidelines Refers to the total land area under active rehabilitation or restoration initiatives during the reporting period, including areas where tree planting, reforestation and ecosystem restoration programmes are currently being implemented.		
Scope and boundary	Metrics refers to the consolidated group		
Method of computation and inputs, assumptions	The metric is quantified in hectares based on the extent of land area under active rehabilitation and restoration programmes during the reporting period		
Nature of metric	Absolute measure	Third-party validation	No
Targets			
Description of the target Increase the biodiversity enhancing programme to cover 5 times the built area occupied by Group			
Metric used to set/monitor the target	Area of land (hectareage)	Time horizon of the target	Long-term target (2030)
Base period and baseline value of baseline operational area	FY 2023/24	Milestones and interim targets	Annual increment of 50%
Third-party frameworks and regulatory requirements	No	Changes to the target	Target was revised in 2024/25 with the launch of the 2nd edition of the Hayleys Lifecode
	Target	2025/26	
Performance against the target	Biodiversity enhancing programmes to cover 5 times the built area	248.9 ha	

Metric 2			
Metric name and definition	Water withdrawal and consumption(m3) from areas of water scarcity, including identification of water source Source: TNFD guidelines Total volume of water withdrawn and consumed by operations located within water-stressed or water-scarce regions during the reporting period		
Scope and boundary	Metrics refers to the consolidated group		
Method of computation and inputs, assumptions	Water withdrawal and consumption are measured in cubic metres (m ³) using water meters, sub-meters and supplier invoices, where applicable Assumption: Sri Lanka's water stress exposure is assessed using the Aqueduct Water Risk Atlas, which classifies the country as having a medium to high level of water stress.		
Nature of metric	Absolute measure	Third-party validation	No

Sustainability-Related Financial Disclosures

Metric 2			
Targets			
Description of the target 50% sustainable water sourcing across the Group			
Metric used to set/monitor the target	Sustainable water sourcing (%)	Time horizon of the target	Long-term target (2030)
Base period and baseline value	FY 2018/19: 10% sustainable water sourcing	Milestones and interim targets	6% annual increase
Third-party frameworks	No	Changes to the target	No change
	Target	2025/26	2024/25
Performance against the target	6%	25%	14%

Metric 3			
Metric name and definition	Weight of hazardous and non-hazardous waste sent to landfill Source: TNFD guidelines Total quantity of hazardous and non-hazardous waste generated by the Group's operations and disposed of through landfill during the reporting period		
Scope and boundary	Metrics refers to the consolidated group		
Method of computation and inputs, assumptions	Waste quantities are determined using waste collection records, , invoices provided by licensed waste handlers, and internally maintained waste tracking logs, where applicable.		
Nature of metric	Absolute measure	Third-party validation	No
Targets			
Description of the target 40% of solid waste recycled			
Metric used to set/monitor the target	Amount of waste recycled (MT)/ Total solid waste (MT)	Time horizon of the target	Long-term target (2030)
Base period and baseline value	FY 2023/24: 17%	Milestones and interim targets	5% annual increase in waste recycled
Third-party frameworks	No	Changes to the target	No change
	Target	2025/26	
Performance against the target	40% of solid waste recycled	29%	18%

Please refer to the Group's ESG Report for further disclosures relating to the TNFD-metrics.

SRRO#2 Energy Transition (Opportunity)

Metric 3			
Metric name and definition	Revenue generated from energy transition-related opportunities. Source: Internally developed		
Scope and boundary	The metric relates to entities with significant upside potential arising from energy transition-related opportunities.		
Method of computation and inputs, assumptions	It is assumed that the Group's principal energy transition-related opportunities arise from energy storage solutions within the Purification Sector, sustainable mobility solutions within Hayleys Mobility, and renewable energy EPC and energy generation activities within the Power & Energy Sector and Hayleys Fentons.		
Nature of metric	Absolute measure (LKR mn)	Third-party validation	No
Targets: The Group has not yet defined targets for this metric			

Methodology for of quantification for CRRO/SRRO

CRRO#1 & #2: Physical risks of climate change- Rainfall and temperature	
Computation method	The potential impact on plantation production was estimated by analysing historical estate-level temperature and rainfall trends and mapping these against historical crop yield patterns. This assessment was supplemented by available research on projected yield responses under future climate scenarios. Based on these relationships, estimated changes in crop productivity were applied to current production levels to assess the potential impact on future production volume
Judgements/Assumptions	- Estimation of asset vulnerability, including the exposure of plantations, processing facilities and supporting infrastructure to floods, droughts, landslides - Assessment of crop sensitivity to climate variables, including the relationship between temperature, rainfall, humidity and crop productivity - Estimation of future yield impacts, including the extent to which changing climatic conditions may affect crop yields, quality and harvest cycles
Measurement uncertainty: For physical climate risks, emergency operational expenditure is estimated using recent historical experience as a base, with rainfall intensity and landslide frequency assumptions derived from observed trends over a three-year period; however, the episodic and non-linear nature of extreme weather events means that actual future costs may deviate materially from modelled outcomes. Revenue projections for high-grown tea incorporate an assumed yield decline trajectory at higher elevations, calibrated to a mid-range emissions pathway under the IPCC Sixth Assessment Report; however, the precise rate and timing of yield deterioration is subject to uncertainty in regional temperature and precipitation.	

SRRO # 1: Ecological Impacts

The quantification of ecological impacts remains at a nascent stage, and the Group will continue to enhance its methodologies and capabilities in this area going forward.

SRRO#2: Operational Safety	
Computation method	The financial impact of operational safety incidents was computed based on the losses incurred from fire-related incidents during the reporting period, as recognised in the financial statements. The calculation is derived from the actual costs and losses attributable to these incidents.
Judgements/Assumptions	The reported amount is derived directly from recorded costs and losses attributable to these incidents and does not involve any significant judgments, estimates or assumptions. The Group will continue to enhance its approach to quantifying the anticipated financial effects of operational safety-related risks and opportunities as data availability and assessment methodologies evolve.

Sustainability-Related Financial Disclosures

CRRO #3: Climate-related transition risk

Computation method The potential financial impacts of climate-related transition risks were assessed by evaluating the anticipated effects of emerging sustainability-related regulations on the Group's operations. This involved estimating the incremental cost per unit of production or operation arising from compliance requirements and applying these costs to projected business volumes over the assessment period. The analysis also considered the potential implications for revenue and operating costs, taking into account expected growth in production volumes and business activity under the respective scenarios.

Judgements/Assumptions

Hand Protection - EUDR

- ⊙ Price premium on EUDR-compliant rubber
- ⊙ Incremental cost of latex due to EUDR compliance have been considered for the Quantification.
- ⊙ Price increase of latex prices due to EUDR will not be transferred to customers

Construction Materials - CBAM

- ⊙ Estimated export growth of 7%

Transportation & Logistics- IMO

- ⊙ Annual GHG emissions from the vessel are assumed to reduce by 2% in the short-term, 4% in the mid-term, and 7% in the long-term, based on historical data analysis.
- ⊙ A GHG levy is applied on total vessel emissions at rates of 17% (short term), 15% (mid-term), and 30% (long-term).
- ⊙ An additional 3% annual emission reduction is projected through the adoption of new technologies.
- ⊙ Advantis, as the vessel owner, will bear the full cost of the IMO GHG levy

Measurement uncertainty: Key sources of uncertainty include the timing, scope and enforcement of sustainability-related regulations, future compliance requirements, changes in input and commodity prices, the pace of technological developments and variations in production volumes and growth assumptions. The frequency and severity of climate-related events, together with the effectiveness of adaptation and mitigation measures, may also influence actual outcomes

SRRO # 4: Energy Transition

Computation method

Judgements/Assumptions

- ⊙ Short-term effects are led by EC mix improvement, while water and air purification revenues of about 19.65 bn LKR and 5.67 bn LKR respectively continue to provide a broad climate-solution revenue base
- ⊙ Medium-term effects represent the main uplift period, with higher EC volumes providing significant upside while water and air purification demand remains structurally supported by water stress, reuse requirements and industrial emissions controls
- ⊙ Long-term financial effects remain positive but become more scenario-sensitive for EC than for purification; portfolio resilience arises from the combination of high-upside EC exposure with more persistent and regulation-driven water and air purification revenues

Measurement uncertainty: For physical climate risks, emergency operational expenditure is estimated using recent historical experience as a base, with rainfall intensity and landslide frequency assumptions derived from observed trends over a three-year period; however, the episodic and non-linear nature of extreme weather events means that actual future costs may deviate materially from modelled outcomes. Revenue projections for high-grown tea incorporate an assumed yield decline trajectory at higher elevations, calibrated to a mid-range.

MANAGEMENT
DISCUSSION
AND ANALYSIS

Bring this
Story to Life

AN ORBIT OF TRANSFORMATION

Planetary orbits are governed by gravitational forces that balance inertia and attraction. As a planet moves through space, the pull of a larger body shapes its path into a stable, elliptical trajectory. This dynamic equilibrium sustains motion without collapse or escape; allowing orbits to adjust while maintaining stability. Together, these forces form a system that is both constant and adaptive within a broader cosmic framework.

At Hayleys PLC, we operate within a complex economic and global environment, where forward momentum is guided by a balance of strategy and discipline. Each business and investment contributes to a unified trajectory, enabling expansion while remaining anchored to strong fundamentals. As conditions evolve, this balance allows for recalibration without disruption, ensuring continuity and resilience. Through this sustained motion, we advance with purpose; strengthening our position while creating enduring value across industries, communities, and markets.

GROUP CHIEF FINANCIAL OFFICER'S OVERVIEW

The Group's financial strategy is designed to drive long-term shareholder value through building a resilient and optimal portfolio of businesses, while maximising cash generation to fund future investments. Accordingly our approach to resource allocation and portfolio management seeks to maintain a strategic equilibrium between investing in high-potential, return-accretive growth ventures and preserving the stable cash flows generated by our mature businesses. In this regard, we continue to actively evolve the portfolio, positioning our mature businesses to move further up the value chain through a greater focus on specialised and higher-value market segments, while accelerating the growth of emerging businesses with strong long-term potential

The year under review was a strong one for the Group, with revenue reaching a record high and profitability remaining commendable despite the challenging operating conditions that prevailed. Alongside delivering robust financial performance, we remained focused on strengthening the Group's financial resilience through prudent balance sheet management, enhanced funding flexibility and continued attention to key leverage and debt protection metrics, thereby reinforcing the long-term stability of the business.

KEY AREAS OF FINANCIAL FOCUS

- Strengthening the Group's financial position through the successful mobilisation of capital via debenture issuances and a rights issue
- Strategic deployment of capital prioritising high-return, scalable businesses
- Enhancing portfolio quality through the rationalisation of non-core and underperforming operations.
- Effective capital allocation- which balances the needs of our shareholders while retaining funding for future growth
- Strategic financial reporting and transparency

FINANCIAL DRIVERS

- Revenue growth
- Effective margin management
- Cash flow generation
- Working capital management
- Management of financial risks

REVENUE

Robust performance from our domestic-facing businesses provided an effective counterbalance to the headwinds encountered by export-oriented sectors, reaffirming the value of the Group's diversified earnings base. Consolidated Revenue increased by 19% to an unprecedented Rs.585.02 bn during the year, crossing the half-trillion revenue mark for the first time in the Group's history. Top line growth was driven primarily by the Consumer & Retail (+44%), Purification (+56%) and Transportation & Logistics (+10%) sectors. As domestic operating conditions improved, the Group's local businesses delivered strong growth, resulting in a greater contribution to the revenue mix. Consequently, domestic operations accounted for 50% of Consolidated Revenue during the year, compared to 47% in the previous year. Further information on the factors which shaped the performance of each Sector is detailed in the Portfolio Reviews from page 212 to 317.

During the year, the results of Luxury Resort (Pvt) Ltd have been classified as a discontinued operation in the Financial Statements and presented separately from continuing operations in accordance with SLFRS 5 – Non-current Assets Held for Sale and Discontinued Operations. This follows the Group's decision to transfer the Head lease and major operating assets of the entity, in line with its strategy of sharpening portfolio focus and concentrating its leisure investments within Sri Lanka.

HOW WE MEASURE PROGRESS

Financial Capital KPIs

GROWTH	PROFITABILITY	SHAREHOLDER RETURNS
Revenue growth (%) 2024  -10% 2025  13% 2026  19%	EBIT margin (%) 2024  10 2025  10 2026  8	Dividend per share (Rs.) 2024  5.35 2025  6.00 2026  6.00
How we performed: The Group achieved 19% Revenue growth from continuing operations to reach a record high of Rs. 585.02 bn driven primarily by the strong performance of the domestic businesses while the export-oriented sectors delivered a year of mixed performance.	How we performed: EBIT margins recorded a decline during the year, reflecting the escalation of global commodity prices and energy costs across major business lines and start-up costs associated with the Group's newer growth ventures.	How we performed: EPS from continuing operations increased by 3.3% as the Group continued to deliver on its shareholder commitments.

	CONSOLIDATED REVENUE	Rs. bn
2022		338
2023		487
2024		435
2025		491
2026		585

Most significant increases in revenue was driven by,

- Consumer & Retail – supported by strategic market activations and portfolio expansion
- Purification - driven by the Sector's increasing focus on high-value added, innovative product segments
- Transportation & Logistics - Driven by improved performance in Freight Management and Integrated Logistics segments

Implications of SRROs on Revenue

- Rainfall and temperature impact on yields of Plantations Sector
- Revenue upside from energy transition: particularly in the Purification and Power & Energy segments

OPERATING PROFITABILITY

The Group's Operating Profit/EBIT by continuing operations increased by 2% to Rs.49.37 bn during the year, reflecting top -line growth as well as improvement in the core performance of Consumer & Retail, Purification and Hand Protection Sectors. Challenges relating to demand dynamics and escalating operating costs impacted across selected sectors including Textiles (-58%) and Transportation & Logistics (-9%) among others. Notably, the Eco Solutions Sector which had incurred a Loss Before Interest and Tax of Rs.333.21 mn the previous year, recorded a strong turnaround to generate an EBIT of Rs. 247.51 mn during the reviewed period. Overall, the Group's EBIT margin narrowed from 10% to 8% during the year. Key determinants of the Group's Operating Profitability are set out below:

Cost of Sales including Raw Materials and Consumables: The Group's Cost of Sales increased by 20% during the year, reflecting the sharp escalation in global commodity prices and energy costs, resulting in the Consolidated GP margin narrowing marginally to 23%, from 24% the previous year.

Operating Costs:

The Group's Administrative Expenses increased by 18% during the year, reflecting higher personnel costs arising from the Group's continued focus on employee value creation, along with start-up costs incurred in developing and scaling its new growth ventures. Distribution expenses increased by 33% to Rs. 23.74 bn during the year, in view of increased investments in market activations across key verticals as well as higher commission paid on the significantly higher business volumes at Singer (Sri Lanka) PLC. Meanwhile, Other Expenses increased by 45% to Rs.1.55 bn during the year.

Implications of SRROs on Profitability

Physical damage to assets due to extreme weather events

- ⦿ Increased cost of sourcing water due to supply disruptions
- ⦿ Increased cost of compliance stemming from sustainability-related regulations

NET FINANCE COSTS

The Group's Net Finance Cost declined by 6% to Rs.10.80 bn during the year, supported by an increase in Finance Income reflecting a change in fair value of financial assets on the Group's investments in Harischandra Mills PLC and DIMO PLC. Meanwhile, Finance Costs also increased by 8% to Rs.19.93 bn during the year, due to a near 42% increase in Total Borrowings to Rs.289.67 bn.

PROFIT BEFORE TAX

The Group's Profit Before Tax from continuing operations increased by 4% to Rs. 38.04 bn during the year, reflecting the strength of its market positions and its ability to proactively capture emerging opportunities across its portfolio. The Consumer & Retail Sector emerged as the largest contributor to PBT with a share of (29%), followed closely Transportation & Logistics (15%), Purification (15%), Hand Protection (11%) and Energy, Mobility & Projects (6%).

TAXATION

The Group's Tax Expense for the year increased by 13% to Rs.14.59 bn during the year led by improved profitability while the effective tax rate amounted to 39% during the year. The tax payments relevant to each of the tax rates applicable across the Group are set out below.

Tax strategy: The Group's tax strategy is reviewed by the Board and implemented by the Group Head of Tax and the Group Chief Financial Officer. The tax strategy centers on the following pillars:

- ⦿ Ensuring compliance with all applicable laws and regulations in all jurisdictions that the Group operates in
- ⦿ Maintain open and transparent engagement with tax authorities

- ⦿ Efficient management of tax affairs which support achievement of growth profitability targets
- ⦿ Ensuring timely and accurate filing of all tax returns (corporate income tax, VAT/GST, payroll taxes, etc.).

PROFIT AFTER TAX

The Group generated a Profit After Tax from continuing operations of Rs.23.45 bn, a marginal decrease of 2% compared to the previous year. At Company level, Hayleys PLC recorded a Loss After Tax of Rs.1.44 bn, due to the Impairment on Investment and Receivables relating to the transfer of the Head Lease and operating assets of Luxury Resort (Pvt) Ltd during the year (Refer to page 468 for further information)

OTHER COMPREHENSIVE INCOME

The Group's Other Comprehensive Income for the year amounted to Rs.2.62 bn, reflecting net exchange differences on the translation of foreign operations. As a result, the Group's Total Comprehensive Income declined by 8% to Rs.24.84 bn compared to the previous year.

TOTAL ASSETS

The growth in the Group's asset base during the year was driven by strategic investments to strengthen future growth platforms, alongside higher working capital requirements associated with increased business activity. Total assets increased by 26% to Rs.645.82 bn during the year, with Total Non-Current Assets and Current Assets increasing by a respective 16% and 34% during the year. The former represents a near 10% increase in Property, Plant and Equipment reflecting capital expenditure across key sectors including Hand Protection, Purification, Transportation & Logistics and Energy, Mobility & Projects among others. The increase in Total Current Assets was driven primarily by higher operational activity across key verticals, which saw Trade & Other Receivables increasing by 40% during the period under review.

Implications of SRROs on Financial Position

- Physical damage to infrastructure & Inventory due to extreme weather events
- Funding requirement stemming from asset replacement
- Investment in low carbon technology & renewable energy

CAPITAL AND FUNDING

During the year, the Group undertook several strategic initiatives to further strengthen its funding profile and enhance long-term financial resilience. These initiatives were aimed at strengthening the capital structure, partially settling existing debt and providing the financial capacity to pursue future growth opportunities. A key milestone was the completion of a Rs. 9.0 bn Rights Issue, the Group's first equity raising exercise since 2005, which was oversubscribed, reflecting the confidence placed in the Group's

strategy and long-term prospects by its shareholders. Complementing this, the Group raised Rs. 12.9 bn through two listed, rated, senior, unsecured redeemable debenture issuances, further supporting its long-term capital management objectives and enhancing funding flexibility.

Maintaining a stable debt profile

The Group's Total Borrowings increased by 42% during the year, reflecting higher working capital requirements across key businesses, capital expenditure undertaken to support strategic investments and investments in new renewable energy generation projects. Effective working capital management remained a key priority throughout the year, ensuring the continuity of operations and the ability of businesses to respond to evolving market opportunities. These investments were undertaken in line with the Group's long-term growth strategy and commitment to strengthening its future earnings capacity. Short-term Borrowings accounted for 68% of the Group's Total

Borrowings, primarily reflecting working capital facilities that are typically revolving in nature. In managing the Group's debt profile, we ensure that the maturities of our funding sources are adequately spread out. Counterparty exposures are also monitored on an ongoing basis, ensuring that our funding platform is diversified across banks and other debt instruments.

DEBT MATURITY PROFILE

CASH FLOW AND LIQUIDITY

The Group's approach to liquidity management is centred on the proactive monitoring of forecast and actual cash flows, maintaining strong relationships with funding partners and ensuring the optimal structuring of funding for capital investments, acquisitions and other strategic initiatives. During the year, the Group recorded a Net Cash Outflow from Operating Activities of Rs. 17.13 bn, compared to an inflow of Rs. 17.99 bn in the previous year, primarily reflecting increased working capital requirements associated with higher levels of operational activity. Net Cash Outflow from Investing Activities amounted to Rs. 31.79 bn, driven by capacity expansions, strategic capital expenditure and investments across key business verticals. Meanwhile, Net Cash from Financing Activities recorded an inflow of Rs. 183.05 mn, supported by proceeds from interest-bearing borrowings and debenture issuances, which helped fund the Group's investment program while supporting liquidity and financial flexibility.

WAY FORWARD

Priorities for 2026/27

- ④ **Deploy capital towards strategic growth opportunities,** particularly through the Group's investments in renewable energy and large-format supermarkets. These investments are expected to support long-term value creation by expanding exposure to sectors with favourable growth prospects, strengthening recurring earnings streams and enhancing the resilience of the Group's portfolio
- ④ **Maintain prudent liquidity management and proactively manage debt maturities:** The Group remains focused on preserving a strong liquidity position through disciplined cash flow management, maintaining adequate funding buffers and ensuring access to diversified sources of financing
- ④ **Diversify funding sources to enhance financial flexibility and resilience:** The Group seeks to maintain a well-balanced funding structure by accessing a range of financing channels, including bank borrowings, capital market instruments and other alternative funding sources where appropriate

PERFORMANCE OF THE COLOMBO STOCK EXCHANGE

Building on the strong momentum witnessed towards the latter part of 2024, the Colombo Stock Exchange recorded another year of growth in 2025, supported by improving macroeconomic conditions, favourable investor sentiments and stronger corporate earnings. The All Share Price Index (ASPI) and the S&P SL20 recorded gains of 41.9% and 26.6%, respectively, during the year. Market activity remained robust, with average daily turnover increasing significantly to approximately Rs. 5.18 tn from Rs. 2.24 tn in 2025, while market capitalisation surpassed Rs. 8.07 tn by year-end. The positive performance of the market was largely driven by domestic investors, reflecting growing confidence in Sri Lanka's economic recovery and future growth prospects.

Debenture 1 : 5 year, fixed interest rate of 12.30%, redeemable on 08th May 2030

Debenture 2 : 5 year, fixed interest rate of 12.30%, redeemable on 21st May 2030

Debenture 3 : 5 year, fixed interest rate of 13.75%, redeemable on 09th March 2031

SHARE PRICE MOVEMENTS

PERFORMANCE OF THE HAYLEYS SHARE

The Hayleys share performed exceptionally well during the year, strengthening gradually throughout the year to close at Rs. 215.00, an increase of 57% from the beginning of the year. The share price traded between a low of Rs.127.00 and a high of Rs. 260.00, while the average volume traded amounted to 417,438 during the year while the daily average turnover clocked in at Rs. 18,472 mn compared to Rs.16,357 mn the year before, demonstrating improved investor interest and frequency of trading.

Shareholder Returns

The Group delivered superior returns to shareholders during the year, recording broad-based improvements across multiple shareholder metrics as summarised in the table below.

The Company's Price-to-Earnings (P/E) ratio during the year, indicating that the market valued the Company's earnings at a higher multiple compared to the previous year. The increase reflects a strengthening in market valuation relative to earnings reflects positive investor sentiment regarding the Company's future performance and growth prospects. Meanwhile, the reduction in dividend yield during the year primarily reflects the appreciation in the Company's share price, which outpaced the growth in dividend distributions. This is consistent with the higher market valuation assigned to the Company and reflects investor confidence in its long-term growth prospects and earnings potential

Systems and standards

- ⦿ The Group continued to strengthen its innovation agenda through ongoing investments in research and development, capability enhancement, and strategic collaborations which support the advancement of products and operational processes.
- ⦿ During the year, the Group continued to advance its digital transformation agenda through multiple enterprise-wide initiatives aimed at strengthening operational efficiency, enhancing customer engagement and enabling data-driven decision-making across sectors and functions.
- ⦿ Industry insights and domain-specific knowledge built over the Group's long-standing legacy have cultivated a unique base of intellectual capital, which has continued to deepen through organic growth, acquisitions, and cross-sector collaboration

How it supports our strategy

Portfolio Optimisation

Customer Centricity

KEY INTERVENTIONS IN 2025/26

- Hayleys' AI strategy is focused on building a data-intelligent enterprise that leverages AI to strengthen decision-making, efficiency, and automation across commercial, operational, and customer-facing functions.
- During the year, the Company received multiple awards and recognitions across diverse areas including corporate reporting, business excellence, exports, human resource management, innovation, and technical capabilities, reflecting the breadth of its expertise and the strength of its operational and strategic execution

Way forward and adequacy of Intellectual Capital

- Integration of the digital transformation roadmap across all relevant areas of the business
- Innovation focused on the development of premium and value-added products, enabling the Group to strengthen market positioning, enhance customer differentiation
- A strong product pipeline, continued investment in research and development, and a culture of knowledge sharing are expected to further strengthen the Group's intellectual capital, enhancing its ability to capture new opportunities, enter new markets, and expand customer reach.

Natural Capital

What it means to us: Natural capital forms the foundation of many of our business operations, particularly in the resource-dependent sectors. As ecosystems provide essential inputs and services, from raw materials to climate regulation, the degradation of natural capital poses significant risks to long-term business viability

PROFILE OF NATURAL CAPITAL

Energy and water consumption

Management Approach

Refer to the Group's ESG Report for further information

ENERGY & EMISSIONS

- ⦿ Fuel switching and conversion of furnace boilers to biomass boilers across key sectors
- ⦿ Majority of new production lines are powered with biomass energy
- ⦿ Real time energy monitoring systems
- ⦿ Ongoing investments in large-scale renewable energy generation
- ⦿ Strategic expansion into sustainable mobility solutions

WASTE

- ⦿ Embedding circularity concepts into innovation and product development
- ⦿ Waste to energy conversions
- ⦿ E-waste collection through Singer outlets
- ⦿ Somerset ECO Material Collection & Processing Centre established by Talawakelle Tea Estates in partnership with Coca Cola and Janashakthan

How it supports our strategy

Portfolio Optimisation

Strategic ESG Integration

Refer the Group's ESG Report for further information on the Group's environmental commitment

KEY INTERVENTIONS IN 2025/26

WATER & EFFLUENTS

- Increased reliance on sustainable water sourcing
- Improved water monitoring and measurement mechanisms
- Optimising water usage in manufacturing operations
- Increasing effluent treatment plant capacity

BIODIVERSITY

- Project Kirulu- the Group's flagship biodiversity conservation programme
- Mangrove restoration by Hayleys Advantis
- Biodiversity preservation in the Plantation Sector (Rotary one million trees project, Project REGROW by Horana Plantations)
- ECO Pulse Cloud Forest Restoration programme

Way forward

- Contributing to the country's green energy transition through increasing investments in large-scale energy generation projects and investments in sustainable mobility solutions
- Ongoing investments in biodiversity and ecosystem restoration projects

Portfolio Review

The Group's portfolio review set out in the following pages, provides a concise and balanced overview of the value creation of our Sectors for the period under review. In line with the principles of Integrated Reporting, we have included material information relating to the Sectors' resource allocation, strategy, performance, external environment and stakeholder value creation among others.

Key improvements featured in this year's Sector Review

- Improved clarity and conciseness:** In line with the Group's overall target towards improving conciseness of the Report, the content included in each Portfolio Review has been consciously streamlined
- Focus on financial materiality:** Aligned with the evolution of the Group's Integrated Annual Report this year, the Portfolio Review focuses primarily on matters that are financially material. Topics that are high in impact materiality are disclosed in the Group's ESG Report.
- Performance against target disclosures:** We have disclosed performance against budgets/targets for financial, environmental and social performance in each Portfolio Review

Information shared in the Sector Reviews

- Key factors shaping the operating environment and impacts on the business
- Risk and opportunity landscape
- Strategic priorities and measurement against KPIs
- Financially material sustainability topics
- Prospects and plans

Rs. 15.11 bn (+18%)	Rs. 98.93 mn	Rs. (154.3) mn (+70%)	Rs. 23.41 bn (+13%)	Rs. 11.81 bn (+24%)	1,105 (-2%)	11,568 tCO ₂ e (+6%)

Year in review

Financial performance

The Sector delivered a strong recovery during the year, with revenue increasing by 18% to Rs. 15.11 bn and Profit Before Tax recovering to Rs. 98.93 mn. Performance was supported by the improved contribution of the Eco Fibre segment and notable improvements across several business segments.

73% reliance on renewable energy and reduction in emission intensity

Indirect employment generation across the value chain

ESG performance

Strategic highlights

Pursued increased penetration in non-traditional markets while expanding the product portfolio

Strengthen competitive position and access new markets in the eco fibre segment

Operational efficiency and lean management

Ensure supply chain security through backward integration

Way forward

The carbon footprint for 2025/26 represents an expanded coverage of Scope 3 emissions compared to the previous year

1. ECO FIBRE

Manufacture a range of value-added coir fibre products

2. BRUSHWARE

Pioneer in the brush market, catering to both the local and international markets

3.FLOOR COVERING AND MATTRESSES

Manufacturer of coir, rubber, flocked door mats and PU mattresses

SECTOR COMPOSITION

INTEGRATED PERFORMANCE

OPERATING ENVIRONMENT

The global coir market continued to record steady growth during the year, supported by increasing customer preference towards sustainable and environmentally responsible materials. Demand for coir-based solutions remained resilient across key export markets, reflecting the industry's growing relevance within agriculture, horticulture, landscaping, and industrial applications. On the other hand, the operating environment was also marked by significant supply-side pressures with weaker harvests in key sourcing regions resulting in a sharp escalation in raw material prices during the year. These conditions, together with broader supply chain disruptions, placed considerable pressure on industry cost structures and margins.

At the same time, the global market remained intensely competitive, compelling manufacturers to strengthen their focus on innovation and agility to preserve market share and customer relationships amid evolving industry dynamics. Despite these challenges, several long-term structural trends continued to support market expansion. The increasing adoption of coir in erosion control and hydroponics applications, combined with limited arable land availability and growing consumer preference for healthier and more sustainable food production methods, continued to drive demand for high-quality growing media products globally.

INTEGRATED PERFORMANCE REVIEW

Performance upheld by eco fibre: The Sector recorded a strong turnaround during the year, with revenue increasing by 18% to Rs. 15.11 bn and recorded a Profit Before Tax of Rs. 98.93 mn compared to a loss of Rs. 523.9 mn in the previous year. Performance was driven primarily by the Eco Fibre segment, which delivered a healthy performance during the year, supported by improved demand conditions and stronger market penetration. Strategic measures implemented in the previous year resulted in expansion into new markets and product categories. Meanwhile, the performance of the Brushware segment remained below expectations amid challenging market conditions, although the Mattresses and Floor Coverings segments recorded notable improvements compared to the previous year.

	Revenue (y-o-y) %	PBT (y-o-y) %
y-o-y growth	Revenue	Profit

Refer to Sustainability-related Financial Disclosures on page 140 for further information on the financial implications of sustainability issues

*SASB Household and Personal care Products standard

The above factors represent the Sector's financially material sustainability issues. Please refer to the Group's ESG supplement for disclosures on impact material sustainability issues.

Sub-sector performance: The Eco Fibre segment emerged as the primary driver of the Sector's growth during the year with Profit Before Tax increasing exponentially, supported by growth momentum across global horticulture markets and continued expansion into new geographies and applications. The business successfully penetrated the Moroccan market while making inroads in specialised solutions for tomato and berry cultivation. In line with its strategic focus on expanding its global footprint, the Sector also ventured into South America, leveraging opportunities in seed production and other high-value cultivation applications. The growing emphasis on value-added growing media solutions, particularly for European and US markets, continued to support customer acquisition and volume expansion.

The Floor Coverings segment recorded an improvement in performance during

the year, with revenue increasing alongside improved margins and a reduction in losses, although overall performance continued to remain below expectations. New product development initiatives also gained traction, with certain products reaching commercial supply stage during the year. The Sector continued to focus on streamlining its distribution network and improving market effectiveness by rationalising its dealer base while strengthening direct distribution channels. In parallel, the business underwent a broader restructuring process, including changes to key personnel, SKU rationalisation, enhanced marketing initiatives, and measures aimed at improving capacity utilisation.

The Mattresses segment delivered a strong performance during the year, supported by improved market penetration and strengthened

distribution capabilities through the Singer network. The ranks as the third-largest player in the market, recorded a healthy volume growth while operating at approximately 80% capacity utilisation. Performance was further supported by the expansion into complementary product categories, rationalisation of its distribution model by transitioning from a dealer-based structure to a distributor-led network.

Brushware: The Brushware segment continued to face challenging operating conditions during the year, with losses increasing from Rs. 165 mn to Rs. 323 mn, reflecting low-capacity utilisation levels and elevated raw material costs. In response, the Sector continued to pursue a focused recovery strategy centred on driving export market growth through investments in machinery, development of new molds, process improvements, and backward integration initiatives

ESG as a driver of business value

Eco Solutions

relating to key raw materials. At the same time, the business leveraged its strong domestic distribution footprint, which now covers approximately 8,800 hardware outlets, to channel new product offerings and broaden its hardware-related product portfolio.

Backward integration: During the year, the Sector officially launched its fibre extraction facility in Nikaweratiya, representing an investment of approximately Rs. 700 mn and marking a significant milestone in strengthening backward integration and supply chain resilience. Following initial product testing and quality optimisation processes, the facility is expected to gradually scale up operations and eventually supply approximately 30% of the Sector's raw material requirement. The investment positions the business among the few players in the industry with integrated fibre extraction capabilities, thereby enhancing long-term supply chain stability.

PROSPECTS AND PLANS

The long-term outlook for the Sector remains positive, supported by favourable global demand dynamics for sustainable coir-based solutions, particularly within growing media. Increasing environmental regulation and the broader global focus on sustainability are expected to continue driving demand for natural and renewable alternatives across international markets. The Sector will continue to focus on simplifying its holding structure while rationalising and consolidating loss-making business lines in order to improve operational efficiencies and strengthen overall profitability. The Eco Fibre segment is expected to remain a key growth driver, supported by planned initiatives to improve lead-time responsiveness, and further strengthen market presence within the Middle Eastern and African regions. The Sector's risk and opportunity landscape and its interventions to mitigate and leverage these developments are mapped below:

3. THAILAND OPERATIONS

2 manufacturing facilities in Thailand producing disposable gloves

SECTOR COMPOSITION

INTEGRATED PERFORMANCE

OPERATING ENVIRONMENT

The glove industry operating environment remained volatile during the year, shaped by changing demand dynamics, raw material fluctuations, and geopolitical developments. At the beginning of the year, demand conditions improved with a strong order book and a favourable product mix weighted towards synthetic gloves, while the disposable glove market remained sluggish due to excess industry capacity. Raw material prices remained relatively stable during the early part of the year despite some shortages in natural rubber supply and freight-related disruptions. Sourcing strategies were diversified to reduce reliance on individual markets, while weather-related disruptions in Thailand had limited impact on operations. However, conditions changed significantly following the escalation of geopolitical tensions in the Middle East,

which drove sharp increases in nitrile-based raw material prices linked to crude oil markets amid supply shortages and production disruptions.

The long-term growth potential of the glove industry remains favourable, supported by increasing global emphasis on occupational safety, hygiene standards and health protection across a wide range of industries. Demand is expected to be driven by the healthcare sector and also by growing requirements for protective handwear in industries such as manufacturing, automotive, construction, food processing, electronics and chemical handling. Structural trends including stricter workplace safety regulations, rising industrialisation in emerging markets and greater awareness of worker protection are expected to sustain demand over the long term.

INTEGRATED PERFORMANCE REVIEW

Year of strong growth: The Sector delivered a strong performance during the year, with revenue increasing by 10% to Rs. 51.1 Bn, supported by volume growth of 14%, a more favourable product mix, and strong pricing momentum for nitrile gloves, particularly during the early part of the year. Profit before tax increased by 13% to Rs. 4.4 Bn, driven by improved margins, continued focus on operational efficiencies and automation, and the ongoing transition towards more technologically advanced manufacturing capabilities. The Italian operations recorded a strong improvement in profitability, with Profit Before Tax increasing by nearly 134%, led by ICOQuanti's continued expansion within disposable glove markets, particularly the medical segment, supported by dedicated marketing efforts and market share gains. Meanwhile, the France operations remained loss-making during the year, although losses moderated compared to the previous year as restructuring and rationalisation initiatives continued. Performance at Hi-Care in Thailand remained below expectations; however, efforts are underway to improve product mix towards higher-value products, enhance capacity utilisation, and strengthen margins through ongoing operational rationalisation initiatives.

Refer to Sustainability-related Financial Disclosures on page 140 for further information on the financial implications of sustainability issues

*SASB Household and Personal Care Products standard

The above factors represent the Sector's financially material sustainability issues. Please refer to the Group's ESG supplement for disclosures on impact material sustainability issues.

Strengthening the manufacturing footprint:

The Group continued to expand its manufacturing capacity during the year through several strategic investments and commissioning initiatives. The Sector commenced construction of its sixth manufacturing facility in Sri Lanka through the strategic conversion of an acquired plant, the commissioning of a natural rubber glove manufacturing facility in Hanwella, and the launch of next-generation natural rubber and electrician's glove dipping plants in Kottawa, strengthening the Group's production capabilities and product portfolio.

Value-added product strategy: The Sector continued to strengthen its value-added product strategy during the year, with several high-end products introduced and enhanced across key segments. Focus remained on developing high-value, niche, and customer-specific

solutions targeting sophisticated industrial and specialised markets. Key developments included the introduction of high-end chemical-resistant butyl gloves, expansion of specialised industrial product offerings, and continued growth within the household glove category.

Strategic customer acquisition: The Sector pursued strategic customer acquisition during the year, onboarding 47 new customers through participation in international trade exhibitions and focused market development initiatives. Efforts were directed towards strengthening presence in high-growth markets including India, Saudi Arabia, East Asia, Australia, and South America. The Sports Gloves segment also recorded continued momentum, with expansion of the customer portfolio and increasing engagement with globally recognised brands, supporting ongoing capacity expansion initiatives within the segment.

Digitalisation and innovation: The Sector continued to strengthen its position as an industry leader in technologically advanced manufacturing through ongoing investments in automation, robotics, and digitalisation. During the year, the Sector commissioned the industry's first next-generation AI and robotics-enabled dipping plant, while also advancing several digital initiatives including a pre-launched enhanced production planning system with future AI-driven planning capabilities, qualified systems, energy monitoring platforms, warehouse management systems, and robotic material handling solutions, including several first-time implementations in Sri Lanka.

Our people proposition: The Sector continued to invest in its people during the year, recognising that a strong organisational culture, diversity, equity and inclusion, and ongoing training and

ESG as a driver of business value

Hand Protection

development remain fundamental to long-term success. Reflecting these efforts and the Sector's broader operational excellence, Dipped Products PLC (DPL) was recognised as the Overall Winner – Most Outstanding Exporter 2025 at the National Chamber of Exporters (NCE) Export Awards, in addition to securing the Gold Award in the Rubber and Rubber Products Sector – Extra Large Category and three Special Awards recognising foreign exchange earnings, performance in emerging markets, and support for persons with disabilities within the export sector.

PROSPECTS AND PLANS

The immediate operating environment remains uncertain given the ongoing geopolitical tensions and resulting supply chain disruptions, particularly across key raw materials and petroleum-based packaging inputs. In response, the Sector continues to strategically navigate the situation by balancing customer retention with the timely pass-through of cost escalations where necessary. Despite these near-term challenges, the Sector's longer-term outlook remains favourable, supported by continued focus on expanding customer reach and launching value-added products. The commissioning of the new plant in Katunayake is also expected to support future volume growth through catering to the industrial and niche product segments. The Sector's risk and opportunity landscape and its interventions to effectively mitigate and leverage these developments are mapped below:

A complete range of over 1,500 product variants including standard, washed impregnated granular powder and extruded pelletized forms	The Sector caters to over 600 customers in over 50 countries with marketing offices in Sri Lanka, USA, Europe and Australia and an extensive distributor network globally	Seven manufacturing facilities comprising 2 each in Sri Lanka and Indonesia, 2 in Thailand and 1 in Philippine.	Advanced research and product development capabilities which have enabled the Sector to cater to evolving customer demands across different applications including value added activated carbon for energy storage applications

OPERATING ENVIRONMENT

The operating landscape during the year was shaped by a combination of strong demand dynamics and heightened input-side pressures. Global demand remained favourable, underpinned by robust performance in core application segments. The gold sector, in particular, experienced sustained momentum in line with global economic uncertainty while tightening environmental regulations supported increasing demand for water purification carbons. Emerging application segments also gained traction, with demand for energy storage solutions rising significantly, driven by structural shifts such as the expansion of AI-driven data centres, grid stabilisation requirements, and growth in the electric vehicle market, particularly in China.

Against this backdrop of demand strength, the industry faced notable supply-side challenges. Raw material markets remained constrained, with key sourcing regions including Sri Lanka, Indonesia and India affected by climate-related disruptions and competing demand from China. In addition, competitive intensity for raw materials increased, particularly from emerging producers in India and the Philippines. Resultantly, charcoal prices increased by over 50% during the year, resulting in a significant escalation in input costs. While supply conditions showed signs of moderate stabilisation toward the latter part of the period, pricing pressures remained elevated.

Sustainability-related opportunities

Opportunities for energy storage solutions stemming from the low-carbon transition

CRRO#4

STRATEGY & RESOURCE ALLOCATION

Strategic priorities

Innovation-led energy storage 1

Strategic focus on expanding the innovation-led energy storage portfolio of solutions including super capacitor carbons and silicone carbon composites

Resource allocation: Investment in R&D: Rs. 262 mn

Relevance to Group strategy:

Supply chain security and resilience 2

Continued emphasis on backward integration, geographical expansion of supplier base and pursuing opportunities in alternative input material

Resource allocation: No. of new coconut-shell and charcoal suppliers added: 44

Relevance to Group strategy:

Capacity expansions 3

The Sector expanded production capacity in value-added energy storage solutions while also adding capacity in Thailand. The Sector's new manufacturing facility in Philippines is currently under construction

Resource allocation: CAPEX: Rs. 4.22 bn

Relevance to Group strategy:

H-High, M-Medium, L-Low | Red circle represents adverse effect while green circle represents positive effect

MEASURING PROGRESS

About this KPI and why we use it:

- ⦿ Demonstrates the effectiveness of the Sector's value-added product strategy and optimum product mix

NEW PRODUCTS DEVELOPED

About this KPI and why we use it:

- ⦿ Demonstrates the success of the Sector's supplier expansion and diversification strategy

TOTAL SUPPLIERS

About this KPI and why we use it:

- ⦿ Represents the Sector's upside potential and ability to cater to evolving market opportunities

15%

Capacity expansion during the year

INTEGRATED PERFORMANCE REVIEW

Resilient performance: The Sector delivered a strong Revenue growth of 56% to Rs. 66.77 bn during the year, driven by a near 5% volume growth, higher prices and a favourable shift in the product mix towards value-added segments, particularly energy storage carbons. However, the sharp escalation in raw material costs exerted pressure on gross margins which narrowed from 28% to 20% during the year. Despite these cost headwinds, the Sector's continued emphasis on value-added carbons and higher-margin product categories enabled profit resilience. Accordingly, the Sector's Profit Before Tax recorded a marginal growth of 7% to Rs. 5.9 bn underscoring the effectiveness of the Sector's strategic focus on portfolio optimisation and value enhancement. The Environmental Engineering segment recorded a marginal decrease in Profit Before Tax of 4% to Rs. 64 mn during the year, although the long-term prospects are promising given the gradual recovery in government-led projects across Sri Lanka and the Maldives. Activity levels showed a notable uptick towards the latter part of

The above factors represent the Sector's financially material sustainability issues. Please refer to the Group's ESG supplement for disclosures on impact material sustainability issues.

the year, reflecting an improving project pipeline and a more conducive operating landscape.

Innovation-led energy storage

solutions: Energy storage carbons continued to gain strategic prominence during the year, supported by accelerating demand across key end-use applications. Structural shifts driven by the rapid expansion of electric vehicle manufacturing in China, increasing investments in AI-driven data centres, and the growing need for grid stabilisation and synchronisation have strengthened the long-term growth potential of this segment. In response to these dynamics, the Sector focused on strengthening its portfolio of supercapacitor carbons and silicon carbon composites while also intensifying its market development efforts, recording significant customer acquisition across China and South

Korea. As a result of these efforts, Haycarb has now emerged as a significant player in the global energy storage solutions domain attesting to the technical excellence of its solutions.

Investing for the future: Capacity expansion and operational enhancement initiatives remained a key focus area during the year. Strategic investments in Thailand, including the commissioning of a new turbine and boiler and increased capacity of RECOGEN supported a circa 15% increase in production volumes. In parallel, an investment of over Rs. 2.0 bn was directed towards expanding energy storage carbon manufacturing capacity, more than doubling output in this high-growth segment. The Group's latest manufacturing facility in the Philippines is also currently under construction and is expected to be commissioned in early 2027, further strengthening its regional production footprint. Complementing these investments, the Sector advanced

its digitalisation agenda in boiler control systems and charcoal procurement processes.

Supply chain security: Supply chain security and resilience remained a critical focus area amid regional shortages stemming from adverse climate impacts, disease, and heightened demand from China. In response, the Sector advanced its multi-pronged strategy centred on geographical diversification of manufacturing and deeper backward integration. This included the expansion of the Haritha Angara programme and the establishment of a new charcoal production project in Surabaya, Indonesia. This initiative enabled the development of a broader supplier ecosystem in Indonesia, currently fulfilling approximately 15% to 20% of raw material requirements. Concurrently, the Sector continues to evaluate and integrate alternative raw material sources to enhance long-term supply resilience.

ESG as a driver of business value

Purification

PROSPECTS AND PLANS

Looking ahead, the operating environment is expected to remain volatile in the immediate term, particularly with ongoing disruptions in the Middle East impacting global shipping routes, freight costs and marine insurance premiums. Despite these headwinds, underlying demand fundamentals remain extremely encouraging. In particular, the energy storage segment is expected to witness robust growth, supported by the rapid expansion of electric vehicle manufacturing, especially in China, and rising investments in AI-driven data centres and grid infrastructure. These structural shifts are anticipated to sustain long-term demand for advanced carbon solutions, reinforcing the sector's relevance within evolving global energy and technology ecosystems. The Sector's risk and opportunity landscape and its interventions to effectively mitigate and leverage these developments are mapped below:

Short-term		Medium to Long-term	
Portfolio optimisation	• Increase contribution from value-added carbon products • Customer acquisition across Asian markets		• Expand regional presence of water purification business
Inclusive business models	• Continued expansion of Haritha Angara initiatives in regional manufacturing locations		• Drive supply chain integration efforts in Phillippines
Strategic ESG Integration	• Drive decarbonisation agenda in line with the aspirations of the Activate framework		• Leverage opportunities arising from low-energy transition
What we hope to achieve	• 20% Revenue growth • ROCE >15%		• 30% Revenue growth / ROCE >20% • 25% reduction in Scope 1 and 2 GHG emissions • Average training hours of 40 p/a

Opportunities and levers
• Energy transition to low carbon economy
• Increasingly stringent air and water purification regulations
• Sustainability as a competitive edge

Risks to strategy
• Escalation of state-based armed conflict
• Implications of physical climate risk including rainfall and temperature on coconut supply chains
• Escalating regional competition for raw materials

Year in review

Financial performance

Performance during the year was impacted by weakened global demand, shifting sourcing dynamics, and rising input and labour costs, although the Sector responded through strategic agility to navigate the challenging operating environment.

13% reduction in Scope 1 & 2 GHG emissions

Ongoing investments in biodiversity and ecosystem preservation

ESG highlights

Strategic highlights

Zero tolerance waste strategy and achieving 100% right-first-time execution

Brand diversification and value-added product strategy

Diversify customer base through increased engagement with emerging, fast-growing brands

Innovation in value-added synthetic portfolio

Way forward

The carbon footprint for 2025/26 represents an expanded coverage of Scope 3 emissions compared to the previous year

1. HAYLEYS FABRICS PLC

Fabric manufacturer with an annual production capacity of 11,400 MT

2. SOUTH ASIA TEXTILES

Fabric manufacturer with an annual production capacity of 10,32 MT

SECTOR COMPOSITION

INTEGRATED PERFORMANCE

Market presence	Manufacturing capabilities	Innovation	Sustainability focusw
The Sector's caters to a high-end and emerging global fashion brands such as Calvin Klein, Tommy Hilfiger and Victoria's Secret among others	Knitting, Dyeing, Printing, Brushing, Sueding and Finishing, with the ability to manufacture a variety of tailor-made natural, synthetic and weft-knit fabrics.	The first Sri Lankan fabric mill to launch its own brand, 'INNO'- enabling it to position itself as a niche supplier of fashion-forward fabric	Globally recognised for its strong sustainability focus , with numerous innovations centered on decarbonisation, circularity and resource efficiency

OPERATING ENVIRONMENT

The global fashion industry is undergoing a period of long-term structural transformation, shaped by shifting trade dynamics, evolving consumer behaviour and rapid technological disruption. Tariff measures adopted by the United States in 2025 have redrawn global trade flows, compelling brands and suppliers to recalibrate sourcing strategies with greater agility. The growing dominance of e-commerce platforms and digital marketplaces is further reshaping the industry, intensifying competition and driving the need for faster, more responsive supply chains aligned with changing consumer preferences. The luxury segment saw a wave of creative resets supported by the entry of exciting new brands seeking to reinvigorate consumer interest.

The heightened global disruptions placed considerable strain on Sri Lanka's apparel value chain. A key development was the imposition of a 40% tariff on apparel exports to the United States, materially eroding the country's cost competitiveness in its largest end-market. This was further compounded by the rationalisation of supplier bases by global brands, which consolidated volumes into alternative regional markets. Meanwhile intense price competition due to excess capacity and rising domestic costs, including an increase in minimum wages, placing significant pressure on margins. Collectively, these factors contributed to one of the most challenging operating environments for the industry in recent years, necessitating strategic agility and recalibration across the value chain.

INTEGRATED PERFORMANCE REVIEW

Navigating market headwinds:

Performance during the year reflected the pronounced challenges stemming from the operating landscape, while also highlighting the Sector's ability to respond with strategic agility and proactive intervention. Revenue declined by 13%, reflecting a 13% contraction in volumes, as demand from global fashion brands weakened sharply amid shifting sourcing dynamics and subdued consumer sentiment. On the other hand, margins were pressured by intensified price competition across an oversupplied market, further compounded by escalating input and labour costs. Against this backdrop, the Sector recorded a decline in Profit Before Tax and Profit After Tax of 66% and 70% respectively to Rs. 1.04 bn and Rs. 637.75 mn.

Refer to Sustainability-related Financial Disclosures on page 140 for further information on the financial implications of sustainability issues

*SASB Apparel, Accessories and Footwear Standard

The above factors represent the Sector's financially material sustainability issues. Please refer to the Group's ESG supplement for disclosures on impact material sustainability issues.

Relentless focus on resource

optimisation: Operational excellence remained a critical lever in mitigating the impact of an increasingly adverse operating environment. In August, the Group initiated its 'Zero Tolerance' programme, centred on eliminating wastage and achieving 100% right-first-time execution with zero rework, underpinned by five clearly defined KPIs driven directly by the Board. Notably, while the Group experienced a deterioration in performance from mid-year amid escalating external pressures, the operational efficiencies realised through this programme proved pivotal in stabilising performance

Brand and product diversification

strategy: The Sector continued to refine its brand and product strategy in line with evolving industry dynamics. Increased focus was placed on the fast-growing

athleisure category, where the rise of digitally native and e-commerce-driven brands is reshaping traditional sourcing models. Accordingly, the Sector broadened its engagement to include a more diverse mix of customers aligning with their preference for smaller, more flexible order quantities. This strategy has also enabled the diversification of major markets, with the reliance on the USA declining from 58% to 51% during the year.

In parallel, the Sector continued to advance its product strategy by progressively moving into higher-value fabric segments, particularly nylon-based products. Leveraging INNO, the Sector's own brand, the Sector is accelerating the introduction of differentiated and innovative offerings such as advanced knitted structures and enhanced functionality, positioning itself as a price leader in niche, value-added segments.

Labour dynamics: Efforts to improve gender representation remained a key area of focus in people management, with female participation increasing to approximately 24%, with pronounced improvements in knitting operations. This shift reflects observed improvements in operational outcomes, as higher levels of diligence and precision have translated into lower rejection rates and reduced downgrades. In parallel, the Group strengthened its talent pipeline by integrating young engineering graduates into production roles, fostering greater intergenerational diversity and accelerating the adoption of modern technical capabilities. The year also saw the successful conclusion of labour negotiations, culminating in the signing of a wage agreement, thereby ensuring continuity and stability across the workforce.

ESG as a driver of business value

Textiles

PROSPECTS AND PLANS

The near-term outlook remains uncertain, shaped by ongoing geopolitical tensions and volatility in global commodity markets. The Group remains particularly exposed to rising crude oil prices, which directly impact the cost of petroleum-based synthetic yarns sourced from key markets such as China, while elevated freight rates continue to exert additional pressure on input and logistics costs. In this context, maintaining agility and the ability to adapt swiftly to shifting conditions will be critical. Notwithstanding these near-term challenges, the long-term prospects of the industry remain encouraging, with emerging niche opportunities in value-added and specialised segments presenting avenues for sustainable growth.

Short-term	Medium to Long-term
Portfolio optimisation - Diversify customer base through increased engagement with emerging, fast-growing brands - Ongoing focus on process optimisation and operational excellence	Expansion of manufacturing capabilities and capacities
Customer Centricity Innovation in value-added synthetic portfolio	Technical developments through collaboration
Strategic ESG Integration - Strategic emphasis on driving decarbonisation agenda - Increase reliance on renewable energy	Accelerated positive impacts in line with the Green Catalyst ESG roadmap
What we hope to achieve 3% Revenue growth - ROCE > 10%	7% Revenue growth - ROCE > 20%

Opportunities and levers

- Emergence of new apparel brands
- Digitalisation and new operating models
- Customers' increasing sustainability consciousness

Risks to strategy

- Ripple effects of prevalent geopolitical conflict
- Increasing cost pressures and potential impacts on margins
- Escalating implications of climate change and water availability on the cotton value chain (CRRO 1)

Year in review

Financial performance

The Sector experienced a challenging year due to external pressures and temporary operational disruptions during the replacement and refurbishment of several extruders.

First Aluminium extruder to obtain the ASI Certification in Sri Lanka

Reduction in Scope 1 & 2 GHG emissions

Increased usage of recycled billet

ESG performance

Strategic highlights

The Sector continued to focus on growing contribution from exports

Strategic focus on strengthening manufacturing capabilities and driving digital transformation

Develop presence in non-traditional markets

Strengthen value-added proposition in export markets

Way forward

The carbon footprint for 2025/26 represents an expanded coverage of Scope 3 emissions compared to the previous year

Manufacturing strength

As the **largest manufacturer** of aluminium extrusions in Sri Lanka the Sector has an annual capacity of 22,000 MTs. Infrastructure includes

- Extrusion, melting, powder coating and anodizing plants
- 9 distribution centres
- 13 Lumin Concept centres

Quality commitment

A host of **local and international certifications** including QMEA, QUALANOD, QUALICOAT and several ISO Standards

Global reach

Strong presence in international markets such as **UK, USA, Canada, Australia, New Zealand, Germany, Italy, Singapore and India**, with exports generating nearly 35% of the Sector's Revenue

Access to proprietary systems

Manufacturing rights for **9 globally renowned proprietary systems** for Aluminium windows

OPERATING ENVIRONMENT

The Sector's performance is typically correlated to the country's construction sector which demonstrated a measured recovery during the year, expanding by 9.2%, underpinned by a resurgence in residential activity, including an uptick in suburban luxury housing developments. This momentum was, in part, supported by the release of pent-up demand and reflects the gradual recommencement of projects across key urban and peri-urban corridors.

Against this backdrop, the domestic aluminium market witnessed heightened competitive pressures, particularly in the earlier part of the financial year, which saw the continuation of duty-free imports of finished aluminium doors and windows until January. This exerted downward pressure on pricing structures, compressing margins across local manufacturers. Meanwhile, global aluminium prices recorded a sharp escalation of over 40%, driven by elevated demand, persistent supply chain disruptions and geoeconomic tensions. These dynamics were further compounded by the imposition of a 25% tariff on aluminium imports by the USA, which led to a significant drop in demand in additional cost pressures across the value chain.

INTEGRATED PERFORMANCE

INTEGRATED PERFORMANCE REVIEW

Moderation in performance: The Sector's performance reflected the external challenges that prevailed during the year which were compounded by partial operational disruptions in the first half, as several extruders underwent replacement and refurbishment. This resulted in an overall volume decline of 25%, which, together with prevailing price pressures, led to a near 8% reduction in Revenue. EBIT declined by 7% to Rs. 1.77 billion, driven by the weakening of core operations and the normalisation of the relatively high insurance claim recognised in the previous year. Consequently, the Sector's

Profit Before Tax decreased by 9% to Rs. 1.04 billion for the year. Notwithstanding these challenges, momentum improved towards the latter part of the year, with a strengthening demand pipeline in the final quarter, which resulted in capacity utilisation levels increasing from approximately 50% to 70%.

Diversifying export markets: Amid evolving geoeconomic developments, particularly in the United States which has traditionally been a key export destination, the Sector adopted a strategic shift towards diversifying its export markets. This included a focused effort on customer acquisition across both new and existing regions, aimed at reducing market concentration risk and strengthening revenue resilience. Leveraging its innovative product portfolio, including specialised offerings such as balcony systems, the Sector was able to enhance its international value proposition resulting in the Sector's export volumes increasing by 16% during the year, accounting for 18% of Revenue.

Digital transformation: During the year, the Sector placed increased emphasis on digitalisation and AI-driven initiatives, including the implementation of an AI-assisted platform for policy access,

Construction Materials

Refer to Sustainability-related Financial Disclosures on page 140 for further information on the financial implications of sustainability issues

*SASB Construction Materials Standard

** The Aqueduct Water Risk Atlas places Sri Lanka in the medium to high-risk category for water stress

and sheet processing equipment including bending and shearing machines. In parallel, the Sector placed significant emphasis on increasing the use of recycled materials and driving efficiency improvements across operations, reinforcing its commitment to sustainable and cost-effective growth.

People and partners: During the year, the Sector's employee value proposition was strengthened through a continued focus on talent development, including increased training hours across all categories and the introduction of an

e-learning platform featuring structured monitoring of training effectiveness and knowledge absorption. Alumex continues to be a catalyst for skill development across the aluminium value chain, delivering training sessions to diverse industry stakeholders including fabricators, dealers, engineers and students of the Vocational Training Authority and NAITA among others.

Decarbonisation strategy: The Sector's decarbonisation strategy is aligned with the 1.5°C emission reduction pathway outlined by the International Aluminium

Institute and is anchored within its ESG roadmap, Elevate, launched last year. This roadmap sets the foundation for reducing emission intensity across operations through targeted initiatives such as increasing the use of recycled billets and driving energy efficiency improvements across manufacturing processes. Collectively, these efforts will support a gradual reduction in emission intensity while also positioning the Sector to align with emerging regulatory requirements, including the Carbon Border Adjustment Mechanism (CBAM).

ESG as a driver of business value

The above factors represent the Sector's financially material sustainability issues. Please refer to the Group's ESG supplement for disclosures on impact material sustainability issues.

Construction Materials

PROSPECTS AND PLANS

In the immediate term, Alumex operates within a markedly volatile environment, shaped primarily by escalating geopolitical tensions in the Middle East. The disruption of operations in that region, including the impact on plants linked to three of the largest billet suppliers to the global extrusion industry, has constrained supply chains and contributed to a sharp escalation in input prices. The Sector is pursuing increased diversification of its supply chain to mitigate this potential vulnerability although fuel availability remains the most critical risk to operations and the broader economy.

Over the medium to long term, prospects remain positive, supported by an expected recovery in the construction sector, improving macroeconomic conditions, and the rollout of large-scale projects. This outlook is further reinforced by the increasing preference for aluminium over timber, driven by its durability, sustainability, design flexibility, and weather resistance, which has supported rising demand in recent years. Growth in export markets further strengthens the trajectory, positioning the Company for sustained expansion beyond the current period of uncertainty.

Short-term		Medium to Long-term	
Portfolio optimisation	Develop presence in non-traditional markets	Develop customers across 5 continents and set up sales offices in key markets	
	Strengthen value-added proposition in export markets	Increase contribution from premium products	
	Ongoing development of fabricators to manage proprietary systems	Drive decarbonisation plans in line with Elevate Roadmap	
	What we hope to achieve 18% Revenue growth 9% PBT growth	18% Revenue growth - ROCE >20%	

Opportunities and levers

- Sustainability as a competitive edge in the industry
- Recommencement of large-scale infrastructure projects in Sri Lanka
- Customer demand for convenient and alternatives to wood fixtures

Risks to strategy

- State-based armed conflict and implications on global supply chains
- Cost and availability of fuel stemming from disruptions to supply chain
- Increasing focus on industry decarbonisation through regulations such as the Carbon Border Adjustment Mechanism

Strength and impact	Competitive position	Quality benchmark	World-leader in industry sustainability
Sri Lankas' largest plantation sector group, collectively accounting for 4.5% and 4.8% of the country's tea and rubber production	Consistently ranking among the top price takers in the Colombo Tea Auction, with TTE and KVPL ranking 1st and 2nd and HPL 4th respectively	Benchmark of quality as the most Certified Plantation Companies in Sri Lanka, which includes 43 certifications and 16 management systems across all three RPCs	TTE and KVPL have obtained verification of its SBTi targets, in addition to obtaining the regenagri® certification

OPERATING ENVIRONMENT

Sri Lanka's plantation sector remains at critical crossroads, reflecting mounting structural pressures from rising labour costs, acute labour shortages and low productivity as well as the escalating implications of climate change. The country's tea production increased marginally to 264.12 million kg in 2025, with all three elevations recording modest growth during the year. Despite Sri Lankan continuing to command premium pricing in global markets, underpinned by its reputation for quality, auction prices declined marginally during the year, falling by 5% during the year. The most significant challenge arose from the near 70% increase in daily wages of plantation sector workers to LKR 1,750, intensifying cost pressures in a sector where labour accounts for

approximately 60% of total cost of production. This has further strained and already challenged operating landscape, particularly for RPCs, which, unlike smallholders who benefit from various subsidies, receive limited direct support—thereby constraining their ability to sustain margins and reinvest in long-term productivity. To navigate structural challenges, the plantation sector is rethinking traditional operating model to drive transformation and ensure future readiness.

Meanwhile, the rubber industry also faced significant pressure impacted by weakening global demand, policy uncertainty, persistent disease outbreaks, labour shortages and rising cost of production. The removal of the SVAT system led to strained liquidity

across the value chain, altering market dynamics as the industry increasingly shifted from traditional auction mechanisms to direct purchasing.

PREMIUM PRICING

INTEGRATED PERFORMANCE REVIEW

Resilience in a challenging landscape:

The Sector demonstrated strategic foresight in navigating the industry's structural constraints to deliver a resilient performance during the year. Despite a 1% contraction in tea production, the Sector's relentless focus on delivering superior quality enabled all three RPCs to sustain price premiums, while ongoing crop diversification initiatives helped enhance revenue stability. Accordingly, the Sector's Revenue increased by 4% to Rs. 19.97 bn during the year. However, EBIT declined by 22% to Rs. 2.01 bn, reflecting the sharp increase in wages and other costs during the year. Overall, the Sector's Profit Before Tax decreased by 24% to Rs. 2.2 bn during the year, while Profit After Tax clocked in at Rs. 1.39 bn, compared to Rs. 1.91 bn the previous year. Key investments during the year included the commissioning of the state-of-the-art Kiruwanaganga Tea Factory, constructed at an investment of Rs. 780 mn, with a manufacturing capacity of 14,000 kg of green leaf tea per day.

*SASB Agricultural Products Satandard

** The Aqueduct Water Risk Atlas places Sri Lanka in the medium to high-risk category for water stress

The above factors represent the Sector's financially material sustainability issues. Please refer to the Group's ESG supplement for disclosures on impact material sustainability issues.

Crop diversification: Crop diversification remains a key strategic priority as the Sector seeks to build a more resilient and balanced revenue profile, while reducing exposure to climate-related risks and optimising land use. In this context, KVPL has outlined plans to allocate approximately 20% of its land extent to coffee and cinnamon cultivation by 2028, reflecting a structured shift towards higher-value, climate-resilient crops. At TTE, diversification into cinnamon across Low Grown estates has yielded encouraging results, including the successful turnaround of a previously underperforming property, with the crop now contributing positively to overall performance and being rapidly scaled. Meanwhile, HPL continues to maintain approximately 250 hectares under oil palm cultivation. With the anticipated removal of the cultivation ban, subject to environmental safeguards, HPL remains well-positioned to recommence and expand oil palm cultivation, given its

existing compliance with requirements on soil conservation, forestry cover and broader environmental standards.

Labour dynamics: The Sector continued to drive efforts towards transforming labour dynamics, which remain challenged by escalating wage costs, low labour productivity and persistent labour shortages, partly driven by migration out of the industry and the perceived lack of dignity associated with estate employment. In response, Hayleys Plantations has sought to move away from the traditional daily wage-based system through the introduction of an innovative revenue share model, aimed at creating social business enterprises within estates. Currently accounting for over 50% of the Sector's total revenue generation, the model offers greater flexibility in working hours and alignment to productivity enabling workers to enhance their earnings through a more entrepreneurial approach. The Sector

maintains that equitable, productivity-linked remuneration models represent the way forward, supported by ongoing efforts in mechanisation to further improve efficiency and reduce dependency on manual labour.

Quality and sustainability: The Sector continues to strategically leverage sustainability as a means of strengthening competitive advantage, reducing exposure to climate change and building long-term resilience. During the year, this approach was formalised through the launch of the ESG roadmap, *Regenerate*, which integrates sustainability priorities with core business strategy while reinforcing a commitment to responsible business practices. Key initiatives include ecosystem preservation, the application of organic fertiliser, decarbonisation and investments in water stewardship. In parallel, social sustainability remains a priority, exemplified by the 'Home for Every Plantation Worker' programme.

ESG as a driver of business value

Plantations

PROSPECTS AND PLANS

The short-term outlook for the Sector remains uncertain, particularly in light of evolving geopolitical developments and their potential impact on freight rates, fertiliser prices, global demand and pricing dynamics. This is further compounded by structural challenges within Sri Lanka's tea industry, including escalating cost of production, persistent labour shortages and the intensifying implications of climate change. Notwithstanding these headwinds, the Sector remains optimistic that the strategic interventions undertaken in recent years to recalibrate its traditional operating model will yield results over time. The sector is also proactively engaging with global buyers to develop direct sales channels, reducing reliance on traditional auction mechanisms.

Ongoing measures to transform estate operations, supported by the Sector's industry-leading talent and proactive leadership teams, are expected to strengthen resilience and competitiveness, positioning all three RPCs as future-ready, sustainable and high-quality producers of tea.

Short-term		Medium to Long-term
Portfolio optimisation - Ongoing focus on crop diversification - Focus on efficiencies, yield improvements and automation		Develop speciality teas catering to evolving customer requirements
Strategic ESG integration - Increase reliance organic fertiliser - Widen reliance on renewable energy - Biodiversity preservation		Drive decarbonisation efforts aligned to the SBTi
Inclusive business models - Increase the coverage of remuneration share models in creating more equitable value - Drive increased female representation in leadership roles		
What we hope to achieve ROE >18%		ROE>18% 42% Scope 1 & 2 emission reduction Zero significant workplace injuries

Opportunities and levers

- Emergence of niche markets and sustainability-led differentiation
- Transformation of traditional labour models
- Expanding into complementary crops to build a more resilient and diversified revenue base

Risks to strategy

- Implications of ongoing global geopolitical tensions
- Escalating implications of climate change (SRRO link)
- Labour shortage and relatively low productivity

INTEGRATED PERFORMANCE

Leadership position	Global relationships	Extension services	Regional presence
Largest Sri Lankan exporter of processed fruits and vegetables. Largest producer and exporter of tissue culture plants. Only Sri Lankan exporter of F1 hybrid flower seeds. Leader in Agri input solutions and equipment.	Long-standing relationships with 66 globally renowned principals including Kubota, Bayer, BASF, Elanco and Hipra among others.	Agriculture Extension Services powered by over 137 skilled agriculturalists who collaborate with stakeholders across the agriculture value chain in propagating knowledge and best practice.	Haychem Bangladesh offers an array of crop protection, fertiliser, bio-fertiliser, animal health and other solutions to the agriculture sector of Bangladesh.

OPERATING ENVIRONMENT

Sri Lanka’s agricultural sector demonstrated measured resilience within a challenging operating environment, recording a modest growth of 1.4% during the period. This expansion was achieved despite adverse climatic disruptions arising from Cyclone Ditwah and a continued escalation in the cost of key agricultural inputs, which exerted pressure on cultivation cycles and farmer margins. Notwithstanding these constraints, the paddy sub-sector remained notably robust, with production increasing by 5.3% in 2025.

The impact of increasingly volatile climatic conditions continued to intensify

during the year, adversely affecting the production crops such as seed potato and maize. In contrast, the coconut sub-sector recorded a notable recovery, with output expanding by 9%, marking a reversal of the persistent contraction observed over the preceding years. Meanwhile agricultural input prices increased in line with global trends, particularly driven by the surge in fertiliser costs following recent geopolitical disruptions. However, regulated pricing structures limited the ability to pass on these cost escalations, resulting in sustained pressure on margins across the sector.

INTEGRATED PERFORMANCE REVIEW

Strength in diversity: The Sector demonstrated notable resilience during the year, underpinned by the diversification of its business portfolio, which enabled it to navigate both climatic disruptions and sustained margin pressures in key segments. Revenue grew by 18% to Rs. 44.28 bn during the year, supported by strong contributions from agricultural equipment, Haychem Bangladesh and export markets, where the Group effectively leveraged its global partnerships, established distribution networks and reputation for quality. Against this backdrop, the sector delivered a commendable improvement in profitability, with Profit Before Tax increasing by 8% to Rs. 2.82 bn, contributed by emphasis on cost management as well as strategic recalibration across key exposures.

The Crop Protection cluster navigated a challenging operating environment during the year, characterised by intensified price competition from lower-priced commodity alternatives and volume disruptions stemming from Cyclone Dittwah.

*SASB Agricultural Product Standard

** The Aqueduct Water Risk Atlas places Sri Lanka in the medium to high-risk category for water stress

Notwithstanding these pressures, the cluster remained focused on ensuring uninterrupted product availability, thereby supporting continued paddy cultivation and the broader agricultural ecosystem during a period of heightened uncertainty. Meanwhile, the cluster continued to drive efforts towards strengthening its product portfolio with the introduction of *Basagran* by BASF, a broadleaf weedicide for paddy cultivation.

The Agri Equipment cluster delivered strong growth in profitability underpinned by robust market demand and the strength of its brand equity. Demand for Kubota machinery remained exceptionally strong, with close collaboration alongside suppliers to progressively align production with market requirements and sustain growth momentum. During the year, the segment further

broadened its product offering with the introduction of the E-Kubota 2WD Tractor, the Agrotech Pro 110 Harvester, and the Agritech Belt Tractor targeting the more affordable segment, thereby enhancing accessibility and reinforcing its position across a wider customer base.

The Animal Health cluster recorded a decline in profitability during the year, reflecting temporary supply disruptions arising from changes within a key principal. The cluster continued to invest in strengthening its long-term potential, with the HayVet laboratory in Kuliypitiya, the only private facility offering diagnostics and feed testing undergoing expansion and capability enhancements to meet advanced accreditation standards. Meanwhile the Fertiliser cluster recorded moderating profitability, reflecting sustained margin

pressures despite revenue growth. The sharp increase in global fertiliser prices, coupled with regulated pricing and intensified competition from smaller market participants, limited the ability to pass on cost escalations, resulting in margin pressure.

The Exports cluster recorded a year of mixed performance, with strong growth in coconut milk exports partially offset by challenges across other categories. Processed fruits and vegetables faced intensified competition from regional players while the horticulture segment experienced subdued demand amid shifting preferences away from traditional varieties. During the year, the Sector expanded export operations, with concentrated coconut water commercial operations scheduled to commence in 2026/27, positioning the segment for future growth.

The Sector's operations in Bangladesh continued to deliver a strong performance during the year, remaining a significant contributor to overall profitability while operating within a complex and evolving macroeconomic landscape. Despite a period of political transition and economic uncertainty the Company sustained its market position through strategic emphasis on expanding its service portfolio and progressing towards replicating the Sri Lankan operating model in Bangladesh.

Accelerating digitalisation: During the year, the Sector advanced its digitalisation agenda through the implementation of the OMNIX Digital System enhancing farmer engagement, operational efficiency and traceability across the agricultural value chain. The platform supports over 1,209 farmers across an extensive network of collection centres and projects, enabling a shift towards data-driven decision-making

ESG as a driver of business value

Agriculture

PROSPECTS AND PLANS

In the near term, the operating environment is expected to remain challenging, with ongoing geopolitical tensions in the Middle East likely to disrupt supply chains, particularly for key agricultural inputs routed through critical trade corridors. This is anticipated to result in extended lead times, elevated input and distribution costs, and continued margin pressures within a regulated pricing environment, further compounded by affordability constraints and intensified regional competition in export markets.

Over the longer term, however, the Sector remains well positioned to navigate these dynamics, supported by its diversified portfolio spanning value addition and exports. Continued investments in digitalisation, precision agriculture and mechanisation, alongside a focus on operational resilience and supply security, are expected to strengthen the sector's ability to sustain performance, positioning it to deliver stable and sustainable returns despite cyclical and climate-related disruptions.

Short-term	Medium to Long-term
Portfolio optimisation - Expansion of concentrated coconut water vertical. - Expansion of chemical formulation operations in Bangladesh	- Strategic emphasis on regional expansion. - Leverage digitalisation to strengthen decision making and competitive position.
Customer Centricity Continued focus on high-efficacy, superior quality products.	Continued emphasis on widening product and service portfolio.
Inclusive business models - Continued investments in farmer extension services. - Leverage digitalisation to strengthen engagement and monitoring across.	Widen network of outgrowers across diverse products
What we hope to achieve 14% Revenue growth - ROCE>18%	14% Revenue growth - ROCE>18%

Opportunities and levers

- ⊙ Mechanisation of industry, given increasing labour shortages.
- ⊙ Rising demand for climate- smart and sustainable agricultural solutions.
- ⊙ Drive increased penetration in Bangladesh through widening product offering.

Risks to strategy

- ⊙ Escalating implications of climate change and impacts on quality, yields and crop.
- ⊙ Increased competition from sub-standard agricultural input products.
- ⊙ Escalating cost concerns amidst prevalent global conditions.

Market reach	Brand strength	Innovation	Sustainability focus
Singer operates an extensive network of 427 outlets across 25 districts and 15 service centres. Meanwhile, Singer Finance operates a network of 63 branches	One of Sri Lanka's strongest brands, having won the People's Brand of the Year for 20 consecutive years at the SLIM-Kantar People's Awards	A portfolio of over 600 electronic items and 1,200 home appliances which includes representation of over 60 international consumer brands such as Samsung, Dell, Huawei, Honor, Philips and Panasonic	Hayleys Consumer is the distributor of Proctor & Gamble products in Sri Lanka including personal care brands such as Head & Shoulders, Gillette, Whisper and Olay as well as Group products such as Mabroc Teas and Hayleys Agriculture Products

OPERATING ENVIRONMENT

The operating environment for the retail sector improved significantly during the year under review, supported by improving consumer sentiment, favourable interest and exchange rate conditions and stronger overall economic stability. Improved liquidity and cash circulation within the market contributed positively towards consumer spending, particularly within the consumer durables segment, resulting in stronger demand across

key product categories. Against this backdrop, all sectors represented by the Group recorded strong growth, with favourable business conditions supporting the continuation of the positive momentum experienced during the previous year. Following the reopening of the vehicle market after nearly four years, demand for vehicle leasing facilities improved significantly, supporting a strong performance and growth momentum for Singer Finance (Lanka) PLC.

	6% Increase in private consumption expenditure
	16% Increase in spending on furnishings and household expenditure

INTEGRATED PERFORMANCE REVIEW

Year of record performance: The sector recorded unprecedented growth in both revenue and profitability during the year under review, with revenue increasing by 44% to Rs. 156.7 bn and profitability increasing by 76% to Rs. 11.5 bn, emerging as the largest contributor to the Hayleys Group's profitability. Performance was supported by timely strategic interventions, the successful introduction of new products to the market and continued investment in advertising and brand visibility initiatives. Aggressive cost optimisation and sourcing strategies, including improved procurement terms enabled the Group to offer products at competitive price points, supporting market share gains across key product categories whilst maintaining leadership positions in several segments. The Group's strategy of establishing strong market leadership across its core business segments continued to yield positive results during the year.

Customer centricity: The Group continued to strengthen its focus on customer centricity through the renovation and upgrade of over 100 retail outlets. This included the expansion of selected branches in line with the scale and growth potential of key towns, the introduction of larger-format “Mega” outlets in locations such as Matara and the continued rollout of the “Singer Lite” concept across peripheral and rural areas through smaller and customer-friendly retail outlets. This was complemented by strengthened aftersales service operations and the ongoing monitoring of customer-related KPIs to support continuous improvement. Reflecting the continued strength of the Singer brand, the Company was recognised as the “People’s Brand of the Year” for the 20th consecutive year at the SLIM Kantar People’s Awards 2026, whilst also securing awards for “Youth Brand of the

Year” and “People’s Durables Brand of the Year”.

Product expansion: Singer continued to expand and diversify its product portfolio during the year. New additions included HP’s entire range of laptops and printing solutions, CCTV solutions by HikVision and agricultural machinery solutions whilst expansion into light mobility and electric vehicle categories was supported through the introduction of Piaggio vehicles. In a milestone achievement, Singer was also appointed as the authorised retailer for Starlink in Sri Lanka, thereby strengthening its position in the technology and connectivity space. In addition, the Group strengthened its premium and lifestyle product portfolio through brands such as Bosch and De’Longhi, alongside the continued expansion of product variants. Meanwhile through its local

manufacturing arm, Singer launched an innovative range of top loading washing machines.

Digital transformation: Digital transformation remained a key area of focus during the year. The Group established the Singer Advanced Analytics Centre of Excellence, becoming the first entity within the Group to implement a dedicated analytics function supported by a team of qualified data scientists and analysts. The implementation of an integrated online payment gateway enabled enhanced customer convenience while facilitating end-to-end transaction validation. Meanwhile predictive monitoring and trend analysis tools enhanced operational visibility and responsiveness across the network. In parallel, the Group continued to strengthen its digital customer engagement capabilities.

ESG as a driver of business value

Consumer & Retail

Performance of Singer Finance: The Company delivered an exceptional performance during the year, with Profit Before Tax increasing by 81% to Rs. 1.8 Bn. Performance was supported by strong growth across key business segments and an expanding geographical footprint. Lending activities increased significantly during the year, supported by the expansion of the leasing and gold loan portfolio. Portfolio quality was maintained at a healthy level throughout the year.

Hayleys Consumer: Hayleys Consumer Products Limited recorded a commendable increase in revenue during the year, with revenue growing 30% to Rs.1.8 bn. Performance across the portfolio remained mixed, with strong growth recorded in selected categories, particularly within the homecare segment, whilst certain personal care categories experienced softer market conditions and supply-related constraints during the year. Despite the strong revenue growth, profitability moderated during the period under review.

PROSPECTS AND PLANS

The outlook for the industry remains positive, supported by stabilising macroeconomic fundamentals and improving disposable incomes. While short-term uncertainty may arise from evolving geopolitical and global trade dynamics, particularly in sectors such as apparel and textiles which could indirectly impact consumer demand, the Group remains confident in the sector's long-term growth prospects. The strategic initiatives implemented across the business, together with the Group's strong market positioning, diversified product portfolio and customer reach, are expected to support continued growth going forward. Trends expected to shape the Sector's risk profile over the short, medium and long term are presented below.

Short-term

Medium to Long-term

Portfolio optimisation

- Ongoing product and brand diversification catering to different price points

Customer Centricity

- Diversification of customer segments
- Emphasis on customer service and after-sales care

Digital transformation

- Enhance decision-making and access to real time information through AI-driven capabilities
- Strengthen employees' digital literacy
- Leverage digitalisation and automation for customer lifecycle journey tracking

What we hope to achieve

- **15%** Revenue growth
- **ROCE > 17%**

- **15%** Revenue growth | **ROCE > 17%**
- **20%** reduction in Scope 1 and 2 GHG emissions

Opportunities and levers

- Customer sophistication & demographic changes
- Digitalisation of operations
- Omni-channel preference

Risks to strategy

- Escalation of state-based armed conflict
- Escalating global prices of memory chips
- Potential moderation of economic growth

Amongst the most popular and top-rated banquet operators in Colombo

Distribution strategy

The Sector's **multi-channel distribution strategy** includes destination management companies (DMC), online travel agents, direct bookings and online reservations among others

OPERATING ENVIRONMENT

Tourist arrivals to Sri Lanka increased by 15% to reach an unprecedented 2.36 million in 2025, marking a strong recovery for the leisure sector following several years of sustained challenges. India remained the largest source market, while emerging markets such as Russia, Bangladesh and Poland gained prominence, underscoring a gradual diversification of the country's tourism base. Notably, while markets including India, Russia, Bangladesh, Poland, Spain and Israel have surpassed their 2018 levels, several traditional Western markets continue to lag, signalling a structural shift in Sri Lanka's tourist composition towards regional and non-

traditional segments. This transition has also influenced visitor behaviour, with European markets continuing to exhibit longer average stays, while regional markets are characterised by shorter visit durations. Consequently, the overall average length of stay has declined to 8.29 nights, reflecting the growing share of shorter-haul, cost-conscious travellers within the mix.

Meanwhile, on the supply side competitive pressures continued to intensify with the total five-star room capacity increasing by 23% during the year. This is particularly pronounced in Colombo which saw several new players entering the industry.

EMPLOYEE RETENTION

INTEGRATED PERFORMANCE REVIEW

Year of mixed performance: The Leisure Sector recorded a year of mixed performance, with revenue increasing by 8% to Rs. 8.7 bn, supported by broad-based growth across all properties which benefitted from improved occupancy levels amid the recovery in tourist arrivals. Profitability was underpinned by the strong performance of The Kingsbury Colombo and Amaya Lake which continued to strengthen their competitive positions while other properties faced region-specific challenges that weighed on overall profitability. The Sector's EBIT accordingly amounted to Rs. 669.23 mn compared to Rs. 1.18 bn the previous year. In May 2026, Hayleys PLC entered into an Asset Purchase Agreement to transfer the head lease and operating assets of Luxury Resort (Pvt) Ltd, in line with the Group's strategy of sharpening its portfolio focus and concentrating its leisure investments within Sri Lanka. Accordingly, the respective assets and liabilities directly associated Luxury Resort (Pvt) Ltd have been classified as held-for-sale, resulting in the subsidiary being presented as a discontinued operation.

** The Aqueeduct Water Risk Atlas places Sri Lanka in the medium to high-risk category for water stress

The above factors represent the Sector's financially material sustainability issues. Please refer to the Group's ESG supplement for disclosures on impact material sustainability issues.

Property-level performance:

Performance across individual properties reflected divergent trends during the year. The Kingsbury Colombo delivered a resilient performance despite heightened pricing pressures following the entry of new capacity into the market, sustaining strong occupancy levels, robust RevPAR and an outstanding contribution from F&B, thereby maintaining its position among the leading performers in Colombo. Amaya Lake continued its positive momentum, benefitting from its strong destination appeal and consistently above-average occupancy levels. In contrast, Amaya Beach experienced a downturn, impacted by reduced arrivals from key CIS markets, which had been a key target market for the property. Amaya Kandy also recorded a moderation in performance, reflecting evolving customer preferences

and a gradual shift away from traditional city-based itineraries towards more experiential destinations.

People proposition: The Sector recorded a strong year in terms of people performance, with improved staff retention driven by the Sector's strong employee value proposition including the continued focus on employee engagement, structured learning and development initiatives, and its strong positioning as an employer of choice under the Hayleys brand. The ability to offer stable career pathways and a supportive work environment played a key role in retaining talent during the year. These efforts were further supported by external dynamics, with reduced migration to overseas markets such as the Middle East and the Maldives contributing to greater workforce stability across the sector.

Addressing the implications of climate change and biodiversity loss:

The Sector continues to strengthen its environmental stewardship through a structured ESG Roadmap, which outlines clear priorities across emissions management, biodiversity preservation and the sustainable use of natural resources. In recognition of the increasing impacts of climate change and ecosystem degradation, targeted initiatives have been implemented across properties to mitigate environmental risks and preserve ecosystem services. These include measures to manage coastal vulnerability, protect natural habitats and reduce environmental footprints. For instance, at Amaya Beach, proactive steps have been taken to address coastal erosion through regular beach clean-ups and the reinforcement of sea walls.

ESG as a driver of business value

Leisure

PROSPECTS AND PLANS

Looking ahead, the sector remains positive despite the short-term impact of geopolitical tensions, which led to elevated cancellations in March 2026. While this affected momentum towards the end of the financial year, these pressures are expected to ease progressively as global travel sentiment stabilises. Encouragingly, the medium to long-term outlook remains strong, underpinned by Sri Lanka's growing appeal as a leisure destination and a positive demand trajectory, with the country targeting a record 2.6 - 3.0 million international tourist national efforts to drive increased arrivals during summer by adopting targeted arrivals in 2026. Meanwhile, there is further opportunity to strategically expand and tactical national level campaigns which can optimise year-round destination.

Short-term	Medium to Long-term
Portfolio optimisation - Continued focus on achieving strategic differentiation through focus service propositions - Strengthen social media presence to drive increased conversion rates	Target non-traditional emerging markets
Customer Centricity Curating unique experiences at each property	Enhance corporate proposition of The Kingsbury
Strategic ESG Integration - Pursue opportunities in renewable energy sources - Drive initiatives towards achievement of the ESG targets set on in the Sector ESG roadmap	Pursue long-term climate adaptation and mitigation mechanisms
What we hope to achieve ROCE >8%	- ROCE >15% - Gearing >55%

Opportunities and levers	Risks to strategy
- Strong upside potential in the country's tourism sector - Changing customer expectations and preference for authentic experiences	- Escalation of state-based armed conflict and potential implications on travel - Competitive intensity, particularly among 5-star city hotel operators - Physical risks of climate change

OPERATING ENVIRONMENT

The operating environment remained challenging during the year despite the industrial sector recording growth of 7.8%, driven primarily by manufacturing, construction, mining and quarrying activities. Market conditions, however, remained uneven across sectors. Domestic-oriented industries demonstrated relatively stable demand conditions, particularly across essential and consumer-driven segments, which provided a degree of resilience to the broader industrial landscape. Local demand for selected industrial products and raw materials remained steady, although overall market expansion

continued at a measured pace amid prevailing macro-economic conditions.

In contrast, export-oriented industries continued to face significant headwinds arising from subdued global demand, geopolitical uncertainties and broader external market volatility. Sectors such as textiles and tyre-related manufacturing were particularly impacted during the year, reflecting weaker international market conditions. Meanwhile, the life sciences sector continued to operate within a constrained investment environment, with slower capital expenditure utilisation levels affecting overall market activity.

REVENUE GENERATED FROM SUSTAINABLE PRODUCTS

INTEGRATED PERFORMANCE REVIEW

Moderation in performance: The Sector's performance during the year was impacted by challenging operating conditions across all business lines, reflecting subdued market activity and pressures within both domestic and export-oriented segments. As a result, revenue declined by 5% to Rs. 10.5 Bn, while Profit Before Tax decreased by 43% compared to the previous year. The decline in profitability reflected weaker core operating performance during the year, together with the normalisation of the comparatively high profit contribution recognised in the previous year from interest on arrears relating to renewable energy receivables.

Industrial Raw Materials: The cluster experienced a challenging year with Profit Before Tax declining by 6% due to weaker demand conditions across export-oriented sectors such as textiles. Despite

Y-o-y growth	Revenue	Profit

** The Aqueduct Water Risk Atlas places Sri Lanka in the medium to high-risk category for water stress

The above factors represent the Sector's financially material sustainability issues. Please refer to the Group's ESG supplement for disclosures on impact material sustainability issues.

the softer operating environment, the cluster continued to pursue strategic growth initiatives aimed at strengthening its long-term market position and diversifying its revenue streams. During the year, the cluster further expanded its product portfolio through the commencement of commercial production of Aquapersons products, catering to both local and regional glove manufacturing customers. The new operation, established at an investment of approximately Rs. 540 mn, manufactures variants used in glove production to leading glove manufacturers. The construction chemicals segment also expanded its value-added product portfolio, particularly through specialised chemical solutions for cement manufacturing applications. In parallel, the Group strengthened its presence in regional markets such as Maldives.

Lifesciences: The cluster experienced a challenging year with Revenue and Profit Before Tax declining by a respective 25% and 16% during the year amidst subdued market conditions and slower government procurement activity. Despite these challenges, the division continued to strengthen its long-term growth platform through portfolio diversification, including the introduction of new medical technologies such as CT machines. During the year, the business was also restructured into two dedicated units comprising medical solutions and analytical solutions, enabling greater market focus and supporting growth opportunities within the laboratory and diagnostics segment.

Engineering: The Engineering division recorded a subdued performance

during the year amid challenging market conditions and intensified price competition across key segments. Despite these challenges, the division continued to strengthen its position through portfolio enhancement and regional expansion initiatives. During the year, the division diversified into transformers through a new partnership with Turkish supplier STD, while also expanding market penetration efforts across the Maldives, Bangladesh and Seychelles. The division further reinforced its position as a market leader in high-capacity generators and continued to enhance its weighing solutions portfolio under the Avery brand through integrated automation and IT-enabled capabilities, including remote inventory monitoring and data-driven operational solutions.

Power & Energy: The cluster experienced a challenging year, with performance impacted by generator breakdowns and repair-related disruptions across several wind power plants, together with relatively low tariff structures and delays in receivables. Profitability was further affected by ongoing power curtailments arising from excess daytime energy generation and comparatively lower industrial demand for electricity, limiting the sector's ability to fully capitalise on generation capacity. Despite these challenges, the sector successfully commissioned the 4MW Matara Solar 2 project during the year, further strengthening its renewable energy portfolio.

ESG as a driver of business value

Industry Inputs, Power & Energy

PROSPECTS AND PLANS

The medium-to-long term prospects for the Industry Inputs cluster remain promising, supported by continued opportunities for regional expansion and portfolio diversification. The Sector remains optimistic on the growth potential across regional markets and intends to further strengthen its presence in territories such as India, Indonesia and other South-East Asian markets through strategic market penetration initiatives and partnerships. Meanwhile, the Power & Energy cluster remains well-positioned to capitalise on the Government's target of achieving 70% renewable energy generation by 2030, which is expected to create significant long-term growth opportunities for the renewable energy sector. The cluster will continue to evaluate opportunities for expansion within the renewable energy space while strengthening operational efficiency and reliability across its existing portfolio.

Short-term		Medium to Long-term	
	Portfolio optimisation	- Expand regional presence across verticals - Strengthen position in the analytical market	- Strengthen presence in construction industry - Expansion into new market segments
	Customer Centricity	Broaden product portfolio in Lifesciences segment	Promote laboratory automation across the pharmaceutical, spice and testing industries
	Strategic ESG Integration	- Increasing contributions from sustainable raw materials - Pursue opportunities in renewable energy generation	
	What we hope to achieve	42X% Revenue growth ROCE >12%	61% Revenue growth ROCE>10% 30% reduction in Scope 1 & 2 GHG emissions Average training hours of 40 p/a per employee

Opportunities and levers
- Opportunities for regional expansion - Gradual recovery of the domestic industrial sector - Sustainability as a competitive edge

Risks to strategy
- Escalation of state-based armed conflict and impact on export-oriented businesses - Supply chain disruptions - Competition from China and other regional manufacturers

Year in review

Financial performance

Performance during the year reflected the Sector's diversified earnings profile, with growth driven by strong contributions from the Freight Management, Integrated Logistics and Aviation clusters, although profitability was moderated by challenges within the Marine and Energy and Projects and Engineering divisions.

4% reduction in Scope 1 & 2 GHG emission intensity

Certified as Great Place to Work

ESG performance

Strategic highlights

Strengthening presence and capturing growth opportunities in India and Indonesia

Digital transformation and process automation

Continued focus on regional expansion including India, Indonesia and other markets

Organic and inorganic growth strategies

Way forward

The carbon footprint for 2025/26 represents an expanded coverage of Scope 3 emissions compared to the previous year

1. FREIGHT MANAGEMENT

One of the largest freight forwarding and shipping agency houses in Sri Lanka and the Maldives

2. INTEGRATED LOGISTICS

Offers integrated logistics services covering storage, distribution, and freight solutions across diverse industry verticals

3. PROJECTS & ENGINEERING

A leader in project logistics and engineering solutions, with expertise in heavy cargo, construction and interiors

4. MARINE & ENERGY

A leading marine and energy services provider, delivering a comprehensive range of solutions across the region

5. INTERNATIONAL OPERATIONS

Represents the Sector's overseas operations across South and Southeast Asia, extending Sri Lankan logistics expertise to the region

6. TRAVEL & AVIATION

A leading travel and aviation service provider representing prominent airlines in Sri Lanka and the Maldives

INTEGRATED PERFORMANCE

Leadership position	Global relationships	Extension services	Regional presence
Largest operator of floating assets in Sri Lanka, with a fleet of owned and chartered 22 assets Largest shipping and airline agency house in Sri Lanka and the Maldives Warehouse footprint of over 3.7 mn sq.ft across 6 markets	Multi-purpose project logistics capabilities B2B distribution footprint of 8 mn KM annually	Strengthening market presence in transportation and logistics in South Asia and Southeast Asia	Partnerships with numerous global principals including the world's leading shipping and freight forwarding companies and the world's largest air express company. Collaborations with numerous Multinational companies across the region

OPERATING ENVIRONMENT

Global shipping activity demonstrated a measured recovery during the year, with trade volumes expanding by 4.1%, reflecting an improvement over the subdued conditions observed in the previous period and early part of the reviewed period. Notwithstanding this uptick, freight rates remained volatile, influenced by elevated tariff structures and escalating geopolitical tensions. However, conditions began to recalibrate towards the latter part of the financial year in line with the escalation of geopolitical conflict, as renewed supply chain disruptions constrained vessel availability across key routes. This dislocation, coupled with a resurgence

in demand, exerted upward pressure on freight rates, with capacity bottlenecks creating demand for available operators and supporting a gradual recovery in pricing.

Meanwhile, Sri Lanka's port activities also recorded commendable growth, with throughput increasing by 6.4% to a record high 8.29 million TEUs in 2025, underscoring its resilience and growing relevance within regional maritime trade. This performance reflects a recovery in transshipment volumes and the port's continued ability to capitalise on its strategic location and capacity enhancements stemming from the commencement of operations at the

Colombo West International Terminal, which marks a strategic expansion in the port's infrastructure.

SECTOR COMPOSITION

Transportation and Logistics

EMPLOYEE RETENTION

INTEGRATED PERFORMANCE REVIEW

Year of mixed fortunes: The Sector experienced a year of mixed performance, demonstrating a degree of resilience underpinned by its diversified earnings profile and geographical reach. Revenue increased by 10% to Rs. 117.5 bn, supported by strong growth in the Freight Management, Integrated Logistics and Aviation clusters, reflecting strategic foresight and an ability to capitalise on emerging opportunities. However, overall profitability was impacted by challenges within the Marine and Energy and Projects and Engineering divisions, resulting in a decline in Profit Before Tax by 8% to Rs. 6 bn for the year.

The Freight Management cluster delivered a 3% increase in Profit Before Tax to Rs. 4.52 bn, reflecting strong execution against strategic priorities, firm freight rates towards the latter part of the year

Y-o-y growth	Revenue	Profit
Freight Management	2%	13%
Integrated Logistics	10%	-8%
Marine & Energy	3%	-22%
Projects & Engineering	-26%	-358%

*SASB Marine and Road Transportation Standard ** The Aqueduct Water Risk Atlas places Sri Lanka in the medium to high-risk category for water stress

and the effective positioning of Colombo as a key regional hub to capture emerging trade opportunities. Meanwhile, the Integrated Logistics cluster recorded a year of moderate growth, underpinned by the performance of the Retail and FMCG segments, alongside continued portfolio expansion through new customer acquisitions and deeper penetration among existing customers.

The Travel & Aviation cluster delivered a strong performance during the year, supported by increased flight movements and higher frequencies, reflecting improved airline activity and route expansion. The anticipated entry of new international operators and growing interest from regional markets are expected to further strengthen traffic volumes and support continued momentum in the coming year.

The Marine & Energy cluster encountered operational challenges during the year due to unforeseen vessel breakdowns and weather-related disruptions, which constrained normal operations and impacted overall performance. Despite these setbacks, the bunkering segment delivered a strong performance, capitalising on prevailing market conditions to close the year on a positive note.

The Projects and Engineering cluster continued to face challenges reflecting legacy issues originating in prior periods, including cost overruns and manpower constraints. Ongoing negotiations on certain contracts, coupled with necessary provisions and recognised losses, resulted in a substantial impact on the cluster's performance, consequently weighing on the overall Sector results. In response, the Group has initiated a comprehensive

restructuring and rationalisation of the division, including changes to its organisational structure and leadership, aimed at stabilising operations and restoring long-term viability.

Regional strategy: The Sector continued to advance its regional strategy leveraging its geo-product structure, with the objective of replicating its successful Sri Lankan operating model across selected markets. India and Indonesia remain key focus areas, with India delivering strong profitability and sustained expansion, while Indonesia presents a robust growth pipeline supported by ongoing investments in client acquisition. Momentum was also evident in Bangladesh, where the Sector secured several large-scale contracts, reinforcing its market position, while Myanmar is showing early promise with efforts underway to expand both the client base and service portfolio.

Meanwhile operations in the Maldives and Thailand were challenging during the year, and measures are being adopted to refine the operating model and pursue emerging opportunities. Over the longer term, the Sector aims to establish Singapore as a central regional hub to support and scale its international operations.

Strategic focus on digitalisation:

The Group continued to advance its enterprise-wide digital transformation through the phased implementation of SAP Rise. This transition is complemented by a growing focus on AI-driven solutions, supported by strengthened in-house development capabilities. Concurrently, the Group is enhancing business visibility and process efficiency through structured workflow planning and ERP-led integration to enable more seamless information flow and operational alignment across the organisation.

ESG as a driver of business value

Transportation and Logistics

PROSPECTS AND PLANS

Looking ahead, the Transportation and Logistics Sector will operate within an increasingly complex global environment, shaped in part by ongoing geopolitical tensions in the Middle East, which continue to disrupt established trade routes and elevate volatility across shipping and logistics networks. While these conditions may present near-term challenges, their impact is expected to be largely transitory and could even give rise to selective short-term opportunities such as escalating freight rates. Against this backdrop, the Sector will continue to prioritise the geographic diversification of its revenue streams through regional expansion, while actively pursuing both organic and inorganic growth initiatives to strengthen its market position and long-term resilience. As part of ongoing portfolio optimisation, a component of the Sector, including aspects of the Projects and Engineering operations, will be restructured to form a separate sector within the Hayleys Group, to improve organisational efficiency and clarity of focus. The Sector's risk and opportunity landscape and its interventions to effectively mitigate and leverage these developments are mapped below:

Short-term	Medium to Long-term
Portfolio optimisation - Continued focus on regional expansion including India, Indonesia and other markets - Organic and inorganic growth strategies	Business diversification through leveraging diverse verticals
Customer Centricity - Initiatives to increase top-of-mind brand awareness - Tailored marketing plans to drive regional aspirations	
Nurturing inspired teams - Execution of DEI initiatives across the Group - Leverage digitalisation to drive improved learning outcomes	
What we hope to achieve 9% Revenue growth - ROCE > 17%	9% Revenue growth - ROCE > 20% 45% reduction in Scope 1 and 2 GHG emissions

Opportunities and levers

- Regional dynamics and economic growth opportunities
- Gradual recovery of Sri Lanka's construction sector
- Digital transformation

Risks to strategy

- Escalation of state-based armed conflict
- Exchange rate volatility
- Industry decarbonisation regulations (CRRO3)

5. MOBILITY

Passenger and commercial mobility solutions

INTEGRATED PERFORMANCE

Market leader in solar EPC and renewable energy generation	Operational excellence	Mobility	Quality focus
Sri Lanka's leading solar EPC company, having installed over 500 MWp of rooftop solar power systems since 2011 Pipeline of 110MW of wind power and 300 MW of ground mount solar	Receipt of over 96 awards during the year for excellence across multiple aspects of operations	Offers a multi-brand range of electric and hybrid vehicles in the passenger and commercial vehicle segments	Compliance to a range of domestic and international environmental, quality and health and safety certifications. The first and only ISO-certified Facility Management Service provider in the country and network operation centre is also ISO certified.

OPERATING ENVIRONMENT

Sri Lanka's construction sector expanded by 9.2% during the year, reflecting the stabilisation of macro-economic conditions and favourable interest rates which led to the revival of previously stalled large-scale projects and the gradual recovery of investment activity. Meanwhile, Sri Lanka's solar energy sector experienced a more constrained operating environment during the year, as regulatory authorities moderated the pace of rooftop solar expansion through reduced approvals and tighter capacity restrictions for new installations. Feed-in

tariffs were also lowered, impacting the financial attractiveness of small-scale solar investments. While solar generation capacity continued to expand, the resulting increase in daytime renewable energy supply created grid integration challenges, leading to periodic power curtailment measures to maintain system stability. These developments reflect the growing need for grid modernisation, storage solutions, and more adaptive energy planning to sustainably accommodate Sri Lanka's accelerating renewable energy transition.

INTEGRATED PERFORMANCE REVIEW

The Sector remained resilient amidst challenging operating conditions through strategic diversification initiatives aimed at strengthening long-term business sustainability. Revenue increased by 6% to Rs. 28.31bn, reflecting steady business momentum despite pressures within the Renewable Energy Cluster which impacted profitability. Accordingly EBIT declined by 15% to Rs. 3.1 bn and Profit Before Tax reducing by 30% to Rs. 2.3 bn. Nevertheless, targeted cost optimisation measures and productivity improvements helped partially offset margin pressures, positioning the Sector to better navigate current challenges while building a stronger foundation for future growth.

Renewable energy: The Cluster maintained its position as the market leader in the rooftop solar PV segment, surpassing 500MW of installation and commanding a market share of 20%. During the year the cluster pursued geographical expansion, further strengthening its presence in the Maldives, which delivered significant benefits during the year under review. As resort operators increasingly transitioned

*Engineering and construction Services SASB Standard.

** The Aqueduct Water Risk Atlas places Sri Lanka in the medium to high-risk category for water stress

from oil-dependent energy systems to solar solutions to mitigate fuel vulnerability, the Cluster capitalised on this shift, securing approximately 10 MW of solar and battery projects and emerging as the second-largest player in the Maldivian market. The Cluster also accelerated horizontal diversification by expanding into grid infrastructure and transmission projects. It also emerged as one of the first players to offer hybrid and off-grid energy solutions resulting in exceptional battery sales momentum towards the latter part of the financial year.

Meanwhile, within the power generation segment, the Cluster pursued inorganic growth through the acquisition of controlling stakes in six companies, adding 60 MW of wind and 150 MW of solar capacity. This was further supported by a robust development pipeline, including the commencement of construction of the Group's 50 MW wind project and an additional 149 MW of solar projects.

Projects: The performance of the Projects Cluster moderated during the year, in view of evolving industry conditions. Operationally, the Cluster remained firmly aligned with its speed-to-completion strategy while integration of digitalisation, including advanced estimation tools further enhanced execution precision. During the year, the Cluster also secured several major projects, including highly time-sensitive assignments demonstrating its strong

execution capabilities. Geographical diversification gained traction, with the Cluster expanding into markets such as the Maldives through the acquisition of several sizable projects. Meanwhile, SIS Integrated Solutions experienced a more challenging year amid subdued market conditions, reflecting exposure to government infrastructure spending.

Equipment trading and renting: The Cluster successfully expanded existing customer engagements in battery backup solutions while scaling its OPEX-based offerings across the Group's multiple verticals. This included extending the model into the mobility segment, where its owned vehicle fleet was successfully deployed through corporate rental arrangement. Meanwhile the Singapore trading operation delivered strong growth, significantly expanding its customer base and trading volumes while generating healthy profitability.

Mobility: The Mobility Cluster, the Sector's newest and most dynamic vertical, marked an exciting new chapter following the lifting of vehicle import restrictions, strategically positioning itself at the forefront of Sri Lanka's accelerating transition towards new energy vehicles. Accordingly, the Cluster secured a strategic partnership with CHERY International, China's largest automobile exporter since 2002, enabling the introduction of rapidly growing brands including JAECOO, OMODA, Kayi and SRM. This was further complemented by a balanced commercial vehicle offering comprising small commercial vehicles, passenger vans, and cargo vans. The Cluster's competitive strength lies in its integrated mobility ecosystem, combining a compelling product portfolio, expanding retail presence, and EV infrastructure capabilities. Supported by flagship retail locations and charging solutions through STAR Charge, the Cluster is well-positioned to play a leading role in Sri Lanka's evolving mobility landscape.

ESG as a driver of business value

Energy, Mobility & Projects

Customer experience and brand: The Sector continued to place strategic emphasis on customer service, particularly within Renewable Energy. In Projects, the Experience Centre also played an important role in improving customer interaction and driving sales conversion. Attesting to its continued focus on excellence, the Fentons Group secured 96 multi-disciplinary awards during the year, reflecting broad-based recognition across its operations and service delivery. Hayleys Solar's inclusion among Sri Lanka's Most Loved Brands by LMD, alongside its strong positioning in Brand Finance's Most Valuable Brands rankings, reinforces the growing strength of the brand.

PROSPECTS AND PLANS

We are seeing encouraging traction across several emerging opportunities, particularly in industrial developments, high-rise residential projects, and large-scale economic zones such as Port City. These segments are expected to support the continued expansion of the Sector's Projects division, which has been strategically strengthened through the addition of two new sub-verticals. Over the short-to-medium term, the Renewable Energy cluster is also expected to remain a key driver of performance, particularly following the Sector's entry into energy generation, although further reductions in solar feed-in tariffs may temper future investment momentum. In addition, the mobility segment presents significant growth potential as consumer adoption of electric vehicles accelerates, positioning the Sector to capitalise on evolving market trends and diversify future earnings streams. The Sector's risk and opportunity landscape and its interventions to effectively mitigate and leverage these developments are mapped below:

Opportunities and levers

- Recovery of Sri Lanka's construction and infrastructure development sector
- Energy transition including BESS and stronger policy commitment towards achieving country's decarbonisation goals
- Strong demand for new energy mobility solutions

Risks to strategy

- Escalation of state-based armed conflict and implications on input pricing
- Government policy on renewable energy and further reductions in solar feed-in tariffs
- Escalating competition and adverse policy changes in the mobility sector

Tea Exports

As one of Sri Lanka's largest tea exporters, Mabroc Teas (Pvt) Ltd takes Ceylon Tea to the world through extensive distribution networks and long-standing customer relationships. Meanwhile, Martin Bauer Hayleys (Pvt), a joint venture between Hayleys and global leader in botanicals, German-based Martin Bauer Group (MBG) Ltd is engaged in the manufacturing and export of value-added tea extracts and tea aroma products.

Market position	Product capabilities	Distribution network	Quality
Mabroc Teas is one of Sri Lanka's largest tea exporters. It is also the largest exporter of tea from Sri Lanka to China and Taiwan. Martin Bauer Hayleys (Pvt) Ltd is the leading exporter of Ceylon Tea aroma to the global market and one of Sri Lanka's largest exporters of instant tea extract powders.	In value-added tea, the Sector has capabilities to customise blended teas to supply a range of packets and tea bags of black, green, herbal and flavoured tea. Martin Bauer Hayleys is the only Sri Lankan manufacturer with capabilities to manufacture tea aroma with varying concentrations	Mabroc's OEM and branded products are sold in 51 countries as well as 16,504 retail outlets across the island. Martin Bauer's products are sold in 25 markets across the world	The Sector is committed to maintaining the highest standards of quality and product responsibility as attested by numerous Food Safety and Quality certifications.

OPERATING ENVIRONMENT

Sri Lanka's tea export sector demonstrated a measure of recovery in 2025, with export volumes increasing by 4.7% to 257.4 million KGs and export earnings rising to approximately USD 1.51 bn. The improvement was supported by steady global demand, sustained production levels and the continued ability of Ceylon Tea to command a premium position in international markets. Average export prices remained largely stable during the year, reflecting the industry's ability to maintain value despite a challenging global environment.

Nevertheless, exporters continued to navigate a range of external pressures. Geopolitical tensions and escalating conflicts in several key markets contributed to demand volatility and heightened uncertainty, while disruptions to global shipping routes led to a significant increase in freight costs, impacting profitability. In addition, increasingly stringent regulatory requirements relating to residue levels continued to pose challenges for the industry, with compliance and testing requirements adding to the cost burden faced by exporters.

INTEGRATED PERFORMANCE REVIEW

The Sector operated in a highly competitive environment during the year, as lower-cost tea origins, particularly Kenya, Indonesia and India, continued to gain market share in certain export markets. Against this backdrop, Sector revenue declined by 20% to Rs. 10.55 bn, while EBIT decreased by 8% to Rs. 557.51 mn. Despite the pressure on top-line performance, profitability remained resilient, supported by the strong contribution from Martin Bauer Hayleys. Consequently, the Sector's Profit After Tax surged 50% increase to Rs. 704.01 mn, demonstrating the benefits of its focus on value-added products, market diversification and differentiated offerings.

Martin Bauer Hayleys delivered its highest-ever profitability during the year, with the Group's share of profit after tax from the joint venture more than tripling to Rs. 319.32 mn. The exceptional performance was driven by strong volume growth, supported by the successful retention and expansion of

key multinational customer relationships across Asia, particularly in markets such as Thailand, Pakistan and Vietnam. The business also benefited from robust demand for its tea aroma products, particularly in the United States market, reflecting the strength of its value-added product portfolio and customer relationships.

Innovation and product development: Mabroc continued to pursue its strategy of driving higher value addition through the development and marketing of unique tea blends tailored to the preferences of diverse export markets, strengthening its differentiation and premium positioning. Meanwhile, Martin Bauer Hayleys advanced its innovation agenda through the introduction of several new tea aroma and tea extract

variants, including the development of liquid tea extract products.

Market development: Market development and diversification remained a strategic priority for Mabroc during the year as the Company continued to expand its presence beyond traditional export destinations. While maintaining its position as the largest Sri Lankan tea exporter to China, Mabroc actively pursued growth opportunities in non-traditional markets, with particular emphasis on strengthening its presence in Japan and Taiwan. Meanwhile, Martin Bauer also pursued customer acquisition in new markets such as Japan.

Traceability and sustainability: As part of the Hayleys Group, the Sector benefits from end-to-end traceability

through access to tea sourced from Hayleys Plantations, a recognised leader in sustainable plantation management. This integration provides access to premium single-garden teas cultivated in accordance with rigorous certification standards and supported by strong environmental and social stewardship practices, strengthening the Sector's differentiation in global markets. Reinforcing its commitment to sustainable value creation, Mabroc also launched its own ESG Roadmap during the year, aligned with the aspirations and targets of the Hayleys Lifecode, providing a structured framework to advance its sustainability agenda and create long-term value for stakeholders.

ESG as a driver of business value

Tea Exports

PROSPECTS AND PLANS

Looking ahead, demand for value-added tea products is expected to remain favourable, while demand for tea extracts is anticipated to remain stable over the short to medium term. Nevertheless, the near-term operating environment is likely to remain challenging amid heightened geopolitical tensions, evolving trade policies and ongoing uncertainty surrounding tariffs applicable to exports to the United States, which could have implications for certain segments of the Sector. In addition, structural challenges within Sri Lanka's plantation industry, including rising production costs and increasing exposure to climate-related risks, are expected to contribute to supply and cost volatility across the tea value chain.

Against this backdrop, the Sector continues to focus on strengthening its resilience through market diversification, innovation and value addition. In anticipation of more moderate growth in traditional export markets, the businesses have intensified efforts to develop differentiated products and unique tea propositions for international customers. These initiatives, together with a broader geographic footprint and strong customer relationships, are expected to support sustainable growth and enhance the Sector's long-term competitiveness.

Short-term		Medium to Long-term
Portfolio optimisation - Continued focus on non-traditional markets - Enhance production capacity through investments in new manufacturing facility is currently under construction		Geographical diversification of operations through establishing overseas operations (Mabroc)
Customer Centricity - Ongoing innovation and product development to cater to emerging customer needs - Offer sustainable product propositions		- Expand the private label market share in Australia - Increase Mabroc brand distribution in the European Union. - Pursue international e-commerce business in USA.
Strategic ESG Integration Enhance ESG capabilities across the Sector		- Drive active reduction of fossil-fuel based energy sources - Drive initiatives towards achievement of the targets set out in the ESG Roadmap
What we hope to achieve 10% Revenue growth - ROCE >16%		40% Revenue growth ROCE >20%

Opportunities and levers

- International expansion through investments in Kenya and Poland
- Escalating customer requirements on sustainability

Risks to strategy

- Geopolitical tensions in major buying markets
- Escalating implications of climate change and impacts on quality, yields and crop (CRRO 1)

HAYLEYS PLC

Hayleys PLC, the investment holding company of the Group, provides a range of centralised services enabling greater alignment and consistency across the Group. During the year, Dividend Income increased by 13% to Rs. 6.47 bn, reflecting the strong profitability of the Group's operating subsidiaries. As at the Reporting Date, the Company had committed to transfer of the head lease and operating assets of Luxury Resort (Pvt) Ltd, supporting the Group's strategy of sharpening its portfolio focus and concentrating its leisure investments within Sri Lanka. Accordingly, a Letter of Intent was signed on 3 February 2026 followed by a Lease Transfer Agreement and Asset Purchase Agreement on 16 May 2026. Based on management's assessment of the recoverability of its investment and related receivables as at 31 March 2026, an impairment loss of Rs. 6.89 bn has been recognised under Other Expenses (Refer to note 37 for further information). Meanwhile, Net Finance Costs declined by 28% to Rs. 2.29 bn, supported by fair value gains on equity investments. Consequently, Hayleys PLC reported a Loss Before Tax of Rs. 1.58 bn and a Loss After Tax of Rs. 1.44 bn for the year.

During the year, the Company undertook several strategic interventions to further strengthen its financial position and enhance its capacity to pursue future growth opportunities. A key milestone was the successful completion of a Rs. 9 bn Rights Issue, the first undertaken by the Company since 2005, which was oversubscribed and reflected shareholder confidence in the Group's long-term prospects. The proceeds are being deployed to optimise the Group's capital structure through the partial settlement of debt, while enhancing financial flexibility to pursue strategic investments and long-term growth opportunities. In addition, the Company raised Rs. 12.9 bn through

the issuance of two listed, rated, senior, unsecured, redeemable debentures, further enhancing financial flexibility and supporting its capital management objectives.

The year also marked an important step in the Group's portfolio expansion strategy with the announcement of its entry into the supermarket sector. Significant progress has already been made in establishing the foundations required to scale the business, including key leadership appointments, capability building and the development of operational platforms. With the foundational elements now being established, the Group is excited about the opportunities ahead and confident in the sector's potential to emerge as a significant contributor to the Group's future growth. Further strengthening its investment portfolio, the Company acquired a 40.63% stake in Harischandra Mills PLC and a 9.48% stake in Diesel and Motor Engineering PLC during the year.

Hayleys Business Solutions International

Hayleys Business Solutions International delivered another year of strong growth and strategic progress, recording growth of 12% and 7% in Revenue and Profit Before Tax respectively during the year. Performance was driven by continued expansion within the Australian market, supported by the establishment of Hayleys Business Solutions Pacific, enabling the Company to strengthen its proximity to customers. Growth was also supported by the continued expansion of the Company's service portfolio towards higher-value services, moving beyond traditional process-driven outsourcing. The BPO and Payroll verticals continued to perform strongly through the acquisition of new customers and the successful achievement of growth targets, while Shared Services operations remained stable during the year.

Concurrently, the Company continued to strengthen its digital and technological capabilities, actively exploring opportunities to leverage AI across its internal processes and service delivery models. Efforts during the year focused on assessing how AI-enabled solutions could enhance efficiency and productivity, while building on the Company's existing strengths in robotics and process automation. Further reinforcing client confidence and governance standards, the BPO division obtained ISO 27001 certification during the year, reflecting the strength of its information security and data management practices.

Talent development and employee retention remained key priorities during the year, supported by continued investments in digital and AI-related capability building for its highly specialised workforce. Employee retention improved compared to prior years amidst reduced overseas migration, although competition for talent continued to remain a challenge. Further reinforcing its employer brand and operational credibility, the Company was recognised as an ACCA Gold Partner and among ACCA's Top 10 Employers.

Looking ahead, the Company remains focused on accelerating growth within the Australian market through its local presence, while simultaneously evaluating opportunities for inorganic expansion, including potential acquisitions. Key downside risks include intensifying competition, evolving technological disruption driven by AI, and continued pressure on talent retention, which the Company will seek to mitigate through service diversification, capability enhancement, and continued investment in higher-value offerings.

Way Forward

GLOBAL OUTLOOK

The global economic outlook remains fluid and increasingly influenced by geopolitical developments. The recent escalation of conflict in the Middle East has emerged as a significant source of uncertainty at a time when the global economy was already grappling with elevated trade barriers, policy uncertainty and uneven growth dynamics. Reflecting these challenges, the International Monetary Fund (IMF) has revised its global growth forecast to 3.1% in 2026 and 3.2% in 2027. While the baseline outlook remains positive, downside risks continue to dominate. A prolonged or broader conflict, increasing geopolitical fragmentation, renewed trade tensions or a reassessment of expectations surrounding productivity gains from artificial intelligence could weigh further on growth and heighten volatility across financial markets. These risks are compounded by elevated levels of public debt and weakening institutional credibility in several economies, leaving the global economy more exposed to future shocks.

IMPLICATIONS ON SRI LANKA

The outlook for Sri Lanka remains subject to heightened uncertainty. Although the economy has made significant progress in restoring macroeconomic stability and rebuilding confidence following the recent crisis, the external environment has become increasingly challenging. The conflict in the Middle East has introduced risks through higher energy costs, potential disruptions to trade and tourism and possible pressures on remittance inflows, all of which are important contributors to economic activity and external sector stability. These factors are expected to weigh on growth and contribute to higher inflation during the year ahead. While economic growth is projected to remain positive,

the pace of expansion is expected to moderate, underscoring the importance of maintaining reform momentum, fiscal discipline and policy consistency in order to safeguard recent gains and strengthen resilience against future shocks.

IMPLICATIONS ON HAYLEYS

The evolving geopolitical situation presents a mixed outlook for the Group. While prolonged instability has the potential to create headwinds through higher energy prices, supply chain disruptions and weaker consumer demand in certain sectors, Hayleys' diversified portfolio provides a degree of natural hedging, with some sectors positioned to benefit from the very conditions that may adversely affect others.

Potential risks

- ⊙ **Higher Energy Costs:** A sustained increase in global energy prices could place upward pressure on operating costs across several sectors, particularly within the Manufacturing and Transportation and Logistics which have relatively energy-intensive operations

- ⊙ **Tourism demand:** Heightened geopolitical uncertainty and weaker global economic sentiment could adversely affect international travel patterns, potentially impacting tourist arrivals to Sri Lanka and weighing on occupancy levels and profitability
- ⊙ **Input cost inflation:** Higher commodity and freight costs could increase the cost of imported raw materials and inputs used across the Group, including fertiliser, latex, yarn, chemicals and other production inputs

Opportunities

- ⊙ **Increased Demand for Logistics and Freight Services:** Disruptions to global supply chains and changes in trade routes may lead to increased demand for freight forwarding, logistics solutions and supply chain management services
- ⊙ **Supply chain reconfiguration:** As businesses seek to diversify sourcing strategies and improve supply chain resilience, opportunities may emerge for the Group to strengthen its role within regional and global value chains

OUTLOOK AND WAY FORWARD FOR HAYLEYS

Against this backdrop, the Group will maintain focus on its five key strategic pillars while also emphasising building increased agility into its business models. Key priorities under each strategic pillar is summarised below

As our mature businesses continue to generate stable growth and cash flows, we are simultaneously building new growth platforms in sectors such as retail, mobility and consumer businesses that are expected to play an increasingly important role in the Group's future.

 Portfolio Optimisation	• Aggressive growth in new industry verticals including the large-format supermarket sector and mobility solutions • Export-oriented sectors will seek to diversify its markets with increasing focus on non-traditional markets • Increase contributions from value-added products, thereby reducing exposure to price competitive offerings • Pursuing diversification of funding sources to fuel future investments in organic and inorganic growth
 Customer Centricity	• Our mature businesses will continue to pursue growth through a greater focus on niche and value-added segments. • Focus on customised solutions to sharpen competitive edge and customer loyalty • Active engagement in trade fairs and exhibitions • Aggressively seeking new customer acquisition in regional markets
 Inclusive business models	• Continued focus on prioritising inclusive supply chains which accelerate positive social and environmental impact • Screening suppliers on environmental and social criteria
 Nurturing inspired teams	• Developing a future-ready workforce with the capabilities required for a rapidly evolving digital landscape. • Ongoing digitalisation of HR processes • Succession planning across sectors to build effective talent pipelines • Creating a respectful and inclusive workplace through ongoing training and engagement interventions
 ESG integration	• Completion of Sector-level ESG roadmaps across all Sectors • Ongoing focus on strengthening ESG governance and reporting mechanisms • Initiatives across all six pillars aligned to the aspirations of the Hayleys Lifecode

TO THE BOARD OF DIRECTORS OF HAYLEYS PLC

REPORT ON THE CONTENT ELEMENTS INCLUDED IN HAYLEYS PLC'S INTEGRATED ANNUAL REPORT FOR THE YEAR ENDED MARCH 31, 2026

Conclusion

We have performed a limited assurance engagement on whether the Content Elements ("Subject matter Information" or "SMI") in the Hayleys PLC's ("the group") Integrated annual report for the year ended March 31, 2026 have been prepared in accordance with the IFRS Foundation's International <IR> Framework ("Criteria").

Based on the procedures performed and evidence obtained, nothing has come to our attention to cause us to believe that the Content Elements in the Integrated Report of Hayleys PLC for the year ended 31st March 2026 are not prepared, in all material respects, in accordance with the Criteria.

Our conclusion on the SMI as mentioned above does not extend to other information that accompanies or contains the SMI and our assurance report.

Basis for conclusion

We conducted our engagement in accordance with Sri Lanka Standard on Assurance Engagements (SLAE) 3000 (Revised), Assurance Engagements Other Than Audits or Reviews of Historical Financial Information issued by the Institute of Chartered Accountants of Sri Lanka. Our responsibilities under this standard are further described in the "Our responsibilities" section of our report.

We have complied with the independence and other ethical requirements of the Code of Ethics for professional Accountants issued by CA Sri Lanka (Code of Ethics).

Our firm applies Sri Lanka Standard on Quality Management (SLSQM) 1, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for limited assurance conclusion.

Intended use or purpose

We have been engaged by the Board of Directors of Hayleys PLC to provide limited assurance on whether the SMI have been prepared in accordance with the Criteria.

Restriction on use or distribution

This report has been prepared for the Board of Directors of Hayleys PLC for the purpose of providing an assurance conclusion on whether the SMI in the Hayleys PLC's Integrated Annual Report for the Year ended 31st March 2026 has been prepared in accordance with the Criteria and may not be suitable for another purpose. We disclaim any assumption of responsibility for any reliance on this report, to any person other than Hayleys PLC, or for any other purpose than that for which it was prepared.

Our report should not be regarded as suitable to be used or relied on by any party wishing to acquire rights against us

other than Hayleys PLC, for any purpose or in any other context. Any party other than Hayleys PLC who obtains access to our report or a copy thereof and chooses to rely on our report (or any part thereof) will do so at its own risk. To the fullest extent permitted by law, we accept or assume no responsibility and deny any liability to any party other than Hayleys PLC for our work, for this independent assurance report, or for the conclusions we have reached.

Our conclusion is not modified in respect of this matter.

Responsibilities of Management for the SMI

The management of the Group are responsible for:

- Selecting or developing suitable criteria for preparing the Subject Matter Information and appropriately referring to or describing the criteria
- Determining that the criteria is appropriate to meet the needs of intended users, being the Group's Board of Directors and any other intended users.
- Preparing and presenting the SMI in accordance with the criteria set out in the IFRS Foundation's International <IR> Framework. This includes disclosing the criteria, including any significant inherent limitations.
- Design and implementation of internal controls that the Group determines necessary to enable the preparation and presentation of the SMI that is free from material misstatement, whether due to fraud or error.

- Ensuring the Group's strategy is well-presented in the SMI and reflects how the Group creates value as they operate in practice
- Identifying stakeholders and stakeholder requirements;
- Identifying material issues and reflecting those in the SMI; and
- Preparation and fair presentation of the SMI;
- Informing us of any known and/or contentious issues relating to the SMI.
- Preventing and detecting of fraud and ensuring that the Group complies with laws and regulations applicable to its activities;
- Process to ensure that the Group's personnel involved with the preparation and presentation of the SMI are properly trained, systems are properly updated and that any changes in reporting is relevant to the SMI and encompass all significant business units.
- The responsibility also includes informing changes in the Group's Operations since the date of our most recent assurance report on the SMI.
- The maintenance and integrity of Hayleys PLC's website, including the presentation of our independent limited assurance report on the website is the responsibility of Hayleys PLC's management. Management is responsible for any changes to either the information in the Report or our independent limited assurance report that may have occurred since the initial date of its presentation on Hayleys PLC's website.

Those charged with governance are responsible for overseeing the reporting process for the Group's SMI.

Inherent limitations

The preparation of SMI is subject to inherent limitations arising from the nature of non financial data, including the

use of estimates, assumptions, and third party information. In addition, due to the inherent limitations of any internal control system, errors or irregularities may occur and not be detected.

Our engagement was not designed to detect internal control weaknesses because the procedures were performed on a test basis and not continuously throughout the period. We do not provide any assurance on the assumptions and achievability of prospective information in the Integrated Report

Our responsibilities

We are responsible for:

- planning and performing the engagement to obtain limited assurance about whether the SMI is free from material misstatement, whether due to fraud or error;
- forming an independent conclusion, based on the procedures we have performed and the evidence we have obtained; and
- reporting our conclusion to the Board of Directors of Hayleys PLC.

Summary of the work we performed as the basis for our conclusion

We exercised professional judgment and maintained professional skepticism throughout the engagement. We designed and performed our procedures to obtain evidence about the SMI that is sufficient and appropriate to provide a basis for our limited assurance conclusion.

Our procedures selected depended on our understanding of the SMI , other engagement circumstances, and our consideration of areas where material misstatements are likely to arise. In carrying out our engagement, the procedures we performed primarily consisted of:

1. Assessing the suitability of the criteria used by the Group in preparing SMI;
2. Through inquiries, obtained an understanding of the Group's control environment, processes and information systems relevant to the

preparation of the Information subject to Limited Assurance, but did not evaluate the design of particular control activities, obtain evidence about their implementation or test their operating effectiveness;

3. Obtaining an understanding of the relevant internal policies and procedures developed by the Group, including those relevant to determining what matters most to the Group's stakeholders, how the Group creates value, the Group's external environment, strategy, governance and reporting.
4. Obtaining an understanding of the description of the Group's strategy and how the Group creates value in the SMI and enquiring of management as to whether the description accurately reflects their understanding;
5. Assessing of the alignment between the Group's strategy, the disclosures on how the Group creates value and what matters most to the Group's stakeholders.
6. Checking Board minutes to ensure consistency with the SMI.
7. Evaluated the overall presentation of the Information subject to Limited Assurance to determine whether it is consistent with the criteria and in line with our overall knowledge of, and experience with, the Group's processes.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

TO THE BOARD OF DIRECTORS OF HAYLEYS PLC REPORT ON THE SELECTED SUSTAINABILITY RELATED DISCLOSURES AND CLIMATE RELATED DISCLOSURES IN THE INTEGRATED ANNUAL REPORT AS OF 31ST MARCH 2026

Conclusion

We have performed a limited assurance engagement on whether the selected Qualitative Sustainability and Climate Related Disclosures as defined in Annexure A ("Subject Matter Information" or "SMI") included in Hayleys PLC's and its subsidiaries ("the entity") Integrated Annual Report for the year ended 31st March 2026, has been prepared in accordance with the selected paragraphs of the Sri Lanka Financial Reporting Standards (SLFRS) Sustainability Disclosure Standards, SLFRS S1 (General Requirements for Disclosure of Sustainability-related Financial Information) and SLFRS S2 (Climate-related Disclosures) (together 'SLFRS S1 and S2') as detailed in the Annexure A ("Criteria").

Based on the procedures performed and evidence obtained, nothing has come to our attention to cause us to believe that the selected Qualitative Sustainability and Climate Related Disclosures as defined in Annexure A of the Hayleys PLC Integrated Annual report for the year ended 31st March 2026 are not prepared, in all material respects, in accordance with the Criteria.

Our conclusion on the SMI does not extend to any other information that accompanies or contains the SMI and our assurance report.

Basis for conclusion

We conducted our engagement in accordance with Sri Lanka Standard on Assurance Engagements (SLAE) 3000 (Revised), Assurance Engagements Other Than Audits or Reviews of Historical Financial Information issued by the Institute of Chartered Accountants of Sri Lanka. Our responsibilities under this standard are further described in the "Our responsibilities" section of our report.

We have complied with the independence and other ethical requirements of the Code of Ethics for professional Accountants issued by CA Sri Lanka (Code of Ethics).

Our firm applies Sri Lanka Standard on Quality Management (SLSQM) 1, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for limited assurance conclusion.

Intended use or purpose

We have been engaged by the Management of Hayleys PLC to provide limited assurance on whether the SMI have been prepared in accordance with the Criteria.

Restriction on use or distribution

This report has been prepared for the Board of Directors of Hayleys PLC for the purpose of providing an assurance conclusion on whether the Subject Matter Information included in the Hayleys PLC's Integrated Annual Report for the Year ended 31st March 2026 has been prepared in accordance with the Criteria and may not be suitable for another purpose. We disclaim any assumption of responsibility for any reliance on this report, to any person other than Hayleys PLC, or for any other purpose than that for which it was prepared.

Our report should not be regarded as suitable to be used or relied on by any party wishing to acquire rights against us other than Hayleys PLC, for any purpose or in any other context. Any party other than the entity who obtains access to our report or a copy thereof and chooses to rely on our report (or any part thereof) will do so at its own risk. To the fullest extent permitted by law, we accept or assume no responsibility and deny any liability to any party other than Hayleys PLC for our work, for this independent assurance report, or for the conclusions we have reached.

Our conclusion is not modified in respect of this matter.

Responsibilities of the Board of Directors and Management for the Subject Matter Information

The Management of the Entity are responsible for:

- designing, implementing and maintaining internal control relevant to the preparation of the SMI free from material misstatement, whether due to fraud or error;
- selecting or developing suitable criteria for preparing the Subject Matter Information and appropriately referring to or describing the criteria used;
- Preparing the Subject Matter Information in accordance with the Criteria. This responsibility includes:
 - understanding the context in which Softlogic Life Insurance's activities and business relationships take place and developing an understanding of its affected stakeholders;
 - Identifying stakeholders and stakeholder requirements;
 - Determining that the criteria is appropriate to meet the needs of intended users, being the Entity's members and any other intended users.
 - Disclosing the criteria in the SMI, including any significant inherent limitations.
 - the identification and disclosure of the material matters i.e. actual and potential impacts (both negative and positive) related to sustainability matters, as well as risks and opportunities that affect, or could reasonably be expected to affect, the entity's financial position, financial performance, cash flows, access to finance or cost of capital over the short-, medium-, or long-term;
 - the assessment of the materiality of the identified Sustainability related risks and opportunities and Climate related risks and opportunities by selecting and applying appropriate thresholds;

- and making assumptions and estimates that are reasonable in the circumstances.
- Informing us of any known and/or contentious issues relating to the Subject Matter Information;
- Ensuring that the Entity complies with laws and regulations applicable to its activities.
- Ensuring that the Entity personnel involved with the preparation and presentation of the Subject Matter Information are properly trained, systems are properly updated and that any changes in reporting is relevant to the integrated report information encompass all significant business units. This responsibility also includes informing us of any changes in the Entity's operations.

The maintenance and integrity of Hayleys PLC's website, including the presentation of our independent limited assurance report on the website is the responsibility of the Hayleys PLC's management. Management is responsible for any changes to either the information in the Report or our independent limited assurance report that may have occurred since the initial date of its presentation on Hayleys PLC's website.

Those charged with governance are responsible for overseeing the reporting process for the entity's Subject Matter Information.

Inherent limitations in preparing the SMI

The preparation of SMI is subject to inherent limitations arising from the nature of non financial data, including the use of estimates, assumptions, and third party information as set out below:

- Uncertainty in Qualitative and Forward-Looking Disclosures: The Selected Qualitative Sustainability and Climate Related Disclosures may include qualitative, subjective, or forward-looking disclosures — such as scenario analysis or narrative descriptions of climate-related risks

and opportunities — which are inherently uncertain. The selection of different, yet acceptable, scenario assumptions or estimation techniques by management could result in materially different disclosures. For clarity, our engagement does not extend to providing assurance on the accuracy or achievability of forward-looking statements or scenario outcomes.

- Scenario-Based Value Chain Assessments: When scenario analysis is applied to assess value chain risks or opportunities, results may be subject to significant limitations. Scenario models often involve simplified representations of complex systems, and the outcomes depend on assumptions about future policy, technological advancements, and market shifts — all of which are inherently uncertain.
- Complexity of Business Model Dynamics: Disclosures related to the business model may rely on management's current understanding of how climate-related and sustainability factors interact with various aspects of operations, strategy, and financial performance. These interactions are complex, dynamic, and may evolve as external conditions change. The interconnected nature of these elements introduces inherent uncertainty, and different but acceptable modeling approaches or assumptions could produce materially different outcomes.
- Evolving Industry Practices and Frameworks: Sustainability Related Disclosures and Climate Related Disclosures for business models and value chains is still evolving, with varying levels of maturity across industries. The absence of universally standardized methodologies may lead to differences in how sustainability impacts are assessed and disclosed, potentially affecting comparability across reporting periods or peer entities.

Independent Assurance Report - Sustainability Related Disclosures and Climate Related Disclosures

- Allocation of Resources and Strategic Adaptation: Disclosures regarding changes to resource allocation or business strategy in response to climate-related risks and opportunities may include forward-looking statements. These statements are based on current expectations and strategic plans but are subject to change as new information becomes available. Our assurance procedures do not extend to the accuracy or achievability of future strategic actions or the completeness of the disclosed adaptation pathways.
- Prospective Information and Future Resilience Assessments: Information regarding the future resilience of the business model or value chain under different climate scenarios is inherently uncertain. Actual future impacts may differ materially from those disclosed, due to unforeseen variables or changes in the external environment. Our limited assurance procedures do not include assessing the likelihood or precision of future events or verifying the underlying assumptions of scenario analysis.

In addition, due to the inherent limitations of any internal control system, errors or irregularities may occur and not be detected. Our engagement was not designed to detect internal control weaknesses because the procedures were performed on a test basis and not continuously throughout the period.

Our responsibilities

We are responsible for:

- planning and performing the engagement to obtain limited assurance about whether the SMI is free from material misstatement, whether due to fraud or error;
- forming an independent conclusion, based on the procedures we have performed and the evidence we have obtained; and
- reporting our conclusion to the Board of Directors of Hayleys PLC

Summary of the work we performed as the basis for our conclusion

We exercised professional judgment and maintained professional skepticism throughout the engagement. We designed and performed our procedures to obtain evidence about the SMI that is sufficient and appropriate to provide a basis for our conclusion. Our procedures selected depended on our understanding of the SMI and other engagement circumstances, and our consideration of areas where material misstatements are likely to arise. In carrying out our engagement, the procedures we performed primarily consisted of:

1. Assessed the suitability of the criteria used by the entity in preparing the SMI;
2. Interviewing executives, senior management and relevant staff for obtaining an understanding of the control environment, processes and information systems relevant to the preparation of the SMI, but did not evaluate the design of particular control activities, obtain evidence about their implementation or test their operating effectiveness.
3. Obtaining an understanding of the relevant internal policies and procedures developed by the entity, including those relevant to determining what matters most to the investors and providers of financial, the Entity's strategy, governance and reporting process relevant to the Strategy Core Content Disclosures.
4. Obtaining an understanding of the reporting process for the SMI performed by the Entity, including the preparation of the SMI;
5. Performing risk assessment procedures to understand the Entity and its environment, including the Entity's reporting boundary, its value chain information and identify risks of material misstatement;
6. Obtaining an understanding of the Entity's materiality assessment process by performing inquiries

to understand the sources of the information used by management, reviewed the Entity's internal documentation of this process:

7. Inspecting the integrated risk management framework and internal risk registers to identify the process of how sustainability related risks and opportunities are identified and monitored.
8. Evaluating consistency of disclosed timeframes across the report and strategic plans.
9. Obtain understanding of climate targets to identify how the Entity plans to achieve the climate-related targets it has set.
10. Evaluating the overall presentation of the SMI and considered whether they are, consistent with the Criteria.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Annual Report of the Board of Directors

1. GENERAL

The Board of Directors of Hayleys PLC has pleasure in presenting their Report on the affairs of the Company together with the Audited Consolidated Financial Statements for the year ended 31st March 2026. The details set out herein provide the pertinent information required under Section 168 of the Companies Act No. 07 of 2007 ('the Companies Act'), the Listing Rules of the Colombo Stock Exchange, Code of Best Practice on Corporate Governance 2023 issued by the CA Sri Lanka, and Finance Companies Corporate Governance Direction No 05 of 2021 issued by the Monetary Board of the Central Bank of Sri Lanka under the Finance Business Act No 42 of 2011.

2. REVIEW OF THE BUSINESS

2.1 Principal Business activities of the Company and the Group

Hayleys PLC is a holding Company that owns, directly or indirectly, investments in the numerous Companies constituting the Hayleys Group and provides services to its Group Companies. The Group consists of a portfolio of diverse business operations. The main subsidiaries and equity accounted investees of Hayleys PLC are listed on pages 511 to 522.

The principal activities of the Group are categorised into fourteen different business sectors. i.e. Eco Solutions, Hand Protection, Purification Products, Textiles, Construction Materials, Plantations, Agriculture, Transportation & Logistics, Consumer & Retail, Industry Inputs, Power & Energy, Leisure, Energy, Mobility & Projects, Tea Exports and Others. The main activities of the sectors are described in the Portfolio Review pages on 212 to 319 of this Report.

During the financial year the Group ventured into mobility and large scale supermarket businesses. There were no other material changes in the nature of the business of the Company and Group.

The Directors to the best of their knowledge and belief, confirm that the Company and the Group have not engaged in any activity that contravene laws and regulations.

2.2 Review of operations of the Company and the Group

The investment/disposal activities during the financial year and after the reporting period include the following;

- Hayleys PLC purchased 1,751,306 (2.58%) ordinary shares of Kelani Valley Plantations PLC at a total consideration of Rs. 169.59 mn
- Hayleys PLC acquired 778,946 ordinary shares of Harischandra Mills PLC, representing a 40.58% stake, for a total consideration of Rs. 2.58 bn. Subsequently, a Mandatory Offer was made to the remaining shareholders of Harischandra Mills PLC, pursuant to which an additional 1,080 shares were acquired, increasing Hayleys PLC's shareholding in Harischandra Mills PLC to 40.63%.
- Hayleys PLC acquired a total of 1,040,291 shares at a consideration of Rs. 1.1 bn resulting in 11.27% shareholding in Diesel and Motor Engineering PLC during the month of April 2025 as part of the Group's business strategy. Subsequently disposed of 165,000 shares at a total consideration of Rs. 330 mn which resulted in a reduction of the shareholding to 9.48%.
- Hayleys PLC disposed 250,000 ordinary voting shares of Hayleys Produce Marketing Limited to Talawakelle Tea Estates PLC at a consideration of Rs. 7.50 mn.
- Hayleys Fentons Limited capitalized their reserves and retained profits amounting to Rs. 3.18 bn and issued 03 fully paid ordinary shares for every 01 share held by the existing shareholders. Hayleys PLC received 361,389,315 fully paid ordinary shares of Hayleys Fentons Limited.
- Hayleys Fentons Limited invested Rs. 160 mn in Hayleys Electronics (Pvt) Ltd and was issued 16,000,000 ordinary shares.
- Hayleys Fentons Limited invested Rs. 500 mn in Hayleys Mobility Limited and was issued 50,012,722 ordinary shares.
- Hayleys Fentons Limited invested Rs. 160 mn in Fentech Brands Ltd and was issued 16,000,000 ordinary shares.
- Hayleys Fentons Limited invested Rs. 160 mn in Nex-Gen Engineering Studio Limited and was issued 16,000,000 ordinary shares.
- Hayleys Fentons Limited invested Rs. 190 mn in Fentons Smart Facilities Limited and was issued 19,000,000 ordinary shares.
- Hayleys Fentons Limited invested Rs. 6.2 bn in Haywind One Limited and was issued 7,750,098 ordinary shares.
- Nex-Gen Engineering Pte Ltd (Singapore) invested Rs. 608.4 mn in Haywind One Limited and was issued 600,000 ordinary shares.
- Hayleys Fentons Limited, invested Rs. 389.69 mn in Energynet (Pvt) Ltd, a subsidiary of Hayleys Fentons, by taking up the full rights entitlement and was issued 2,726,880 ordinary shares.
- Hayleys Aventura (Private) Limited invested Rs. 194 mn in Celonex (Pvt) Ltd and was issued 1,940,000 ordinary shares.
- Hayleys Power Limited invested Rs. 250 mn in Solar Two (Pvt) Ltd and was issued 25,000,000 ordinary shares.
- Hayleys Agriculture Holdings Limited invested Rs. 390 mn in Hayleys Nature Nest (Pvt) Ltd and was issued 39,000,000 (50%) ordinary shares.
- Singer (Sri Lanka) PLC subscribed to 60,567,388 (21.8%) ordinary voting shares in the Rights Issue of Singer Finance (Lanka) PLC, representing 21.8% of the shares offered for total investment of Rs. 1.6 bn.

- Hayleys Power Limited disposed 100,000 ordinary voting shares of Innovative Health Solutions (Pvt) Ltd to Hayleys Aventura (Private) Limited.
- Hayleys Leisure PLC, invested Rs. 857.7 mn in Sun Tan Beach Resorts Limited, a subsidiary of Hayleys Leisure PLC by subscribing to its full rights entitlement and additional rights shares, acquiring a total of 456,247,280 ordinary voting shares.

New Incorporations

- Hayleys Aventura India (Pvt) Ltd was incorporated on 17th September 2025 as a fully owned subsidiary of Hayleys Aventura Singapore Pte Ltd.
- Mabroc India Private Limited was incorporated on 13th October 2025 as a fully owned subsidiary of Mabroc Teas (Pvt) Ltd.
- Hayleys BSI Pacific Pty Ltd was incorporated on 28th November 2025 as a fully owned subsidiary of Hayleys Business Solution International (Pvt) Ltd.
- Hayleys Green Energy Holdings Ltd was incorporated on 06th January 2026 as a fully owned subsidiary of Hayleys PLC.
- Hayleys Retail Holdings Ltd was incorporated on 06th January 2026. The Company had not commenced operations as at the reporting date and remains in its preparatory stage.
- Advantis Sarens Heavy Lift (Private) Limited was incorporated on 17th March 2026 as a joint venture of Hayleys Advantis Limited (50%) and Sarens Heavy Lift India Private Limited (50%).

Discontinued Operations

As at the reporting date, the Group was committed to transfer the head lease and the operating assets of Luxury Resort (Pvt) Ltd, a wholly owned subsidiary of Hayleys PLC, by entering into a binding offer (Contract) by way of a Letter of Intent dated 03rd February 2026 and

an addendum to the binding offer dated 11th April 2026 and an Asset Purchase Agreement signed on 16th May 2026, which comprises the transfer of property, plant & equipment, leasehold rights, intangible assets, and inventories relating to its hotel operations in the Maldives.

In accordance with SLFRS 5 – Non-current Assets Held for Sale and Discontinued Operations, the assets and corresponding liabilities directly associated with Luxury Resort Pvt Ltd have been classified as assets held for sale and the subsidiary has been presented as a discontinued operation in the Consolidated Financial Statements. Accordingly, the After Tax Loss from the discontinued operation has been disclosed separately, and comparative information has been restated to conform with the requirements of the standard. Further details are provided in Note 37 to the Financial Statements.

Accordingly, Hayleys PLC has recognized an impairment loss of Rs. 6.88 bn in the Statement of Profit or Loss, which includes an impairment of the investment in Luxury Resort Pvt Ltd amounting to Rs. 2.96 bn and an impairment of balance receivables from Luxury Resort Pvt Ltd amounting to Rs. 3.92 bn.

Amalgamations

- D P L Premier Gloves Limited a fully owned subsidiary of Dipped Products PLC, was amalgamated with Dipped Products PLC on 01st August 2025.
- Ultracarb (Private) Limited a fully owned subsidiary of Haycarb PLC, was amalgamated with Haycarb PLC on 01st October 2025.

Change of Company Names

The following Name changes were carried out during the financial year;

- Nex-Gen Asia (Pvt) Ltd changed its name to Nex Gen Engineering Studio Limited on 29th July 2025, in order to carry on engineering related businesses.

- Global Consumer Brands (Pvt) Ltd changed its name to Fentech Brands Ltd on 26th September 2025 in order to deal with manufacturing, selling and importing of all types of electronic and mechanical machinery for domestic and industrial use.

 - Northgate Wind Power (Pvt) Ltd
 - Air Power Energy Solutions (Pvt) Ltd
 - Karaitivu Windcity Energy Park (Private) Limited
 - Westgate Wind Power Solutions (Pvt) Ltd
 - Wind Will Energy (Pvt) Ltd
 - Northwest Wind Power Solutions (Pvt) Ltd
- Hayleys Fentons Limited invested Rs. 375 mn in Ceylon Electric Power Development (Pvt) Ltd and acquired 19% of the 50 MW solar power project in Jaffna.

Rights Issue

Hayleys PLC

On 21st January 2026, the Board of Directors resolved to increase the stated capital of the Company by way of a Rights Issue of 45,000,000 ordinary voting shares at a price of Rs. 200/- per share for a total consideration of Rs. 9 bn in the proportion of three (03) new ordinary voting shares for every fifty (50) existing ordinary voting shares held. Subsequent to obtaining the approval in principle from the Colombo Stock Exchange, an Extraordinary General Meeting ("EGM") was held where the resolutions were approved unanimously by the shareholders. The shares were oversubscribed by Rs. 2 bn and the Company allotted the rights shares to those who applied for the rights

entitlement in full. The additional shares were allotted on a proportionate basis according to the rights entitlement of the shareholders. On 27th April 2026 the Company issued and allotted 45 mn ordinary voting shares to the shareholders and the shares were listed on the Colombo Stock Exchange on 4th May 2026.

Singer Finance (Lanka) PLC

On 20th May 2025, the Board of Singer Finance (Lanka) PLC resolved a Rights Issue to raise the Tier 1 Capital by Rs. 2.01 bn through the issuance of 75,777,778 ordinary voting shares at a price of Rs. 26.50 per share, subject to the approval of the Central Bank of Sri Lanka and the approval in principle from the Colombo Stock Exchange. The Rights Issue was offered in the proportion of six (06) new ordinary voting shares for every sixteen (16) existing ordinary voting shares held. Unanimous approval was received from the shareholders for the Rights issue at the EGM held on 29th August 2025 upon receiving the approval of the CBSL and the Colombo Stock Exchange.

The Rights Issue was oversubscribed by Rs. 363 mn. The new ordinary shares under the Rights Issue were allotted on 8th October 2025 and were listed on the Colombo Stock Exchange on 14th October 2025.

Sun Tan Beach Resorts Limited

On 30th September 2025, the Board of Directors resolved to increase the stated capital of the Company by way of a Rights Issue of 533,839,504 ordinary voting shares at a price of Rs. 1.88 per share, for a total consideration of Rs. 1 bn by issuing six (6) ordinary voting shares for every five (5) ordinary voting shares held. The shareholders unanimously approved the Rights issue at the EGM. Hayleys Leisure PLC subscribed for 456,247,280 ordinary voting shares (including additional shares), for a total consideration of Rs. 857.74 mn. Accordingly, the Rights shares were

allotted on 8th October 2025 to the shareholders who applied for their Rights entitlement and additional shares.

Energynet Limited

On 23rd March 2026, the Board of Directors resolved to increase the stated capital of the Company by way of a Rights Issue of 2,726,880 ordinary voting shares at a price of Rs. 143/- per share, for a total consideration of Rs. 389.94 mn by issuing one (1) ordinary voting share for every four (4) shares held. Approval of the shareholders was received and Hayleys Fentons Limited subscribed for their full rights entitlement of 2,726,880 ordinary voting shares at a consideration of Rs. 389.4 mn.

Capitalization of Reserves

Hayleys Fentons Limited

On 30th March 2026, the Board of Directors resolved to capitalise the balances remaining in the General Reserve and Retained Earnings of the Company as at that date and to issue fully paid ordinary shares to the existing shareholders of the Company.

Accordingly, Rs. 3.18 bn was capitalised and 361.38 mn fully paid ordinary voting shares were issued at Rs. 8.797 per share, in the proportion of three (3) new ordinary voting shares for every one (1) ordinary voting share held by shareholders.

Mandatory offer

The Company acquired 778,946 ordinary voting shares, constituting 40.58% of the total issued ordinary voting shares of Harischandra Mills PLC at a price of Rupees Three Thousand Three Hundred (Rs. 3,300/-) per share on 17th October 2025. In terms of Rule 31(1)(a) of the Company Takeovers and Mergers Code, 1995 (as amended in 2003), Hayleys PLC made a mandatory offer to the remaining shareholders of Harischandra Mills PLC to purchase the balance 1,140,654 ordinary voting shares in issue, constituting 59.42%, at a price of Rupees

Three Thousand Three Hundred (Rs. 3,300/-) per share, being the highest price paid by Hayleys PLC for shares of Harischandra Mills PLC within the twelve-month period preceding the date of acquisition.

Subsequent to the offer, the Company holds 780,026 ordinary voting shares of Harischandra Mills PLC, representing 40.63% of the total issued ordinary voting shares of Harischandra Mills PLC.

2.3 Financial Statements of the Company and the Group

The Financial Statements of the Company and the Group are given on pages 358 to 486 of this report.

2.4 Auditors' Report

The Auditor's Report on the Financial Statements of the Company and the Group is given on pages 354 to 357.

2.5 Accounting Policies and changes during the year

The Financial Statements have been prepared in accordance with the Sri Lanka Accounting and Auditing Standards Act No. 15 of 1995 which requires compliance with Sri Lanka Accounting Standards. The detailed accounting policies adopted in the preparation of the Financial Statements are given on pages 369 to 394. There were no changes to the Accounting Policies used by the Group and the Company during the year.

2.6 Entries in the Interests Register

The Company, in compliance with the Companies Act, maintains an Interests Register. In accordance with the requirement of Section 30 of the Companies Act, particulars of entries in the interests register of the Company and those subsidiaries which have not dispensed with the requirement to maintain interests registers, are detailed below.

2.6.1 Directors' interest in transactions

The Directors of the Company and its Subsidiaries have made the general disclosures in terms of Section 192(2) of the Companies Act. Note to the Financial Statements dealing with related party disclosures includes details of their interests in transactions. In instances where a Director had an interest in contracts (or a relevant interest as per Section 200 of the Companies Act involving the Company), such Director refrained from voting and refrained from being a part of the discussion or decision.

2.6.2 Directors' interests in shares

Directors of the Company and its Subsidiaries who have relevant interests in the shares of the respective Companies have disclosed their shareholdings and any acquisitions/disposals to their Boards, in compliance with Section 200 of the Companies Act.

Hayleys PLC

- Mr. T. A. Amarasuriya, Managing Director of Singer Finance (Lanka) PLC subscribed to 18,808 Rights shares and disposed 40,000 shares during the financial year.

Annual Report of the Board of Directors

2.7 Payment of remuneration to Directors

Executive Directors' remuneration is structured within an established framework by the Board's Remuneration Committee, to whom this task has been entrusted. The Directors are of the opinion that the framework assures appropriateness of remuneration and fairness for the Company. The total remuneration of Executive Directors for the year ended 31st March 2026, which is given in Note 10 includes the value of perquisites granted to them as part of their terms of service.

The total remuneration of Non-Executive Directors for the year ended 31st March 2026, which is given in Note 10 is determined according to scales of payment decided upon by the Board.

The Board is satisfied that the payment of remuneration is fair to the Company.

Directors' remuneration, in respect of the Company for the financial year 2025/26 is Rs. 1,156 mn (2024/25 - Rs. 939.84 mn) comprising Rs. 1,131.45 mn paid to Executive Directors and Rs. 24.7 mn paid to Non-Executive Directors.

Directors' remuneration in respect of the Company's Subsidiaries for the financial year 2025/26 amounted to Rs. 4.33 bn (2024/25 - Rs. 4.23 bn) comprising Rs. 4.18 bn paid to Executive Directors and Rs. 152.23 mn paid to Non-Executive Directors.

2.7.1 Insurance & Indemnity

The Company has obtained a Directors and Officers Liability insurance cover. This covers the liability towards the Directors and Officers of Hayleys Group in respect of past, present and future negligence subject to terms and conditions of the policy.

2.8 Corporate Donations

Donations by the Company amounted to Rs. 2.98 mn (2024/25 - Rs. 2.96 mn) which includes a sum of Rs. 0.14

mn (2024/25 - Rs. 11.54 mn) made to Government approved charities. Donations by the Subsidiaries amounted to Rs. 51.1 mn (2024/25 - Rs. 32.20 mn).

3 FUTURE DEVELOPMENTS

Future developments are discussed in the Reflections from the Chairman & Chief Executive (pages 35 to 43) and Portfolio Review (pages 212 to 319) of this Report.

4 GROUP REVENUE AND INTERNATIONAL TRADE

The revenue of the Group from its continuing activities was Rs. 585.02 bn (2024/25 - Rs. 490.56 bn) in the year under review. A detailed analysis of the Group's revenue, profit and asset allocation relating to different segments of the Group's businesses is given in Note 40 to the Financial Statements.

The Group's exports from Sri Lanka, amounted to Rs. 205.6 bn (2024/25 - Rs. 203.95 bn) at F.O.B. value in the year under review.

The Group's revenue from International Trade, which includes the revenue of overseas subsidiaries in addition to exports from Sri Lanka, amounted to Rs. 294.89 bn (2024/25 - Rs. 260.43 bn) in the year under review.

Trade between Group companies is conducted at fair market prices.

5 PERFORMANCE AND RESERVES

5.1. Performance

The Group's Profit Before Tax (PBT) from continuing operations amounted to Rs. 38.04 bn (2024/25 - Rs. 36.71 bn). After deducting 14.59 bn (2024/25 - Rs. 12.86 bn) for taxation the profit from continuing operations was Rs. 23.45 bn (2024/25 - Rs. 23.85 bn). Loss from discontinued operations amounted to Rs. 1.23 bn (2024/25 - Rs. 1.37 bn) which resulted in the Group's profit for the year amounted to Rs. 22.22 bn (2024/25 - Rs. 22.51 bn). After deducting Rs. 8.17 bn (2024/25 -

Rs. 9.06 bn) to non-controlling interests the profit attributable to the owners of the Parent amounted to Rs. 14.05 bn for the year. (2024/25 - Rs. 13.45 bn).

5.2 Reserves

Total Group Reserves as at 31st March 2026 amounted to Rs. 102.64 bn (2025 - Rs. 91.57 bn). These reserves comprised Capital Reserves of Rs. 1.23 bn (2025 - Rs. 0.98 bn), Other components of equity of Rs. 35.94 bn (2025 - Rs. 34.17 bn), and Revenue Reserves of Rs. 65.46 bn (2025 - Rs. 56.43 bn). The composition of the reserves is presented in the Statement of Changes in Equity in the Financial Statements.

6 PROPERTY, PLANT AND EQUIPMENT

During the year, the Group incurred capital expenditure of Rs. 33.6 bn (2025: Rs. 21.33 bn) on property, plant and equipment (including capital work-in-progress), biological assets, and intangible assets. The Company's capital expenditure for the same period amounted to Rs. 625 mn (2025: Rs. 457.07 mn).

Details of capital expenditure relating to Property, Plant and Equipment (including capital work-in-progress), Investment properties, Biological assets, and Intangible assets, are disclosed in Notes 13, 15, 16 and 17 to the Financial Statements.

Information of extents, locations, number of buildings and valuations of the Group's properties are given in the statement of Value of Real Estate on pages 498 to 501.

7 MARKET VALUE OF FREEHOLD

The freehold lands of the Group has generally been subjected to periodic revaluation by independent qualified valuers. The most recent revaluations of the lands were carried out in 2025. Details of revaluations, carrying values and market values are disclosed in Note 13 to the Financial Statements. The details of freehold land is given in the statement of Value of Real Estate on pages 498 to 501.

8 ISSUE OF SHARES AND DEBENTURES

8.1 Issue of Shares

As the allotment of Rights shares occurred after the reporting date, the rights shares issued have not been included in the number of voting shares for the year ended 31st March 2026.

8.2 Increase of Stated Capital

The stated capital of the Company remained unchanged for the year ended 31st March 2026. Although the Rights Issue was approved during the year, the share allotment was completed subsequent to the reporting date on 27th April 2026. Accordingly, as at 31st March 2026, the Rights Issue amount of Rs. 9 bn was presented separately within equity as Shares Pending Allotment, reflecting the fact that the shares had not yet been formally allotted at the reporting date, despite the capital having been committed.

8.3 Issue of Debentures

- On 23rd March 2026, the Company issued 50,000,000 listed, rated, unsecured, senior redeemable debentures ('Debentures') at a par value of Rs. 100/- each to raise Rs. 5 bn with an option to issue up to a further 20,000,000 Debentures at the discretion of the Company in the event of an oversubscription of the initial issue, thereby raising up to a maximum of Rs. 7 bn. The initial issue was oversubscribed, and accordingly 58,828,200 debentures were allotted to investors, following which the Board decided not to proceed with the issuance of the remaining additional Debentures available under the option granted by the Prospectus.
- On 14th May 2026 the Company issued 50,000,000 listed, rated, unsecured, senior, redeemable debentures at a par value of Rs. 100/- each, to raise Rs. 5 bn with an option to issue a further 20,000,000 debentures at the discretion of the Company in the

event of an oversubscription of the initial issue, thereby raising up to a maximum of Rs. 7 bn. The issue was oversubscribed on the first day of opening, and accordingly, 70,000,000 debentures were allotted to investors.

Details of the debentures in issue are disclosed in the Share Information section on page 504 of this Annual Report.

9. SHARE INFORMATION

Information relating to earnings, dividend, net assets, market value per share, share trading and distribution of shareholding is given on pages 502 to 504.

10. SUBSTANTIAL SHAREHOLDINGS

10.1 Major Shareholdings

Details of the twenty largest ordinary shareholders, together with their respective percentage holdings, are given on page 502.

10.2 Public Holding

There were 16,403 (2025 - 13,086) registered shareholders as at 31st March 2026. The percentage of shares held by the public, in accordance with Colombo Stock Exchange rules is 37.09% (2025 - 37.09%). The Float Adjusted Market Capitalization as at 31st March 2026 was Rs. 59.8 bn. The distribution schedule of the number of shareholders is given on page 502.

11. DIRECTORS

a. Hayleys PLC

The names of the Directors who held office during the financial year is given below. Brief profiles of each Director are provided on pages 48 to 51.

Executive Directors

Mr. A. M. Pandithage (Chairman & Chief Executive)
Mr. S. C. Ganegoda
Mr. H. S. R. Kariyawasan
Mr. L. R. V. Waidyaratne
Mrs. J. Dharmasena
Mr. R. J. Karunarahaj

Non-Executive Directors

Mr. K. D. D. Perera (Co-Chairman)
Dr. H. Cabral, PC
Mr. K. D. G. Gunaratne

Senior Independent Director

Mr. P. Y. S. Perera (appointed as the Senior Independent Director on 15th September 2025)

Mr. M. Y. A. Perera (resigned from the Board with effect from 15th September 2025)

Independent Directors

Mr. T. A. B. Speldewinde
Mr. A. J. Alles
Mrs. S. R. Fernando
(appointed on 17th September 2025)

b. Rationale for the appointment of a Senior Independent Director

The Board is of the view that, given the Group's diversified operations across 14 business sectors and 20 countries, the current arrangement where the Chairman and Chief Executive roles are combined is the most appropriate for both the Company and the Group and should therefore continue. Accordingly, the Company continues to have a Senior Independent Director in compliance with Section 9.6.3 of the Governance Rules of the Colombo Stock Exchange. Mr. M. Y. A. Perera who served as Senior Independent Director resigned from the Board with effect from 15th September 2025, after serving for 9 years as an Independent Director. Following his resignation, Mr. P. Y. S. Perera was appointed as the new Senior Independent Director of the Company.

The role and responsibilities of the Senior Independent Director are given in the Statement by the Senior Independent Director on page 340.

Annual Report of the Board of Directors

c. Classification of Directors

The basis on which Directors are classified as Independent is discussed in the Corporate Governance Report page 57.

d. Re-election/ Re-appointment of Directors

The Nominations and Governance Committee of the Company has recommended that the Chairman & Chief Executive of the Company Mr. A. M. Pandithage who continues to make a significant contribution to the Board and the Company through his extensive experience, industry knowledge and business acumen is eligible to be re-appointed by the shareholders in terms of Section 211 of the Companies Act, notwithstanding the age limit of seventy years stipulated by Section 210 of the Companies Act.

In terms of the Articles of Association of the Company which stipulates that one third of the Directors who have served the longest on the Board shall retire at every Annual General Meeting, except the person holding the office of the Chief Executive/ Managing Director

and the newly appointed Directors, the Nominations and Governance Committee have recommended that Mr. K. D. G. Gunaratne, Mrs. J. Dharmasena, Mr. T. A. B. Speldewinde and Mr. P. Y. S. Perera who are due to retire by rotation, are eligible to be re-elected by the shareholders at the Annual General Meeting.

The Nominations and Governance Committee has also recommended that Mrs. S. R. Fernando who was appointed to the Board on 17th September 2025, and who is to be re-elected by the shareholders at the Annual General Meeting in terms of the Articles of Association of the Company, is eligible to be re-elected to the Board.

The Nominations and Governance Committee has ensured that the aforementioned Directors have fulfilled the fit and proper criteria stipulated in the Listing Rules of the CSE. Brief profiles of the Directors are provided in pages 48 to 51. Details of their other principal commitments and directorships are given in pages 48 to 51.

The Board of Directors further confirm that all the Directors have throughout the financial year continuously satisfied the fit and proper assessment criteria stipulated in the Listing Rules of the CSE.

e. Board Composition

The Board comprises thirteen (13) Directors of whom four (4) are Independent. The Independent Directors have submitted their annual declaration of independence and there has been no impairment of their independence during the year.

The Company remains fully compliant with the requirements in Section 9.8 of the Listing Rules.

f. Alternate Directors

No alternate directors were appointed during the year.

g. Directors of Subsidiaries

The names of the Directors holding office of the Subsidiaries as at the end of the financial year, grouped by Sectors, are given below. The names of the Directors who ceased to hold office during the year are shown within brackets.

12. DISCLOSURE OF DIRECTORS' DEALING IN SHARES AND DEBENTURES

Directors' dealings in shares are given under Note 2.6.2 of this report.

Directors' holdings in the ordinary shares of the Company are given on page 503.

None of the Directors hold debentures in by the Hayleys PLC.

13. EMPLOYEE SHARE OWNERSHIP PLANS

The Company does not operate any share option schemes.

14. DIRECTORS' DISCLOSURE OF INTEREST

Disclosure of interest by the Directors of the Company and its subsidiaries are detailed in Note 2.6 above.

15. RELATED PARTY TRANSACTIONS

The related party transactions of the Company during the financial year have been reviewed by the Related Party Transactions Review Committee

The Board of Directors confirms that the Company has complied with the requirements stipulated in Section 9.14 of the CSE Listing rules. More details are given in the Related Party Transactions Review Committee report.

16. ENVIRONMENTAL PROTECTION

The Group's efforts to conserve scarce and non-renewable resources, as well as its environmental objectives and key initiatives, are described in the Natural Capital on pages 208 to 209.

17. STATUTORY PAYMENTS

The Directors, to the best of their knowledge and belief, are satisfied that all statutory payments due to the Government, other regulatory bodies and employees have been made on time. They further confirm that there have been no material non compliances with law or regulation, nor any applicable material fines, imposed by any government or regulatory authority in any jurisdiction in which the Company and Group operate.

The declaration relating to statutory payments is made in the Statement of Directors' Responsibilities on page 341.

18. RESEARCH AND DEVELOPMENT

Research and development remain a strategic focus of the Group, contributing to innovation and operational excellence. Significant resources have been invested in developing intellectual property, products, and processes, and these efforts will continue to support future growth and improve operational performance.

19. EVENTS AFTER THE REPORTING DATE

No event of material significance requiring adjustment to the Financial Statements that have occurred subsequent to the reporting date, other than those disclosed in Note 35 to the Financial Statements on page 468.

20. GOING CONCERN

The Directors, having considered the financial position, operating environment, regulatory requirements, and other relevant factors including those addressed in the Corporate Governance Code, have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future. Accordingly, the Financial Statements have been prepared on a, the going concern basis.

21. EXPOSURE TO RISK

The Group has a structured risk management process in place to support its operations.

The Hayleys Board of Directors, Audit Committee and the sector Audit Committees play a major role in this process. The Risk Management section of this report elaborates these practices and the Group's risk factors.

22. APPOINTMENT OF AUDITORS

A resolution for the re-appointment of Messrs Ernst & Young, Chartered Accountants, as auditors of the company for the year 2026/27 will be proposed at the Annual General Meeting.

23. AUDITORS' REMUNERATION AND INTEREST IN CONTRACTS

A resolution authorising the Directors to determine their remuneration will be submitted at the Annual General Meeting.

The Auditors, were paid Rs. 3.64 mn (2024/25 - Rs. 3.25 mn), and Rs. 194.06 mn (Rs. 185.7 mn) as audit fees by the Company and its local and overseas Subsidiaries respectively. In addition, they were paid Rs. 1.56 mn (2024/25 - Rs. 2.53 mn) and Rs. 66.55 mn (Rs. 70.30 mn), by the Company and its local and overseas Subsidiaries respectively, for non-audit related work, which consisted mainly of tax consultancy services.

The Auditors of the Company and its Subsidiaries, have confirmed that they have no relationships with, or interests in, the Company or any of its Subsidiaries. other than in their capacity as auditors.

24. RATIOS AND MARKET PRICE INFORMATION

The information relating to equity and debt as required by the listing requirements of the Colombo Stock Exchange are given on pages 502 to 504, and page 18 of this Report.

25. EMPLOYEES & INDUSTRIAL RELATIONS

The Group has a structure and a culture that recognizes the aspirations, competencies and commitment of its employees. Career growth and advancement within the Group is promoted.

Details of Group's human resource practices and employee and industrial relationships are given in Human Capital section of the Capital Management Review.

The number of persons employed by the Group at year-end was 38,746 (2025 - 38,029).

26. COMMUNICATION WITH SHAREHOLDERS

The Group endeavors to ensure equitable treatment to its shareholders. The policy on relations with Shareholders and Investors is available on the Company's website: www.hayleys.com. The contact person for communication with Shareholders is also provided in the website and in the Corporate Information page 540 in this Report.

The Board has established a process to make Directors aware of any major issues and concerns of shareholders, and it is set out in the Governance Report on page 76.

27. INTERNAL CONTROLS

The Directors acknowledge their responsibility for the Group's system of internal control. The system is designed to give assurance, inter alia, regarding the safeguarding of assets, the maintenance of proper accounting records and the reliability of financial information generated. However, any system can only ensure reasonable and not absolute assurance that errors and irregularities are either prevented or detected within a reasonable time period.

The Board, having reviewed the system of internal controls, covering financial, operational and compliance controls and risk management and having obtained reasonable assurance on their effectiveness, is satisfied with the Group's adherence to and effectiveness of these controls for the period up to the date of signing the Financial Statements.

28. BOARD SUB COMMITTEES

The Board has established and maintains the following sub committees;

- Audit Committee
- Related Party Transactions Review Committee
- Nominations and Governance Committee
- Remuneration Committee

Please refer pages 343 to 352 for the Board sub committee reports.

29. POLICIES

The Company has adopted all the policies mandated by the Listing Rules of the CSE in addition to other policies of the Company. The policies include Matters relating to Board of Directors, Policy on Board Committees, Policy on Corporate Governance, Nominations and Re-elections, Policy on Internal Code of Business Conduct and Ethics

Annual Report of the Board of Directors

for all Directors and employees including trading in Company shares, Policy on Risk Management and internal controls, Policy on Relations with Shareholders and Investors, Policy on ESG and Sustainability (Hayleys Lifecode), Policy on Control and Management of Company Assets and shareholder investments, Policy on Corporate Disclosures, Policy on Whistle Blowing and Policy on Anti Bribery and Corruption.

These policies are available on the Company's website: www.hayleys.com. The Company's Policy on Matters relating to Board of Directors, has set out the specific requirements stipulated in Rule 9.5 of the Listing Rules of the CSE and the Company has been compliant with the requirements of the Policy throughout the year.

30. CORPORATE GOVERNANCE

The Corporate Governance requirements stipulated under the Listing Rules of the CSE have been adhered to by the Company. The Corporate Governance Report on pages 57 to 92 discusses this further.

31. DIVIDENDS

The Company paid an interim dividend of Rs. 6/- for the financial year ended 31st March 2026, on 12th February 2026.

32. ANNUAL GENERAL MEETING

The Seventy Fifth Annual General Meeting will be held at the registered office No. 400, Deans Road, Colombo 10, Sri Lanka on Tuesday, 30th June 2026 at 1.00 p.m. The Notice of the Annual General Meeting to the shareholders is given on page 543.

For and on behalf of the Board,

Chairman & Chief Executive's and Group Chief Financial Officer's Responsibility Statement

The Financial Statements of Hayleys PLC and the Consolidated Financial Statements of the Group as at 31st March 2026 are prepared and presented in compliance with the requirements of the following:

- Sri Lanka Accounting Standards issued by CA Sri Lanka;
- Companies Act No. 07 of 2007;
- Sri Lanka Accounting and Auditing Standards Act No. 15 of 1995;
- Sri Lanka Financial Reporting Standards S1 & S2 Sustainability Disclosure Standards
- Listing Rules of the Colombo Stock Exchange;
- Code of Best Practice on Corporate Governance 2023 issued by CA Sri Lanka;
- Finance Companies Corporate Governance Direction No 05 of 2021 issued by the Monetary Board of the Central Bank of Sri Lanka under the Finance Business Act No 42 of 2011.

We confirm that the significant accounting policies used in the preparation of the Financial Statements are appropriate and are consistently applied, as described in the Notes to the Financial Statements. The significant accounting policies and estimates that involved a high degree of judgment and complexity were discussed with the Audit Committee and our External Auditors. The SLFRS S1 and SLFRS S2 Sustainability Disclosure Standards become mandatory for the Group in the reporting period under review, and disclosures have been further enhanced in line with the Group's adoption roadmap.

We have also taken proper and sufficient care in installing systems of internal control and accounting records to safeguard assets and to prevent and detect frauds as well as other irregularities. These have been reviewed, evaluated and updated on an ongoing basis. Reasonable assurances that the established policies and procedures of the Company have been consistently followed were provided by periodic audits conducted by Group's internal auditors. However, there are inherent limitations that should be recognized in weighing the assurances provided by any system of internal controls and accounting.

The Audit Committee of the Company meets periodically with the Internal Auditors and the Independent Auditors to review the effectiveness of the audits and to discuss auditing, internal control and financial reporting issues. The Independent Auditors and the Internal Auditors have full and free access to the Audit Committee to discuss any matter of substance.

The Financial Statements were audited by independent external auditors, Messers Ernst & Young, Chartered Accountants. Their report is given on pages 354 to 357 of the Annual Report.

The Audit Committee approves the audit and non-audit services provided by the External Auditor, in order to ensure that the provision of such services do not impair their independence.

We confirm that,

- the Company and its subsidiaries have complied with all applicable laws, regulations and prudential requirements;
- there are no material non-compliances; and
- there are no material litigations that are pending against the Group other than those disclosed in the Note 32 to the Financial Statements in this Annual Report.

Mohan Pandithage
Chairman & Chief Executive

Milinda Hewagama
Group Chief Financial Officer

29th May 2026

Statement by the Senior Independent Director

The year under review marked my first year serving as the Senior Independent Director of the Company, having assumed the role on 15th September 2025 following the relinquishment of the position by my predecessor to ensure continued compliance with the independence requirements of the Listing Rules of the Colombo Stock Exchange. My appointment was made in accordance with these Rules, which require the appointment of a Senior Independent Director where the roles of Chairman & Chief Executive are combined.

Rationale for the Combined Role of the Chairman & Chief Executive

Due to the complexity of operations in the conglomerate, which has 14 diverse business sectors and 51 overseas companies and the pivotal role played by the Chairman & Chief Executive in terms of cultivating and developing external partnerships, maintaining trust and confidence with business partners and key principals and ensuring the retention of prestigious agencies for the sustenance and growth of the Company and the Group's business as a whole, as well as his executive management skills, integrity, expertise, wealth of experience and business acumen, the Board has decided that the Chairman & Chief Executive should continue to function in the said capacity.

Role of the Senior Independent Director

As the Senior Independent Director of the Company, I remain committed to supporting strong corporate governance, constructive Board dynamics, and effective engagement with Key Management Personnel and other stakeholders.

Activities During the Year

During the year, I maintained regular engagement with the Chairman & Chief Executive, the Non-Executive Directors, and the Board Committees to ensure that the Board operates effectively by bringing in independent judgement and balanced decision-making through diversity of thought, skills, and experience which remained central to the Board's deliberations.

The Board continued to focus on the Group's long-term value creation, capital allocation priorities, risk oversight, succession planning, and maintaining high standards of integrity and accountability. Independent Directors actively challenged and contributed to management proposals, ensuring robust discussion on matters affecting the Group's strategy and operations.

During the year I presided over the meeting of Non-Executive Directors without the presence of the Executive Directors. The performance of the Chairman & Chief Executive and the Executive Directors were appraised at this meeting. The Non-Executive Directors expressed their satisfaction on governance matters and the creditable performance of the Chairman & Chief Executive who created a conducive environment for unfettered opinions and suggestions. A separate meeting was held with only the Independent Directors

that provided valuable insights to further strengthen Board effectiveness and governance practices. The outcome of these meetings together with recommendations were duly informed to the Chairman & Chief Executive.

I am satisfied that the Board continues to operate effectively, with open dialogue, mutual respect, and an appropriate balance of skills, experience, and independence. The annual Board evaluation process confirmed that the Board and its Committees continue to operate effectively, with a strong culture of openness. This process enhances the effectiveness of the Board, the Committees and the management of the Company. The Independent/Non-Executive Directors thank the Chairman & Chief Executive and other Executive Directors for the co-operation extended at all times to the Independent/Non-Executive Directors in carrying out their duties.

P. Y. S. Perera
Senior Independent Director

22nd May 2026

Statement of Directors' Responsibilities

This Statement of Directors' Responsibility is to be read in conjunction with the Report of the Auditors and is made to distinguish the respective responsibilities of the Directors and of the Auditors in relation to the Financial Statements contained in this Annual Report.

The Directors are responsible, under Sections 150 (1), 151, 152 (1), 153 (1) and 153 (2) of the Companies Act No. 07 of 2007 (the Companies Act), to ensure compliance with the requirements set out therein to prepare Financial Statements for each financial year giving a true and fair view of the state of affairs of the Company and the Group as at the end of the financial year and of the profit and loss of the Company and the Group for the financial year.

The Directors are also responsible, under Section 148, of the Companies Act to ensure that proper accounting records are kept to enable determination of the financial position with reasonable accuracy.

The Directors have taken all reasonable steps to ensure that the Company and its subsidiaries maintain adequate and accurate accounting records which capture all transactions and provide an accurate disclosure of the Company's Financial Position.

In line with the mandatory adoption of SLFRS S1 and SLFRS S2 during the year, the Directors have exercised oversight over the processes and controls established to support the identification, measurement and disclosure of material sustainability-related and climate-related matters and are satisfied that the disclosures presented are consistent with the requirements of the Standards

The Board accepts responsibility for the integrity and objectivity of the Financial Statements presented. The Directors confirm that in preparing the Financial Statements, appropriate accounting policies have been selected and applied consistently while reasonable and prudent judgements have been made so that the form and substance of transactions are properly reflected. They also confirm that the Financial Statements have been prepared and presented in accordance with the Sri Lanka Accounting Standards and the Companies Act. They also confirm that the Financial Statements have been prepared and presented in accordance with the Sri Lanka Accounting Standards (SLFRS/LKAS), the Companies Act and the Listing Rules of the Colombo Stock Exchange.

The Directors are of the opinion, based on their knowledge of the Company, key operations and specific inquiries, that adequate resources exist to support the Company on a going concern basis over the next year. These Financial Statements have been prepared on that basis.

The Directors have taken proper and sufficient measures to safeguard the assets of the Group and, in that context, have instituted appropriate systems of internal control and accounting records to prevent and detect frauds and other irregularities. These have been reviewed, evaluated and updated on an ongoing basis.

The Directors have confirmed that the Company satisfied the solvency test requirement under Section 56 of the Companies Act for all dividends paid. Auditors' solvency certificates have been obtained as required.

The External Auditors, Messrs Ernst & Young, Chartered Accountants who were re-appointed in terms of the Companies Act were provided with every opportunity to undertake the inspections they considered appropriate to enable them to form their opinion on the Financial Statements. The Report of the Auditors, shown on pages 354 to 357 sets out their responsibilities in relation to the Financial Statements.

COMPLIANCE REPORT

The Directors confirm that to the best of their knowledge, all statutory payments relating to employees and the Government that were due in respect of the Company and its subsidiaries as at the Balance Sheet date have been paid or provided where relevant.

By Order of the Board,

Hayleys Group Services (Private) Limited
Secretaries

29th May 2026

Directors' Statement on Internal Controls

The following statement fulfils the requirement to publish the Directors' Statement on internal controls as per the Code of Best Practice on Corporate Governance 2023 issued by CA Sri Lanka.

The Board of Directors is responsible for maintaining a sound system of internal controls to safeguard shareholders' investments and the Company's assets. The Board has established an ongoing process for identifying, evaluating and managing the significant risks faced by the Company and Group. This process includes enhancing the system of internal controls as and when there are changes to business environment or regulatory guidelines. The process is regularly reviewed by the Board.

The Board is of the view that the system of internal controls in place is sound and adequate to provide reasonable assurance regarding the reliability of financial reporting, and the preparation of Financial Statements for external purposes and is in accordance with relevant accounting principles and regulatory requirements.

The Board has implemented the following to obtain reasonable assurance that proper systems of internal controls are in place:

- Instituted various committees to assist the Board in ensuring the effectiveness of Company's operations and the operations are in accordance with the corporate strategies and annual budget.
- Implementation of a comprehensive Personal Data Protection framework, aligned with the Sri Lanka Personal Data Protection Act (PDPA) including the appointment of a Group Data Protection Officer
- The Group Management Audit and System Review Department (MA & SRD) to review and report on the internal control environment and control procedures in the Company and Group. Audits are carried out on all subsidiaries in accordance with the annual audit plan approved by the Audit Committee.
- Findings are submitted to the relevant sub audit committees for their review at their periodic meetings and the key observations are tabled at the Group Audit Committee for their review.
- The Audit Committee reviews internal control issues identified by the Group MA & SRD and management, and evaluates the adequacy and effectiveness of the risk management and internal control systems. They also review the internal audit functions with particular emphasis on the scope of audits and quality of internal audits. The minutes of the Audit Committee meetings are tabled at the Board meetings of Hayleys PLC.
- The adoption of new Sri Lanka Accounting Standards comprising LKAS and SLFRS (including SLFRS S1 & S2 Sustainability Disclosure Standards), Processes that are required to comply with new requirements of recognition, measurement, presentation and disclosures were introduced and implemented. The Group has implemented the necessary risk monitoring and reporting processes required to comply with the requirements of the SLFRS S1 and S2 and will continue to drive improvements in these processes to ensure full adoption of the Standards by 2026/27.
- The comments made by External Auditors in connection with the internal control system during the financial year 2024/25 were taken into consideration and appropriate steps have been taken to incorporate them where appropriate.

CONCLUSION

The Board having implemented the above is aware that such systems are designed to manage rather than eliminate the risk of failure to achieve business objective and can only provide reasonable and not absolute assurance against material misstatements of loss.

The Board of Directors confirm that the financial reporting system of Hayleys PLC has been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes has been done in accordance with the Sri Lanka Accounting Standards, requirements of the Company's Act No 7 of 2007 and the Listing Rules of the Colombo Stock Exchange.

** Mr. M. Y. A. Perera who served as the Chairman of the Audit Committee and Senior Independent Director of the Board having completed nine years as an Independent Director resigned from his position as a Board member to comply with the Corporate Governance rules.*

Profiles of the members are indicated in pages 48 to 51.

The Chairman of the Audit Committee is a member of a recognized accounting body.

The individual and collective financial knowledge and business acumen and the independence of the Committee members are brought to bear on their deliberations and judgments on matters that come within the Committee's purview.

Attendees by Invitation

The Chairman & Chief Executive, Group Chief Financial Officer and Head – Group Management Audit & System Review attend all the meetings of the Committee.

Secretaries to the Committee

Hayleys Group Services (Private) Limited serves as the Secretary to the Committee.

CHARTER OF THE AUDIT COMMITTEE

The Audit Committee Charter is periodically reviewed and revised with the concurrence of the Board of Directors to make sure that new developments relate to the function of the Committee. The Charter of the Committee was last reviewed and approved by the Board in March 2026. The Terms of Reference of the Committee are clearly defined in the Charter of the Audit Committee. The Terms of Reference was revised during the year under review to include oversight responsibilities on Sustainability and ESG reporting.

Rules on Corporate Governance under Listing Rules of the Colombo Stock Exchange, 'Code of Best Practice on Corporate Governance' issued by Institute of Chartered Accountants of Sri Lanka in 2023 and in the case of the subsidiary company, Singer Finance (Lanka) PLC 'Finance Leasing (Corporate Governance) Direction No 05 of 2021 issued by the Monetary Board of the Central Bank of Sri Lanka under the Finance Business Act No 42 of 2011', further regulate the composition, roles and functions of the Board Audit Committee.

MEETINGS OF THE AUDIT COMMITTEE

The Committee met on a quarterly basis during the year. The attendance of the members is stated in the given table.

Other members of the Board and the Group Management Committee, as well as the External Auditors were present at discussions where it was appropriate. The proceedings of the Audit Committee are regularly reported to the Board of Directors by tabling the minutes of the Committee meetings and an update by the Chairman of the Committee on matters that require the attention of the Board.

Audit Committee Report

THE AUTHORITY OF THE AUDIT COMMITTEE

- Recommend appointment, dismissal, service period and audit fee of the external auditors.
- Establish and maintain a direct communication channel with the external auditors.
- Resolve any issues regarding financial reporting between the management and the external auditor.
- Pre-approve all auditing and non-audit services performed by the external audit firm and internal audit service providers.
- Seek any information it requires from employees or external parties relating to investigations.
- Meet with the management and external auditors as necessary to carry out the assigned duties.

ACTIVITIES IN 2025/26 FINANCIAL REPORTING SYSTEM

The Committee reviewed the financial reporting system adopted by the Group in the preparation of its quarterly and annual Financial Statements to ensure reliability of the processes and consistency of the accounting policies and methods adopted and their compliance with the Sri Lanka Financial Reporting Standards. The methodology included obtaining statements of compliance from Heads of Finance and Directors-in-charge of operating units. The Committee recommended the Financial Statements to the Board for its deliberations and issuance.

The Committee, in its evaluation of the financial reporting system, also recognized the adequacy of the content and quality of routine management information reports forwarded to its members.

INTERNAL CONTROLS

The Committee reviewed the process to assess the effectiveness of the Internal Financial Controls that have

been designed to provide reasonable assurance to the Directors that assets are safeguarded and that the financial reporting system can be relied upon in preparation and presentation of Financial Statements.

The Group Management Audit & Systems Review Department (MA & SRD) reports on key control elements and procedures in Group companies that are selected according to a group annual audit plan. During the year 2025/26, 767 audits were performed covering all 18 verticals of the Group. Significant findings and recommendations together with management's responses of the review of the internal controls carried out by internal auditors and provide recommendations for improvement.

The internal audits of certain verticals were outsourced in the financial year 2025/26 to leading audit firms in line with an agreed annual group audit plan. The Committee also invited representatives from the audit firms to make presentations on their observations and findings.

Follow-up reviews were scheduled to ascertain that audit recommendations are being acted upon.

The Committee evaluated the Internal Audit Function covering key areas such as scope, quality of internal audits, independence and resources. The Committee appraised the independence of the Group Management Audit & Systems Review Department and other internal auditors in the conduct of their assignments.

RISK MANAGEMENT

The Committee obtained and reviewed the Key Business Risks Dashboard of Business verticals identifying their respective major business risks, mitigatory action taken or contemplated for management of these risks. The COSO Enterprise Risk Reporting Process is presently being implemented within the Group.

The Committee maintains a close oversight of the information security systems of the Group to ensure that its digital infrastructure remains resilient against external threats and internal vulnerabilities.

The Audit Committee also conducted ESG risk assessments during the year, thereby identifying, prioritizing and monitoring sustainability-related risks and opportunities.

Review of risk management, internal controls, business continuity planning and information security systems are carried out and appropriate remedial actions are recommended to the Board.

SUBSIDIARY COMPANY AUDIT COMMITTEES

Within the Hayleys Group, there are 18 verticals consisting of 13 listed subsidiaries and 5 unlisted subsidiaries which have appointed their own Audit Committees comprising Independent Non-Executive Directors and have met four times each during the year 2025/26. These Audit Committees function independent of the Audit Committee of Hayleys PLC but have similar Terms of Reference. The minutes of their meetings were made available to Hayleys Audit Committee.

EXTERNAL AUDITS

The Committee held meetings with the External Auditors to review the Audit Plan detailing the nature, approach, scope of the audit. Further, the External Auditor presented to the Audit Committee, the Audit Results prior to the conclusion of the audit. The External Auditors' Management Letters of Group Companies were reviewed by the Audit Committee. Actions taken by the management in response to the issues raised, as well as the effectiveness of the internal controls in place, were discussed with the heads of business units. Remedial actions were recommended wherever necessary.

The Committee reviewed the Auditors' Declaration regarding their independence and is satisfied that the independence of the External Auditors has not been impaired. The nature of services provided by the Auditors, audit fees, expenses and any non-audit services were also scrutinized to ensure their independence is maintained throughout the financial year. Messrs Ernst & Young have served as the External Auditors of the Company for sixteen (16) years, and a Partner rotation of the External Auditor takes place periodically. The current audit partner has served in the role for one (01) year.

APPOINTMENT OF EXTERNAL AUDITORS

The Audit Committee has recommended to the Board of Directors that Messrs Ernst & Young., continue as Auditors for the financial year ending 31st March 2027 after evaluating the scope, delivery of the audit, resources and the quality of the assurance initiatives taken during the financial year 2025/26.

COMPLIANCE

The Committee obtained representations from respective MD's and CFOs of Group Companies on the adequacy of provisions made for possible liabilities and reviewed reports tabled by Group Companies certifying their compliance with relevant statutory requirements. Further, the Committee obtained regular updates from Head of HR and Legal regarding compliance matters.

ETHICS AND GOOD GOVERNANCE

The Committee continuously emphasized upholding ethical values of the staff members. In this regard, Code of Ethics, Whistle-Blowers Policies and Anti-corruption Policies were put in place and followed educating and encouraging all members of staff. All appropriate procedures are in place to conduct independent investigations into incidents reported through Whistleblowing or identified through other means. The Whistle-Blower Policy guarantees strict confidentiality of the identity of the Whistle-Blowers.

SRI LANKA ACCOUNTING STANDARDS

Committee reviewed the revised policy decisions relating to adoption of new and revised Sri Lanka Accounting Standards (SLFRS/LKAS) applicable to the Group companies and made recommendation to the Board of Directors.

Progress of implementation of SLFRS:

The Committee continuously monitored the progress of implementation of SLFRS as per the requirements of Sri Lanka Accounting Standards.

The Committee would continue to monitor the compliance with relevant Accounting Standards and keep the Board of Directors informed at regular intervals.

SUPPORT TO THE COMMITTEE

The Committee received information and support from management during the year to enable it to carry out its duties and responsibilities effectively.

Mr. M. Y. A. Perera * (Senior Independent Director)	Resigned on 15.09.2025	-

* Mr. M. Y. A. Perera who served as the Chairman of the Nominations and Governance Committee and Senior Independent Director of the Board having completed nine years as an Independent Director resigned from his position as a Board member to comply with the Corporate Governance rules.

Profiles of the members are indicated in pages 48 to 51.

Attendees by Invitation

The Chairman & Chief Executive participated in all deliberations except in matters which were in relation to himself.

Secretaries to the Committee

Hayleys Group Services (Private) Limited serves as the Secretary to the Committee.

The Board has approved well-defined Terms of Reference outlining the Committee's purpose, composition, quorum, authority, responsibilities, and meeting related matters.

DUTIES OF THE NOMINATIONS AND GOVERNANCE COMMITTEE

- To approve a formal and transparent procedure to evaluate and recommend the appointment of Directors of the Company considering the required skills, experience and qualifications necessary.
- Maintain a set of criteria for selection of Directors such as academic / professional qualifications, skills, experience and key attributes required for eligibility taking into consideration the nature of the business of the Company and industry specific requirements.
- To consider and recommend (or not recommend) the re-election of current Directors taking into account the combined knowledge, experience, performance and contribution made by the Director to meet the strategic demands of the Company and the discharge of the Board's overall responsibilities and the number of directorships held by the Director in other listed and unlisted companies and other principal commitments.
- To approve a suitable process for the periodic evaluation of the performance of the Board Directors and the Chairman & Chief Executive of the Company to ensure their responsibilities are satisfactorily discharged.

- To review the succession plans for Board of Directors and Group Management Committee Members.
- To review and recommend the overall corporate governance framework of the Company, taking into account the Listing Rules and other applicable regulatory requirements and industry best practices.
- To review and update the corporate governance policies/ framework in line with regulatory and legal developments relating to same.
- To periodically review the insurance cover "Directors' and Officers' Liability Cover" for Directors and other Key Management Personnel.
- To receive reports from the Management on compliance of the corporate governance framework of the Company including the Company's compliance with provisions of the Securities and Exchange Commission Act, Listing Rules of the Colombo Stock Exchange and other applicable laws and reasons for any deviations or non-compliances.

ACTIVITIES DURING THE YEAR

The Committee reviewed and evaluated the profile of the proposed Directors and recommended their appointment to the Board. The Committee also reviewed the structure and composition of the Board and Board Committees and recommended additions to Committees. Accordingly, the Board sought to enhance its diversity across areas such as experience, skills, age, and gender to support the effective discharge of its responsibilities.

Board performance evaluation was carried out and discussed at Board meetings. This entails the evaluation of performance of the Board, Sub-Committees and the performance of the Chairman & Chief Executive.

The succession Plan for the Board of Directors and the Group Management Committee Members was also reviewed and approved by the Committee.

The Company's policies were reviewed during the year and necessary amendments were incorporated. The Committee ensured that the Policies were uploaded on the Company website. The list of Policies of the Company is given on page 337 of the Annual Report of the Board of Directors. The Charter and Terms of Reference of the Committee were reviewed and amended where necessary.

The Committee also evaluated the Independence of the Directors against the criteria for independence as set out in the Listing Rules. The Committee ensured that the declaration of independence is carried out by the Independent Directors and concluded that all Independent Directors of the Company meet the criteria for determining independence. The Committee also evaluated all the Directors against the Fit and Proper assessment criteria.

The Committee ensured that Corporate Governance rules stipulated by the Colombo Stock Exchange were adhered to by the Board and the Company throughout the year.

The newly appointed Director was inducted to the Board by giving adequate information on the Group companies and their respective local and foreign operations. During the year, the Committee also updated the Board on Corporate Governance, Listing Rules, market regulation, and the Companies (Amendment) Act No. 12 of 2025.

RE-APPOINTMENTS / RE- ELECTIONS

One Third (1/3) of all the Directors, except the Chairman & Chief Executive and those who have been appointed to the Board since the last Annual General Meeting, retire by rotation in terms of the

Articles of Association and being eligible submit themselves for re-election at the Annual General Meeting.

Accordingly, the Committee has recommended to re-elect Mr. K. D. G. Gunaratne, Mrs. J. Dharmasena, Mr. T. A. B. Speldewinde and Mr. P. Y. S. Perera to the Board at the Annual General Meeting to be held on 30th June 2026, based on their performance and the contribution made to achieve the objectives of the Board.

Mr. K. D. G. Gunaratne, Non-Executive Director, was appointed to the Board on 01st October 2019 and last re-appointed as a Director in 2023. His directorships and other principal commitments are given in the profile on page 50. He serves on the Audit Committee, Nominations and Governance Committee, Related Party Transactions Review Committee and the Remuneration Committee of the Company.

Mrs. J. Dharmasena, Executive Director, was appointed to the Board on 01st April 2018 and last re-appointed as a Director in 2023. Her directorships and other principal commitments are given in the profile on page 50. She does not serve on any Board Committees.

Mr. T. A. B. Speldewinde, Independent Non-Executive Director, was appointed to the Board on 03rd January 2024. His directorships and other principal commitments are given in the profile on page 50. He serves as the Chairman of the Related Party Transactions Review Committee, and as a member of the Audit Committee, Nominations and Governance Committee, and the Remuneration Committee of the Company.

Mr. P. Y. S. Perera was appointed to the Board on 01st April 2024 and appointed as the Senior Independent Director on 15th September 2025. His directorships and other principal commitments are given in the profile on page 50. He serves as the Chairman of

Nominations and Governance Committee Report

the Audit Committee, Nominations and Governance Committee, Remuneration Committee and as a member of the Related Party Transactions Review Committee of the Company.

Mrs. S. R. Fernando, Independent Non-Executive Director who was appointed to the Board on 17th September 2025, comes up for re-election at the Annual General Meeting. She does not serve on any Board Committees of the Company. Her profile is given on page 51 which contains her other principal commitments.

Due to the invaluable contribution made to the Board as a result of his many years of experience, industry knowledge and business acumen, the Committee has recommended to re-appoint Mr. A. M. Pandithage, Chairman & Chief Executive who is over seventy years, and who retires in terms of Section 210 of the Companies Act No. 7 of 2007.

The Committee affirms that it has met the Corporate Governance requirements stipulated in the Listing Rules of the Colombo Stock Exchange and further details are given in the Corporate Governance narrative from pages 80 to 85.

** Mr. M. Y. A. Perera who served as the Chairman of the Remuneration Committee and Senior Independent Director of the Board having completed nine years as an Independent Director resigned from his position as a Board member to comply with the Corporate Governance rules.*

Profiles of the members are indicated in pages 48 to 51.

Attendees by Invitation

The Chairman & Chief Executive participated in all deliberations except in matters which were in relation to himself.

Secretaries to the Committee

Hayleys Group Services (Private) Limited serves as the Secretary to the Committee.

The Remuneration Committee has well defined Terms of Reference outlining the Committee's, composition, quorum, authority, responsibilities and meeting related matters. The Committee comprises three Independent Non-Executive Directors and two Non-Executive Directors who are free from business, operational, personal or other relationships which may interfere with their independent, unbiased judgement.

RESPONSIBILITIES OF THE REMUNERATION COMMITTEE

The Committee is responsible to the Board to determine the policy of the remuneration package of the Chief Executive, Executive and Non-Executive Directors and the Key Management Personnel.

The Committee evaluates, assesses and recommends to the Board of Directors on matters that may affect Human Resources Management of the Company and specifically include;

- Review and approve the Remuneration Policy of the Company and its specific application to the Executive Directors and Key Management Personnel.
- Review the process of determination of the compensation of the Chief Executive, Executive Directors and Key Management Personnel.
- Review and approve guidelines, policies and parameters for the compensation structures for Senior Management of the Company.
- Review information related to Executive Directors' and Senior Management pay from time to time to ensure same is on par with the market/industry rates.

Remuneration Committee Report

- Approve the guidelines and parameters for annual salary increments and bonuses.
- Assist the Board of Directors to comply with the obligations under Section 216 of the Companies Act No. 7 of 2007 read together with the Articles of Association of the Company when approving remuneration of Directors including the basis under which the remuneration may be considered fair to the Company.

REMUNERATION POLICY

The Company's Remuneration Policy is designed to attract, motivate, and retain a highly qualified and experienced executive team, while rewarding performance in alignment with industry benchmarks and market practices.

The remuneration schemes provide compensation appropriate for each business within the Company and commensurate with each employee's level of expertise and contributions, bearing in mind the business' performance and shareholder returns. The Policy also ensures that Executive Directors and Key Management Personnel are appropriately incentivised and motivated to perform in the best interest of the Company in the long term.

The remuneration packages which are linked to individual performances are aligned with the Companies short term and long-term strategy.

Non-Executive Directors receive a fee for serving on the Board and serving on Sub-Committees. They do not receive any performance related incentive payments. The Policy ensures that Non-Executive Directors' fee is based on principles of non-discriminatory pay practices among them so that their independence is not impaired.

ACTIVITIES IN 2025/26

During the year the Committee reviewed the performance of the Chairman & Chief Executive, Executive Directors and Key Management Personnel based on the targets set in the previous year. The Committee also reviewed the Chief Executive's, Executives Directors, and Senior Management's compensation packages. The Committee also recommended increments and market-based adjustments to total compensation packages to ensure alignment with median market benchmarks. According to performance measurements, bonus payments were also reviewed and recommended. Revised Terms of Reference of the Committee were also reviewed and forwarded for Board approval.

During the year, the remuneration of Non-Executive Directors was reviewed and revised where appropriate, while a comprehensive salary benchmarking exercise was undertaken for members of the Group Management Committee (GMC)

The aggregate remuneration of the Executive and Non-Executive Directors for the financial year amounted to Rs. 5.48 bn.

Mr. A. J. Alles (Independent Director)	15.09.2025	3/3
Mr. M. Y. A. Perera (Senior Independent Director)	Resigned on 15.09.2025	1/1

Profiles of the members are indicated in pages 48 to 51.

Regular Attendees by Invitation

Mr. A. M. Pandithage - The Chairman & Chief Executive
Mr. T. M. Hewagama - Group Chief Financial Officer
Mr. S.C. Ganegoda - Executive Director
Ms. D.G. Talpahewa - Head of Group Legal & HR

Secretaries to the Committee

Hayleys Group Services (Private) Limited serves as the Secretary to the Committee.

The Board established the Related Party Transactions Review Committee (RPTRC) on 10th February 2015 in accordance with Section 9 of the Listing Rules of the Colombo Stock Exchange.

The RPTRC also complies with the Code of Best Practice on Related Party Transactions issued by CA Sri Lanka. The Committee comprises three Independent Non-Executive Directors and two Non-Executive Directors.

The Board appointed Mr. T.A.B. Speldewinde as the Chairman of the Related Party Transactions Review Committee on 15th September 2025 upon the recommendations of the Nominations and Governance Committee.

The Committee met four times on a quarterly basis, during the Financial Year 2025/26, to review the related party transactions. The minutes of the RPTRC meetings are tabled at Board meetings, thereby providing the Directors with access to the deliberations of the Committee.

The Committee assists the Board in reviewing all related party transactions carried out by the Company to ensure that the interests of shareholders as a whole are taken into account when entering into related party transactions, and also to ensure that Directors and Key Management Personnel do not secure any undue advantage due to their positions, thereby avoiding any conflicts of interest. The Committee also assists the Board in maintaining transparency in relation to related party transactions with required disclosures.

Related Party Transactions Review Committee Report

THE DUTIES OF THE COMMITTEE

- To review in advance all proposed related party transactions of the Group either prior to the transaction being entered into or, if the transaction is expressed to be conditional on such review, prior to the completion of the transaction.
- Seek any information the Committee requires from the Management, employees or external parties with regard to any transaction entered into with a related party.
- Obtain knowledge or expertise to assess all aspects of proposed related party transactions where necessary, including obtaining appropriate professional and expert advice from suitably qualified persons.
- To recommend where necessary, to the Board and obtain their approval prior to the execution of any related party transaction.
- To review all non recurrent related party transactions while recurrent related party transactions are entered into on an arm's length basis determined by market forces and as per pre-approved criteria determined by the Committee, and ensure that details of those are presented to the Committee every quarter.
- To monitor that all related party transactions of the entity are transacted on normal commercial terms and are not prejudicial to the interests of the entity and its minority shareholders.
- Meet with the Management, Internal Auditors/External Auditors as necessary to carry out the assigned duties.
- To review the transfer of resources, services or obligations between related parties regardless of whether a price is charged.
- To review the economic and commercial substance of both recurrent/ non-recurrent related party transactions
- To monitor and recommend the acquisition or disposal of substantial assets between related parties, including obtaining competent independent advice from independent professional experts with regard to the value of the substantial asset of the related party transaction.
- To ensure that there is an adequate and effective process in place to capture information which is relevant to its review function.
- To advise the Board in making immediate market disclosures on applicable related party transactions as per Rule 9.14.7, and in the Annual Report as per Rule 9.14.8 of the Listing Rules.

Policy and Terms of Reference

The Committee strengthened the Policy and Terms of Reference for the RPTRC with the approval of the Board. The Terms of Reference set forth the procedure to identify related parties and the process of reporting the transactions with related parties to the RPTRC on a quarterly basis. The Policy outlines the composition of the Committee, meeting procedures and the responsibilities of the Committee. It also specifies the approval processes and disclosure requirements, including market announcements and Annual Report disclosures. The Policy guides the Committee and makes them responsible for ensuring that no director or major shareholder takes advantage of their position to the detriment of the interest of minority shareholders.

COMMITTEE ACTIVITIES

During the year the RPTRC reviewed the related party transactions and their compliances of Hayleys PLC and its Group Companies (other than listed companies within the Group), and communicated the comments and observations to the Board of Directors and relevant companies.

In accordance with the RPT Policy, self-declarations were obtained from each Director for the purpose of identifying

parties related to them. The Committee in its review process recognized the adequacy of the content and quality of the information forwarded to its members by the Management.

The Committee on an annual basis, reviews and assesses ongoing relationships with the Related Parties to determine whether they are in compliance with the Committee's guidelines and that the Related Party Transaction remains appropriate.

DISCLOSURES

A detailed disclosure of all the related party transactions including recurrent and non-recurrent related party transactions which are required to be disclosed under Section 9.14.8 of the Listing Rules of the Colombo Stock Exchange has been made in Note 38 to the Financial Statements given in pages 470 to 474 to this report.

DECLARATION

In terms of Rule 9.14.8 (4) of the Listing Rules of the Colombo Stock Exchange, a declaration by the Board of Directors as an affirmative statement of compliance with Listing Rules pertaining to Related Party Transactions is given on page 336 of this Annual Report.

T. A. B. Speldewinde
Chairman - Related Party Transactions Review Committee

FINANCIAL
STATEMENTS

Bring this
Story to Life

A SPHERE OF RENEWAL

Seasonal cycles are driven by the Earth's axial tilt and its orbit around the sun, creating predictable variations in solar exposure throughout the year. These shifts influence temperature, daylight, and biological activity, guiding phases of renewal, growth, maturity, and dormancy. Each season plays a distinct role in maintaining ecological balance, ensuring that systems recover, adapt, and prepare for what follows. This continuous cycle builds resilience, allowing natural environments to evolve while remaining stable.

During the year, Hayleys PLC entered a phase of recalibration; reassessing performance, refining priorities, and strengthening our foundation for what lies ahead. We used this season to sharpen our direction and build momentum for future growth through a disciplined approach, while positioning ourselves for continued progress.

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS TO THE SHAREHOLDERS OF HAYLEYS PLC

Opinion

We have audited the financial statements of Hayleys PLC ("the Company") and the consolidated financial statements of the Company and its subsidiaries ("the Group"), which comprise the statement of financial position as at 31 March 2026, and the statement of profit or loss, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements of the Company and the Group give a true and fair view of the financial position of the Company and the Group as at 31 March 2026, and of their financial performance and

cash flows for the year then ended in accordance with Sri Lanka Accounting Standards.

Basis for opinion

We conducted our audit in accordance with Sri Lanka Auditing Standards (SLAuSs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants issued by CA Sri Lanka (Code of Ethics) and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of

the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Key audit matter	How our audit addressed the key audit matter
Revenue The Group's revenue for the year amounted to Rs. 585.02 bn and was derived from diverse industry segments as disclosed in Notes 3.22 and 6 to the financial statements. Revenue was a key audit matter due to; - the materiality of the revenue reported and the significance of the amounts generated from industry specific sales arrangements for products and services; and - the considerations to be made on terms attached to sales arrangements, particularly relating to the timing of transferring control over goods sold and services provided.	Our audit procedures included the following key procedures: - obtained an understanding of the nature of revenue contracts entered in to by the industry segments of the Group - assessed whether the accounting policy for revenue recognition for each industry segment has been appropriately applied. - tested the relevant key controls over revenue. Our procedures included testing the general IT control environment and the relevant key IT application controls relating to the most significant IT systems relevant to revenue.

Key audit matter	How our audit addressed the key audit matter
	- performed analytical procedures to understand and assess the reasonableness of the reported revenues. - tested revenue transactions to sales contracts and other supporting documents. Our procedures included testing: - revenue transactions at the year-end to determine whether transactions have been recorded in the proper period and to the proper accounts; In particular, we tested how terms of specific sales arrangements for products and services were considered within the revenue recognition process, and - journal entries recognized to revenue. We also assessed the adequacy of the related disclosures set out in Notes 3.22 and 6 to the financial statements.
Carrying value of inventories As of the reporting date, the carrying value of inventories of the Group amounted to Rs. 116.37 billion net of provision of Rs. 10.35 billion as disclosed in Note 21 to the financial statements. Carrying value of inventories was a key audit matter due to; - materiality of the reported inventory balance which represented 18% of the Group's total assets as of the reporting date; - the existence of diverse industry specific inventories; and - the use of significant management judgement over identifying inventories requiring write down to net realizable value (NRV) and in the determination of the provision, as disclosed in Notes 5.6 and 21 to the financial statements.	Our audit procedures to address this area of focus included the following: - obtained an understanding of inventories maintained by industry segments, together with key processes and controls relating to inventories; - observed physical inventory counts and reconciled the count results to the inventory listings compiled by management to support amounts reported - tested whether inventories were stated at the lower of cost and net realizable value, by comparing cost with subsequent selling prices; - assessed the reasonableness of judgements applied by management in the write down of inventories to NRV and estimation of the provision for inventories. Our procedures included testing the completeness and accuracy of inventory age reports used as a basis to estimate the provision. We also assessed the adequacy of disclosures made in relation to the measurement of inventories in Notes 5.6 and 21 to the financial statements.
Impairment allowance for current and non-current trade and other receivables in the Consumer & Retail segment of the Group The Group has recognised an allowance for expected credit losses of Rs. 8.69 billion for current and non-current trade and other receivables as disclosed in Note 22 in the financial statements. The allowance recorded in the Consumer and Retail segment of the Group amounts to Rs. 4.67 billion. The impairment allowance for current and non-current trade and other receivables in the Consumer & Retail segment of the Group was a key audit matter due to; the degree of judgements, significance of assumptions and level of estimation uncertainty associated with estimating future cash flows management expects to receive from such financial assets.	Our audit procedures included the following: - We evaluated the competence and independence of the firm of chartered accountants performing the component audit of the Consumer and Retail segment. - With the involvement of component auditors where relevant, we - assessed the appropriateness of the selection of accounting policies based on the requirements of the SLFRS 09, business understanding and industry practice - evaluated the appropriateness of the management approach over the application and use of practical expedients applied for SLFRS 9 - assessed management's processes, systems and controls implemented over impairment assessment, including the completeness, accuracy and relevance of data used - assessed the logics and compilation of the overdue information of loans and advances, finance lease receivables and hire purchases,

Independent Auditors' Report

Key audit matter	How our audit addressed the key audit matter
the materiality of the reported amount of allowances for expected credit losses. Such assumptions, judgements and estimates include incorporation of forward-looking information such that expected cashflows reflect current and anticipated future external factors.	- evaluated the appropriateness of the assumptions used based on knowledge and information of the client and the industry and assessed whether the macro-economic factors have been used with the latest available information to assess that the latest economic forecasts have been used, and - tested the mathematical accuracy of models applied and post- model adjustments. We have also assessed the adequacy of the disclosures made in Note 3.9 and Note 22 in the financial statements.
Discontinued operations and assets held for sale As disclosed in note 37, the group was committed to transfer the head lease and the operating assets which comprises the transfer of property, plant and equipment, leasehold rights, intangible assets, and inventories relating to its hotel operations in the Maldives. This was considered as a key audit matter due to; - The significant management judgements and estimates that were involved in assessing the classification of assets and liabilities as held for sale, determining the necessary adjustments to the carrying amounts, the presentation as a discontinued operation, and the adequacy of related disclosures. - The judgements and estimates made by the management to determine the impact of the above transaction to the parent company Hayleys PLC and group are as disclosed in Notes 3.11, 8, 18, 37, 38.3.2.1 and 42 to the Financial Statements.	Our audit procedures included the following key procedures: - We read the related contracts and other supporting documentation to understand the key terms and conditions of the transaction including its nature, timing, and any significant contingencies. We evaluated whether a binding commitment existed as at the reporting date. - We evaluated the reasonableness of management's judgements and estimates in determining adjustments to the carrying amounts of the assets and liabilities, including the recognition of impairment. This included testing the key computations and underlying data. - We assessed the reasonableness of the recorded amount of impairment of the Company's investment, transfer and write-off of related balances of the respective subsidiary companies by agreeing amounts to supporting documentation and evaluating the basis for transfer and write-off. - We assessed the appropriateness of management's classification of the respective subsidiary's assets and liabilities as held for sale, and the presentation of its results as a discontinued operation. Further, we evaluated the adequacy of the related disclosures in Note 3.11, 8, 37, 18, 38.3.2.1 and 42 to the financial statements.

Other Information included in the 2026 Annual Report

Other information consists of the information included in the Annual Report, other than the financial statements and our auditor's report thereon. Management is responsible for the other information.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our

knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the management and those charged with governance for the financial statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with Sri Lanka Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial

statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's and the Group's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SLAuSs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SLAuSs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal controls of the Company and the Group.
- Evaluate the appropriateness of accounting policies used and the

reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for the purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings,

including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

As required by section 163 (2) of the Companies Act No. 07 of 2007, we have obtained all the information and explanations that were required for the audit and as far as appears from our examination, proper accounting records have been kept by the Company.

CA Sri Lanka membership number of the engagement partner responsible for signing this independent auditor's report is 3755.

Notes to the Financial Statements

1. CORPORATE INFORMATION

1.1 Reporting Entity

Hayleys PLC is a Company incorporated and domiciled in Sri Lanka. The ordinary shares of the Company are listed on the Colombo Stock Exchange of Sri Lanka. Corporate information, the address of the Company's registered office and the principal place of business are given on page 540 in this Annual Report.

1.2 Consolidated Financial Statements

The Financial Statements for the year ended 31 March 2026 comprise "the Company" referring to Hayleys PLC as the holding Company and the "Group" referring to companies that have been consolidated therein together with the group's Interests in Equity Accounted Investees.

1.3 Nature of Operations and Principal Activities of the Company and the Group

Descriptions of the nature of operations and principal activities of the Company, its subsidiaries and equity accounted investees are given on pages 511 to 522 to the Financial Statements.

Hayleys PLC does not have an identifiable parent of its own. Hayleys PLC is the ultimate parent of the Group.

1.4 Approval of Financial Statements

The Consolidated Financial Statements of Hayleys PLC and its subsidiaries (collectively, the Group) for the year ended 31 March 2026 were authorised for issue by the Directors on 29 May 2026.

1.5 Responsibility for Financial Statements

The responsibility of the Directors in relation to the Financial Statements is set out in the Statement of Directors' Responsibility Report in the Annual Report.

2. BASIS OF PREPARATION

2.1. Statement of Compliance

The Consolidated Financial Statements of the Group have been prepared and presented in accordance with Sri Lanka Accounting Standards (SLFRS/LKAS) issued by the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka), in compliance with the Sri Lanka Accounting and Auditing Standards Act No. 15 of 1995. The Consolidated Financial Statements also comply with the provisions of the Companies Act No. 07 of 2007.

2.2 Basis of Measurement

The Consolidated Financial Statements have been prepared on the historical cost basis, except for:

- Lands which are recognised as property plant and equipment which are measured at cost on initial recognition and subsequently carried at fair value.
- Land and buildings which are recognised as investment property which are measured at cost on initial recognition and subsequently carried at fair value.
- Financial instruments reflected as fair value through profit or loss which are measured at fair value.
- Financial instruments designated as fair value through other comprehensive income (OCI) which are measured at fair value.
- Consumable biological assets and agricultural produce from bearer biological assets which are measured at fair value, less costs to sell.

Where appropriate, the specific policies are explained in the succeeding notes.

No adjustments have been made for inflationary factors in the Consolidated Financial Statements.

2.3 Functional and Presentation Currency

The Financial Statements are presented in Sri Lankan Rupees (Rs), which is also the Company's functional currency.

Subsidiaries whose functional currencies are different as they operate in different economic environments are reflected in Note 34 to the Financial Statements.

2.4 Materiality and Aggregation

Each material class of similar items is presented separately in the Consolidated Financial Statements. Items of a dissimilar nature or function are presented separately unless they are immaterial.

2.5 Comparative information

Comparative information including quantitative, narrative and descriptive information as relevant is disclosed in respect of previous period in the Financial Statements.

In addition, the Group presents an additional statement of financial position at the beginning of the preceding period when there is a retrospective application of an accounting policy, a retrospective restatement, or a reclassification of items in Financial Statements.

2.6 Rounding

All financial information presented in Sri Lankan Rupees has been rounded to the nearest thousand (Rs'000), except when otherwise indicated.

2.7 Offsetting

Assets and liabilities or income and expenses, are not offset unless required or permitted by Sri Lanka Accounting Standards.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1. Basis of Consolidation

The Consolidated Financial Statements encompass the Company, its subsidiaries (together referred to as the "Group") and the Group's interest in equity accounted investees (Associates and Joint Ventures).

Subsidiaries and equity accounted investees are disclosed in Note 18 to the Financial Statements.

Notes to the Financial Statements

3.1.1 Subsidiaries

Subsidiaries are those entities controlled by the Group. Control is achieved when the Group is exposed, or rights to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee).
- Exposure, or rights, to variable returns from its involvement with the investee.
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has the power over an investee, including:

- The contractual arrangement(s) with the other vote holders of the investee.
- Rights arising from other contractual arrangements.
- The Group's voting rights and potential voting right.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the Consolidated Financial Statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or Loss and each component of Other Comprehensive Income are attributed to equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the Financial Statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, non-controlling interest and other components of equity while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

3.1.2 Consolidation of subsidiaries with different accounting periods

The Financial Statements of all subsidiaries in the Group other than those mentioned in Note 36 to the Financial Statements are prepared for a common financial year, which ends on 31 March.

Most subsidiaries with 31 December financial year ends prepare for consolidation purposes, additional financial information as of the same date as the Financial Statements of the parent.

For subsidiaries which are unable to prepare additional financial information the parent uses the most recent Financial Statements of the subsidiaries and is adjusted for the effects of significant transactions or events that occur between the date of those Financial Statements and the date of the

Consolidated Financial Statements.

The difference between the date of the subsidiary's Financial Statements and that of the Consolidated Financial Statements will not be more than three months.

The Financial Statements of the associate or joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate or joint venture. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate or joint venture is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value, and then recognises the loss within 'Share of profit or loss of equity accounted investees' in the Statement of Profit or Loss.

Upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in the Statement of Profit or Loss.

3.1.3 Investment in Associate

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The Group's investment in its associate and joint venture are accounted for using the equity method.

The aggregate of the Group's share of profit or loss of an associate is shown on the face of the statement of profit or loss outside operating profit and represents profit or loss after tax and non-controlling interests in the subsidiaries of the associate.

Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is not tested for impairment separately. Thus, reversals of impairments may effectively include reversal of goodwill impairments. Impairments and reversals are presented within 'Share of profit of an associate and a joint venture' in the statement of profit or loss.

The statement of profit or loss reflects the Group's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference

between the recoverable amount of the associate and its carrying value, and then recognises the loss within 'Share of profit of an associate in the statement of profit or loss.

Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

3.2 Business Combination and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative expenses.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organised workforce with the necessary skills, knowledge, or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as equity is not re-measured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of SLFRS 9 Financial Instruments, is measured at fair value with the changes in fair value recognised in the Statement of Profit or Loss in accordance with SLFRS 9. Other contingent consideration that is not within the scope of SLFRS 9 is measured at fair value at each reporting date with changes in fair value recognised in the Statement of Profit or Loss.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests) and any previous interest held over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the re-assessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in the Statement of Profit or Loss.

Notes to the Financial Statements

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a cash generating unit (CGU) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed of in this circumstance is measured based on the relative values of the disposed operation and the portion of the cash generating unit retained.

3.3 Foreign Currency

3.3.1 Transactions and balances

Transactions in foreign currencies are initially recorded by the Group's entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rate of exchange at the reporting date. Differences arising on settlement or translation of monetary items are recognised in Statement of Profit or Loss. Tax charges and credit attributable to exchange differences on those monetary items are also recognised in Other Comprehensive Income.

Non-monetary assets and liabilities which are measured in terms of historical cost in a foreign currency are translated using exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign

currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of gain or loss on the change in fair value of the item (i.e., translation differences on items of which fair value gain or loss is recognised in OCI or Profit or Loss are also recognised in OCI or Profit or Loss, respectively).

In determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which the Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of advance consideration.

3.3.2 Foreign operations

On consolidation, the assets and liabilities of foreign operations are translated into Sri Lanka Rupees at the rate of exchange prevailing at the reporting date and their Statements of Profit or Loss are translated at exchange rates prevailing at the dates of the transactions. The exchange differences arising on translation for consolidation are recognised in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is reclassified to profit or loss.

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operation and translated at the spot rate of exchange at the reporting date.

3.3.3 Current versus non-current classification

The Group presents assets and liabilities in the Statement of Financial Position based on current/ non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in a normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in a normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

3.4 Fair Value Measurement

The Group measures financial instruments such as investments which are designated as fair value through Other Comprehensive Income (OCI), financial assets at fair value through Profit or Loss and derivatives; non-

financial assets such as owner-occupied land and investment properties, at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the Financial Statements at fair value on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed are summarised in the following notes:

- Disclosures for valuation methods, significant estimates and assumptions - Note 19.
- Quantitative disclosures of fair value measurement hierarchy - Note 19.
- Property (land) under revaluation model - Note 13.
- Investment properties - Note 15.
- Financial instruments (including those carried at amortised cost) - Note 19.
- Biological assets (Consumable and agricultural produce) - Note 16.

3.5 Property, Plant & Equipment

The group applies the requirements of LKAS 16 on 'Property Plant and Equipment' in accounting for its owned assets which are held for and use in the provision of the services or for administration purpose and are expected to be used for more than one year.

3.5.1 Basis of recognition

Property, plant and equipment is recognised if it is probable that future economic benefit associated with the assets will flow to the Group and cost of the asset can be reliably measured.

3.5.2 Basis of measurement

Items of property, plant & equipment including construction in progress are measured at cost net of accumulated depreciation and accumulated impairment losses, if any, except for land which is measured at fair value.

3.5.3 Owned assets

The cost of property, plant & equipment includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the asset to a working condition for its intended use, and includes the costs of dismantling and removing the items and restoring the site on which they are located, and borrowing costs on qualifying assets. Purchased software that is integral to the functionality of the related equipment is capitalised as a part of that equipment.

When significant parts of plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives.

Revaluation of land is done with sufficient frequency to ensure that the fair value of the land does not differ materially from its carrying amount, and is undertaken by professionally qualified valuers.

Notes to the Financial Statements

Any revaluation surplus is recorded in Other Comprehensive Income and credited to the asset revaluation reserve in equity. However, to the extent that it reverses a revaluation deficit of the same asset previously recognised in the Statement of Profit or Loss, the increase is recognised in the Statement of Profit or Loss. A revaluation deficit is recognised in the Statement of Profit or Loss, except to the extent that it offsets an existing surplus on the same asset recognised in the asset revaluation reserve. Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

3.5.4 Subsequent costs

The cost of replacing a component of an item of property, plant & equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The carrying amount of the replaced part is derecognised in accordance with the derecognition policy given below.

The costs of the repair and maintenance of property, plant & equipment are recognised in the Statement of Profit or Loss as incurred.

3.5.5 Permanent land development costs

Permanent land development costs which relate to the Group's Plantation Sector are those costs incurred in major infrastructure development and building new access roads on leased lands. The costs have been capitalised and amortised over the shorter of useful lives or remaining lease periods.

Permanent impairment to land development costs are charged to the Statement of Profit or Loss in full or reduced to the net carrying amounts of such assets in the year of occurrence after ascertaining the loss.

3.5.6 Derecognition

The carrying amount of an item of property, plant & equipment is derecognised on disposal; or when no future economic benefits are expected from its use. Any gains and losses on derecognition are recognised (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) in the Statement of Profit or Loss. Gains are not classified as revenue.

3.5.7 Depreciation

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets, as follows:

Description	Period
Buildings	20 – 50 years
Software	03 – 05 years
Plant & machinery	05 – 20 years
Stores equipment	05 – 10 years
Motor vehicles	04 – 10 years
Furniture, fittings & office equipment	02 – 13 years
Vessels	05 – 25 years
Bearer biological assets	20 – 25 years

Depreciation of an asset begins when it is available for use and ceases at the earlier of the dates on which the asset is classified as held for sale or is derecognised. The asset's residual values, useful lives are reviewed, and adjusted if appropriate, at each financial year end and adjusted prospectively, if appropriate.

3.5.8 Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

3.5.8.1 Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases

and leases of low value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

3.5.8.1.1 Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

Description	Period
Land	02-50 years
Buildings	02-16 years
Machinery & store	
Equipment	20 years
Motor vehicles	02-05 years
Furniture, fittings & office equipment	
Vessels	01-02 years
Mature/Immature plantation	20-33 years

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment as described in Note 3.13 Impairment of non-financial assets.

3.5.8.1.2 Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

The Group's lease liabilities are included in Interest-bearing loans and borrowings in Note 28 to the Financial Statements.

3.5.8.1.4 Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases. It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

3.5.8.2 Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the Statement of Profit or Loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

3.6 Investment Property

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, the investment properties are stated at fair values, which reflect market conditions at the reporting date.

Gains or losses arising from changes in fair values of investment properties are included in the Statement of Profit or Loss in the year in which they arise, including the corresponding tax effect. Fair values are evaluated annually by an accredited external, independent valuer.

Investment properties are derecognised either when they have been disposed of, or when they are permanently withdrawn from use and no future economic benefits are expected from their disposal. The difference between the net disposal proceeds and the carrying

amounts of the asset is recognised in Statement of Profit or Loss in the period of derecognition.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to owner occupied property the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

3.7 Intangible Assets

3.7.1 Basis of recognition

An Intangible asset is recognised if it is probable that future economic benefits associated with the assets will flow to the Group and cost of the asset can be reliably measured.

3.7.2 Basis of measurement

Intangible assets acquired separately are measured on initial recognition at cost. The costs of intangible assets acquired in a business combination is their fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in the Statement of Profit or Loss in the year in which the expenditure is incurred.

3.7.3 Useful economic lives and amortisation

The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

Notes to the Financial Statements

The amortisation period and the amortisation method for an intangible asset with finite useful lives are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Profit or Loss in the expense category that is consistent with the function of the intangible assets.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

3.7.4 Derecognition of intangible assets

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit or Loss.

3.7.5 Research and development

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Group can demonstrate:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale.
- Its intention to complete and its ability and intention to use or sell the asset.

- How the asset will generate future economic benefits.
- The availability of resources to complete the asset.
- The ability to measure reliably the expenditure during development.

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation is recorded in cost of sales. During the period of development, the asset is tested for impairment annually.

3.7.6 Brand name

Brands acquired as part of a business combination, are capitalised if the Brand meets the definition of an intangible asset and the recognition criteria are satisfied. Brand Names, being determined to have an indefinite useful life, are reviewed for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired.

3.7.7 Customer list

The present value of the income anticipated from repeat customer lists of travel agents as at the acquisition date is recognised as an intangible asset based on a valuation carried out by an independent valuer. Subsequent to initial recognition, the intangible asset is carried at cost less accumulated amortisation and accumulated impairment losses. Customer lists recognised at the acquisition date are amortised over the period over which income is anticipated to derive from repeat customers and reviewed annually for any impairment in value if there are indicators of impairment.

3.7.8 Trade mark

Trade marks purchased, being determined to have an indefinite useful life, are reviewed for impairment, annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired.

3.7.9 Other intangible assets

Other intangible assets which are acquired by the Group, with finite useful lives, are measured on initial recognition at cost. Following initial recognition ERP systems are carried at cost less accumulated amortisation and accumulated impairment losses.

3.7.10 Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in Profit or Loss as incurred.

3.7.11 Amortisation

Amortisation of intangible assets with a finite life is recognised in Profit or Loss on a straight-line basis over the estimated useful lives of intangible assets, from the date on which they are available for use. The estimated useful lives are as follows:

Description	Period
Right to generate hydro power	15- 20 years
Right to generate solar power	20 years
Customer List	5 years
ERP Systems	5-10 years

3.8 Biological Assets

Biological assets are classified as either mature biological assets or immature biological assets. Mature biological assets are those that have attained harvestable specifications or are able to sustain regular harvests. Immature

biological assets are those that have not yet attained harvestable specifications. Tea, rubber, other plantations and nurseries are classified as biological assets.

Biological assets are further classified as bearer biological assets and consumable biological assets. Bearer biological assets include tea and rubber trees, being biological assets that are not intended to be sold or harvested, but are used to grow for purpose of harvesting agricultural produce from such biological assets. Consumable biological assets include managed timber trees those that are to be harvested as agricultural produce or sold as biological assets.

3.8.1 Bearer biological assets

Bearer biological assets are measured at cost less accumulated depreciation and accumulated impairment losses, if any, in terms of LKAS 16 – Property Plant & Equipment.

The cost of land preparation, rehabilitation, new planting, replanting, crop diversification, inter planting and fertilising, etc., incurred between the time of planting and harvesting (when the planted area attains maturity), are classified as immature plantations. These immature plantations are shown at direct costs plus attributable overheads. The expenditure incurred on bearer biological assets (Tea, Rubber) which comes into bearing during the year, is transferred to mature plantations.

3.8.2 Infilling cost on bearer biological assets

The land development costs incurred in the form of infilling have been capitalised to the relevant mature field, only where the number of plants per hectare exceeded 3,000 plants and, also if it increases the expected future benefits from that field, beyond its pre-infilling performance assessment. Infilling costs so capitalised are depreciated over the newly assessed remaining useful economic life of the relevant mature plantation, or the unexpired lease period, whichever is lower.

Infilling costs that are not capitalised have been charged to the Statement of Profit or Loss in the year in which they are incurred.

3.8.3 Consumable biological asset

Consumable biological assets include managed timber trees those that are to be harvested as agricultural produce or sold as biological assets. Expenditure incurred on consumable biological assets (managed timber trees) is measured on initial recognition and at the end of each reporting period at its fair value less cost to sell in terms of LKAS 41. The cost is treated as approximation to fair value of young plants as the impact on biological transformation of such plants to price during this period is immaterial. The fair values of timber trees are measured using discounted cash flow (DCF) method taking in to consideration the current market prices of timber, applied to expected timber content of a tree at the maturity by an independent professional valuer. All other assumptions and sensitivity analysis are given in Note 16.

The main variables in DCF model concerns

Variable	Comment
Timber content	Estimate based on physical verification of girth, height and considering the growth of each species in different geographical regions. Factor all the prevailing statutory regulations enforced against harvesting of timber coupled with forestry plan of the Group.
Economic useful life	Estimated based on the normal life span of each species by factoring the forestry plan of the Group.
Selling price	Estimated based on prevailing Sri Lankan market price. Factor all the conditions to be fulfil in bringing the trees in to saleable condition.
Planting cost	Estimated costs for the further development of immature areas are deducted.

The gain or loss arising on initial recognition of consumable biological assets at fair value less cost to sell and from a change in fair value less cost to sell of consumable biological assets are included in Statement of Profit or Loss for the period in which it arises.

Permanent impairments to biological asset are charged to the Statement of Profit or Loss in full and reduced to the net carrying amounts of such asset in the year of occurrence after ascertaining the loss.

3.8.4 Nursery plants

Nursery cost includes the cost of direct materials, direct labour and an appropriate proportion of directly attributable overheads, less provision for overgrown plants.

3.9 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and financial liability or equity instrument of another entity.

Notes to the Financial Statements

3.9.1 Financial assets

3.9.1.1 Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under SLFRS 15.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order

to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

3.9.1.1.1 Business model assessment in the context of Financial Services within the Consumer & Retail Sector

In relation to entities in the Group engaged in financial services, the Group makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated - e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and

- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Group's continuing recognition of the assets. Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

3.9.1.1.2 Assessment whether contractual cash flows is solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Group considers:

- Contingent events that would change the amount or timing of cash flows;
- Terms that may adjust the contractual coupon rate, including variable-rate features;
- Prepayment and extension features; and
- Terms that limit the Group's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

3.9.1.2 Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories;

- Financial assets at amortised cost (debt instruments).
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments).
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments).
- Financial assets at fair value through profit or loss

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The Group's financial assets at amortised cost includes trade receivables, short term deposits and cash and cash equivalents.

Financial assets at fair value through OCI (debt instruments)

For debt instruments at fair value through OCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in the Statement of Profit or Loss and computed in the same manner as for financial assets measured at amortised cost. The remaining fair value changes are recognised in OCI. Upon derecognition, the cumulative fair value change recognised in OCI is recycled to Profit or Loss.

The Group's debt instruments at fair value through OCI includes investments in quoted debt instruments included under other non-current financial assets.

Financial assets designated at fair value through OCI (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under LKAS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument- by-instrument basis.

Gains and losses on these financial assets are never recycled to Profit or Loss. Dividends are recognised as other income in the Statement of Profit or Loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

This category includes listed and non-listed equity instruments under this category.

Financial assets at fair value through profit or loss

Financial assets at fair value through Profit or Loss are carried in the

Statement of Financial Position at fair value with net changes in fair value recognised in the Statement of Profit or Loss.

This category includes derivative instruments and listed equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are recognised as other income in the Statement of Profit or Loss when the right of payment has been established.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through Profit or Loss. Embedded derivatives are measured at fair value with changes in fair value recognised in Profit or Loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through Profit or Loss category.

3.9.1.3 Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e: removed from the Group's Consolidated Financial Position) when:

The rights to receive cash flows from the asset have expired, or

The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and

Notes to the Financial Statements

either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

3.9.1.4 Impairment of financial assets

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures which are determined to have low credit risk at the reporting date and for which there has not been

a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

3.9.1.4.1 Impairment model for segments other than the Consumer & Retail sector

The Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

3.9.1.4.2 Impairment model for the Consumer & Retail sector (Excluding financial services)

The group measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- Debt securities that are determined to have low credit risk at the reporting date; and
- Other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowance for trade receivables is always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable

information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the group's historical experience and informed credit assessment and including forward-looking information.

The Group considers a financial asset to be in default when:

- The borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Credit-impaired financial assets

At each reporting date, the group assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the borrower or issuer;
- A breach of contract such as a default in payments;
- The restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise;

- It is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- The disappearance of an active market or a security because of financial difficulties.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-offs

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Group has a policy of writing off the gross carrying amount based on historical experience of recoveries of similar assets. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures to recovery of amounts due.

3.9.1.4.3 Impairment model for the Financial Services within the Consumer & Retail sector;

The Company recognises loss allowances for ECL on the following financial instruments that are not measured at FVTPL:

- Financial assets that are debt instruments;
- Lease & loan receivables;
- Financial guarantee contracts issued; and
- Loan commitments issued.

No impairment loss is recognised on equity investments.

The Group measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- Debt investment securities that are determined to have low credit risk at the reporting date; and
- Other financial instruments (other than lease receivables) on which credit risk has not increased significantly since their initial recognition.

Loss allowances for lease receivables are always measured at an amount equal to lifetime ECL.

The Group considers a debt investment security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. The Group does not apply the low credit risk exemption to any other financial instruments. Financial instruments for which a 12-month ECL is recognised are referred to as 'Stage 1 financial instruments'.

Life-time ECL is the ECL that result from all possible default events over the expected life of the financial instrument. Financial instruments for which a lifetime ECL is recognised but which are not credit-impaired are referred to as 'Stage 2 financial instruments'.

Measurement of ECL

ECL are a probability-weighted estimate of credit losses. They are measured as follows:

- Financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive);
- Financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;

- Undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Group if the commitment is drawn down and the cash flows that the Group expects to receive; and
- Financial guarantee contracts: the expected payments to reimburse the holder less any amounts that the Group expects to recover.

The key inputs used for measurement of ECL are likely to be the term structures of the following variables:

Probability of Default (PD)

PD estimates are estimates at a certain date, which are calculated based on statistical models, and assessed using various categories based on homogeneous characteristics of exposures. These statistical models are based on internally compiled data comprising both quantitative and qualitative factors. The Group forecast PD by incorporating forward looking economic variables (unemployment, GDP growth, inflation, interest rate and using lag effect of these variables).

Loss Given Default (LGD)

LGD is the magnitude of the likely loss if there is a default. The Group estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties.

Exposure at default (EAD)

EAD represents the expected exposure in the event of a default. The Group derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract including amortisation. The EAD of a financial asset is its gross carrying amount.

The Group has used these parameters from internally-developed statistical models using historical data. All inputs were adjusted to reflect forward-looking information and future economic scenarios.

Notes to the Financial Statements

Impairment losses and releases are accounted for and disclosed separately from modification losses or gains that are accounted for as main adjustment of the financial asset's gross carrying value.

The mechanics of the ECL method are summarised below:

- **Stage 1 :** The 12 month ECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Group calculates the 12-month ECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR.
- **Stage 2 :** When a loan has shown a significant increase in credit risk since origination, the Group records an allowance for the LTECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- **Stage 3 :** For loans considered credit-impaired the Group recognises the lifetime expected credit losses. The method is similar to that of Stage 2 assets, with the PD set at 100%.

Restructured financial assets

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognised and ECL are measured as follows.

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows

arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset.

- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt financial assets carried at FVOCI, and finance lease receivables are credit-impaired (referred to as 'Stage 3 financial assets'). A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the borrower or issuer;
- A breach of contract such as a default or past due event;
- The restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- It is becoming probable that the borrower will enter bankruptcy or another financial reorganisation; or
- The disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash

flows has reduced significantly and there are no other indicators of impairment. In addition, a retail loan that is overdue for 180 days or more is considered credit-impaired even when the regulatory definition of default is different.

In making an assessment of whether an investment in sovereign debt is credit-impaired, the Company considers the following factors.

- The market's assessment of creditworthiness as reflected in the bond yields.
- The rating agencies' assessments of creditworthiness.
- The country's ability to access the capital markets for new debt issuance.
- The probability of debt being restructured, resulting in holders suffering losses through voluntary or mandatory debt forgiveness.
- The international support mechanisms in place to provide the necessary support as 'lender of last resort' to that country, as well as the intention, reflected in public statements, of governments and agencies to use those mechanisms. This includes an assessment of the depth of those mechanisms and, irrespective of the political intent, whether there is the capacity to fulfil the required criteria.

Presentation of allowance for ECL in the Statement of Financial Position.

Loss allowances for ECL are presented in the Statement of Financial Position as follows:

- Financial assets measured at amortised cost as a deduction from the gross carrying amount of the assets;
- Loan commitments and financial guarantee contracts: generally, as a provision;
- Where a financial instrument includes both a drawn and an undrawn component, and the Group cannot identify the ECL on the loan

commitment component separately from those on the drawn component: the Group presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn components presented as a provision; and

- Debt instruments measured at FVOCI - no loss allowance is recognised in the Statement of Financial Position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognised in the fair value reserve.

Write-off

Loans and debt securities are written off (either partially or in full) when there is no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual asset level. Recoveries of amounts previously written off are included in 'impairment losses on financial instruments' in the Statement of Profit or Loss and OCI.

Financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

3.9.2 Financial liabilities

3.9.2.1 Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, bank overdrafts, loans and borrowings, financial guarantee contracts, amounts due to equity accounted investees and derivative financial instruments.

3.9.2.2 Subsequent measurement

The measurement of financial liabilities depends on their classification as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the Statement of Profit or Loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss so designated at the initial date of recognition, and only if criteria of SLFRS 9 are satisfied. The Group has not designated any financial liability at fair value through profit or loss.

Financial liabilities at amortised cost

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using

the EIR method. Gains and losses are recognised in the Statement of Profit or Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance costs in the Statement of Profit or Loss.

Financial guarantee contracts

Financial guarantee contracts issued by the Group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the best estimate of the expenditure required to settle the present obligation at the reporting date and the amount recognised less cumulative amortisation.

3.9.2.3 Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit or Loss.

3.9.3 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if,

Notes to the Financial Statements

- There is a currently enforceable legal right to offset the recognised amounts and
- There is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

3.9.4 Derivative financial instruments and hedge accounting

3.9.4.1 Initial recognition and subsequent measurement

The Group uses derivative financial instruments, such as forward currency contracts to hedge its foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

For the purpose of hedge accounting, hedges are classified as cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment.

At the inception of a hedge relationship, the documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined).

A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.

- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.

- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group actually hedges and the quantity of the hedging instrument that the Group actually uses to hedge that quantity of hedged item.

Hedges that meet all the qualifying criteria for hedge accounting are accounted for, as described below:

Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the Statement of Profit or Loss. The cash flow hedge reserve is adjusted to the lower of the cumulative gain or loss on the hedging instrument and the cumulative change in fair value of the hedged item.

The Group uses forward currency contracts as hedges of its exposure to foreign currency risk in forecast transactions and firm commitments. The ineffective portion relating to foreign currency contracts is recognised as other expense.

The Group designates only the spot element of forward contracts as a hedging instrument. The forward element is recognised in OCI and accumulated in a separate component of equity under cost of hedging reserve.

The amounts accumulated in OCI are accounted for, depending on the nature of the underlying hedged transaction. If the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is removed from the separate component of equity and included in the initial cost or other carrying amount of the hedged asset or liability. This is not

a reclassification adjustment and will not be recognised in OCI for the period. This also applies where the hedged forecast transaction of a non-financial asset or non-financial liability subsequently becomes a firm commitment for which fair value hedge accounting is applied.

For any other cash flow hedges, the amount accumulated in OCI is reclassified to Profit or Loss as a reclassification adjustment in the same period or periods during which the hedged cash flows affect profit or loss.

If cash flow hedge accounting is discontinued, the amount that has been accumulated in OCI must remain in accumulated OCI if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to profit or loss as a reclassification adjustment. After discontinuation, once the hedged cash flow occurs, any amount remaining in accumulated OCI must be accounted for depending on the nature of the underlying transaction as described above.

3.10 Fair Value of Financial Instruments

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs.

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include:

- Using recent arm's length market transactions
- Reference to the current fair value of another instrument that is substantially the same

A discounted cash flow analysis or other valuation models.

An analysis of fair values of financial instruments and further details as to how they are measured are provided in Note 19 to the Financial Statements.

3.11 Non-Current Assets held for Sale and Discontinued Operations

The Group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

The criteria for held for sale classification is regarded as met only when the sale is highly probable and the asset or disposal group is available for immediate sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the plan to sell the asset and the sale is expected to be completed within one year from the date of the classification.

Property, plant and equipment and intangible assets are not depreciated or amortised once classified as held for sale.

Assets and liabilities classified as held for sale are presented separately as current items in the Statement of Financial Position.

A disposal group qualifies as discontinued operation if it is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- Represents a separate major line of business or geographical area of operations;

- Is part of a single coordinated plan;
- to dispose of a separate major line of business or geographical area of operations; Or
- Is a subsidiary acquired exclusively with a view to resale

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the Statement of Profit or Loss.

Additional disclosures are provided in Note 37. All other notes to the Financial Statements include amounts for continuing operations, unless indicated otherwise.

3.12 Inventories

Inventories are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition are accounted for as follows:

All inventory items, except manufactured inventories and work-in-progress are measured at weighted average directly attributable cost.

Manufactured inventories and work-in-progress are measured at weighted average factory cost which includes all direct expenditure and appropriate share of production overhead based on normal operating capacity but excluding borrowing costs.

Net realisable value is the estimated selling price in the ordinary course of business less, the estimated cost of completion and the estimated costs necessary to make the sale.

3.12.1 Agricultural produce harvested from biological assets

Agricultural produce harvested from its biological assets are measured at their fair value less cost to sell at the point of

harvest. The finished and semi-finished inventories from agriculture produce are valued by adding the cost of conversion to the fair value of the agricultural produce.

3.13 Impairment of Non-Financial Assets

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on most recent detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. A long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Notes to the Financial Statements

Impairment losses of continuing operations are recognised in the Statement of Profit or Loss in expense categories consistent with the function of the impaired asset, except for properties previously revalued with the revaluation taken to Other Comprehensive Income. For such properties, the impairment is recognised in Other Comprehensive Income up to the amount of any previous revaluation.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit or Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Goodwill is tested for impairment annually as at 31 March and when circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31 March at the CGU level, as

appropriate, and when circumstances indicate that the carrying value may be impaired.

3.14 Cash and Cash Equivalents

Cash in hand and at bank and short-term deposits in the Statement of Financial Position comprise cash at banks and on hand and short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Consolidated Statement of Cash Flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts and short-term borrowings as they are considered an integral part of the Group's cash management.

3.15 Employee Benefits

3.15.1 Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to Provident and Trust Funds covering all employees are recognised as an employee benefit expense in profit or loss in the periods during which services are rendered by employees.

The Group contributes 12% and 3% of gross emoluments to employees as Provident Fund and Trust Fund contribution respectively.

3.15.2 Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The defined benefit is calculated by independent actuaries using Projected Unit Credit (PUC) method as recommended by LKAS 19 – "Employee benefits". The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates that are denominated in

the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related liability. The present value of the defined benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Key assumptions used in determining the defined retirement benefit obligations are given in Note 28. Any changes in these assumptions will impact the carrying amount of defined benefit obligations. Actuarial gains or losses are recognised in full in the Other Comprehensive Income.

Provision has been made for retirement gratuities from the beginning of service for all employees, in conformity with LKAS 19 on employee benefits. However, for entities of the Group operating in Sri Lanka, under the Payment of Gratuity Act No. 12 of 1983, the liability to an employee arises only on completion of 5 years of continued service.

The liability is not externally funded. The settlement of the liability is based on legal liability method or the following basis as applied by the respective entities.

Length of each service (Years) No. of month's salary for completed year of service.

Length of each service (Years)	No. of months salary for completed year of service
Up to 20	1/2
20 up to 25	3/4
25 up to 30	1
30 up to 35	1 1/4
Over 35	1 1/2

3.15.3 Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

3.16 Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the Statement of Profit or Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

3.17 Grants and Subsidies

Grants and subsidies are recognised where there is a reasonable assurance that the grant / subsidy will be received and all attaching conditions, if any, will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed.

Grants and subsidies related to assets, including non-monetary grants at fair value are deferred in the Statement Financial Position and credited to the Statement of Profit or Loss over the useful life of the asset.

3.18 Warranties

The Group provides warranties for general repairs of defects that existed at the time of sale, as required by law. Provisions related to these assurance-

type warranties are recognised when the product is sold or the service is provided to the customer. Initial recognition is based on historical experience. The initial estimate of warranty-related costs is revised annually.

3.19 Contingent Liabilities Recognised in a Business Combination

A contingent liability recognised in a business combination is initially measured at its fair value. Subsequently, it is measured at the higher of the amount that would be recognised in accordance with the requirements for provisions above or the amount initially recognised less (when appropriate) cumulative amortisation recognised in accordance with the requirements for revenue recognition.

3.20 Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

3.21 Regulatory Provisions

3.21.1 Deposit insurance scheme

In terms of the Finance Companies Direction No. 02 of 2010 – 'Insurance of Deposit Liabilities' issued on 27th September 2010 all Registered Finance Companies are required to insure their deposit liabilities in the Deposit Insurance Scheme operated by the Monetary Board in terms of Sri Lanka Deposit Insurance Scheme Regulations No. 01 of 2010 issued under Sections 32A to 32E of the Monetary Law Act with effect from 1st October 2010.

Deposits to be insured include demand, time and savings deposit liabilities and exclude the following:

- Deposit liabilities to member institutions.
- Deposit liabilities to Government of Sri Lanka.

- Deposit liabilities to Directors, Key Management Personnel and other related parties as defined in Finance Companies Act Direction No. 03 of 2008 on Corporate Governance of Registered Finance Companies.
- Deposit liabilities held as collateral against any accommodation granted.
- Deposit liabilities falling within the meaning of dormant deposits in terms of the Finance Companies Act, funds of which have been transferred to the Central Bank of Sri Lanka.
- Registered Finance Companies are required to pay a premium of 0.15% on eligible deposit liabilities as at end of the month to be payable within a period of 15 days from the end of the respective month.

3.21.2 Reserve fund

Singer Finance (Lanka) PLC, a subsidiary of the Group maintains a reserve fund in compliance with Direction No. 01 of 2003 – Central Bank (Capital Funds) issued to Finance Companies and it will be used for only the purpose specified in the said Direction above. The details of the reserve fund are disclosed in Note 23.1.2.

3.22 Revenue from Contracts with Customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

The Group has several operating segments which are described in Note 40 to these Financial Statements. In all operating segments, the Group has generally concluded that it is the principal in its revenue arrangements, except for agency services described in Note 3.22.2.3 below, because it typically controls the goods or services before transferring them to the customer.

Notes to the Financial Statements

3.22.1 Sale of goods

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the goods. The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated (e.g., warranties, customer loyalty points). In determining the transaction price for the sale of goods, the Group considers the effects of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer (if any).

3.22.1.1 Variable consideration

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

3.22.1.2 Significant financing component

The Group receives short-term advances from its customers. Using the practical expedient for short term advances in SLFRS 15, the Group does not adjust the promised amount of consideration for the effects of a significant financing component if it expects, at contract inception, that the period between the transfer of the promised good or service to the customer and when the customer pays for that good or service will be one year or less. Where long-term advances are received from customers, the transaction price for such contracts is discounted, using the rate that would be reflected in a separate financing transaction between the Group and its customers at contract inception, to take into consideration the significant financing component.

3.22.1.3 Warranty obligations

In several sectors, the Group provides warranties for general repairs of defects that existed at the time of sale. These assurance type warranties are accounted for under LKAS 37 Provisions, Contingent Liabilities and Contingent Assets. The Group also provides a warranty beyond fixing defects that existed at the time of sale in several sectors. These service-type warranties are sold either separately or bundled together with the sale of goods. Contracts for bundled sales of goods and a service-type warranty comprise two performance obligations because the promises to transfer the equipment and to provide the service type warranty are capable of being distinct. Using the relative stand-alone selling price method, a portion of the transaction price is allocated to the service type warranty and recognised as a contract liability. Revenue is recognised over the period in which the service-type warranty is provided based on the time elapsed.

3.22.1.4 Loyalty points programme

The Group has loyalty point programmes, in several sectors, which allows customers to accumulate points that can be redeemed against subsequent purchases. The loyalty points give rise to a separate performance obligation as they provide a material right to the customer. A portion of the transaction price is allocated to the loyalty points awarded to customers based on relative stand-alone selling price and recognised as a contract liability until the points are redeemed. Revenue is recognised upon redemption of products by the customer.

When estimating the stand-alone selling price of the loyalty points, the Group considers the likelihood that the customer will redeem the points. The Group updates its estimates of the points that will be redeemed on a quarterly basis and any adjustments to the contract liability balance are charged against revenue.

3.22.1.5 Non-cash considerations

Certain sectors of the Group have arrangements where customers are offered a scheme where new goods could be acquired through part exchange of old goods.

The Group estimates the fair value of the non-cash consideration by reference to its market price. If the fair value cannot be reasonably estimated, the non-cash consideration is measured indirectly by reference to the stand-alone selling price of the goods sold.

3.22.1.6 Consignment arrangements

Certain Sectors engage in business which includes the delivery of goods to another party but retain control of the goods. Examples of such arrangements may include the delivery of a good to a dealer or a distributor for sale to an end customer of the Group. Revenue on such arrangements are recognised at the point of sale to an end customer net of commission expenses incurred.

3.22.2 Rendering of services

Several entities within the Group engage in the provision of services to its customers. The Group recognises revenue from services over time, applying methods to measure progress towards complete satisfaction of the service, because the customer simultaneously receives and consumes the benefits provided by the Group.

3.22.2.1 Hospitality revenue

Accommodation revenue generated by the hospitality sector is recognised on the rooms occupied on a daily basis. Food and beverage revenue is recognised at the time of related sale.

3.22.2.2 Maintenance services

Certain sectors within the group provide customers with complementary servicing of consumer durable goods sold by the Group within a defined period. Such servicing arrangements are identified as separate performance obligations

and revenue is recognised when the complementary services are provided to the customer.

3.22.2.3 Agency services

When the Group acts in the capacity of an agent rather than as the principal in a transaction, the revenue recognised is the net amount that it retains for its agency services.

3.22.3 Construction and installation contracts

In relation to contracts which involve the construction and installation of assets on behalf of its customers, the Group assesses the nature of the respective contracts as to whether such is reflective of goods or services transferred at a point in time or satisfied over a period of time.

The Group determines that arrangements include transfers of a good or service over time when any of the following criteria are met:

- The customer simultaneously receives and consumes the benefits provided by the entity's performance as the entity performs.
- The entity's performance creates or enhances an asset (e.g., work in progress) that the customer controls as the asset is created or enhanced
- The entity's performance does not create an asset with an alternative use to the entity and the entity has an enforceable right to payment for performance completed to date.

When either of the above criteria is met, the Group recognises revenue on the respective contracts similar to the rendering of services. If an entity is unable to demonstrate that control transfers over time, the presumption is that control transfers at a point in time, and revenue is recognised similar to the sale of goods.

3.22.4 Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

3.22.5 Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made, or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

3.22.6 Assets and liabilities arising from rights of return

3.22.6.1 Right of return assets

A right-of-return asset is recognised for the right to recover the goods expected to be returned by customers. The asset is measured at the former carrying amount of the inventory, less any expected costs to recover the goods and any potential decreases in value. The Group updates the measurement of the asset for any revisions to the expected level of returns and any additional decreases in the value of the returned products.

3.22.6.2 Refund liabilities

A refund liability is recognised for the obligation to refund some or all of the consideration received (or receivable) from a customer. The Group's refund liabilities arise from customers' right of return. The liability is measured at the amount the Group ultimately expects it will have to return to the customer. The Group updates its estimates of refund liabilities (and the corresponding change in the transaction price) at the end of each reporting period.

3.22.6.3 Cost to obtain a contract

In several sectors, the Group pays sales commission to its employees and third party representative for sales carried out. The Group applies the optional practical expedient to immediately expense costs to obtain a contract if the amortisation period of the asset that would have been recognised is one year or less. As such, sales commissions are immediately recognised as an expense.

3.23 Income relating to Financial Services in Consumer and Retail Sector

3.23.1 Interest

Interest income and expense are recognised in Profit or Loss using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial assets or liability (or, where appropriate a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective interest rate, the Company estimates future cash flows considering all contractual terms of the financial instruments, but not future credit losses.

The calculation of effective interest rate includes all transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability. Interest income is presented in finance income in the Statement Profit or Loss.

3.23.2 Hire purchase, lease, loans and advances

The excess of aggregated contract receivables over the cost of the hired assets constitutes the total unearned income at the commencement of a contract. The unearned income is recognised as revenue as it is earned, using the effective interest rate method.

Notes to the Financial Statements

3.23.2.1 Service fee income on hire purchase

Service fee income is recognised over the length of hire purchase agreement using the effective interest rate method. In the event of early termination of the hire purchase contract or cash conversion remaining deferred, service income is recognised when such contract is recognised or converted.

3.23.3 Fees and commission

Fees and commission income and expense that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate. Other fees and commission income, including account servicing fees, are recognised as the related services are performed.

3.24 Other Income

3.24.1 Dividends

Dividend income is recognised in Profit or Loss on the date the entity's right to receive payment is established, which in the case of quoted securities is the ex-dividend date.

3.24.2 Grants

Grants are recognised initially as deferred income when there is a reasonable assurance that they will be received and that the Group will comply with the conditions associated with the grant. Grants that compensate the Group for expenses incurred are recognised in profit or loss on a systematic basis in the periods in which the expenses are recognised. Grants that compensate the Group for the cost of an asset are recognised in profit or loss on a systematic basis over the useful life of the asset.

3.24.3 Gains and losses

Gains and losses on disposal of an item of property, plant & equipment are determined by comparing the net sales proceeds with the carrying amounts of property, plant & equipment and are recognised net within "other income" in Profit or Loss.

3.24.5 Other income

Other income is recognised on an accrual basis.

3.25 Expenses

Expenses are recognised in the Profit or Loss on the basis of a direct association between the cost incurred and the earnings of specific items of income. All expenditure incurred in the running of the business has been charged to income in arriving at the profit for the year. For the purpose of presentation of the Statement of Profit or Loss, the function of expenses method is adopted.

Repairs and renewals are charged to Profit or Loss in the year in which the expenditure is incurred.

3.25.1 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

3.26 Finance income

Finance income comprises interest income on funds invested, dividend income, changes in the fair value of financial assets at fair value through profit or loss, and gains on hedging instruments that are recognised in the Statement of Profit or Loss. Interest income is recognised as it accrues in the Statement of Profit or Loss.

3.27 Finance Cost

Finance cost comprise interest expense on borrowings, unwinding of the discount on provisions, changes in the fair value of financial assets at fair value through profit or loss, and losses on hedging instruments that are recognised in the Statement of Profit or Loss.

3.28 Tax Expense

Tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in the Statement of Profit or Loss except to the extent that it relates to a business combinations, or items recognised directly in Equity or in Other Comprehensive Income.

3.28.1 Current tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income.

Current tax relating to items recognised directly in Other Comprehensive Income is recognised in Other Comprehensive Income and not in the Statement of Profit or Loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

3.28.2 Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries, equity accounted investee and interests in

joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries, equity accounted investee and interests in joint arrangements, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the Statement of Profit or Loss is recognised outside the Statement of Profit or Loss. Deferred tax items are recognised in correlation to the underlying transaction either in Other Comprehensive Income or directly in equity.

Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, would be recognised subsequently if new information about facts and circumstances changed.

The adjustment would either be treated as a reduction to goodwill (as long as it does not exceed goodwill) if it was incurred during the measurement period or in the Statement of Profit or Loss.

The Group offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

3.28.3 Value added tax on financial services

VAT on Financial Services is calculated in accordance with the amended VAT Act No. 07 of 2013. The base for the computation of Value Added Tax on Financial Services is the accounting

profit before income tax adjusted for the economic depreciation and emolument of employees computed on prescribed rate.

3.28.4 Crop insurance levy

As per the provisions of the Section 14 of the Finance Act No. 12 of 2013, the CIL was introduced with effect from 1st April 2013 and is payable to the National Insurance Trust Fund. Currently, the CIL is Payable at 1% of the profit after tax.

3.28.5 Sales tax

Expenses and assets are recognised net of the amount of sales tax, except:

- When the sales tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the sales tax is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable.
- When receivables and payables are stated with the amount of sales tax included.

The net amount of sales tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the Statement of Financial Position.

3.28.6 Social Security Contribution Levy (SSCL)

Social Security Contribution Levy (SSCL) shall be paid by any person carrying on the business of manufacturing, supply of services or whole/ retail sales, on the liable turnover specified in the Second Schedule of the Social Security Contribution Levy Act No. 25 of 2022, at the rate of 2.5%, with effect from 1st October 2022 and subsequent amendments thereto.

4. GENERAL

4.1 Events Occurring After the Reporting Date

All material post reporting date events have been considered and where appropriate adjustments or disclosures

Notes to the Financial Statements

have been made in the respective notes to the Financial Statements.

4.2 Earnings Per Share

The Group presents basic and diluted earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

4.3 Statement of Cash Flows

The Statement of Cash Flows has been prepared using the "indirect method".

Interest paid is classified as financing cash flow. Grants received, which are related to purchase and construction of property, plant & equipment are classified as investing cash flows. Dividend and interest income are classified as cash flows from investing activities.

Dividends paid are classified as financing cash flows. Dividends received by Hayleys PLC, which is an investment company, are classified as operating cash flows and are not disclosed separately in the Company Cash Flow Statement.

4.4 Segment Reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. All operating segments' operating results are reviewed regularly by the Chairman and the Board to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

Segment results that are reported to the Chairman include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

Segment capital expenditure is the total cost incurred during the period to acquire property, plant and equipment, and intangible assets other than goodwill.

4.5 Changes in Accounting Policies and Disclosures

4.5.1 New and amended standards and interpretations

No significant impact resulted on the Financial Statements of the Group due to changes in Accounting Standards and disclosures during the year.

4.6 Standards Issued but not yet Effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's Financial Statements are disclosed below. The Group intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

4.6.1 SLFRS 17 Insurance Contracts

SLFRS 17 Insurance Contracts SLFRS 17 is a comprehensive new accounting standard for insurance contracts, covering recognition, measurement, presentation, and disclosure. It replaces SLFRS 4 and applies to all types of insurance contracts, including life, non-life, direct insurance, reinsurance as well as certain guarantees and financial instruments with discretionary participation features:

The standard is built around the General Measurement Model, supported by two supplementary approaches:

- Variable Fee Approach (VFA): for contracts with direct participation features

- Premium Allocation Approach (PAA): a simplified model mainly for short-duration contracts

SLFRS 17 is effective for annual reporting periods beginning on or after 1 January 2026, with comparative figures required. Early adoption is allowed if the entity also applies SLFRS 9 Financial Instruments and SLFRS 15 Revenue from Contracts with Customers by the date SLFRS 17 is first applied.

SLFRS 17 does not have a material impact on the Financial Statements.

4.6.2 SLFRS 18 Presentation and Disclosure in Financial Statements

SLFRS 18, which replaces LKAS 1, introduces significant enhancements to the way financial information is organized and communicated. The standard establishes new categories and subtotals in the statement of profit or loss to improve consistency and comparability across entities. It also requires entities to disclose management-defined performance measures (as specified in the standard), together with clear explanations and reconciliations.

In addition, SLFRS 18 introduces strengthened requirements regarding the location, aggregation, and disaggregation of financial information. These changes are designed to ensure that Financial Statements present information more transparently and in a way that enhances users' understanding of an entity's financial performance and position.

SLFRS 18, and consequential amendments to the other accounting standards, are effective for annual reporting periods beginning on or after 1 January 2027. Early application is permitted.

The potential impact of SLFRS 18 on the Financial Statements and the related notes is currently being identified and evaluated.

4.6.3 SLFRS 19 Subsidiaries without public accountability:

Disclosures SLFRS 19 introduces reduced disclosure requirements for subsidiaries that do not have public accountability but continue to apply the full SLFRS recognition and measurement principles.

The purpose of SLFRS 19 is to lessen the financial reporting burden on qualifying subsidiaries by simplifying disclosure requirements, while still ensuring that Financial Statements remain high-quality, consistent, and comparable for users.

SLFRS 19 applies to Specified Business Enterprises, as defined in the Sri Lanka Accounting and Auditing Standards Act No. 15 of 1995. Subsidiaries that fall within this category and do not have public accountability are eligible to apply SLFRS 19.

The Standard becomes effective for annual reporting periods beginning on or after 1 January 2027. Early application is permitted.

The entity is not eligible to apply for SLFRS 19.

4.6.4 Classification and Measurement of Financial Instruments - Amendments to SLFRS 9 and SLFRS 7

The amendments introduce enhancements to the classification, measurement, derecognition, and disclosure requirements for financial instruments. Their objective is to strengthen transparency, promote greater consistency in financial reporting, and respond to emerging market developments - particularly features such as sustainability linked terms and nature dependent electricity contracts.

These amendments are effective for annual reporting periods beginning on or after 1 January 2026. Early application is permitted.

The amendments are not expected to have a material impact on the Financial Statements

4.6.5 Annual improvements to Sri Lanka Accounting Standards

Narrow scope amendments as part of its periodic maintenance of Sri Lanka Accounting Standards will be adopted, if applicable, when they become effective.

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of Financial Statements in conformity with SLFRS/LKAS's requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses.

Judgements and estimates are based on historical experience and other factors, including expectations that are believed to be reasonable under the circumstances. Hence actual experience and results may differ from these judgements and estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised if the revision affects only that period and any future periods.

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the Financial Statements is included in the following notes.

5.1 Going concern

The Directors have made an assessment of the Group's ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. The assessment includes the existing and anticipated effects from the present macro-economic conditions, the circumstances of the external environment, or are inconsistent with historical trends. Management is not aware of any

material uncertainties that may cast significant doubt upon the Group's ability to continue as a going concern and the management do not intend either to liquidate or to cease operations of the Group. Therefore, the Financial Statements continue to be prepared on the going concern basis.

5.2 Measurement of the recoverable amount of cash-generating units containing goodwill

The Group tests annually whether goodwill requires impairment, in accordance with the accounting policy stated in Note 3.13. The basis of determining the recoverable amounts of cash generating units and key assumptions used are given in Note 17 to the Financial Statements.

5.3 Taxation

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits, together with future tax planning strategies.

The Group has Rs. 14.0 bn (2025: Rs. 9.32 bn) of tax losses carried forward. These losses relate to subsidiaries that have a history of losses and may not be used to offset taxable income elsewhere in the Group. The subsidiaries neither have any taxable temporary difference nor any tax planning opportunities available that could partly support the recognition of these losses as deferred tax assets.

On this basis, the Group has determined that it cannot recognise deferred tax assets on tax losses carried forward and described in Note 11 to the Financial Statements.

Notes to the Financial Statements

5.4 Measurement of the employee benefit obligations

The present value of the employee benefit obligations is determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases.

Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate, management considers the interest rates of government bonds, and extrapolated as needed along the yield curve to correspond with the expected term of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables. Those mortality tables tend to change only at intervals in response to demographic changes. Future salary increases are based on expected future inflation rates. Further details about employee benefit obligation are provided in Note 28 to the Financial Statements.

5.5 Revaluation of property, plant and equipment and investment properties

The Group measures the freehold land (classified as property, plant and equipment) at revalued amounts, with changes in fair value being recognised in OCI. The freehold lands were valued by reference to transactions involving properties of a similar nature, location and condition. In addition, the Group carries its investment properties at

fair value, with changes in fair value being recognised in the profit or loss. For investment properties, valuation methodologies such as market approach, and income approach (the discounted cash flow (DCF) model) for properties lacked comparable market data were used.

The Group engaged valuation specialists to assess fair values as at 31 March 2025 for the freehold lands and investment properties. The key assumptions used to determine the fair value of the properties and sensitivity analyses are provided in Notes 13 and 15 to the Financial Statements.

5.6 Valuation of inventories

The Group has applied judgment in the determination of impairment in relation to inventories that are slow moving or obsolete. The Group's impairment assessment in relation to such inventories take into account factors such as the use of significant judgement over identifying inventories requiring write down to NRV, including consideration of product life cycles, nature of inventories, future inventory demand and quality/ grading assessments, and the existence of significant estimates applied in the determination of NRV, considering expected sales prices and allowance policies based on historical sales.

5.7 Impairment allowance for current and non-current trade and other receivables in the Consumer & Retail segment of the Group

The Group uses a provision matrix to calculate ECLs for loans and trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns (i.e., by geography, product type, customer type and rating, and coverage by letters of credit and other forms of credit insurance).

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions are expected to deteriorate over the next year which can lead to an increased number of defaults in the relevant sectors, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. The information about the ECLs on the Group's loans and trade receivables is disclosed in Note 22 to the Financial Statements.

6. REVENUE

11.4 General Provisions

Corporate Income Taxes of companies resident in Sri Lanka have been computed in accordance with the Inland Revenue Act No. 24 of 2017, as amended. Corporate Taxes of non-resident companies in the Group have been computed in keeping with the domestic statutes in the respective countries of their residence.

Sri Lankan resident companies in the Group, excluding those which enjoy a tax holiday or concessionary tax rates, were liable to income tax during the year of assessment 2025/26 at the rate of 30%.

11.5 Tax Exemptions

On Business Profits

11.5.1 In terms of the Inland Revenue Act

Solar One Ceylon (Pvt) Ltd is entitled for a 10 year income tax holiday. Tax holiday period has commenced during the Y/A 2016/17.

Alumex PLC is entitled for an income tax exemption for a period of 10 years for its undertaking associated with sale of construction materials recycled in a site established in Sri Lanka to recycle materials which were already used in the construction industry. The tax holiday period has commenced during the Y/A 2022/23.

11.5.2 In terms of BOI Agreements

Companies enjoying Tax Holidays under BOI Law are as follows:

Martin Bauer Hayleys (Pvt) Ltd.	10 year tax holiday ending December 31, 2027
Sun Tan Beach Resorts Ltd.	15 year tax holiday ending March 31, 2030

On Investment Income

11.5.3 Dividend Income

Many resident companies in Sri Lanka receiving dividend income enjoy the tax exemption on qualifying quantum of such dividend based on the following exemptions:

- Dividend receipt from non-resident entity, in cases where the Sri Lankan shareholding Company has a substantial participation in such non-resident entity;
- A dividend paid by a resident company which has entered into an agreement with the BOI and which is engaged in specified qualifying businesses such as offshore business and/or entrepot trade;
- A dividend paid by a resident company to a member to the extent that such dividend payment is attributable to, or derived from, another dividend received by that resident company or another resident company.

11.5.4 Interest accrued on foreign currency deposits

Many resident companies in Sri Lanka enjoy an income tax exemption on interest income accruing or deriving from moneys lying to its credit in foreign currency in a foreign currency account opened by such company in any commercial bank or in any specialized bank, with the approval of the Central Bank of Sri Lanka.

Notes to the Financial Statements

11.6 Concessionary Tax Rates

Weighted average number of ordinary shares of the parent (No.)	751,036,500	751,036,500	751,036,500	751,036,500
Basic/diluted earnings/ (loss) per share (Rs.)	18.71	17.91	(1.91)	5.31

12.1.2 Earnings per share from Continuing operations

For the year ended 31st March	CONSOLIDATED	
	2026	2025
Profit attributable to ordinary shareholders (Rs.'000)	15,279,799	14,785,795
Weighted average number of ordinary shares (No)	751,036,500	751,036,500
Basic/ Diluted earnings per share (Rs.)	20.34	19.69

12.1.3 Earnings per share from Discontinued operations

For the year ended 31st March	CONSOLIDATED	
	2026	2025
Loss attributable to ordinary shareholders (Rs.'000)	(1,227,977)	(1,336,666)
Weighted average number of ordinary shares (No)	751,036,500	751,036,500
Basic/ Diluted loss per share (Rs.)	(1.64)	(1.78)

12.1.4 Reconciliation of weighted average number of ordinary shares

On 21st January, 2026 it was resolved to increase the Company's Stated Capital by way of a Rights Issue amounting to Rs 9.0 Bn. Accordingly, the Board approved the issuance of three (3) new Ordinary Voting Shares for every fifty (50) existing ordinary voting shares held by the shareholders in the register of shareholders as at end of the date of entitlement and the share allotment was completed on 27 April 2026, upon which the balance recognized under Pending Share Allotment was transferred to stated capital.

In accordance with LKAS 33 – Earnings Per Share, comparative earnings per share has been adjusted retrospectively to reflect the bonus element inherent in the rights issue. The adjustment factor applied was 1.001382, which was calculated based on the theoretical ex-rights price derived from the market value of the shares immediately prior to the rights issue.

As the allotment of shares occurred after the reporting date, the rights shares issued have not been included in the weighted average number of shares for the year ended 31 March 2026, except for the retrospective adjustment reflecting the bonus element in accordance with LKAS 33 – Earnings Per Share.

For the year ended 31st March	CONSOLIDATED		COMPANY	
	2026	2025	2026	2025
Weighted average number of ordinary shares of the parent at beginning of the year (No.)	750,000,000	750,000,000	750,000,000	750,000,000
Retrospective adjustment for the bonus element	1,036,500	1,036,500	1,036,500	1,036,500
Weighted average number of ordinary shares of the parent (No.)	751,036,500	751,036,500	751,036,500	751,036,500

12.2 Dividends

For the year ended 31st March	COMPANY	
	2026	2025
Interim dividend (Rs'000)	4,500,000	4,500,000
Dividend per ordinary share (Rs.)	6.00	6.00

- 13.7** Lands owned by the Group (disclosed under property, plant and equipment and investment property) were revalued as at 31st March 2025 by independent Chartered Valuation Surveyors, Mr. P.B. Kalugalgedara, Mr. S. Sivaskantha and KPMG Real Estate & Valuation Services (Private) Limited. The fair value of the land was determined based on transaction observed in the market, appropriately adjusted for differences in the nature, location or condition of the specific property.
- 13.8** Lands owned by the Group other than that mentioned above have been stated at cost as the appreciation in value is insignificant. Further information is provided on page 498 to 501.
- 13.9** There has been an impairment of property, plant & equipment amounting to Rs. 1,658.71 mn (2025 - Rs. 9.18 mn). Details are as follows.

As at 31st March	2026 Rs.'000	2025 Rs.'000
Buildings	929,845	-
Machinery & Stores Equipments	472,594	9,180
Furniture, Fittings and Office Equipments	238,508	-
Marine Transport Equipment	17,760	-
Total impairment	1,658,707	9,180

The impairment losses amounting to Rs. 1,658 mn on buildings, machinery and store equipment, furniture, fittings and office equipment, and Marine Transport Equipment were recognised in Luxury Resort (Pvt) Ltd in order to write down the carrying amounts of such assets to their fair value less costs to sell, consequent to the classification of the disposal group as held for sale.

- 13.10** Property, plant & equipment with a carrying value of Rs. 22,217 mn (2025 - Rs. 23,730 mn) and Rs. Nil (2025 - Nil) for the Group and Company respectively have been pledged as security for term loans obtained. The details are shown in Note 25 to the Financial Statements.
- 13.11** The carrying value of revalued lands given above, had the said lands been included at cost, would amount to Rs. 8.53 mn (2025 -Rs. 8.85 mn) for the Group and Rs Nil (2025 - Nil) to the Company.
- 13.12** The cost of fully depreciated property plant and equipment which are still in use at the reporting date is as follows.

As at 31st March	CONSOLIDATED		COMPANY	
	2026 Rs'000	2025 Rs'000	2026 Rs'000	2025 Rs'000
Buildings	2,492,025	2,142,414	223,770	223,770
Machinery & store equipments	23,194,910	20,718,753	79,182	31,710
Furniture, fittings & office equipments	5,356,739	5,794,327	178,833	216,465
Motor vehicles & vessels	3,156,722	2,519,805	45,275	108,285
	34,200,396	31,175,299	527,060	580,230

13.13 Capital Expenditure Commitments

The approximate amounts of capital expenditure approved by the Directors as at 31st March, 2026 were:

- Capital expenditure contracted for which no provision is made in the Financial Statements for the Group - Rs. 4.9 bn (2025 - Rs. 2.2 bn) and for the Company Rs. Nil (2025 - Nil).
- Capital expenditure approved by the Directors but not contracted for the Group Rs. 4.0 bn (2025 - Rs.4.5 bn) and for the Company Rs. Nil (2025 - Nil).

Notes to the Financial Statements

13.14 Unobservable Inputs used in Measuring Fair Value

The table below sets out information about significant unobservable inputs used in measuring fair value of land as of 31 March 2025.

Category	District	Valuation Technique	Significant Unobservable Input	Range of Estimate (Weighted Average) for Unobservable Input Rs'000	Fair Value Measurement Sensitivity to Unobservable Input
Freehold land	Ampara	Open Market basis	Land -Rate per perch	6 to 7	Significant increases / (decreases) in estimated price per perch in isolation would result in a significantly higher / (lower) fair value.
	Matale			27 to 30	
	Puttalam			50 to 4,250	
	Gampaha			75 to 6,500	
	Kurunegala			33 to 5,000	
	Colombo			130 to 22,500	
	Kegalle			100 to 175	
	Kalutara			100 to 4,500	
	Trincomalee			175 to 5,000	
	Galle			1,250 to 7,000	
	Kandy			350 to 6,500	
	Hambantota			2,000 to 4,500	
	Ratnapura			2,750 to 5,000	
	Badulla			3,500 to 3,750

Change in fair value during the year	132,394	112,999	2,200	550
At the end of the year	1,463,410	2,192,662	101,200	99,000

15.1 Rental Income

	2026 Rs'000	2025 Rs'000
For the year ended 31st March		
Rental income derived from investment properties	17,375	62,644
Direct operating expenses generating rental income	(1,337)	(987)
Net profit arising from investment properties	16,038	61,657

15.1.1 The Group as a lessor

The Group has entered into operating leases on its investment property portfolio consisting of certain office and manufacturing buildings. All leases include a clause to enable upward revision of the rental charge on an annual basis according to prevailing market conditions.

Future minimum rentals receivable under non-cancellable operating leases as at 31st March are as follows;

	2026 Rs'000	2025 Rs'000
For the year ended 31st March		
Within one year	17,678	39,120
1 - 2 years	7,862	7,320
2 - 3 years	7,862	7,320
3 - 4 years	7,862	7,320
4 - 5 years	7,862	7,320
more than five years	7,862	7,320

Notes to the Financial Statements

15.1.2 The Company as a lessor

The Company has entered into operating leases on its building rented as office space to other related and non-related companies. All leases include a clause to enable upward revision of the rental charge on an annual basis according to prevailing market conditions.

Rental income recognised by the Company during the year is Rs. 516 mn (2025: Rs. 504 mn).

Future minimum rentals receivable under non-cancellable operating leases as at 31st March are as follows;

For the year ended 31st March	2026 Rs.'000	2025 Rs.'000
Within one year	777,332	712,550
After one year but not more than five years	3,109,329	3,109,328

15.2 Investment properties are stated at fair value and fair values of those investment properties given below as at 31st March, 2026 had been carried out based on transactions observed in the market.

The details of fair value of investment properties of the Group as follows:

Company	Location	Building area (Sq Ft)	Land in acres	Value of building Rs '000	Value of land Rs '000	Total Rs'000 2026
Eastern Hotels (Pvt) Ltd	Nilakarai Estate, Nilaweli, Trincomalee	600	23.47	1,380	976,380	977,760
Singer (Sri Lanka) PLC	People's Park shopping Complex, Bodgiraja Mw, Colombo 11	872	-	30,400	-	30,400

Freehold land	Gampaha	Open market basis (Land Rate per perch)	800 to 1500	800 to 1500
	Kalutara		2000 to 3000	2000 to 3000
	Trincomalee		200 to 300	200 to 300

15.3 The Group has no restriction on the realisability of its investment properties and has no contractual obligations to purchase, construct or develop its investment properties or for maintenance and enhancement.

16. BIOLOGICAL ASSETS

As at 31st March	CONSOLIDATED	
	2026	2025
	Rs.'000	Rs.'000
At the beginning of the year	1,651,025	1,506,271
Increase due to development	17,840	33,103
Change in fair value of biological assets	110,291	142,455
Decrease due to harvest	(44,548)	(55,555)
Disposals	(5,150)	-
Transfer to immature/ mature plantation	(32,932)	24,751
At the end of the year	1,696,526	1,651,025

Managed trees include commercial timber plantations cultivated on estates. The cost of immature trees is treated as approximate fair value particularly on the ground of little biological transformation has taken place and impact of the biological transformation on price is not material. When such Plantations become mature, the additional investments made to bring them to maturity are transferred from Immature to Mature.

The fair value of the managed trees across all three plantations, Talawakele Tea Estates PLC, Kelani Velly Plantations PLC, and Horana Plantations PLC, was determined in accordance with LKAS 41, Agriculture, using the fair value less costs to sell method.

The fair value of matured managed trees was determined in accordance with SLFRS 13. Valuations for the three plantations, Talawakele Tea Estates PLC, Kelani Velly Plantations PLC and Horana Plantations PLC, were conducted by Messrs KPMG Real Estate & Valuation Services (Pvt) Ltd, FRT Valuation Services (Pvt) Ltd, and Chartered Valuer Mr. A.A.M. Fathihu, Proprietor of FM Valuers respectively, using the Discounted Cash Flow (DCF) method. In ascertaining the fair value of timber, a physical verification was carried out covering all the estates.

Notes to the Financial Statements

16.1 Information About Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

Talawakelle Tea Estates PLC

Non Financial Asset	Valuation technique	Unobservable inputs	Range of unobservable inputs (Probability weighted average.)		Relationship of Unobservable Inputs to Fair Value
			2026	2025	
Consumable managed biological assets	Discounted cash flows	Discounting Rate	13.0%	13.0%	The higher the discount rate, the lesser the fair value
		Optimum rotation (Maturity)	15-25 Years	15-25 Years	Lower the rotation period, the higher the fair value
		Volume at rotation	25 – 190 cu. Ft	25 – 190 cu. Ft	The higher the volume, the higher the fair value
		Price per cu.ft.	Rs. 166/- to Rs. 2,009/-	Rs. 60/- to Rs. 2,300/-	The higher the price per cu. ft., the higher the fair value

Other key assumptions used in valuation

- 1 The harvesting is approved by the PMMD and the Forest Department based on the Forestry Development Plan.
- 2 The prices adopted are net of expenditure.
- 3 Though the replanting is a condition precedent for harvesting yet the costs are not taken in to consideration.

The valuations, as presented in the external valuation models based on net present values, take into account the long term exploitation of the timber plantations. The Board of Directors retains their view that commodity markets are inherently volatile and that long term price projections are highly unpredictable.

Nevertheless, the Directors recognize that estimates are inherently subject to uncertainty and cannot be completely accurate. Moreover, in the case of the Group's biological assets, small differences in valuation assumptions can have quite disproportionate effect on results. Therefore, the Board of Directors is of the opinion that the sensitivity analysis regarding selling price and discount rate variations as included in this note allows every investor to reasonably challenge the financial impact of the assumptions used in the SLFRS 13 / LKAS 41 valuations as included in the consolidated accounts against his own assumptions.

The carrying amount of biological assets pledged as securities for liabilities as at the date of the statement of Financial Position is Rs. nil. (2025 - Rs. nil).

Kelani Valley Plantations PLC

Non Financial Asset	Valuation technique	Unobservable inputs	Range of unobservable inputs (Probability weighted average.)		Relationship of Unobservable Inputs to Fair Value
			2026	2025	
Consumable managed biological assets	Market Approach	Discounting Rate	13.5%	13.5%	The higher the discount rate, the lesser the fair value
		Optimum rotation (Maturity)	20-25 Years	20-25 Years	Lower the rotation period, the higher the fair value
		Volume at rotation	23 - 174 cu.ft	23-530 cu.ft	The higher the price per cu. dcm., the higher the fair value
		Price per cu.ft.	Rs. 166/- to Rs. 2,834/-	Rs. 67/- to Rs. 4,020/-	The higher the price per cu. ft., the higher the fair value

Other key assumptions used in valuation

1. It is assumed that the felling of trees will be undertaken at maturity for the period not covered under the Forestry Management Plan. Majority of the timber trees which have reached their maturity at the date of valuation are valued using the adjusted market price based on the location and accessibility. Remaining timber trees which have not come up to a harvestable age are valued considering their future incremental growth in the coming years and discounting the future value of such trees by appropriate present value discount ratio, which is assumed as the Expected Rate of Return (ERR) of a rationale investor, i.e. 13.5%.
2. The price adopted could vary based on the species and the girth of the respective species and are on the spare net of expenditure.
3. Though the replanting is a condition precedent for harvesting, yet the cost are not taken in to consideration.

The valuations, as presented in the external valuation models based on market values, take into account the possible market conditions and long-term exploitation of the timber plantations. Because of the inherent uncertainty associated with the valuation at fair value of the biological assets due to the volatility of the active market prices and other variables, their carrying value may differ from their realisable value. The Board of Directors retains their view that commodity markets are inherently volatile and that active market price projections are highly unpredictable.

Horana Plantations PLC

Non Financial Asset	Valuation technique	Unobservable inputs	Range of unobservable inputs (Probability weighted average.)		Relationship of Unobservable Inputs to Fair Value
			2026	2025	
Consumable managed biological assets	Discounted Cash flows	Discounting Rate	12.5% - 14.5%	13% - 15%	The higher the discount rate, the lesser the fair value
		Optimum rotation (Maturity)	25-35 Years	25-35 Years	Lower the rotation period, the higher the fair value
		Volume at rotation	15-65 cu.mt	15-65 cu.mt	The higher the price per cu. dcm., the higher the fair value
		Price per cu.ft.	Rs.310/- to Rs.1,504/-	Rs. 290/- to Rs. 1,504/-	The higher the price per cu. ft., the higher the fair value

Other key assumptions used in valuation

- 1 The prices adopted are net of expenditure.
- 2 The harvesting is approved by the PMMD and the Forest Department based on the Forestry Development Plan.
- 3 The valuation, as presented in the external valuation model based on the net present value, takes into accounts the long-term exploitation of the timber plantation. Because of the inherent uncertainty associated with the valuation at fair value of the biological assets due to the volatility of the variables, their carrying value may differ from their realization value. The Board of Directors retains their view that commodity markets are inherently volatile and their long-term price projection are highly unpredictable. Hence, the sensitivity analysis regarding the selling price and discount rate variation as included in this note allows every investor to reasonably challenge the financial impact of the assumptions used in the valuation against his own assumptions.
- 4 The biological assets of the Company are mainly cultivated in leased lands. When measuring the fair value of the biological assets it was assumed that these concession can and will be renewed at normal circumstances. Timber content expects to be realized in future and is included in the calculation of the fair value that takes into account the age of the timber plants and not the expiration date of the lease.

Notes to the Financial Statements

16.2 Sensitivity Analysis

Sensitivity variation sales price

Values as appearing in the Statement of Financial Position are very sensitive to price changes with regard to the average sales prices applied. Simulations made for timber show that a rise or decrease by 10% of the estimated future selling price has the following effect on the net present value of biological assets.

Sales Price fluctuation	+10%	-10%
Managed Timber	Rs.'000	Rs.'000

Talawakelle Tea Estates PLC

As at 31 March 2026	57,573	(57,573)
As at 31 March 2025	57,456	(57,456)

Kelani Valley Plantations PLC

As at 31 March 2026	35,909	(35,909)
As at 31 March 2025	31,993	(31,993)

Horana Plantations PLC

As at 31 March 2026	64,919	(64,919)
As at 31 March 2025	60,809	(60,809)

Sensitivity variation discount rate

Values as appearing in the Statement of Financial Position are very sensitive to changes of the discount rate applied. Simulations made for timber show that an increase or decrease by 1% of the discount rate has the following effect on the net present value of biological assets.

As at 31 March Managed Timber Discount rate fluctuation	2026		2025	
	+1% Rs.'000	-1% Rs.'000	+1% Rs.'000	-1% Rs.'000
Talawakelle Tea Estates PLC	(2,772)	2,937	(3,225)	3,479
Kelani Valley Plantations PLC	(2,614)	2,758	(3,404)	3,620
Horana Plantations PLC	(32,228)	36,369	(27,775)	31,366

South Asia Textiles Limited	2,104	2,104	VIU
	14,451	14,451	

17.3.1 CGUs in which the carrying amount of goodwill is “significant” in comparison with the entity’s total carrying amount

As at 31st March	2026		2025	
	Discount Rate	Terminal Growth Rate	Discount Rate	Terminal Growth Rate
Singer (Sri Lanka) PLC	9.9%	5.0%	11.0%	5.0%
Hayleys Leisure Group Companies	13.0%	5.0%	11.0%	5.0%
The Kingsbury PLC	14.0%	5.0%	11.0%	5.0%
Alumex PLC	15.0%	7.0%	11.0%	7.0%
South Asia Textiles Ltd.	9.1%	2.7%	11.0%	5.0%
Hayleys Fentons Limited	14.0%	2.0%	11.0%	2.0%

17.3.3 CGUs in which the carrying amount of goodwill is “not significant” individually in comparison with the entity’s total carrying amount:

	2026	2025
Discount Rate	13%	11%
Terminal growth rate	3%-5%	3%-5%

Projected adjusted EBITDA

Projected adjusted EBITDA has been based on past experience adjusted for the following

- Revenue is expected to continue to grow as increase in market share along with higher margins, and new products and services are introduced.
- Margins are expected to be impacted by negative factors such as the cost of acquiring and retaining customers in increasingly competitive markets and by positive factors such as the efficiencies expected from the implementation of Group initiatives.

Terminal Growth Rate

For the purposes of the Group’s value in use calculations, a long-term growth rate into perpetuity is applied immediately at the end of the five years forecast period and is based on the lower of

- the nominal GDP growth rate forecasts for the country of operations; and
- the long-term compound annual growth rate in adjusted EBITDA as estimated by management

Long-term compound annual growth rate determined by the management may be lower than forecasted nominal GDP growth rates due to market-specific factors; such as competitive intensity levels, maturity of business, regulatory environment or sector-specific inflation expectations. Cashflows beyond the five years period are extrapolated using 0%-3%.

Discount rates

Discount rates represent the current market assessment of the risks specific to each CGU, taking into consideration the time value of money and individual risks of the underlying assets that have not been incorporated in the cash flow estimates. The discount rate calculation is based on the specific circumstances of the Group and its operating segments and is derived from its weighted average cost of capital (WACC). The WACC takes into account both debt and equity. The cost of equity is derived from the expected return on investment by the Group’s investors. The cost of debt is based on the interest-bearing borrowings that the Group is obliged to service. Segment-specific risk is incorporated by applying individual beta factors. The beta factors are evaluated annually based on publicly available market data. Adjustments to the discount rate are made to factor in the specific amount and timing of the future tax cash flows, in order to derive a pre-tax discount rate, the rates used for current financial year are 13%-15%.

17.4 Brand Name/ Trade Mark

17.4.1 The Group has recognised an intangible asset for the Amaya chain of hotels from the acquisition of Hayleys Leisure PLC.

“Amaya” brand name is a well established name in the leisure sector. Management is of the opinion that the brand name will be a key attraction in the future booming leisure sector.

Notes to the Financial Statements

17.4.2 Group has recognised an intangible asset in respect of brand name, trade mark, distribution rights through the acquisition of Singer (Sri Lanka) PLC.

SISIL trademark

The company had acquired the "SISIL" trade mark in December 2000, amounting to Rs. 55 mn. The management is of the opinion that the aforementioned trademark has an indefinite useful life as their associated brand awareness and recognition has existed over 30 years and the company intends to utilise the said trademark for the foreseeable future. There are no legal, regulatory, contractual, competitive, economic or other factors that may limit its useful life and accordingly, the carrying amount of this trademark is determined after testing for impairment annually. Following assumptions are made to test for any impairment as at 31st March 2026:

	2026	2025
Annual sales growth for next five years	15%	15%
Gross margin	29%	18%
Discount rate	10%	8%
Indefinite Growth Rate after Year 2031/32	2%	2%

UNIC trademark

The company had acquired the 'UNIC' Trade mark in 2006 amounting Rs. 38.5 mn. This trade mark is also considered to have an indefinite useful life due to the factors mentioned in the preceding paragraph and accordingly, the carrying amount of this trademark is determined after testing for impairment annually. Following assumptions are made to test for impairment as at 31st March 2026:

	2026	2025
Annual sales growth for next five years	8%	8%
Gross margin	21%	25%
Discount rate	10%	8%
Indefinite Growth Rate after Year 2031/32	2%	2%

SONY distribution rights

The company had acquired the distribution rights of brand 'SONY' in 2014 amounting Rs. 46.4 mn. This assets are now carried at cost subject to annual impairment test and carrying amount as at 31st December 2015 is Rs. 46.4 mn. This distribution right also considered to have an indefinite useful life due to the factors mentioned in the preceding paragraph accordingly, the carrying amount of this trademark is determined after testing for impairment annually. Following assumptions are made to test for impairment as at 31st March 2026.

	2026	2025
Annual sales growth for next five years	5%	5%
Gross margin	16%	20%
Discount rate	10%	8%
Indefinite Growth Rate after Year 2031/32	2%	2%

17.5 Customer List

Group has recognised an intangible asset in respect of customer relationship through the acquisition of Amaya Leisure PLC.

The established customer lists of Amaya Hotels is acknowledged as a key component in generation of revenue through travel agents and tour operators. The management is of the opinion that the Company is capable of retaining the travel agents through business relationship strategies and this would ensure retention and lead to repeat business over the future years and inflow of future economic benefits from them.

18.1.1 Provision for impairment of investment made by the Company

During the year, the Company assessed the recoverable amount of its investment in Luxury Resort (Pvt) Ltd in accordance with LKAS 36 Impairment of Assets. Based on management's assessment and commitment to transfer the head lease and the operating assets of Luxury Resort (Pvt) Ltd, an full impairment loss of Rs. 2.96 bn has been recognized against the carrying value of the investment.

The recoverable amount was determined based on the estimated fair value less costs to dispose, taking into consideration current negotiations, indicative market values and other available information relating to the proposed disposal of the subsidiary. Management expects that the proceeds from the disposal of the investment will be lower than the net asset value of the subsidiary and, accordingly, the carrying amount of the investment has been written down to its estimated recoverable amount.

The impairment loss has been recognized in the Statement of Profit or Loss under "Impairment of investment in subsidiary".

19.1.2 Quoted equity shares - at fair value through Profit or Loss

Harischandra Mills PLC

Hayleys PLC acquired 778,946 shares of Harischandra Mills PLC on 17 October 2025, resulting in a 40.58% shareholding. Subsequently, an additional 1,080 shares were acquired pursuant to the mandatory offer.

Following an assessment of the relevant facts and circumstances, management concluded that Hayleys PLC does not have control or significant influence over Harischandra Mills PLC. Accordingly, the investment has been classified as a non-current financial asset and measured at fair value through profit or loss (FVTPL) as at 31 March 2026. The fair value gain of Rs. 1,365 mn (Note 9) arising from the remeasurement of the investment has been recognized in profit or loss for the year.

Diesel & Motor Engineering PLC

On 7 and 24 April 2025, Hayleys PLC acquired 1,040,291 shares of Diesel and Motor Engineering PLC, increasing its equity interest to 11.27% as part of the Group's business strategy. Subsequently, 165,000 shares were disposed of, reducing the holding to 9.48%.

As at 31 March 2026, management reassessed the investment and concluded that it was no longer intended to be held for long-term strategic purposes. Accordingly, the investment was classified as a non-current financial asset and measured at fair value through profit or loss (FVTPL).

Furthermore, a gain of Rs.306 mn (Note 9) arising from the remeasurement of the investment to fair value was recognized in profit or loss for the year ended 31 March 2026.

19.4 Fair Value Hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: Other techniques for which all inputs that have a significant effect on the recorded fair value are observable, either directly or indirectly.

Level 3: Techniques that use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

As at 31 March 2026, the Group held the following financial instruments carried at fair value in the Statement of Financial Position:

Assets measured at fair value

As at 31st March	Notes	2026 Rs.'000	Level 1 Rs.'000	Level 2 Rs.'000	Level 3 Rs.'000

Freehold land	13	43,734,033	-	-	43,734,033
Investment Properties					
Land and buildings	15	2,192,662	-	-	2,192,662

During the reporting period ended 31 March 2026 and 31 March 2025, there were no transfers between Level 1 and Level 2 fair value measurements.

Fair Values

Set out below is a comparison by class of the carrying amounts and fair values of the Group's financial instruments that are carried in the Financial Statements.

As at 31st March	Notes	CONSOLIDATED		COMPANY	
		Carrying value	Fair value	Carrying value	Fair value
		2026		2026	
		Rs.'000	Rs.'000	Rs.'000	Rs.'000
Financial Assets					
Other non- current financial assets					
Fair value through OCI	19.1	100,073	100,073	42,000	42,000
Fair value through profit or loss	19.1	5,013,178	5,013,178	5,013,178	5,013,178
Amortised cost	19.1	558,063	558,063	-	-
Non- current trade and other receivables	22	30,447,534	30,447,534	107,000	107,000
Other current financial assets					
Financial instruments at fair value through profit or loss	19.2	1,583,555	1,583,555	20,043	20,043
Trade and other receivables	22	204,688,335	204,688,335	9,247,070	9,247,070
Amounts due from subsidiaries	38.4	-	-	6,014,410	6,014,410
Amounts due from equity accounted investees	38.5	203,755	203,755	109,279	109,279
Short term deposits		27,002,950	27,002,950	1,463,637	1,463,637
Cash and cash equivalents		26,947,637	26,947,637	442,662	442,662
		296,545,080	296,545,080	22,459,279	22,459,279

Notes to the Financial Statements

As at 31st March	Notes	CONSOLIDATED		COMPANY	
		Carrying value	Fair value	Carrying value	Fair value
		2026		2026	
		Rs.'000	Rs.'000	Rs.'000	Rs.'000
Financial Liabilities					
Interest-bearing borrowings*	25	136,795,902	136,795,902	34,847,054	34,847,054
Other financial liabilities					
Financial liabilities at amortised cost	19.3	41,178,533	41,178,533	-	-
Trade and other payables	29	85,664,564	85,664,564	921,887	921,887
Amounts due to subsidiaries	38.4	-	-	832,549	832,549
Short-term interest-bearing borrowings	31	152,860,811	152,860,811	14,461,337	14,461,337
		416,499,810	416,499,810	51,062,827	51,062,827

* Include fixed interest loans carried at amortised cost.

The fair value of the financial assets and liabilities is included at the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participant at the measurement date. The following methods and assumptions were used to estimate the fair values:

- The carrying value of available for sale financial instruments at fair value through OCI and financial instruments at fair value through profit or loss at fair value.
- Cash and cash equivalents, short term deposits, trade and other, amounts due to/ from subsidiaries, amounts due from equity accounted investees and trade and other payables approximate their carrying values largely due to the short term maturities of these instruments.
- The Fair value of financial assets at amortised cost and financial liabilities at amortised cost is not significantly different from the value based on amortised cost methodology.

20. OTHER NON CURRENT ASSETS

22.1 Nature of the Lessor's Leasing Activities

The Company acts as a lessor under finance lease arrangements relating to [Motor Vehicles ,Machineries & equipment]. Lease terms generally range from 1 year to 5 years, with lease rentals payable in accordance with contractual payment schedules. The lease receivable represents amounts due from lessees under these agreements.

The Company manages its exposure to credit and residual value risks through credit assessments of lessees, ongoing monitoring of lease receivables and, where applicable, obtaining security deposits or other forms of collateral.

As at 31st March	COMPANY			
	2026 No of Shares	2025 No of Shares	2026 Rs. '000	2025 Rs. '000
Issued & fully paid - ordinary shares				
At the beginning of the year	750,000,000	750,000,000	1,575,000	1,575,000
At the end of the year	750,000,000	750,000,000	1,575,000	1,575,000

The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the Company.

Rights issue proceeds pending allotment

On 21st January 2026, the Board of Directors resolved to increase the Company's stated capital through a rights issue amounting to Rs. 9.0 bn. Although the rights issue was approved during the year, the share allotment was completed subsequent to the reporting date on 27th April 2026. Accordingly, as at 31 March 2026, the rights issue amount of Rs.9.0 bn was presented separately within the equity as Shares Pending Allotment, reflecting the fact that the shares had not yet been formally allotted at the reporting date, despite the capital has been committed.

Interest cost	1,573,162	1,528,711	133,731	163,127
Actuarial loss	499,763	574,599	115,871	170,917
At the end of the year	18,109,484	16,103,974	1,536,812	1,222,508

For the year ended 31st March	CONSOLIDATED		COMPANY	
	2026 Rs.'000	2025 Rs.'000	2026 Rs.'000	2025 Rs.'000
The expense is recognised in the following line items in the Statement of Profit or Loss				
Cost of sales	567,852	506,017	133,731	65,793
Administrative expenses	2,271,968	2,215,944	78,242	163,127
Distribution expenses	14,056	12,208	-	-
	2,853,876	2,734,169	211,973	228,920

An actuarial valuation of the retirement gratuity payable was carried out as at March 31, 2026 by Mr K Arumugam, AIA, of Messrs. Actuarial & Management Consultants (Pvt) Ltd., a firm of professional Actuaries. The valuation method used by the actuaries to value the liability is the "Projected Unit Credit Method (PUC)", the method recommended by the Sri Lanka Accounting Standard - LKAS 19 on "Employee Benefits".

28.1 ACTUARIAL ASSUMPTIONS

The following key assumptions were made in arriving at the above figure.

As at 31st March	Company & Local Subsidiaries		Plantations		Overseas Subsidiaries	
	2026	2025	2026	2025	2026	2025
Rate of discount	10.0%	11.0%	10%	10% - 11%	2% - 7%	3% - 7%
Salary increase	9.0%	10.0%	8% - 9%	9% - 10%	2% - 9%	1% - 9%

Assumptions regarding future mortality are based on the A1967/70 for Staff/ Executive and A1949/52 for Worker, issued by the Institute of Actuaries, London.

The demographic assumptions underlying the valuation are with respect to retirement age early withdrawals from service and retirement on medical grounds.

28.2 The Group's and Company employee benefit obligations would have been Rs. 15,920 mn (2025 - Rs. 14,577 mn) and Rs. 1,251 mn (2025 - Rs. 1,042 mn) respectively, as at the reporting date had the Group calculated its retirement benefit obligation as per the requirements of the Payments of Gratuity Act no 12 of 1983, applying the basis of computation given in page 386 to the Financial Statements.

Notes to the Financial Statements

28.3 Sensitivity Analysis - Salary Escalation Rate/ Discount Rate

Notes to the Financial Statements

32 CONTINGENT LIABILITIES AND COMMITMENTS

32.1 Contingent Liabilities

Company

The Company has received income tax assessments from the Department of Inland Revenue relating to the financial years 2018/19, 2019/20 and 2020/21 amounting to Rs. 257.5 mn, Rs. 629 mn and Rs. 9.6 mn respectively, inclusive of interest and penalties. The Company has lodged appeals against these assessments and is currently contesting the matters under the applicable appellate procedures. Based on the available information and expert advice received, the Board of Directors is of the opinion that no provision is required in the Financial Statements as it is not probable that an outflow of economic resources will be required to settle the obligations.

Group

Dipped Products PLC

- The contingent liabilities as at March 31, 2026 amounting to Rs. 128.06 mn (2025- Rs. 128.06 mn). This include Letter of Credit outstanding of Rs. 557.05 mn (2025- Rs. 112.60 mn), bank guarantees provided on behalf of the companies within the group of Rs. 57.19 mn (2024 - Rs. 15.46 mn).

Haycarb PLC

- Contingent liabilities as at 31st March 2025 on guarantees given by Haycarb Group to third parties amounted to Rs. 7.8 bn (2024/25 - Rs. 8.0) of this sum, Rs. 5.9 bn (2024/25 - Rs. 6.4 bn) relates to facilities obtained by subsidiaries.

Singer (Sri Lanka) PLC

- Commissioner General of Inland Revenue has issued assessment notices on Singer (Sri Lanka) PLC pertaining to an additional VAT Liability/ Payment on account of Deemed VAT for seven quarters during the period 1st January 2014 to 30th September 2015. The assessments were for a Deemed VAT payment of Rs. 1,076 mn and penalty of Rs. 423 Mn, totalling to Rs. 1,499 Mn. The assessments were appealed against and in due course the Commissioner General of Inland Revenue issued the determination on the appeal. In terms of the same, Rs. 791 mn of Deemed VAT liability and penalty of Rs. 395 mn totalling to Rs.1,186 mn was held to be the Deemed VAT liability for the seven quarters for the period from 1st January 2014 to 30th September 2015. The Company after carefully reviewing the situation and based on the advice of tax consultants, was of the opinion that there is no basis for the Company to be made liable for Deemed VAT. Accordingly the Company decided to appeal to the Tax Appeals Commission against the determination. Further, the Company had previously provided bank guarantees amounting to Rs. 297 mn to the Commissioner General of Inland Revenue - Tax Appeals Commission.

The Tax Appeals Commission hearings were concluded on 28th February 2023, and the determinations were consequently issued on the 17th of May 2023 and 23rd May 2023 for all seven quarters for the period from 1st January 2014 to 30th September 2015 – Though the Company was not informed of such determinations for a period of approximately one month from such dates. The Tax Appeals Commission in determining the case has confirmed the purported determinations made by the Commissioner General of Inland Revenue for all seven quarters. Accordingly at the time of receiving the said determinations on the 20th of June 2023, the company deposited 10% of the pending assessed value amounting to Rs. 108 mn in lieu of renewing the bank guarantees which were previously given. The Rs. 108 mn. has by now been transferred by the Tax Appeals Commission to the Department of Inland revenue.

The Company after carefully reviewing the situation and based on the advice of tax consultants, is of the opinion that there is no basis for the Company to be made liable for Deemed VAT. Accordingly, the Company has decided to seek the judicial review in the Appellate Court against the determination issued by the Tax Appeals Commission by making an application for a case stated, which was submitted to the Court of Appeal in August 2023. Hence, no provision has been made in the Financial Statements until the matter has been determined by the Court.

- Singer (Sri Lanka) PLC has provided bank guarantees amounting to Rs.807 mn to Director General of Customs to clear imports during the years 2008 to March 2026. The bank guarantee related to alleged additional duty payable on imports, claimed by the customs and is being contested by the Company in courts. The Court of Appeal ordered that the Director General of Customs continue with the investigations. The Company being aggrieved by the decision has filed an appeal, which is pending before the Supreme Court. The Company lawyers are of the opinion that there is no basis that the Company is liable for the additional duty. Based on assessment the probability is higher that the Company would not be required to settle the liability. Hence, no provision is made in the Financial Statements.
- Inland Revenue Department has issued assessment notices on Singer (Sri Lanka) PLC pertaining to VAT for 17 quarters from 1st Quarter 2017 to 1st Quarter 2022. The assessment is for a VAT payment of Rs. 662.44Mn and penalties thereon amounting to Rs. 847.46Mn. The reason for these assessments is due to a mismatch between the tax invoice numbers/values associated with third-party input VAT claims (as reported in Customer VAT Schedule 02) and those recorded and declared by the company in VAT Schedule 01 of Singer (Sri Lanka) PLC.

The Company after carefully reviewing the situation and based on the advice of tax consultants, is of the opinion that there is no basis for the Company to be made liable for VAT. Accordingly, the Company has decided to appeal against the assessments issued by the Senior Deputy Commissioner of the Inland Revenue Department.

- Inland Revenue Department has raised assessment notices on Singer (Sri Lanka) PLC pertaining to an additional Income Tax Liability for the Years of Assessment 2017/2018, 2018/2019, 2019/2020 and 2020/2021. These assessments were for income tax payments of Rs. 596 mn and interest and penalty of Rs. 575 mn and Rs. 205 mn respectively, totalling to Rs. 1,376 mn. The reason for these assessments is due to mismatches between the tax invoice numbers/values associated with third-party input VAT claims (as reported in Customer VAT Schedule 02) and those recorded and declared by the company in VAT Schedule 01 of Singer (Sri Lanka) PLC. Thus, the Inland Revenue Department arguing that there is an undeclared revenue, thereby resulting in an understatement of the taxable profit.

The Company after carefully reviewing the situation and based on the advice of tax consultants, is of the opinion that there is no basis for the Company to be made liable for Income Tax. Accordingly, the Company has decided to appeal against the assessments issued by the Senior Deputy Commissioner of the Inland Revenue Department.

- The Commissioner General of Inland Revenue has issued an assessment notice to Singer Finance (Lanka) PLC regarding an additional surcharge tax liability for the taxable period from 1st April 2020 to 31st March 2021. The assessment includes a surcharge tax of Rs. 333.5 mn and interest of Rs. 49.7 mn, totaling to Rs. 383.2 mn.

Following a comprehensive review of the relevant facts and applicable tax legislation, management concluded that there were reasonable grounds to challenge the assessment. Accordingly, the Company submitted a request for an administrative review on 31 December 2024. Subsequent to this review, the Department of Inland Revenue issued its Determination on 19 January 2026. As per the Determination, the surcharge tax was revised to Rs. 300.2 mn, with interest of Rs. 166.2 mn and a penalty of Rs. 49.4 mn, prior to adjusting for payments already made. The Company had previously settled Rs. 53 mn in 2022 and Rs. 100.3 mn in September 2024. After accounting for these payments, the outstanding amounts were a surcharge tax of Rs. 247.2 mn, interest of Rs. 65.9 mn, and a penalty of Rs. 49.4 mn.

Upon careful consideration of the Determination and based on professional advice obtained from tax consultants, management determined that there are sufficient grounds to further contest the position taken by the Department of Inland Revenue. Accordingly, an appeal was filed with the Tax Appeals Commission on 11 February 2026.

Notes to the Financial Statements

32.2 Commitments

In terms of the operating lease agreements entered in to, minimum future lease payments payable by the Group is as follows;

As at 31st March	CONSOLIDATED		COMPANY	
	2026 Rs.'000	2025 Rs.'000	2026 Rs.'000	2025 Rs.'000
Repayable within one year	2,983,128	2,040,872	112,162	-
Repayable after one year less than 5 years	6,623,022	6,894,962	763,587	-
Repayable after 5 years	6,287,879	5,055,288	2,371,636	-
	15,894,029	13,991,122	3,247,385	-

Notes to the Financial Statements

35 EVENTS OCCURRING AFTER THE REPORTING DATE

Other than what is mentioned below, there are no other circumstances have arisen since the reporting date, which would require adjustments to, or disclosure in the Financial Statements.

Rights Issue and Subsequent Allotment

On 21st January 2026 it was resolved to increase the Company's Stated Capital by way of a Rights Issue amounting to Rs 9.0 bn. Accordingly, the Board approved the issuance of three (3) new Ordinary Voting Shares for every fifty (50) existing ordinary voting shares held by the shareholders in the register of shareholders as at end of the date of entitlement at a price of Rs. 200 per share.

As at 31 March 2026, subscription monies amounting to Rs. 9.0 bn relating to the rights issue has been recognized by the Company, of which Rs. 8.99 bn was recognized as receivables from shares pending allotment and Rs. 0.01 bn as cash at bank. The corresponding amount was recognized within equity under shares pending allotment.

The share allotment was completed on 27th April 2026, upon which the balance recognized under shares pending allotment was transferred to stated capital.

Singer (Sri Lanka) PLC

Singer (Sri Lanka) PLC executed a Sale and purchase agreement with ACME Printing and Packaging PLC on 28th April 2026 to purchase the premises bearing Assessment No. 345, Gonamadiththa Road, Piliyandala at a price of Rs. 630 Mn for the purpose of expanding the local manufacturing business of the Company.

36 COMPANIES WITH DIFFERENT ACCOUNTING YEARS

The Financial Statements of Haylex BV Group have been prepared for the year ended 31 December 2025, whilst the Financial Statements of ICOGUANTI S.p.A., DPL France SAS and ROZENBAL POLSKA Sp. z o.o. have been prepared for the year ended 28 February 2026 in accordance with their respective statutory reporting requirements.

For the purpose of consolidation, management-prepared financial information of these subsidiaries has been used up to their respective reporting dates. The Board of Directors is of the view that the impact arising from the difference in reporting dates is not material to the Group Financial Statements and accordingly no adjustments have been made for the intervening period.

37 DISCONTINUED OPERATIONS AND ASSETS HELD FOR SALE

As at the reporting date, the Group was committed to transfer the head lease and the operating assets of Luxury Resort (Pvt) Ltd, a wholly owned subsidiary of Hayleys PLC, by entering into a binding offer (Contract) by way of a Letter of Intent dated 03rd February 2026 and an addendum to the binding offer dated 11th April 2026 and an Asset Purchase Agreement signed on 16th May 2026, which comprises the transfer of property, plant & equipment, leasehold rights, intangible assets, and inventories relating to its hotel operations in the Maldives.

Accordingly, the respective assets and corresponding liabilities directly associated with Luxury Resort (Pvt) Ltd have been classified as held for sale, resulting in the operation of the subsidiary being presented as a discontinued operation in the Consolidated Financial Statements in accordance with SLFRS 5 – Non-current Assets Held for Sale and Discontinued Operations.

The loss after tax of the discontinued operation has been presented separately in the Consolidated Statement of Profit or Loss and Other Comprehensive Income. Comparative information in the Consolidated Statement of Profit or Loss and Other Comprehensive Income has also been restated to present the operation as a discontinued operation in accordance with SLFRS 5 – Non-current Assets Held for Sale and Discontinued Operations.

37.1 Loss After Tax for the Period from Discontinued Operations

For the period ended 31st March	CONSOLIDATED	
	31.03.2026 Rs.'000	31.03.2025 Rs.'000
Revenue	1,681,031	1,642,997

Non current lease liability	608,730
Current Lease liability	536
Liabilities directly associated with assets classified as held for sale	609,266

Notes to the Financial Statements

37.3 Losses on impairment of subsidiaries and amounts due from subsidiaries recognized in Hayleys PLC

As a result of the committed transfer of head lease and the operating assets of Luxury Resort (Pvt) Ltd, a wholly owned subsidiary of Hayleys PLC, management has assessed that there is uncertainty over the recoverability of its investment and related receivables as at 31 March 2026. Accordingly, Hayleys PLC has recognised an impairment loss of Rs. 6.88 bn in the Statement of Profit or Loss, which includes impairment of investments in Luxury Resort (Pvt) Ltd amounting to Rs. 2.96 bn and impairment of balances receivable from Luxury Resort (Pvt) Ltd amounting to Rs. 3.92 bn.

38 RELATED PARTY TRANSACTIONS

38.1 Parent and Ultimate Controlling Party

Company does not have an identifiable parent of its own.

38.2 Transactions with Key Management Personnel

38.2.1 Loans to Directors

No loans have been given to the Directors of the Company.

38.2.2 Key Management Personnel Compensation

Key management personnel comprise the Directors of Hayleys PLC and its subsidiary companies the company and details of compensation are given in Note 10 to the Financial Statements.

	CONSOLIDATED		COMPANY	
	2026 Rs.'000	2025 Rs.'000	2026 Rs.'000	2025 Rs.'000

Notes to the Financial Statements

38.6 Non-recurrent related party transactions

There were no non-recurrent related party transactions which in aggregate value exceeds 10% of the equity or 5% of the total assets, whichever is lower of the Group as per the audited Financial Statements ending 31 March 2025, which require additional disclosures in the 2025/26 annual report under the Colombo Stock Exchange Listing Rule 9.14.8 and Code of Best Practice on Related Party Transactions under the Securities and Exchange Commission directive issued under section 13 (c) of the securities and exchange commission act.

38.7 Recurrent related party transactions

There were no recurrent related party transactions which in aggregate value exceeds 10% of the consolidated revenue of the Group as per the audited Financial Statements ending 31 March 2025, which require additional disclosures in the 2025/26 annual report under the Colombo Stock Exchange Listing Rule 9.14.8 and Code of Best Practice on Related Party Transactions under the Securities and Exchange Commission directive issued under section 13 (c) of the securities and exchange commission act.

38.8 Details of guarantees given in respect of related parties are given in Note 32 to the Financial Statements.

38.10 No provision was made in respect of related party receivables, except the impairment losses disclosed in note 8.

38.11 No security has been obtained for related party receivables and all related party dues are payable on demand.

38.12 Interest on related party dues are decided based on the Average weighted prime lending rate (AWPLR), associated risk and purpose for which funds are used.

38.13 There are no related parties or related party transactions other than those disclosed in Note 38 to the Financial Statements.

39. PRINCIPAL SUBSIDIARIES WITH MATERIAL NON-CONTROLLING INTERESTS

40. SEGMENT ANALYSIS

The segment information is based on two segmental formats. The business segment is considered as the primary format and based on the management structure of the Group. The management are of the view that the Chairman is considered the Chief Operating decision maker and resources are allocated and performance assessed based on the sectors, Therefore each sector which falls under the purview of a different GMC member is considered a separate segment.

41 FINANCIAL RISK MANAGEMENT

The Group has exposure to the following risk from financial instruments:

- 1 Credit risk
- 2 Liquidity risk
- 3 Market risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included throughout these Consolidated Financial Statements.

Financial Risk Management Framework

The Board of Directors has the overall responsibility for the establishment and oversight of the Group's financial risk management framework which includes developing and monitoring the Group's Financial risk management policies.

The Group's Financial risk management policies are established to identify, quantify and analyse the financial risks faced by the Group, to set appropriate risk limits and controls, and to monitor Financial risks and adherence to limits. Financial Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. All derivative activities for risk management purposes are carried out by Group Treasury that have the appropriate skills and experience.

The Group Audit Committee oversees how management monitors compliance with the Group's financial risk management policies and procedures, and reviews the adequacy of the financial risk management framework in relation to the risks faced by the Group. The Group Audit Committee is assisted in its oversight role by the Management Audit System Review Department(MASRD). MASRD undertakes both regular and ad hoc reviews of Financial risk management policies and procedures, the results of which are reported to the Group Audit Committee.

Credit Risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily from trade receivables) and from its financing activities, investments in Government Securities including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

Trade and other receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer.

The Group has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group's standard payment, delivery terms and conditions are offered. The Group's review includes external ratings, when available, and in some cases bank references. Purchase limits are established for each customer, which represents the maximum open amount without requiring approval from the Management; these limits are reviewed quarterly. Customers that fail to meet the Group's benchmark creditworthiness may transact with the Group only on a prepayment basis. Outstanding customer receivables are regularly monitored at the individual sector and Group Management Committee (GMC) level. Further SLECIC cover or other forms of credit insurance is obtained for most exports or in the instance this is not obtained, specific GMC approval is obtained prior to the export.

In monitoring customer credit risk, customers are grouped according to their credit characteristics, including whether they are an individual or legal entity, whether they are a wholesale, retail or end-user customer, geographic location, industry, aging profile, maturity and existence of previous financial difficulties. Trade and other receivables relate mainly to the Group's wholesale customers. Customers that are considered as "high risk" are placed on a restricted customer list and future sales are made on a prepayment basis.

Notes to the Financial Statements

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments. For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The maximum exposure to credit risk for trade and other receivables at the reporting date is Rs. 226.14 bn (2025 - Rs. 158.72 bn) which is recorded at Note 22 to the Financial Statements.

Investments

Credit risk from invested balances with the financial institutions are managed by the Group's treasury department in accordance with the Group's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty depending on its credit rating. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through potential counterparty's failure.

Treasury bills

Singer Finance (Lanka) PLC invests not less than 7.5% of the average of its month end total deposit liabilities and borrowings of the twelve months of the preceding financial year in Sri Lanka Government Treasury Bills and Bonds to comply with the Central Bank of Sri Lanka Direction No. 4 of 2013.

Cash and cash equivalents

The Group held cash in hand and at bank equivalents of Rs. 26.95 bn at 31 March 2026 (2025 -Rs. 24.29 bn) which represents its maximum credit exposure on these assets.

Respective credit ratings of banks which group cash balances held are as follows;

- People's Bank – AA- (Ika)
- Standard Chartered Bank – AAA (Ika)
- Commercial Bank of Ceylon PLC – AA- (Ika)
- Sampath Bank PLC – AA- (Ika)
- Nations Trust Bank PLC – A (Ika)
- HSBC Bank – AAA (Ika)
- Deutsche Bank – A+ (Ika)
- Pan Asia Banking Corporation PLC Bank – BBB (Ika)
- Hatton National Bank PLC – AA- (Ika)
- Bank of Ceylon – AA- (Ika)
- DFCC Bank – A (Ika)
- Citibank – AAA (Ika)
- Seylan Bank PLC – A+ (Ika)
- National Development Bank PLC – A- (Ika)
- Union Bank of Colombo PLC – BBB- (Ika)

Liquidity Risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, and finance leases. The Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. Access to sources of funding is sufficiently available and debt maturing within 12 months can be rolled over with existing lenders.

Group Treasury receives information from other business units regarding the liquidity profile of their financial assets and liabilities and details of other projected cash flows arising from projected future business. The liquidity requirements of business units and subsidiaries are met through central cash management by Group Treasury to cover any short-term fluctuations and longer term funding to address any structural liquidity requirements. The Group Treasury monitors the cash flows in subsidiary and Group level and obtains adequate bank facilities to meet the funding requirements. The Group does not concentrate on a single financial institution, thereby minimising the expose to liquidity risk through diversification of funding sources. The Group aims to fund investment activities of the individual and group level by funding the long term investment with long term financial sources in terms of equity, debenture or long term loans. Short term investments and working capital are funded using short term loans. Group has been successful in arranging long term funding from overseas lenders as a measure to diversify its funding sources which enabled reducing the sole dependency on domestic market for project financing. The Group also issues debentures in domestic market as a measure to reduce its dependency on local banking system for all its financing requirement and thereby freeing available banking lines for future projects.

The monthly liquidity position is monitored by the Group Treasury. All liquidity policies and procedures are subject to review and approval by Board of Directors. Daily reports cover the liquidity position of both the Group and operating subsidiaries.

The table below summarizes the maturity profile of the Group's financial liabilities based on contractual undiscounted payments.

As at 31st March 2026	On demand Rs.'000	Less than 3 Months Rs.'000	3 to 12 Months Rs.'000	1 to 5 years Rs.'000	>5 years Rs.'000	Total Rs.'000

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise four types of risk: interest rate risk, currency risk, commodity price risk and other price risk, such as equity price risk. Financial instruments affected by market risk include loans and borrowings, deposits, financial assets designated at fair value through OCI, financial assets at fair value through profit or loss and derivative financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

The sensitivity analyses in the following sections relate to the position as at 31 March 2026 and 2025.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group mainly borrows in the short term to fund its working capital requirement which are linked to floating interest rates. For other funding needs the Group maintains a proper mix of interest rate based on the basis of the predictability of future cash flows. Group Treasury closely monitors the interest rate fluctuations in the market and advises the sectors of the Group on a regular basis on risk mitigatory strategies. The Group hedges its exposure to interest rate risk by using Interest Rate Swaps as appropriate.

Interest Rate Sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the Group's profit before tax is affected through the impact on floating rate borrowings as follows:

For the year ended 31st March	Increase/ decrease in base point	CONSOLIDATED	COMPANY
		Effect on profit before tax Rs.'000	Effect on profit before tax Rs.'000
2026	+ 200	(4,829,803)	(754,002)
	- 200	4,829,803	754,002
2025	+ 200	(3,490,848)	(602,543)
	- 200	3,490,848	602,543

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group is exposed to currency risk on sales, purchases and borrowings and net investments in foreign subsidiaries that are denominated in a currency other than the respective functional currencies of the Group. These currencies primarily are the Euro, US Dollars (USD), Bangladesh Taka, Chinese Yuan (CNY), Pound Sterling (GBP), Indonesia Rupiah and Thailand Baht.

The Group hedges its exposure to fluctuations on the translation of its foreign operations by holding net borrowings in foreign currencies and by using foreign currency swaps, forwards contracts and hedge accounting. Group Treasury closely monitors the exchange rate fluctuations and advises the sectors on a regular basis on hedging strategies and their timing.

Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in the US dollar and Euro exchange rate, with all other variables held constant. The impact on the Group's profit before tax is due to changes in the fair value of monetary assets and liabilities.

The Group's exposure to foreign currency changes for all other currencies is not material.

For the year ended 31st March		Increase/ decrease in base point	CONSOLIDATED		COMPANY	
			Effect on profit before tax Rs.'000	Effect on Foreign currency translation reserve Rs.'000	Effect on profit before tax Rs.'000	Effect on Foreign currency translation reserve Rs.'000

	Euro	-10%	(245,793)	(469,233)	-	-

Notes to the Financial Statements

Commodity Risk

The Group is affected by the volatility of certain commodities. Its operating activities require the ongoing purchase and manufacturing process. Due to the significantly increased volatility of the price of the underlying, the management has developed and enacted a risk management strategy regarding commodity price risk and its mitigation. The sectors constantly monitor the Raw material price B204 of Charcoal, Rubber, Aluminum and Yarn for downwards trends and invest in bulk purchase when low prices are prevalent. Management may revise the selling price based on the commodity prices whenever possible.

Equity price risk

The Group's listed and unlisted equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Group manages the equity price risk through diversification and by placing limits on individual and total equity instruments. Management of the Group monitors the mix of debt and equity securities in its investment portfolio based on market indices. Material investments within the portfolio are managed on an individual basis and all buy and sell decisions are approved by the GMC. Equity price risk is not material to the Financial Statements.

Capital Management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Capital consists of share capital, reserves, retained earnings and non-controlling interests of the Group. The Board of Directors monitors the return on capital as well as the level of dividends to ordinary shareholders.

The gearing ratio at the reporting date was as follows

As at 31st March	CONSOLIDATED		COMPANY	
	2026 Rs.'000	2025 Rs.'000	2026 Rs.'000	2025 Rs.'000
Interest Bearing borrowing	92,945,548	71,659,099	28,472,360	19,313,834

	289,656,713	204,410,229	49,308,391	35,284,589
Equity	170,500,746	144,092,342	14,118,147	11,135,108
Equity and debts	460,157,459	348,502,571	63,426,538	46,419,697
Gearing ratio	63%	59%	78%	76%

The Regulatory Capital requirements for the Finance Companies are set by the Central Bank of Sri Lanka. The details of the computation of risk weighted assets, capital and the ratios of the Singer Finance PLC are given below:

Capital Adequacy of Singer Finance PLC

Capital adequacy is a measure of financial institutions financial strength and stability. This widely accepted concept tries to specify the limit to which a business can expand in terms of its risk-weighted assets. Finance companies in pursuit of business expansion, could engage themselves in activities that regularly change their risk profile. In light of this, regulatory capital requirements have been established to avoid undue expansion beyond specified limits, keeping a hold on companies' exposure to risk. Capital serves as a comfort to absorb unexpected losses, providing a degree of security to depositors and other key stakeholders.

This Measure has been introduced by the Central Bank of Sri Lanka to protect the interest of the various stakeholders of the Company while ensuring the maintenance of confidence and stability of the financial system.

The capital adequacy ratio is calculated as a percentage on company's capital to its risk weighted assets as specified by the direction No 03 of 2018 with the effect from 1st July 2018. Previously, Capital Adequacy ratio was computed based on the Direction No.02 of 2006 and by the circular issued by the Central Bank of Sri Lanka dated 15th March 2017.

Based on the Direction No. 03 of 2018 the Listed Finance Companies which are having asset base less than 100 bn need to have minimum Core Capital Ratio (Tier-I) of 7% and 11% based on the Total Capital Ratio (Tier-II). This minimum requirement will increase to 8.5% and 12.5% respectively with the effect from 1st July 2022.

The core capital represents the permanent shareholders, equity and reserves created or increase by appropriations of retained earnings or other surpluses and the total capital include, in addition to the core capital, the revaluation reserves, general provisions and other hybrid capital instruments and unsecured subordinated debts.

The risk-weighted Assets have been calculated by multiplying the value of each category of asset using the risk-weight specified by the Central Bank of Sri Lanka.

Details of the computation and the resulting ratios are given below:

Capital Adequacy Ratio

As at 31st March	2026 Rs. '000	2025 Rs. '000
Tier 1 Capital	9,182,966	5,772,256
Tier 2 Capital	12,982,966	6,903,392
Total Risk - Weighted Assets	84,125,869	52,555,337
Tier 1 Capital Ratio	10.92%	10.98%
Total Capital Ratio	15.43%	13.14%

Notes to the Financial Statements

42 COMPARATIVE INFORMATION AND RECLASSIFICATION DUE TO DISCONTINUED OPERATIONS

Comparative Information

Comparative figures have been reclassified, where necessary, to confirm with the presentation adopted in the current year's Financial Statements. These reclassifications have been made to improve comparability and do not affect previously reported total assets, total liabilities, total equity, or profit attributable to equity holders of the parent.

Discontinued Operations

During the current financial year, the Group classified certain operations as discontinued in accordance with SLFRS 5 – Non-current Assets Held for Sale and Discontinued Operations. As a result, the prior year's comparative information has been re-presented to separately disclose the results of discontinued operations from those of continuing operations.

The impact of the reclassification on the comparative information of prior year's Statement of Profit or Loss is summarized below:

For the year ended 31 March 2025	As previously reported	Reclassification	As re-presented
Revenue	492,201,092	(1,642,997)	490,558,095
Cost of sales	(369,711,417)	651,852	(369,059,565)
Direct interest cost	(4,177,595)	-	(4,177,595)
Gross profit	118,312,080	(991,145)	117,320,935
Group dividend	-	-	-
Other income	5,063,926	-	5,063,926
Distribution expenses	(17,925,158)	78,944	(17,846,214)
Administrative expenses	(56,613,478)	1,543,705	(55,069,773)
Other expenses	(1,070,435)	-	(1,070,435)
Results from operating activities	47,766,935	631,504	48,398,439
Finance income	6,962,801	-	6,962,801
Finance cost	(19,106,258)	705,162	(18,401,096)
Net finance cost	(12,143,457)	705,162	(11,438,295)
Change in fair value of investment properties	112,999	-	112,999
Share of profit of equity accounted investees (net of tax)	237,074	-	237,074

Country Report

POPULATION (2025)	21.91 mn (2024)
LAND AREA	65,610 sq. km
LANGUAGES	Sinhalese, Tamil, and English
GDP PER CAPITA (2025)	USD 5,003 (CBSL)

Sri Lanka’s economic recovery continues to show resilience during the financial year from April 2025 to March 2026. The economy recorded GDP growth in 2025, matching the 2024 performance and confirming the continuity of the recovery momentum, following the country’s worst economic crisis since independence. The recovery was broad-based, with agriculture, industry, and services all contributing positively, though at varying rates across the year.

The year was shaped by two defining events: the incumbent government further consolidated its position through its victory at the local government elections held in May 2025

and the devastation caused by Cyclone Ditwah in late November 2025, the worst natural disaster to strike Sri Lanka since the 2004 Indian Ocean Tsunami. These two events framed the policy environment, tested fiscal discipline, and defined the social narrative throughout the period.

The country’s structural challenges, including twin deficits, persistent poverty, labour market rigidities, and the external debt burden, remained in the foreground, even as headline macroeconomic indicators improved markedly. Poverty, which had doubled since the 2019 pandemic, was estimated to affect 22.4% of the population in 2026, underscoring the uneven distribution of recovery gains and the social cost of the austerity measures required under the International Monetary Fund Extended Fund Facility programme.

POLITICAL CLIMATE AND POLICY DIRECTION

The Government’s 2026 national budget, under the theme “Steady and Strong: Committing to Fiscal Discipline for a Resilient Economy,” targeted a primary surplus of 2.5% of GDP, government revenue of 15.4% of GDP, and an overall fiscal deficit of 5.1% of GDP for 2026. Record capital expenditure of LKR 1,380 bn, approximately USD 4.4 bn, representing a 37% increase over 2025 actual spending, was proposed to support infrastructure and reconstruction priorities.

The government continued with revenue based fiscal consolidation. The country achieved a structural milestone in fiscal policy, the revenue to GDP ratio increased from a low of 2022 to an estimated 15.4% in 2026, driven by base broadening, revenue administration reforms, and improved compliance. This improvement in government revenue was critical to creating fiscal space for social protection and development spending while maintaining IMF programme targets. The government’s medium-term fiscal framework targets a primary surplus of 2.3% of GDP.

On the legislative front, the government managed to achieve progress on several reform agendas, including amendments to the Disaster Management Act following the inadequacies revealed by Cyclone Ditwah, advancement of State-Owned Enterprise reform including the Sri Lankan Airlines Debt Restructuring, and continuation of governance transparency measures initiated under the IMF’s Governance Diagnostic

Assessment framework. Anti-corruption and public procurement reforms remained key structural benchmarks under the EFF programme.

ECONOMY

Sri Lanka’s Gross Domestic Product expanded 5.0% in 2025 at constant prices, with quarterly growth rates of 4.8% in Q1, 4.9% in Q2, 5.4% in Q3, and 4.8% in Q4. The nominal GDP reached USD 108 Billion in 2025 while per capita GDP surpassed USD 5,000 limit for the first time in the country’s history. While the nominal GDP also marked significant achievement by surpassing pre-crisis output level in USD, the sustained 5.0% growth for two consecutive years indicates a decisive stabilization of the recovery trajectory.

The labour market continued its dual character observed in prior years. Outward labour migration, particularly among skilled and professional categories, remained elevated. At the same time, a shortage of semi-skilled and unskilled industrial labour persisted, constraining output in manufacturing and construction sectors. In the medium term, reforms to address labour market rigidities and increase workforce flexibility remain a structural priority for sustaining competitiveness and industrial growth.

MONETARY POLICY AND INFLATION

Headline inflation, as measured by the Colombo Consumer Price Index (CCPI), remained well below the Central Bank's 5.0% target throughout the financial year. Following a brief period of deflation in early 2025, which the Central Bank characterized as largely driven by energy price reductions, inflation turned positive by mid-2025 and settled at 2.2% year-on-year in March 2026. Core inflation, which had fallen to 2.4% in November 2025, was expected to pick up gradually as demand conditions continued to improve.

The Central Bank of Sri Lanka continued its easing monetary policy stance, cutting its benchmark policy rate from 8.5% to 7.75% at its May 2025 meeting, marking the first policy easing of the year, as deflationary conditions began to ease and the inflation outlook stabilized. At its March 2026 meeting, the Central Bank of Sri Lanka maintained the Overnight Policy Rate (OPR), the new benchmark policy rate at 7.75%, citing uncertainties arising from the ongoing Middle East conflict and its potential negative impact on domestic energy prices, while noting that economic activity remained resilient and early 2026 indicators pointed to a strong recovery from cyclone-related disruptions.

Private sector credit growth remained strong and broad-based, supported by declining market lending rates and revived demand for vehicle imports. Market interest rates, as measured by the weekly Average Weighted Prime Lending Rate, remained stable in line with the easing monetary policy stance, facilitating investment and household consumption. The Central Bank reaffirmed its readiness to adjust the policy stance if inflation or external sector risks emerged.

EXTERNAL SECTOR AND FOREIGN RESERVES

The external sector delivered one of the most notable positive developments of the fiscal year. Gross official foreign

exchange reserves reached USD 7.0 bn by end-March 2026, driven by robust tourism earnings, increased workers' remittances, multilateral disbursements, and continued net foreign exchange purchases by the Central Bank.

Strong tourist arrivals and resultant high tourism receipts, estimated at approximately USD 3.2 bn, and workers' remittances of approximately USD 8.1 bn in 2025, contributed positively to the current account surplus. Sri Lanka maintained a current account surplus for the third consecutive year, providing a structural buffer against external shocks. The import cover reached over three months of imports by end 2025.

The Sri Lanka Rupee remained broadly stable over the fiscal year, underpinned by the market-determined exchange rate framework established under the Central Bank of Sri Lanka Act No. 16 of 2023. Some depreciation pressures noticed towards late March 2026, associated with the escalation of Middle East geopolitical tensions, which affected global energy prices, trade flows, and tourists' arrivals through middle eastern airports. Nearly half of tourists arriving Sri Lanka used to transit through middle eastern carriers and airports before the crisis. Tourist arrivals to Sri Lanka noticeably disrupted with the escalation of tension in the Middle East since late February 2026. Workers' remittances remained resilient despite the ongoing conflict in the Middle East, sustaining the positive momentum observed in 2025, notwithstanding that more than half of overseas employment is concentrated within the affected region. The Central Bank continued to maintain exchange rate flexibility as a key buffer against external shocks.

The trade deficit widened during the period as import demand recovered on the back of higher economic activity and renewed vehicle imports, though robust services export income from tourism and remittances more than offset the merchandise trade gap.

The government's gradual approach to removing the temporary restriction imposed on import of personal motor vehicles was reflected in rising customs revenue, which contributed positively to fiscal performance.

DEBT RESTRUCTURING AND IMF PROGRAMME

The external debt restructuring process reached near-completion during the fiscal year, marking a critical milestone in Sri Lanka's path back to debt sustainability. Sri Lanka had reached agreement on terms with just under 99% of its external creditors, with over 92% of public external debt restructuring fully implemented. The landmark international sovereign bond exchange, completed in late 2024, established a new creditor relationship and contributed to substantial debt relief.

Through the restructuring, external debt and debt service as a share of GDP is projected to be reduced to sustainable levels. Sri Lanka targets to achieve debt stock target 95% of GDP by 2032, Gross Financing Needs (GFN) target average 3% of GDP, foreign currency denominated debt service target of maximum 4.5% of GDP during 2027-2032. In addition to the completion of bilateral agreements, including with official creditors and commercial partners, another significant achievement was the agreement on debt restructuring of Sri Lankan Airlines.

Sri Lanka's IMF Extended Fund Facility, approved in March 2023 for a total of USD 3 bn over 48 months, continued to serve as the anchor of the reform programme. The IMF Executive Board also approved USD 206 mn under the Rapid Financing Instrument (RFI) to address urgent balance-of-payments and fiscal pressures from Cyclone Ditwah. The Fifth Review under the EFF was deferred, with an IMF mission to visit in early 2026.

Country Report

CYCLONE DITWAH: IMPACT AND RESPONSE

Cyclone Ditwah, which struck Sri Lanka in late November 2025, was considered as the largest and most challenging natural disaster in the country's recorded history. The cyclone's torrential rainfall triggered widespread flooding and landslides across all 25 districts of the country, causing serious damages to human lives, livelihood and physical infrastructure.

The economic cost of Cyclone Ditwah was estimated by the World Bank at approximately USD 4 bn, equivalent to nearly 4% of GDP. Infrastructure damage, including to roads, bridges, and utilities across all districts, was assessed as exceeding in aggregate the damage caused by the 2004 Indian Ocean Tsunami, which had concentrated damage primarily along coastal areas. Agricultural livelihoods, particularly in the paddy and subsistence crop sectors, were severely disrupted.

This disaster exposed gaps in Sri Lanka's disaster preparedness infrastructure, including limitations in air rescue capacity available during the emergency response. Substantial humanitarian and reconstruction assistance was received from bilateral partners and multilateral institutions including the United Nations, the World Bank, and the IMF.

The government's reconstruction strategy focused on spending reprioritization and reallocation within the existing budget framework before committing to a supplementary budget in 2026, maintaining its commitment to IMF programme fiscal targets.

ECONOMIC INTEGRATION

Sri Lanka's integration into the South Asian regional economy continued to progress during the period. South Asia remained the world's fastest-growing region, with projected growth of approximately 6% in 2026 driven primarily by India. Advancing the India-Sri

Lanka Economic Partnership Agreement and regional energy connectivity represented strategic opportunities for Sri Lanka to diversify export markets, attract investment, and reduce external vulnerabilities. Advancing these partnerships was flagged as a medium-term priority by the government's economic development agenda.

ECONOMIC OUTLOOK

The economic outlook for the financial year beginning April 2026 is cautiously positive, supported by strong reform foundations, near-complete debt restructuring, and a stabilised monetary environment, though subject to meaningful downside risks. According to the CBSL Monetary Policy Report in February 2026, economic growth for 2026 is currently projected to be in the range of 4% to 5%, continuing the recovery momentum recorded over the past two years

Backed by strong macroeconomic fundamentals and prudent fiscal management, the economy is better prepared for external shocks. Inflation is projected to converge toward the Central Bank's 5% target by mid-2026 as the crisis in the Middle East has caused broad-based energy prices to escalate. The benchmark interest rate expected to remain stable with possibility of short-term uptick if inflation biased emanated from external shocks persisted.

The continuation of private sector credit expansion, recovering domestic demand, and a supportive external environment if sustained, are expected to underpin growth. The construction and industrial sectors are expected to benefit from reconstruction-related activity through 2026 and into 2027, however may affect if the energy price remains elevated.

The most significant near-term risk is the persistent Middle East geopolitical conflict, which has elevated global energy prices, created depreciation pressures on the Sri Lanka Rupee, and

threatened to disrupt tourist arrivals and income and remittance inflows from the Sri Lankan migrant workers in the region. Domestic energy pricing, managed under the cost-recovery framework and automatic tariff adjustment mechanism mandated under the IMF programme, will need to absorb global energy price increases, potentially adding to inflationary pressure in 2026.

Post-cyclone reconstruction will place sustained demands on fiscal resources and public administration over the medium term. The government's ability to deliver on its welfare commitments, maintain IMF programme compliance, advance the capital expenditure programme, and support cyclone reconstruction simultaneously will represent the central policy management challenge of the period ahead. Macroeconomic stability, continued IMF programme adherence, and sustained progress on structural reform including governance, SOE reform, and the business environment remain the critical determinants of Sri Lanka's long-term recovery and development prospects.

Liquid investments with original maturity periods of three months or less.

Contingent Liability

A possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

Current Ratio

Current assets divided by current liabilities. A measure of liquidity.

Current Service Cost

Is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Deferred Taxation

The tax effect of timing differences deferred to/from other periods, which would only qualify for inclusion on a tax return at a future date.

Dividend Cover

Profit attributable to ordinary shareholders divided by dividend. Measures the number of times dividend is covered by distributable profit.

Dividend Payout

Dividend per share as a percentage of the earnings per share.

Dividend Yield

Dividend per share as a percentage of the market price. A measure of return on investment.

DPS

Dividend per share (DPS) is the sum of declared dividends issued by a company for every ordinary share outstanding. The figure is calculated by dividing the total dividends paid out by a business by the number of outstanding ordinary shares issued.

EBIT

Earnings Before Interest and Tax.

EBITDA

Earnings before interest expense, tax, depreciation and amortisation (includes other operating income). Note that EBITDA includes interest income, fair value gains and losses on investment property and share of results of equity accounted investees, but excludes exchange gains or losses on its foreign currency denominated debt and cash.

Effective Tax Rate

Income tax expense divided by profit before tax.

EPS

Earnings per share (EPS) is calculated as a company's profit divided by the outstanding shares of its common stock.

Equity

The value of an asset after all the liabilities or debts have been paid.

Fair Value

The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Fair Value Through Profit and Loss

A financial asset/liability acquired/incurred principally for the purpose of selling or repurchasing it in the near term.

Financial Asset

Any asset that is cash, an equity instrument of another entity or a contractual right to receive cash or another financial asset from another entity.

Financial Instrument

Any contract that gives rise to a financial asset of one entity and a financial liability or equity to another entity.

Financial Liability

Any liability that is a contractual obligation to deliver cash or another financial asset to another entity.

Gain on Bargain Purchase

The amount of the identifiable assets acquired and liabilities assumed exceeds the aggregate consideration transferred.

Glossary of Financial Terms

Gearing

Proportion of total interest bearing borrowings to capital employed.

Interest Cover

Profit before tax and net finance cost divided by net finance cost. Measure of an entity's debt service ability.

Key Management Personnel (KMP)

KMP are those persons having authority and responsibility for planning directing and controlling the activities of the entity, directly or indirectly, including any Director (whether executive or otherwise) of that entity.

Market Capitalisation

Number of shares in issue multiplied by the market value of a share at the reported date.

Net Assets Per Share

Total equity attributable to equity holders divided by the weighted average number of ordinary shares in issue. A basis of share valuation.

Non-controlling Interest

Equity in subsidiary not attributable, directly or indirectly, to a parent.

Other comprehensive income

An entry that is generally found in the shareholders' equity section of the balance sheet.

Price Earnings Ratio

Market price of a share divided by earnings per share as reported at that date.

Related Parties

A person or entity that is related to the entity that is preparing its Financial Statements.

Return on Capital employed

Profit before tax and net finance cost divided by average capital employed.

Revenue Reserves

Reserves considered as being available for distributions and investments.

Segments

Constituent business units grouped in terms of similarity of operations and location.

SoRP

Statement of Recommended Practice.

Value Addition

The quantum of wealth generated by the activities of the Group measured as the difference between turnover and the cost of materials and services bought in.

Working Capital

Capital required to finance day- to-day operations, computed as the excess of current assets over current liabilities.

Surcharge Tax

Surcharge Tax has been calculated in accordance with the provisions of the Inland Revenue Act No. 24 of 2017, which exceeds Rs. 2.00 bn, for the year of assessment 2020/2021.

Climate-related scenario analysis

A process for identifying and assessing a potential range of outcomes of future climate related events under conditions of uncertainty.

Sustainability-related risks and opportunities (SRRO)

Risks and opportunities that arise from sustainability-related events that could reasonably be expected to affect the entity's financial performance, position and prospects

Climate-related risks and opportunities (CRRO)

Risks and opportunities that arise from climate-related events that could reasonably be expected to affect the entity's financial performance, position and prospects

Scope 1 and Scope 2

The Green House Gas (GHG) Protocol has established a classification of GHG emissions called 'Scope': Scope 1, Scope 2 and Scope 3. The GHG emissions standard published by the International Organisation for Standardisation (ISO), 'ISO 14064', represents these classifications of Scope with the following terms:

1. Direct GHG emissions = Scope 1
2. Indirect Energy GHG emissions = Scope 2

Taskforce on Nature-related Financial Disclosures (TNFD)

It is a global framework that helps organizations identify, assess, manage, and disclose nature-related dependencies, impacts, risks, and opportunities. TNFD is similar in concept to climate-related disclosure frameworks but focuses on biodiversity, ecosystems, water, land use, and other nature-related issues.

SLFRS

Sri Lanka Financial Reporting Standards (SLFRS) refer to the Sri Lanka Accounting Standards corresponding to the International Financial Reporting Standards (IFRS), which provide the framework for financial statements ensuring consistency with global standards.

SLFRS S1

Disclosure of information about all sustainability-related risks and opportunities that could reasonably be expected to affect the Group's cash flows, access to finance or cost of capital over the short, medium or long term.

SLFRS S2

Requires the disclosure of information about climate-related risks and opportunities that could reasonably be expected to affect the Group's cash flows, its access to finance or cost of capital over the short, medium or long term.

Annexures

BASIS OF PREPARATION OF CONSOLIDATED STATEMENT OF ESG PERFORMANCE

General standards of reporting: The Group's ESG disclosures are in line with the requirements of GRI Standards, Integrated Reporting Framework, SLFRS S1 and S2 Disclosures, selected SASB standards, Taskforce on Nature-related Financial Disclosures as well as the CDSB Guidance on Water and Nature related Disclosures.

Materiality: In assessing whether a disclosure is sufficiently material to be included in the Group's Statement of ESG Performance, the management considers its potential on the Group's ability to create value in the short, medium and long-term and the extent of its social and environmental impacts.

Principles of consolidation: Environmental disclosures including energy consumption, emissions, water and waste covers all Group-wide manufacturing sites, plantations, corporate offices and other sites. Social and governance-related disclosures also relate to the Hayleys Group comprising all entities controlled by the Group.

Computation methods

Environmental indicators

Energy: Energy consumption is measured as consumption of electricity, fuel, steam and heat. Key sources of fuel are furnace oil, diesel, LPG and marine gas oil among others. The estimated fuel purchasing resulting from the Group's fuel allowance for selected employee categories is also included in the energy consumption. The fuel consumed through Renewable energy sources include biomass, as well as renewable energy generated through hydro and solar power and consumed by the organisation. Energy consumption is measured through meter readings and invoices.

Water: Water consumption is measured using meter readings and water bills provided by utility providers. Key sources include surface water, municipal lines, ground water, rainwater and purchased

drinking water which is used for manufacturing and industrial processes, cooling and heating processes and cleaning and sanitation among others.

Emissions: Scope 1 comprise direct CO₂, CH₄ and N₂O emissions stemming from sources that are owned or controlled by the Hayleys Group. This includes emissions from stationary combustion, mobile consumption and fugitive emissions and represents the combustion of fuel sources such as furnace oil, diesel, kerosene (among others) as well as fuel consumption in company owned vehicles and through fuel allowances paid by the organisation to employees. Fugitive emissions consists of emissions from refrigerants, fire extinguishers and waste water treatments.

Scope 2 emissions comprise CO₂ emissions from purchased electricity. The emission factors represent the grid emission factors in the respective countries of operations.

Scope 3 emissions: As a minimum standard all sectors within the Group have reported 7 out of the 15 scope 3 emission categories defined by the GHG protocol as relevant. These categories are capital goods, fuel-energy related services, upstream transportation and distribution, downstream transportation and distribution, waste generation employee commuting and business air travel. As detailed on page 182, selected sectors have reported a wider coverage of scope 3 emissions, based on industry requirements and commitments for emission reduction. Given the complexity of the Group, Hayleys is adopting a staggered approach in obtaining full coverage of all 15 categories across the entire Group

Waste: Key types of waste generated include industrial hazardous waste, ETP sludge, mixed waste and solid waste which is recovered or disposed in multiple methods. Non-hazardous waste includes cardboard, polythene, food waste and other types of methods

which are disposed in multiple ways. The weight of waste is measured at the point of generation.

Social indicators

Employees: The total number of employees represents the headcount of all employees at year-end including permanent employees, fixed-term contract employees, casual employees and trainees. The headcount excludes employees who are not eligible for statutory retirement benefits by the organisation (outsourced employees, sub-contractors, interns). Employees are attributed to their geographical regions based on the location of their primary workplace across the Group's functions. Employee data is based on the information obtained from the Group's HR and Sustainability Information Reporting systems.

Workplace injuries: Prevalence of workplace injuries and accidents is measured through internal reporting mechanisms across all operating locations. Injuries are defined primarily as first-aid cases while occupational injuries are those resulting in lost working days.

Training: Training hours that employees have undergone during the reporting period including external, internal and overseas training are reported based on gender and employee category.

Research and Development: Investment in R&D represents the operational and capital expenditures incurred in the process of creating and developing new products or services. Records of revenue generated through new products and services are maintained by each Sector and reported accordingly.

Community engagement: Community engagement programmes are defined as initiatives that aim to minimise, mitigate or compensate for adverse social and/or economic impacts, and/or to identify opportunities or actions to enhance positive impacts of a project on the community. When reporting number of beneficiaries, if the direct number is unavailable beneficiaries are reported based on defined assumptions.

Annexures

Suppliers: An organisation or person that provides a product or service used in the organisation's supply chain which includes (but is not limited to) manufacturers, wholesalers, contractors, manufacturers, distributors, consultants and brokers among others. Supplier size is determined based on the definition of the Ministry of Industries which uses the metrics of number of employees, annual turnover and total investment in defining size. Supplier development entails training on product enhancement, cost reduction, efficiency improvements and health and safety aspects among others.

ESG REPORTING FRAMEWORKS INDEX

We continue to focus on streamlining our reporting, in line with the developments in global reporting frameworks. Our reporting strategy is based on a double materiality lens, and we have adopted the GRI Standards as the primary framework to report on material topics with high impact materiality. Having voluntarily adopted the SLFRS S1 and S2 Standards in 2023/24, we hope to fully align with the requirements of the S1 and S2 Standards in reporting on financially material sustainability topics. Aligned to

this aspiration, we have strengthened disclosures of the Group's primary SRROs under the four pillars of governance, strategy, risk management and metrics & targets. As recommended in SLFRS S1 Standard we have adopted other reporting frameworks such as SASB and CDSB to report on SRROs for which the IFRS Sustainability Disclosure Standards are yet to be released. The composite ESG Reporting Frameworks Index below provides an overview of our SLFRS S1 and S2 disclosures and connectivity to the other reporting frameworks that have been adopted.

		SLFRS S1	SLFRS S2	SASB	Other frameworks	Pages
For all SRROs						
Governance approach	Governance processes, controls and procedures the organisation uses to monitor and manage selected CRROs and SRRO's and management's role	S1.27 (a) (b)	S2.6			144
Risk Management	Processes and related policies the entity uses to identify, assess, prioritise and monitor climate-related risks Extent to which this process is integrated into overall risk management	S1.44 (a), (b), (c)	S2.25(a)(b) S2.25(c)			178
Physical Climate risks- CRRO 1/CRRO 2						
Strategy	CRROs that could reasonably be expected to affect the organisation's prospects Impacts on business model and value chain Impacts on strategy and decision-making Financial effects of the SRROs Resilience		S2.10 (a)(b) (c)(d) S2.13 (a)(b) S2.14 (a)(b) (c) S2.15(a)(b) S2.16(a)(b) (c)(d) S2.17 S2.22 (a)(b)			150 - 169 171
Metrics and targets	Greenhouse gases • Scope 1 • Scope 2 • Scope 3 Approach to measurement Disaggregation between consolidated group and other entities Exposure to CRROs Climate-related targets and performance against targets		S2.29 (a) S2.29 (a) S2.29 (b,c,d) S2.33 S2.34			182 186

Notes

Notice of Meeting

NOTICE IS HEREBY GIVEN THAT THE SEVENTY FIFTH (75TH) ANNUAL GENERAL MEETING OF HAYLEYS PLC will be held on Tuesday, 30th June 2026 at 1.00 p.m. at the Chas P. Hayley Lounge of Hayleys PLC, No. 400, Deans Road, Colombo 10, for the following purposes:

1. To consider and adopt the Annual Report of the Board of Directors and the Statement of Accounts for the year ended 31st March 2026 with the Report of the Auditors thereon.
2. To re-elect as a Director Mrs. S. R. Fernando, who was appointed as an Independent Non-Executive Director by the Board, in terms of Article 27(2) of the Articles of Association of the Company.
3. To re-elect as a Director Mr. K. D. G. Gunaratne, who retires by rotation at the Annual General Meeting in terms of Article 29(1) of the Articles of Association of the Company.
4. To re-elect as a Director Mrs. J. Dharmasena, who retires by rotation at the Annual General Meeting in terms of Article 29(1) of the Articles of Association of the Company.
5. To re-elect as a Director Mr. T. A. B. Speldewinde, who retires by rotation at the Annual General Meeting in terms of Article 29(1) of the Articles of Association of the Company.
6. To re-elect as a Director Mr. P. Y. S. Perera, who retires by rotation at the Annual General Meeting in terms of Article 29(1) of the Articles of Association of the Company.
7. To propose the following resolution for the re-appointment of Mr. A. M. Pandithage in terms of Section 211 of the Companies Act No. 07 of 2007.

Ordinary Resolution

'That Mr. Abeyakumar Mohan Pandithage, who is over the age of seventy years, be and is hereby re-appointed as a Director until the next Annual General Meeting and it is hereby declared that the age limit of seventy years referred to in Section 210 of the Companies Act No. 07 of 2007 shall not apply to him'.

8. To authorise the Directors to determine donations and contributions to charities for the ensuing year.
9. To re-appoint Messrs Ernst & Young, Chartered Accountants as the Auditors of the Company for the year 2026/27 and to authorise the Directors to determine their remuneration.
10. To consider and if thought fit, to pass the following Special Resolution to amend the existing Article 50(1) in the Articles of Association of the Company;

Special Resolution (1)

IT IS HEREBY RESOLVED THAT Article 50 (1) of the Articles of Association of the Company be amended by the inclusion of the following paragraph at the end of Article 50 (1);

The Company may serve any notice or document by electronic mail to an electronic mail account notified by a shareholder in writing or by any other acceptable means to the Company or to the Central Depository System (Pvt) Ltd. Where electronic mail is used, the notice or document shall be deemed to have been received by the shareholder upon the dispatch of same by the Company or by the Central Depository System (Pvt) Ltd, through electronic mail.

By Order of the Board,

HAYLEYS PLC

Amali Munasinghe Peiris

Director

HAYLEYS GROUP SERVICES (PRIVATE) LIMITED

Secretaries

Colombo

02nd June 2026

Notice of Meeting

Notes to shareholders:

1. A Shareholder is entitled to appoint a proxy to attend and vote instead of him/her and a proxy need not be a Shareholder of the Company. A Form of Proxy is enclosed for this purpose. The instrument appointing a proxy must be deposited at the office of the Company Secretaries at No. 400, Deans Road, Colombo 10, Sri Lanka not less than forty-eight (48) hours before the time fixed for the Meeting.
2. The Annual Report of the Company for 2025/26 is available on the corporate website www.hayleys.com/investor-relations and on the Colombo Stock Exchange website - www.cse.lk. If you wish to have a printed copy of the Annual Report, please forward the duly completed 'Request Form - Annexure A' to the office of the Secretaries. A printed copy of the Annual Report will be forwarded within 8 market days from the date of receiving the Request Form.
3. You may contact the undernoted person for any requests and queries.

Signature of Shareholder

Form of Proxy

INSTRUCTIONS:

1. The completed Form of Proxy must be deposited with the Company Secretaries, Hayleys Group Services (Private) Limited, at No. 400, Deans Road, Colombo 10, Sri Lanka not less than forty-eight (48) hours before the start of the meeting. Delayed Proxy Forms shall not be accepted.
2. A Shareholder entitled to attend and vote at the Annual General Meeting of the Company is entitled to appoint a Proxy to attend and vote instead of him/her and the Proxy need not be a Shareholder of the Company.
3. Full name of Shareholder/Proxy holder and their NIC Nos. are mandatory. Your Proxy Form will be rejected if these details are not completed.
4. A Shareholder is not entitled to appoint more than one Proxy to attend on the same occasion.
5. The duly completed Form of Proxy must be dated and signed by the Shareholder.
6. Please indicate with an "X" in the space provided how your proxy is to vote on the resolutions. If no indication is given, the proxy can vote as he/she thinks fit.
7. In the case of a company/corporation the proxy must be executed in the manner prescribed by its Articles of Association or by a duly authorised Director.
8. Where the Form of Proxy is signed under a Power of Attorney (POA) which has not been registered with the Company, the original POA together with a photocopy of same or a copy certified by a Notary Public must be lodged with the Company along with the Form of Proxy.
9. In case of Marginal Trading Accounts (slash accounts), the Form of Proxy should be signed by the respective authorised Fund Manager/Banker with whom the account is maintained.
